1-904. Coordinate with the Director of Central Intelligence to ensure that national foreign intelligence activities are useful to and consistent with United States foreign policy;

1-905. Transmit reporting requirements of the Intelligence Community to the Chiefs of United States Missions abroad; and

1-906. Support Chiefs of Mission in discharging their statutory responsibilities for direction and coordination of mission activities.

1-10. *The Department of the Treasury.* The Secretary of the Treasury shall:

1-1001. Overtly collect foreign financial and monetary information;

1-1002. Participate with the Department of State in the overt collection of general foreign economic information;

1-1003. Produce and disseminate foreign intelligence relating to United States economic policy as required for the execution of the Secretary's responsibilities; and

1-1004. Conduct, through the United States Secret Service, activities to determine the existence and capability of surveillance equipment being used against the President of the United States, the Executive Office of the President, and, as authorized by the Secretary of the Treasury or the President, other Secret Service protectees and United States officials. No information shall be acquired intentionally through such activities except to protect against such surveillance, and those activities shall be conducted pursuant to procedures agreed upon by the Secretary of the Treasury and the Attorney General.

1-11. *The Department of Defense.* The Secretary of Defense shall:

1-1101. Collect national foreign intelligence and be responsive to collection tasking by the NITC;

1-1102. Collect, produce and disseminate foreign military and military-related intelligence information, including scientific, technical, political, geographic and economic information as required for execution of the Secretary's responsibilities;

1-1103. Conduct programs and missions necessary to fulfill national and tactical foreign intelligence requirements;

1-1104. Conduct counterintelligence activities in support of Department of Defense components outside the United States in coordination with the CIA, and within the United States in coordination with the FBI pursuant to procedures agreed upon by the Secretary of Defense and the Attorney General, and produce and disseminate counterintelligence studies and reports;

## THE PRESIDENT

1-1105. Direct, operate, control and provide fiscal management for the National Security Agency and for defense and military intelligence and national reconnaissance entities;

1-1106. Conduct, as the executive agent of the United States Government, signals intelligence and communications security activities, except as otherwise directed by the NSC;

1-1107. Provide for the timely transmission of critical intelligence, as defined by the Director of Central Intelligence, within the United States Government;

1-1108. Review budget data and information on Department of Defense programs within the National Foreign Intelligence Program and review budgets submitted by program managers to the Director of Central Intelligence to ensure the appropriate relationship of the National Foreign Intelligence Program elements to the other elements of the Defense program;

1-1109. Monitor, evaluate and conduct performance audits of Department of Defense intelligence programs;

1-1110. Carry out or contract for research, development and procurement of technical systems and devices relating to authorized intelligence functions;

1-1111. Together with the Director of Central Intelligence, ensure that there is no unnecessary overlap between national foreign intelligence programs and Department of Defense intelligence programs and provide the Director of Central Intelligence all information necessary for this purpose;

1-1112. Protect the security of Department of Defense installations, activities, information and personnel by appropriate means including such investigations of applicants, employees, contractors and other persons with similar associations with the Department of Defense as are necessary; and

1-1113. Conduct such administrative and technical support activities within and outside the United States as are necessary to perform the functions described in sections 1-1101 through 1-1112 above.

1-12. *Intelligence Components Utilized by the Secretary of Defense.* In carrying out the responsibilities assigned in sections 1-1101 through 1-1113, the Secretary of Defense is authorized to utilize the following:

1-1201. *Defense Intelligence Agency*, whose responsibilities shall include:

(a) Production or, through tasking and coordination, provision of military and military-related intelligence for the Secretary of Defense, the Joint Chiefs of Staff, other Defense components, and, as appropriate, non-Defense agencies;

(b) Provision of military intelligence for national foreign intelligence products;

(c) Coordination of all Department of Defense intelligence collection requirements for departmental needs;

(d) Management of the Defense Attache system; and

(e) Provision of foreign intelligence and counterintelligence staff support as directed by the Joint Chiefs of Staff.

1-1202. *National Security Agency (NSA)*, whose responsibilities shall include:

(a) Establishment and operation of an effective unified organization for signals intelligence activities, except for the delegation of operational control over certain operations that are conducted through other elements of the Intelligence Community. No other department or agency may engage in signals intelligence activities except pursuant to a delegation by the Secretary of Defense;

(b) Control of signals intelligence collection and processing activities, including assignment of resources to an appropriate agent for such periods and tasks as required for the direct support of military commanders;

(c) Collection of signals intelligence information for national foreign intelligence purposes in accordance with tasking by the NITC;

## THE PRESIDENT

(d) Processing of signals intelligence data for national foreign intelligence purposes consistent with standards for timeliness established by the Director of Central Intelligence;

(e) Dissemination of signals intelligence information for national foreign intelligence purposes to authorized elements of the Government, including the military services, in accordance with guidance from the NITC;

(f) Collection, processing, and dissemination of signals intelligence information for counterintelligence purposes;

(g) Provision of signals intelligence support for the conduct of military operations in accordance with tasking, priorities and standards of timeliness assigned by the Secretary of Defense. If provision of such support requires use of national collection systems, these systems will be tasked within existing guidance from the Director of Central Intelligence;

(h) Executing the responsibilities of the Secretary of Defense as executive agent for the communications security of the United States Government;

(i) Conduct of research and development to meet needs of the United States for signals intelligence and communications security;

(j) Protection of the security of its installations, activities, information and personnel by appropriate means including such investigations of applicants, employees, contractors and other persons with similar associations with the NSA as are necessary; and

(k) Prescribing, within its field of authorized operations, security regulations covering operating practices, including the transmission, handling and distribution of signals intelligence and communications security material within and among the elements under control of the Director of the NSA, and exercising the necessary supervisory control to ensure compliance with the regulations.

1-1203. *Offices for the collection of specialized intelligence through reconnaissance programs*, whose responsibilities shall include:

(a) Carrying out consolidated reconnaissance programs for specialized intelligence;

(b) Responding to tasking through the NITC; and

(c) Delegating authority to the various departments and agencies for research, development, procurement, and operation of designated means of collection.

1-1204. *The foreign intelligence and counterintelligence elements of the military services*, whose responsibilities shall include:

(a) Collection, production and dissemination of military and military-related foreign intelligence, including information on indications and warnings, foreign capabilities, plans and weapons systems, scientific and technical developments and narcotics production and trafficking. When collection is conducted in response to national foreign intelligence requirements, it will be tasked by the NITC. Collection of national foreign intelligence, not otherwise obtainable, outside the United States shall be coordinated with the CIA, and such collection within the United States shall be coordinated with the FBI;

(b) Conduct of counterintelligence activities outside the United States in coordination with the CIA, and within the United States in coordination with the FBI, and production and dissemination of counterintelligence studies or reports; and

(c) Monitoring of the development, procurement and management of tactical intelligence systems and equipment and conducting related research, development, and test and evaluation activities.

1-1205. *Other offices within the Department of Defense* appropriate for conduct of the intelligence missions and responsibilities assigned to the Secretary of Defense. If such other offices are used for intelligence purposes, the provisions of Sections 2-101 through 2-309 of this Order shall apply to those offices when used for those purposes.

## THE PRESIDENT

1-13. *The Department of Energy.* The Secretary of Energy shall:

1-1301. Participate with the Department of State in overtly collecting political, economic and technical information with respect to foreign energy matters;

1-1302. Produce and disseminate foreign intelligence necessary for the Secretary's responsibilities;

1-1303. Participate in formulating intelligence collection and analysis requirements where the special expert capability of the Department can contribute; and

1-1304. Provide expert technical, analytical and research capability to other agencies within the Intelligence Community.

1-14. *The Federal Bureau of Investigation.* Under the supervision of the Attorney General and pursuant to such regulations as the Attorney General may establish, the Director of the FBI shall:

1-1401. Within the United States conduct counterintelligence and coordinate counterintelligence activities of other agencies within the Intelligence Community. When a counterintelligence activity of the FBI involves military or civilian personnel of the Department of Defense, the FBI shall coordinate with the Department of Defense;

1-1402. Conduct counterintelligence activities outside the United States in coordination with the CIA, subject to the approval of the Director of Central Intelligence;

1-1403. Conduct within the United States, when requested by officials of the Intelligence Community designated by the President, lawful activities undertaken to collect foreign intelligence or support foreign intelligence collection requirements of other agencies within the Intelligence Community;

1-1404. Produce and disseminate foreign intelligence, counterintelligence and counterintelligence studies and reports; and

1-1405. Carry out or contract for research, development and procurement of technical systems and devices relating to the functions authorized above.

1-15. *The Drug Enforcement Administration.* Under the supervision of the Attorney General and pursuant to such regulations as the Attorney General may establish, the Administrator of DEA shall:

1-1501. Collect, produce and disseminate intelligence on the foreign and domestic aspects of narcotics production and trafficking in coordination with other agencies with responsibilities in these areas;

1-1502. Participate with the Department of State in the overt collection of general foreign political, economic and agricultural information relating to narcotics production and trafficking; and

1-1503. Coordinate with the Director of Central Intelligence to ensure that the foreign narcotics intelligence activities of DEA are consistent with other foreign intelligence programs.

## SECTION 2

## RESTRICTIONS ON INTELLIGENCE ACTIVITIES

2-1. *Adherence to Law.*

2-101. *Purpose.* Information about the capabilities, intentions and activities of foreign powers, organizations, or persons and their agents is essential to informed decision-making in the areas of national defense and foreign relations. The measures employed to acquire such information should be responsive to legitimate governmental needs and must be conducted in a manner that preserves and respects established concepts of privacy and civil liberties.

2-102. *Principles of Interpretation.* Sections 2-201 through 2-309 set forth limitations which, in addition to other applicable laws, are intended to achieve

## THE PRESIDENT

the proper balance between protection of individual rights and acquisition of essential information. Those sections do not authorize any activity not authorized by sections 1-101 through 1-1503 and do not provide any exemption from any other law.

2-2. *Restrictions on Certain Collection Techniques.*

2-201. *General Provisions.*

(a) The activities described in Sections 2-202 through 2-208 shall be undertaken only as permitted by this Order and by procedures established by the head of the agency concerned and approved by the Attorney General. Those procedures shall protect constitutional rights and privacy, ensure that information is gathered by the least intrusive means possible, and limit use of such information to lawful governmental purposes.

(b) Activities described in sections 2-202 through 2-205 for which a warrant would be required if undertaken for law enforcement rather than intelligence purposes shall not be undertaken against a United States person without a judicial warrant, unless the President has authorized the type of activity involved and the Attorney General has both approved the particular activity and determined that there is probable cause to believe that the United States person is an agent of a foreign power.

2-202. *Electronic Surveillance.* The CIA may not engage in any electronic surveillance within the United States. No agency within the Intelligence Community shall engage in any electronic surveillance directed against a United States person abroad or designed to intercept a communication sent from, or intended for receipt within, the United States except as permitted by the procedures established pursuant to section 2-201. Training of personnel by agencies in the Intelligence Community in the use of electronic communications equipment, testing by such agencies of such equipment, and the use of measures to determine the existence and capability of electronic surveillance equipment being used unlawfully shall not be prohibited and shall also be governed by such procedures. Such activities shall be limited in scope and duration to those necessary to carry out the training, testing or countermeasures purpose. No information derived from communications intercepted in the course of such training, testing or use of countermeasures may be retained or used for any other purpose.

2-203. *Television Cameras and Other Monitoring.* No agency within the Intelligence Community shall use any electronic or mechanical device surreptitiously and continuously to monitor any person within the United States, or any United States person abroad, except as permitted by the procedures established pursuant to Section 2-201.

2-204. *Physical Searches.* No agency within the Intelligence Community except the FBI may conduct any unconsented physical searches within the United States. All such searches conducted by the FBI, as well as all such searches conducted by any agency within the Intelligence Community outside the United States and directed against United States persons, shall be undertaken only as permitted by procedures established pursuant to Section 2-201.

2-205. *Mail Surveillance.* No agency within the Intelligence Community shall open mail or examine envelopes in United States postal channels, except in accordance with applicable statutes and regulations. No agency within the Intelligence Community shall open mail of a United States person abroad except as permitted by procedures established pursuant to Section 2-201.

2-206. *Physical Surveillance.* The FBI may conduct physical surveillance directed against United States persons or others only in the course of a lawful investigation. Other agencies within the Intelligence Community may not undertake any physical surveillance directed against a United States person unless:

(a) The surveillance is conducted outside the United States and the person being surveilled is reasonably believed to be acting on behalf of a foreign power, engaging in international terrorist activities, or engaging in narcotics production or trafficking;

(b) The surveillance is conducted solely for the purpose of identifying a person who is in contact with someone who is the subject of a foreign intelligence or counterintelligence investigation; or

(c) That person is being surveilled for the purpose of protecting foreign intelligence and counterintelligence sources and methods from unauthorized disclosure or is the subject of a lawful counterintelligence, personnel, physical or communications security investigation.

(d) No surveillance under paragraph (c) of this section may be conducted within the United States unless the person being surveilled is a present employee, intelligence agency contractor or employee of such a contractor, or is a military person employed by a non-intelligence element of a military service. Outside the United States such surveillance may also be conducted against a former employee, intelligence agency contractor or employee of a contractor or a civilian person employed by a non-intelligence element of an agency within the Intelligence Community. A person who is in contact with such a present or former employee or contractor may also be surveilled, but only to the extent necessary to identify that person.

2-207. *Undisclosed Participation in Domestic Organizations.* No employees may join, or otherwise participate in, any organization within the United States on behalf of any agency within the Intelligence Community without disclosing their intelligence affiliation to appropriate officials of the organization, except as permitted by procedures established pursuant to Section 2-201. Such procedures shall provide for disclosure of such affiliation in all cases unless the agency head or a designee approved by the Attorney General finds that non-disclosure is essential to achieving lawful purposes, and that finding is subject to review by the Attorney General. Those procedures shall further limit undisclosed participation to cases where:

(a) The participation is undertaken on behalf of the FBI in the course of a lawful investigation;

(b) The organization concerned is composed primarily of individuals who are not United States persons and is reasonably believed to be acting on behalf of a foreign power; or

(c) The participation is strictly limited in its nature, scope and duration to that necessary for other lawful purposes relating to foreign intelligence and is a type of participation approved by the Attorney General and set forth in a public document. No such participation may be undertaken for the purpose of influencing the activity of the organization or its members.

2-208. *Collection of Nonpublicly Available Information.* No agency within the Intelligence Community may collect, disseminate or store information concerning the activities of United States persons that is not available publicly, unless it does so with their consent or as permitted by procedures established pursuant to Section 2-201. Those procedures shall limit collection, storage or dissemination to the following types of information:

(a) Information concerning corporations or other commercial organizations or activities that constitutes foreign intelligence or counterintelligence;

(b) Information arising out of a lawful counterintelligence or personnel, physical or communications security investigation;

(c) Information concerning present or former employees, present or former intelligence agency contractors or their present or former employees, or applicants for any such employment or contracting, which is needed to protect foreign intelligence or counterintelligence sources or methods from unauthorized disclosure;

(d) Information needed solely to identify individuals in contact with those persons described in paragraph (c) of this section or with someone who is the subject of a lawful foreign intelligence or counterintelligence investigation;

(e) Information concerning persons who are reasonably believed to be potential sources or contacts, but only for the purpose of determining the suitability or credibility of such persons;

(f) Information constituting foreign intelligence or counterintelligence gathered abroad or from electronic surveillance conducted in compliance with Section 2-202 or from cooperating sources in the United States;

(g) Information about a person who is reasonably believed to be acting on behalf of a foreign power, engaging in international terrorist activities or narcotics production or trafficking, or endangering the safety of a person protected by the United States Secret Service or the Department of State;

(h) Information acquired by overhead reconnaissance not directed at specific United States persons;

(i) Information concerning United States persons abroad that is obtained in response to requests from the Department of State for support of its consular responsibilities relating to the welfare of those persons;

(j) Information collected, received, disseminated or stored by the FBI and necessary to fulfill its lawful investigative responsibilities; or

(k) Information concerning persons or activities that pose a clear threat to any facility or personnel of an agency within the Intelligence Community. Such information may be retained only by the agency threatened and, if appropriate, by the United States Secret Service and the FBI.

### 2-3. *Additional Restrictions and Limitations.*

2-301. *Tax Information.* No agency within the Intelligence Community shall examine tax returns or tax information except as permitted by applicable law.

2-302. *Restrictions on Experimentation.* No agency within the Intelligence Community shall sponsor, contract for, or conduct research on human subjects except in accordance with guidelines issued by the Department of Health, Education and Welfare. The subject's informed consent shall be documented as required by those guidelines.

2-303. *Restrictions on Contracting.* No agency within the Intelligence Community shall enter into a contract or arrangement for the provision of goods or services with private companies or institutions in the United States unless the agency sponsorship is known to the appropriate officials of the company or institution. In the case of any company or institution other than an academic institution, intelligence agency sponsorship may be concealed where it is determined, pursuant to procedures approved by the Attorney General, that such concealment is necessary to maintain essential cover or proprietary arrangements for authorized intelligence purposes.

2-304. *Restrictions on Personnel Assigned to Other Agencies.* An employee detailed to another agency within the federal government shall be responsible to the host agency and shall not report to the parent agency on the affairs of the host agency unless so directed by the host agency. The head of the host agency, and any successor, shall be informed of the employee's relationship with the parent agency.

2-305. *Prohibition on Assassination.* No person employed by or acting on behalf of the United States Government shall engage in, or conspire to engage in, assassination.

2-306. *Restrictions on Special Activities.* No component of the United States Government except an agency within the Intelligence Community may conduct any special activity. No such agency except the CIA (or the military services in wartime) may conduct any special activity unless the President determines, with

## THE PRESIDENT

the SCC's advice, that another agency is more likely to achieve a particular objective.

2-307. *Restrictions on Indirect Participation in Prohibited Activities.* No agency of the Intelligence Community shall request or otherwise encourage, directly or indirectly, any person, organization, or government agency to undertake activities forbidden by this Order or by applicable law.

2-308. *Restrictions on Assistance to Law Enforcement Authorities.* Agencies within the Intelligence Community other than the FBI shall not, except as expressly authorized by law:

(a) Provide services, equipment, personnel or facilities to the Law Enforcement Assistance Administration (or its successor agencies) or to state or local police organizations of the United States; or

(b) Participate in or fund any law enforcement activity within the United States.

2-309. *Permissible Assistance to Law Enforcement Authorities.* The restrictions in Section 2-308 shall not preclude:

(a) Cooperation with appropriate law enforcement agencies for the purpose of protecting the personnel and facilities of any agency within the Intelligence Community;

(b) Participation in law enforcement activities, in accordance with law and this Order, to investigate or prevent clandestine intelligence activities by foreign powers, international narcotics production and trafficking, or international terrorist activities; or

(c) Provision of specialized equipment, technical knowledge, or assistance of expert personnel for use by any department or agency or, when lives are endangered, to support local law enforcement agencies. Provision of assistance by expert personnel shall be governed by procedures approved by the Attorney General.

2-310. *Permissible Dissemination and Storage of Information.* Nothing in Sections 2-201 through 2-309 of this Order shall prohibit:

(a) Dissemination to appropriate law enforcement agencies of information which indicates involvement in activities that may violate federal, state, local or foreign laws;

(b) Storage of information required by law to be retained;

(c) Dissemination of information covered by Section 2-208 (a)-(j) to agencies within the Intelligence Community or entities of cooperating foreign governments; or

(d) Lawful storage or dissemination of information solely for administrative purposes not related to intelligence or security.

## SECTION 3

## OVERSIGHT OF INTELLIGENCE ORGANIZATIONS

3-1. *Intelligence Oversight Board.*

3-101. *Membership.* The President's Intelligence Oversight Board (IOB) shall function within the White House. The IOB shall have three members who shall be appointed by the President and who shall be from outside the government and be qualified on the basis of ability, knowledge, diversity of background and experience. No member shall have any personal interest in any contractual relationship with any agency within the Intelligence Community. One member shall be designated by the President as chairman.

3-102. *Duties.* The IOB shall:

(a) Review periodically the practices and procedures of the Inspectors General and General Counsel with responsibilities for agencies within the Intelligence Community for discovering and reporting to the IOB intelligence

## THE PRESIDENT

activities that raise questions of legality or propriety, and consider written and oral reports referred under Section 3-201;

(b) Review periodically for adequacy the internal guidelines of each agency within the Intelligence Community concerning the legality or propriety of intelligence activities;

(c) Report periodically, at least quarterly, to the President on its findings; and report in a timely manner to the President any intelligence activities that raise serious questions of legality or propriety;

(d) Forward to the Attorney General, in a timely manner, reports received concerning intelligence activities in which a question of legality has been raised or which the IOB believes to involve questions of legality; and

(e) Conduct such investigations of the intelligence activities of agencies within the Intelligence Community as the Board deems necessary to carry out its functions under this Order.

3-103. *Restriction on Staff.* No person who serves on the staff of the IOB shall have any contractual or employment relationship with any agency within the Intelligence Community.

3-2. *Inspectors General and General Counsel.* Inspectors General and General Counsel with responsibility for agencies within the Intelligence Community shall:

3-201. Transmit timely reports to the IOB concerning any intelligence activities that come to their attention and that raise questions of legality or propriety;

3-202. Promptly report to the IOB actions taken concerning the Board's findings on intelligence activities that raise questions of legality or propriety;

3-203. Provide to the IOB information requested concerning the legality or propriety of intelligence activities within their respective agencies;

3-204. Formulate practices and procedures for discovering and reporting to the IOB intelligence activities that raise questions of legality or propriety; and

3-205. Report to the IOB any occasion on which the Inspectors General or General Counsel were directed not to report any intelligence activity to the IOB which they believed raised questions of legality or propriety.

3-3. *Attorney General.* The Attorney General shall:

3-301. Receive and consider reports from agencies within the Intelligence Community forwarded by the IOB;

3-302. Report to the President in a timely fashion any intelligence activities which raise questions of legality;

3-303. Report to the IOB and to the President in a timely fashion decisions made or actions taken in response to reports from agencies within the Intelligence Community forwarded to the Attorney General by the IOB;

3-304. Inform the IOB of legal opinions affecting the operations of the Intelligence Community; and

3-305. Establish or approve procedures, as required by this Order, for the conduct of intelligence activities. Such procedures shall ensure compliance with law, protect constitutional rights and privacy, and ensure that any intelligence activity within the United States or directed against any United States person is conducted by the least intrusive means possible. The procedures shall also ensure that any use, dissemination and storage of information about United States persons acquired through intelligence activities is limited to that necessary to achieve lawful governmental purposes.

3-4. *Congressional Intelligence Committees.* Under such procedures as the President may establish and consistent with applicable authorities and duties, including those conferred by the Constitution upon the Executive and Legislative

## THE PRESIDENT

Branches and by law to protect sources and methods, the Director of Central Intelligence and heads of departments and agencies of the United States involved in intelligence activities shall:

3-401. Keep the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate fully and currently informed concerning intelligence activities, including any significant anticipated activities which are the responsibility of, or engaged in, by such department or agency. This requirement does not constitute a condition precedent to the implementation of such intelligence activities;

3-402. Provide any information or document in the possession, custody, or control of the department or agency or person paid by such department or agency, within the jurisdiction of the Permanent Select Committee on Intelligence of the House of Representatives or the Select Committee on Intelligence of the Senate, upon the request of such committee; and

3-403. Report in a timely fashion to the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate information relating to intelligence activities that are illegal or improper and corrective actions that are taken or planned.

## SECTION 4

## GENERAL PROVISIONS

4-1. *Implementation.*

4-101. Except as provided in section 4-105 of this section, this Order shall supersede Executive Order 11905, "United States Foreign Intelligence Activities," dated February 18, 1976; Executive Order 11985, same subject, dated May 13, 1977; and Executive Order 11994, same subject, dated June 1, 1977.

4-102. The NSC, the Secretary of Defense, the Attorney General and the Director of Central Intelligence shall issue such appropriate directives and procedures as are necessary to implement this Order.

4-103. Heads of agencies within the Intelligence Community shall issue appropriate supplementary directives and procedures consistent with this Order.

4-104. The Attorney General shall have sole authority to issue and revise procedures required by section 2-201 for the activities of the FBI relating to foreign intelligence and counterintelligence.

4-105. Where intelligence activities under this Order are to be conducted pursuant to procedures approved or agreed to by the Attorney General, those activities may be conducted under terms and conditions of Executive Order 11905 and any procedures promulgated thereunder until such Attorney General procedures are established. Such Attorney General procedures shall be established as expeditiously as possible after the issuance of this Order.

4-106. In some instances, the documents that implement this Order will be classified because of the sensitivity of the information and its relation to national security. All instructions contained in classified documents will be consistent with this Order. All procedures promulgated pursuant to this Order will be made available to the Congressional intelligence committees in accordance with Section 3-402.

4-107. Unless otherwise specified, the provisions of this Order shall apply to activities both within and outside the United States, and all references to law are to applicable laws of the United States, including the Constitution and this Order. Nothing in this Order shall be construed to apply to or interfere with any authorized civil or criminal law enforcement responsibility of any department or agency.

4-2. *Definitions.* For the purposes of this Order, the following terms shall have these meanings:

## THE PRESIDENT

4-201. *Communications security* means protective measures taken to deny unauthorized persons information derived from telecommunications of the United States Government related to national security and to ensure the authenticity of such telecommunications.

4-202. *Counterintelligence* means information gathered and activities conducted to protect against espionage and other clandestine intelligence activities, sabotage, international terrorist activities or assassinations conducted for or on behalf of foreign powers, organizations or persons, but not including personnel, physical, document, or communications security programs.

4-203. *Electronic Surveillance* means acquisition of a nonpublic communication by electronic means without the consent of a person who is a party to an electronic communication or, in the case of a nonelectronic communication, without the consent of a person who is visibly present at the place of communication, but not including the use of radio direction finding equipment solely to determine the location of a transmitter.

4-204. *Employee* means a person employed by, assigned to, or acting for an agency within the Intelligence Community.

4-205. *Foreign Intelligence* means information relating to the capabilities, intentions and activities of foreign powers, organizations or persons, but not including counterintelligence except for information on international terrorist activities.

4-206. *Intelligence* means foreign intelligence and counterintelligence.

4-207. *Intelligence Community and agency or agencies within the Intelligence Community* refer to the following organizations:

(a) The Central Intelligence Agency (CIA);

(b) The National Security Agency (NSA);

(c) The Defense Intelligence Agency;

(d) The Offices within the Department of Defense for the collection of specialized national foreign intelligence through reconnaissance programs;

(e) The Bureau of Intelligence and Research of the Department of State;

(f) The intelligence elements of the military services, the Federal Bureau of Investigation (FBI), the Department of the Treasury, the Department of Energy, and the Drug Enforcement Administration (DEA); and

(g) The staff elements of the Office of the Director of Central Intelligence.

4-208. *Intelligence product* means the estimates, memoranda and other reports produced from the analysis of available information.

4-209. *International terrorist activities* means any activity or activities which:

(a) involves killing, causing serious bodily harm, kidnapping, or violent destruction of property, or an attempt or credible threat to commit such acts; and

(b) appears intended to endanger a protectee of the Secret Service or the Department of State or to further political, social or economic goals by intimidating or coercing a civilian population or any segment thereof, influencing the policy of a government or international organization by intimidation or coercion, or obtaining widespread publicity for a group or its cause; and

(c) transcends national boundaries in terms of the means by which it is accomplished, the civilian population, government, or international organization it appears intended to coerce or intimidate, or the locale in which its perpetrators operate or seek asylum.

4-210. *The National Foreign Intelligence Program* includes the programs listed below, but its composition shall be subject to review by the National Security Council and modification by the President.

(a) The programs of the CIA;

(b) The Consolidated Cryptologic Program, the General Defense Intelligence Program, and the programs of the offices within the Department of

# THE PRESIDENT

Defense for the collection of specialized national foreign intelligence through reconnaissance except such elements as the Director of Central Intelligence and the Secretary of Defense agree should be excluded;

(c) Other programs of agencies within the Intelligence Community designated jointly by the Director of Central Intelligence and the head of the department or by the President as national foreign intelligence or counterintelligence activities;

(d) Activities of the staff elements of the Office of the Director of Central Intelligence.

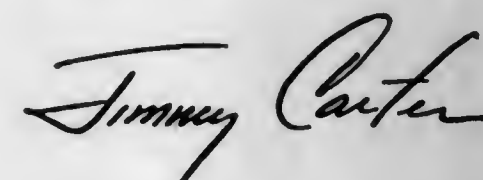

(e) Activities to acquire the intelligence required for the planning and conduct of tactical operations by the United States military forces are not included in the National Foreign Intelligence Program.

4-211. *Physical surveillance* means an unconsented, systematic and deliberate observation of a person by any means on a continuing basis, or unconsented acquisition of a nonpublic communication by a person not a party thereto or visibly present thereat through any means not involving electronic surveillance. This definition does not include overhead reconnaissance not directed at specific United States persons.

4-212. *Special activities* means activities conducted abroad in support of national foreign policy objectives which are designed to further official United States programs and policies abroad and which are planned and executed so that the role of the United States Government is not apparent or acknowledged publicly, and functions in support of such activities, but not including diplomatic activity or the collection and production of intelligence or related support functions.

4-213. *United States*, when used to describe a place, includes the territories of the United States.

4-214. *United States person* means a citizen of the United States, an alien lawfully admitted for permanent residence, an unincorporated association organized in the United States or substantially composed of United States citizens or aliens admitted for permanent residence, or a corporation incorporated in the United States.

THE WHITE HOUSE,

January 24, 1978.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
	CSC			CSC
	LABOR			LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

FEDERAL REGISTER, VOL. 43, NO. 19—FRIDAY, JANUARY 27, 1978

list of cfr parts affected in this issue

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, follows beginning with the second issue of the month.  
A Cumulative List of CFR Sections Affected is published separately at the end of each month. The guide lists the parts and sections affected by documents published since the revision date of each title.

# rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel  
CHAPTER I—CIVIL SERVICE COMMISSION  
PART 213—EXCEPTED SERVICE  
Department of Commerce

AGENCY: Civil Service Commission.  
ACTION: Final rule.

SUMMARY: One position of Special Assistant to the Deputy Assistant Secretary for Domestic Economic Policy Coordination is excepted under Schedule C because it is confidential in nature.

EFFECTIVE DATE: January 27, 1978.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3314(b)(3) is added as set out below:

§ 213.3314 Department of Commerce.

(b) Office of the Assistant Secretary for Policy. . . .

(3) One Special Assistant to the Deputy Assistant Secretary for Domestic Economic Policy Coordination.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218.)

For the United States Civil Service Commission.

JAMES C. SPRY,  
Executive Assistant  
to the Commissioners.  
[FR Doc. 78-2347 Filed 1-26-78; 8:45 am]

[6325-01]

PART 213—EXCEPTED SERVICE  
Department of Defense

AGENCY: Civil Service Commission.  
ACTION: Final rule.

SUMMARY: Section 213.3106(b)(7) of Schedule A is revoked as all positions under cryptologic intelligence activities are no longer excepted. A new authority showing the kinds of positions under cryptologic intelligence activities which are now excepted is added.

EFFECTIVE DATE: January 27, 1978.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3106(b)(7) is revoked and 5 CFR 213.3106(d)(2) is added.

§ 213.3106 Department of Defense.

(b) Entire Department . . . .  
(7) [Revoked]

(d) General . . . .

(2) Positions involved in intelligence-related work of the cryptologic intelligence activities of the military departments. This includes all positions of intelligence research specialist, and similar positions in the intelligence classification series; all scientific and technical positions involving the applications of engineering, physical or technical sciences to intelligence work; and professional as well as intelligence technician positions in which a majority of the incumbent's time is spent in advising, administering, supervising, or performing work in the collection, processing, analysis, production, evaluation, interpretation, dissemination, or estimation of intelligence information or in the planning, programing, and management of intelligence resources.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218.)

Title 7—Agriculture  
CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Lemon Reg. 130]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona lemons that may be shipped to market during the period January 29-February 4, 1978. Such action is needed to provide for orderly marketing of fresh lemons for this period due to the marketing situation confronting the lemon industry.

EFFECTIVE DATE: January 29, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393

SUPPLEMENTARY INFORMATION: Findings. Pursuant to the marketing

agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, and upon other information, it is found that the limitation of handling of lemons, as hereafter provided, will tend to effectuate the declared policy of the act.

The committee met on January 24, 1978, to consider supply and market conditions and other factors affecting the need for regulation and recommended a quantity of lemons deemed advisable to be handled during the specified week. The committee reports the demand for lemons is easier on 115's and larger, steady on 140's and 165's.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the FEDERAL REGISTER. (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

§ 910.130 Lemon regulation 130.

Order. (a) The quantity of lemons grown in California and Arizona which may be handled during the period January 29, 1978, through February 4, 1978, is established at 200,000 cartons.

(b) As used in this section, "handled" and "carton(s)" mean the same as defined in the marketing order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.)

Dated: January 25, 1978.

CHARLES R. BRADER,  
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

(FR Doc. 78-2511 Filed 1-26-78; 8:45 am)

#### Title 7—Agriculture

#### CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

##### SUBCHAPTER S—PERSONNEL

(FmHA Instructions 409.1 and 2045-JJ)

#### PART 1815—RURAL DEVELOPMENT—UTILIZATION OF GRATUITOUS SERVICES

##### PART 2045—GENERAL

#### Subpart JJ—Rural Development—Utilization of Gratuitous Services

##### Redesignation—Revision

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: This rule redesignates FmHA regulations concerning voluntary and gratuitous services as part of a general reorganization of Farmers Home Administration (FmHA) regulations. This redesignation is intended to provide clarity and uniformity in FmHA codification.

DATE: January 27, 1978.

FOR FURTHER INFORMATION CONTACT:

Henry C. Bourne, telephone 202-447-2783.

SUPPLEMENTARY INFORMATION: The FmHA is establishing under Chapter XVIII, Title 7, a new Subchapter S, "Personnel"—Part 2045, "General," in the Code of Federal Regulations. Subchapter JJ, "Rural Development—Utilization of Gratuitous Services," (§§ 2045.1751-2045.1800) of this new Part 2045 is, transferred, and redesignated from Part 1815 of this Chapter XVIII. Overall, this rule sets forth the FmHA program's objective of full cooperation with appropriate agencies of any State, territory or political subdivision concerning voluntary and gratuitous services. Also added to the regulation in this publication, as Exhibit A, is the "Agreement For Utilization of Employees by Farmers Home Administration." The use of this document is required under this regulation. It is the policy of this Department that rules relating to public property, loans, grants, benefits, or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. This rule, however, is not published for proposed rulemaking since the purpose of the redesignation is administration in nature, being a part of a general reorganization of FmHA regulations and, therefore, public procedure thereon is unnecessary.

Accordingly, 7 CFR Chapter XVIII is amended as follows:

1. Part 1815—Rural Development—Utilization of Gratuitous Services (§§ 1815.1-1815.6 [Removed]).

2. FmHA hereby promulgates new Subchapter S, Part 2045, Subpart JJ, to Chapter XVIII, and adds §§ 2045.1751 through 2045.1800 under 7 CFR as set forth below:

#### Subpart JJ—Rural Development—Utilization of Gratuitous Services

Sec.

2045.1751 General

2045.1752 Policy

2045.1753 Authority to Accept Gratuitous Services

2045.1754 Scope of Gratuitous Services Performed

2045.1755 Preparation and Disposition of Agreement Forms

2045.1756 Records and Reports

2045.1757-2045.1800 [Reserved]

EXHIBIT A—Agreement—For Utilization of Employees of ( ) by the Farmers Home Administration.

AUTHORITY: 7 U.S.C. 1989; 42 U.S.C. 1480; delegation of authority by the Sec. of Agr., 7 CFR 2.23; delegation of authority by the Asst. Sec. for Rural Development, 7 CFR 2.70.

#### PART 2045—GENERAL

#### Subpart JJ—Rural Development—Utilization of Gratuitous Services

§ 2045.1751 General.

Section 331(b) of the Consolidated Farm and Rural Development Act (Pub. L. 92-419), and section 506(a) of the Housing Act of 1949, empower the Secretary of Agriculture to accept and utilize voluntary and uncompensated services in carrying out the provisions of the above cited Acts. The Secretary has delegated those authorities to the Administrator of the Farmers Home Administration (FmHA) in 7 CFR 2.70 (a) (1) and (2).

§ 2045.1752 Policy.

Voluntary and uncompensated (gratuitous) services may be accepted with the consent of the agency concerned, from the following sources under the conditions set forth in Exhibit A, "Agreement for Utilization of Employees of (Enter Official Title of Governing Body or Other Authorized Organization) By the Farmers Home Administration" (Agreement Form).

(a) Any agency of State government or of any territory or political subdivision.

(b) Non-profit, educational, and charitable organizations, provided that no partisan, political, or profit motive is involved either explicitly or implicitly.

§ 2045.1753 Authority to accept gratuitous services.

(a) State Directors, Director, Personnel Division, and Director, Finance Office, are hereby authorized to accept and utilize gratuitous services offered by the governmental agencies listed in § 2045.1752(a).

(b) An offer received by an FmHA State or County Office from a source

listed in § 2045.1752(b) shall be transmitted to the National Office, Attention: Director, Personnel Division, for decision. The offer will be accompanied by copies of the Articles of Incorporation and By-laws (if the organization is incorporated), a statement that the organization accepts the conditions set forth in the Agreement Form, and evidence that the organization is financially able to meet the required fiscal obligations of the agreement.

§ 2045.1754 Scope of gratuitous services performed.

(a) Gratuitous services accepted in accordance with this Subpart may be utilized to perform any function performed by regular FmHA employees (excluding Committee members). Such services must not result in the displacement of employees. Most of the gratuitous services should be performed at the County Office level and conform to a standard FmHA position description. A nonstandard position description may be developed and used, depending on current agency needs in a particular office and gratuitous skills available.

(b) Orientation and other training will be provided by FmHA so that gratuitous services may be performed in accordance with current FmHA procedure.

(c) Persons performing authorized gratuitous services will be held to the same standard as regular FmHA employees performing similar duties. The issuance of, and accountability for, identification cards and clearance of employee accountability will be as prescribed in FmHA Instruction 2024-B which is available in all FmHA Offices. Such persons, except Construction Inspectors may, when under direct supervision of County Supervisors, act as Collection Officers and be allowed to use receipt books in accordance with FmHA Instructions 2024-C and 451.2 (Part 1862 of this Chapter and other applicable regulations available in all FmHA Offices).

§ 2045.1755 Preparation and disposition of agreement forms.

(a) Agreements to accept and utilize gratuitous services *MUST BE IDENTICAL* to the attached Exhibit A (Agreement Form) with such exceptions as may be authorized by the Office of the General Counsel, Department of Agriculture.

(b) Two copies of each signed Agreement Form will be forwarded to the Personnel Division. One copy will be retained in the State or Finance Office.

§ 2045.1756 Records and reports.

The FmHA official signing the Agreement Form will maintain records to show the names, duty assignments,

time worked and work locations of all persons performing gratuitous services. Copies of time reports submitted to the persons' employers should suffice. These records will be necessary to respond to occasional requests for reports on the acceptance and utilization of gratuitous services in the FmHA.

§ 2045.1757-2045.1800 [Reserved]

#### AGREEMENT

FOR UTILIZATION OF EMPLOYEES OF (OFFICIAL TITLE OF GOVERNING BODY OR OTHER AUTHORIZED ORGANIZATION, I.E., PICKENS COUNTY, ALA., BOARD OF COMMISSIONERS)

BY THE FARMERS HOME ADMINISTRATION

1. This Agreement, dated—between—, a (political subdivision), (educational), (charitable), (or non-profit) an organization of the State of—(hereinafter called the Agency) and the United States of America acting through Farmers Home Administration, U.S. Department of Agriculture (hereinafter called the Administration) is entered into for the purpose of permitting certain employees of the Agency (hereinafter called the Agency employees) to assist in the Administration's effort to provide agricultural, housing and other assistance for rural people of the State of—in accordance with Section 331(b) of the Consolidated Farm and Rural Development Act and Section 506(a), Title V of the Housing Act of 1949.

2. The Administration certifies that it is empowered by the current Federal laws cited above, and related rules and regulations, to accept personnel assistance from the Agency as provided in paragraphs 4 and 5 below; and that the work assigned to Agency employees will be useful, in the public interest, could not otherwise be provided, and will not result in the displacement of employed workers.

3. The Agency certifies that it has the authority under the laws of the State of—to enter into this Agreement and to provide the services agreed upon in the manner provided for.

4. The Administration hereby supplies the Agency with a narrative description which is made a part of this Agreement as Attachment "A," explicitly setting forth the duties, knowledge, skills, and abilities to be required of Agency employees.

5. The Administration agrees to:

(a) Provide training for and responsible supervision of qualified and acceptable Agency employees in accordance with Attachment "A."

(b) Provide work within the State of—for qualified and acceptable Agency employees for periods not to exceed eight hours per day and 40 hours per week.

(c) Provide the office space, tools, equipment, and supplies to be used by Agency employees in performing work for the Administration.

(d) Report to the Agency, as required, the time worked by and work accomplishments of Agency employees.

(e) Consult with the Agency, as necessary, on situations involving delinquency, misconduct, neglect of work, and apparent conflicts of interest of Agency employees.

(f) Reimburse Agency employees for proper and reasonable travel and per diem expenses incurred in performing official duties for the Administration, in accordance with Administration travel regulations.

(g) Consider Agency employees to be Federal employees for the purposes of the Federal Employees Compensation Act (5 U.S.C. 8101) and of the Federal Tort Claims Act (28 U.S.C. 2671-2680).

6. The Agency agrees to:

(a) Not discriminate against any employee or applicant for employment because of race, color, religion, sex, age, marital status, physical handicap, or national origin. The Agency will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, age, marital status, physical handicap, or national origin. Such action shall include, but not be limited to, the following: Employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training including apprenticeship. The Agency will post in conspicuous places, available to employees and applicants for employment, notices setting forth the provisions of this nondiscrimination clause.

(b) Obtain fingerprints, police records, and work qualifications checks on potential assignees, and divulge the results to the Administration or permit the Administration to obtain this information.

(c) Assign only Agency employees who are acceptable to the Administration in terms of meeting the same ability and suitability standards which are applied to Federal employment.

(d) Pay all salaries and other expenses of Agency employees and comply with Federal, State, and local minimum wage statutes. No monies will be paid by the Administration under this agreement, either to the Agency or its employees.

(e) Consider any Tort claims by third parties under applicable laws and regulations.

(f) Reassign or terminate the assignment of Agency employees upon request of the Administration.

7. The Agency and the Administration mutually understand and agree that the reasons for determining that an Agency employee is unacceptable or unsuitable for initial or continued assignment to Administration work may include but shall not be limited to the following:

(a) Practicing or appearing to practice discrimination for reasons of race, color, religion, sex, age, marital status, physical handicap, or national origin.

(b) Being or becoming involved in real or apparent conflicts of interest, such as, engaging directly or indirectly in business transactions with Administration applicants or borrowers, or using or appearing to use the Administration work assignment for private gain.

(c) Engaging in or having engaged in criminal, dishonest, or immoral conduct, or conducting himself in a manner which might embarrass or cause criticism of the Administration.

(d) Being absent from duty without authorization.

(e) Engaging in partisan political activity prohibited to Federal employees doing similar work.

(f) Lack of work.

(g) Inability of the employee to perform the duties of the assignment.

8. The term of this Agreement shall commence on the date thereof. It shall end on—, unless extended by mutual agreement, or unless terminated earlier by at least thirty (30) days advanced written notice by either party to the other.

(9) The Agency and the Administration respectively certify, each for itself, that its officer signing this Agreement is duly authorized thereto.

##### SUBCHAPTER B—LOANS AND GRANTS PRIMARILY FOR REAL ESTATE PURPOSES

(FmHA Instructions 444.4 and 444.8)

##### PART 1822—RURAL HOUSING LOANS AND GRANTS

Puerto Rico and Virgin Islands Included in Certain Definitions

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its regulations to include Puerto Rico and the Virgin Islands in the definitions of "Domestic farm labor", "Broad based nonprofit organization", and "Nonprofit organization of farmworkers". The change is necessary in order for the regulations to conform to the Housing and Rural Development Act of 1977. The effect of the change is to allow a greater number of people to benefit from the labor housing assistance provided.

EFFECTIVE DATE: January 27, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Paul R. Conn, 202-447-7207.

SUPPLEMENTARY INFORMATION: §§ 1822.63 and 1822.203 of Part 1822, Title 7, Code of Federal Regulations are amended. The current definition of "Domestic farm labor" in the existing regulations excludes laborers on farms in Puerto Rico and the Virgin Islands and their families. The change will permit FmHA to make labor housing loans and grants in Puerto Rico and the Virgin Islands and to provide housing for these families. Puerto Rico and the Virgin Islands are also incorporated into the definitions of

"Broad based nonprofit organization", and "Nonprofit organization of farmworkers." The definition of "Household furnishings" was inadvertently omitted from the prior publication, and is included with this amendment.

It is the policy of this Department that rules relating to public property, loans, grants, benefits, or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. These amendments, however, are not published for proposed rulemaking since the purpose of the change is to expand the labor housing program to comply with the Housing and Rural Development Act of 1977, and any delay would be contrary to the public interest in that assistance would be withheld from persons eligible under the law.

Accordingly §§ 1822.63 and 1822.203 are amended and read as follows: 1. As amended, § 1822.63 reads as follows:

#### § 1822.63 Definitions.

As used in this subpart: (a) "Domestic farm labor" means persons who receive a substantial portion of their income as laborers on farms in the United States, Puerto Rico, or the Virgin Islands and either (1) are citizens of the United States, or (2) reside in the United States, Puerto Rico, or the Virgin Islands after being legally admitted for permanent residence, and may include the families of such persons. Laborers on farms may include laborers engaged in handling agricultural commodities while they are in the unprocessed stage, provided title to the commodity is held by the producer and the place of employment, such as a packing shed, is on or near the farm where the commodity is produced. Domestic farm labor also includes persons working in aquaculture operations as defined in Subpart C of Part 1904 of this chapter.

(b) "Housing" means existing structures or new structures which are or will be suitable for decent, safe, and sanitary dwelling use by domestic farm labor. "Housing" may include "related facilities" where appropriate.

(c) "Household furnishings" consists of such basic durable items as stoves, refrigerators, tables, chairs, dressers, and beds. Items such as bedding, linens, dishes, silverware, and cooking utensils are not included in this definition.

(d) "Related facilities" includes community rooms or buildings, cafeterias, dining halls, infirmaries, child care facilities, assembly halls, and other essential service facilities, such as central heating, sewerage, lighting systems, bathing facilities, and a safe domestic water supply. All related facilities must be reasonably necessary for proper use of the housing as dwellings for the domestic farm labor occupants.

(e) "Individual farmowner" means the "owner" of a "farm" as those terms are defined in Subpart A of this part.

(f) "Organization" means an association of farmers, a State or political subdivision, or a public or private nonprofit organization.

(g) "Association of farmers" means a group of farmers acting as a single legal entity, or whose members each is an individual devoting a substantial part of his time to personal participation in the conduct of farming operations. Though an association of farmers is not required to be a nonprofit organization, its operation of the housing must be on a nonprofit basis.

(h) "Broad-based nonprofit organization" means an organization which (1) is incorporated with in the State, Puerto Rico, or the Virgin Islands, (2) which for a project with a total development cost of \$100,000 or less, has at least 25 members who reflect a variety of interests in the community where the housing will be located, (3) is organized and operated on a nonprofit basis, (4) is legally precluded from distributing any profits or dividends to its members before dissolution, (5) is not grower oriented, and (6) pledges to administer the housing as a community service in the interest of the whole community. The minimum number of members should be increased for larger projects.

(i) "Nonprofit organization of farmworkers" means a nonprofit organization which is incorporated within the State, Puerto Rico, or the Virgin Islands, has local representation in the membership and in the board of directors, and whose members are individuals who receive a substantial portion of their income from farm work.

(j) "Construct or repair" means to construct new structures or facilities, or to acquire, relocate, or improve existing structures or facilities, but does not include the acquisition of land.

(k) "Members" and "membership" include stockholders and stock where appropriate.

(l) "Board" and "directors" include the governing body and members of the governing body of an organization.

(m) "Note" may include bond or other form of obligation.

(n) "Mortgage" may include any appropriate form of security instrument.

(o) "County Supervisor" and "State Director" means the authorized officials of the Farmers Home Administration for the area in which the housing site is located.

2. As amended, § 1822.203 reads as follows:

#### § 1822.203 Definitions.

As used in this subpart: (a) "Domestic farm labor" means persons who re-

ceive a substantial portion of their income as laborers on farms in the United States, Puerto Rico, or the Virgin Islands and either (1) are citizens of the United States, or (2) reside in the United States, Puerto Rico, or the Virgin Islands after being legally admitted for permanent residence, and may include the families of such persons. Laborers on farms may include laborers engaged in handling agricultural commodities while they are in the unprocessed stage, provided title to the commodity is held by the producer and the place of employment, such as a packing shed, is on or near the farm where the commodity is produced. Domestic farm laborers also includes persons working in aquaculture operations as defined in Subpart C of Part 1904 of this chapter.

(b) "Housing" means existing structures or new structures which are or will be suitable for decent, safe, and sanitary dwelling use by domestic farm labor at rentals within the payment ability of families of low income. "Housing" may also include "related facilities" where appropriate.

(c) "Household furnishings" consists of such basic durable items as stoves, refrigerators, tables, chairs, dressers, and beds. Items such as bedding, linens, dishes, silverware, and cooking utensils are not included in this definition.

(d) "Related facilities" include community rooms or buildings, cafeterias, dining halls, infirmaries, child care facilities assembly halls, and other essential service facilities, such as central heating, sewerage, lighting systems, bathing facilities, and a safe domestic water supply. All related facilities must be reasonably necessary for proper use of the housing as dwellings for the domestic farm labor occupants.

(e) "Organization" means a State agency, or political subdivision, or an agency of State or local government such as a public housing authority.

(f) "Broad-based nonprofit organization" means an organization which (1) is incorporated within the State, Puerto Rico, or the Virgin Islands, (2) which for a project with a total development cost of \$100,000 or less, has at least 25 members who reflect a variety of interests in the community where the housing will be located, (3) is organized and operated on a nonprofit basis, (4) is legally precluded from distributing any profits or dividends to its members before dissolution, (5) is not grower oriented, and (6) pledges to administer the housing as a community service in the interest of the whole community. The minimum number of members should be increased for larger projects.

(g) "Nonprofit organization of farmworkers" means a nonprofit organization incorporated within the State, Puerto Rico, or the Virgin Islands

which has local representation in the membership and whose members are individuals who receive a substantial portion of their income from farm work.

(h) "Construct or repair" means to construct new structures or facilities, or to acquire, relocate, or improve existing structures or facilities.

(i) "Development cost" means the cash cost of constructing, purchasing, improving, altering, or repairing new or existing housing and related facilities, and purchasing and improving the necessary land, including necessary architectural, legal, and other appropriate technical and professional fees and charges.

(j) "Board" and "directors" include the governing body and members of the governing body of an organization.

(k) "Applicant" means the applicant for or the recipient of an LH grant.

#### [3410-07]

##### SUBCHAPTER H—GENERAL (FmHA Instruction 1901-N)

##### PART 1901—PROGRAM RELATED INSTRUCTIONS

##### Subpart N—Indian Outreach Program

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule with comments requested.

SUMMARY: The Farmers Home Administration (FmHA) establishes new regulations pertaining to making FmHA loans and grants more accessible to American Indians. The purpose of this rule is to be more responsive to the needs of the American Indian and to establish uniform procedure in carrying out the FmHA Indian Outreach Program.

DATES: Effective date: January 27, 1978. Comments must be received on or before February 27, 1978.

ADDRESSES: Submit written comments to the Office of the Chief, Directives Management Branch, Farmers Home Administration, U.S. Depart-

ment of Agriculture, Room 6316, Washington, D.C. 20250. All written comments made pursuant to this notice will be available for public inspection at the address given above.

FOR FURTHER INFORMATION CONTACT:

Mr. Allen T. Murray, 202-447-5597.

SUPPLEMENTARY INFORMATION: The FmHA amends its regulations by adding a new Subpart N to Part 1901, Chapter XVIII, Title 7, Code of Federal Regulations. Subpart N, "Indian Outreach Program," (§§ 1901.651-1901.700) of this Part 1901 implements the Agency's loan program to Indian Tribes and Tribal Corporation by establishing procedures and responsibilities to insure full participation in this new outreach program. The appointment of State Coordinators to work closely with local, district, State and National Office representatives to remove obstacles and to solve problems that impede the use of FmHA programs on Indian reservations will provide an increased production level of FmHA loans and grants to American Indians both on and off reservations.

It is the policy of this Department that rules relating to public property, loans, grants, benefits, or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. These amendments, however, are not published for proposed rulemaking since the purpose of this program is to promote the availability of FmHA benefits for those Indian communities and reservations needing financial assistance, and the amendments themselves are of a procedural nature. The FmHA, however, is interested in receiving comments at the address given above. Accordingly, new Subpart N of Part 1901 is set forth below:

##### Subpart N—Indian Outreach Program

Sec.

1901.651 Purpose.  
1901.652 Goals.  
1901.653 Field action.  
1901.654 FmHA publications.  
1901.655 Reports.  
1901.656-1901.670 [Reserved]

##### Subpart N—Indian Outreach Program

##### § 1901.651 Purpose.

The purpose of this Subpart is to establish procedures and responsibilities for carrying out the Farmers Home Administration (FmHA) American Indian Outreach Program.

##### § 1901.652 Goals.

The FmHA American Indian Outreach Program is a concerted effort to: (a) Make all FmHA programs more ac-

V  
4  
3  
1  
9

7  
8  
UMI

cessible and available to Indians living on and off reservations.

(b) Surface and attempt to correct problems and obstacles that prevent the participation by eligible Indians and Indian tribes in FmHA programs.

(c) Increase the production level of FmHA loans and grants going to American Indians both on and off reservations.

(d) Provide pamphlets, publications and information on FmHA programs to individual Indians, Indian tribes and Tribal leaders, Bureau of Indian Affairs (BIA) personnel, and other interested groups and individuals.

§ 1901.653 Field action.

State Coordinators of Indian activities appointed by State Directors will:

(a) Maintain close liaison with local FmHA supervisors and officials serving Indian populations and reservations;

(b) Work closely with local District, State, and National Office representatives to remove obstacles and solve problems that impede the use of FmHA programs on Indian reservations;

(c) Be familiar with all FmHA loan and grant programs available to Indians living on and off reservations, including the types of security and eligibility requirements;

(d) Be aware of any unique relationship that may exist between Indians and the Federal and State governments affecting Indian participation in the FmHA loan and grant programs;

(e) As necessary, attend pertinent meeting of Indian groups, government agencies, and others concerned with the economic and social development of Indians;

(f) If possible, become personally acquainted with Indian leaders and non-Indian leaders in Indian affairs in the State;

(g) Arrange for the training of members of Indian tribes, individuals, and interested groups involved in Indian affairs, in the packaging and distribution of materials for use in FmHA loan and grant programs.

§ 1901.654 FmHA publications.

FmHA publications, such as "Rural Credit for American Indians," a handbook of FmHA programs, and "FmHA Credit for American Indians," or other materials to be developed, will be used as supplementary training and informational aids for Indian communities, individuals, governmental agencies, and other groups involved in Indian affairs.

§ 1901.655 Reports.

(a) State Directors will keep the National Office advised of any problems and obstacles in FmHA's procedures relating to Indian laws or customs that

cannot be resolved locally and which prevent American Indians from participating in the FmHA programs on or off the reservations.

(b) Any changes in personnel serving as State Coordinator of Indian activities will be reported to the National Office.

(c) Each State Director will make a semi-annual memorandum report on January 1 and July 1 of each year on activities and accomplishments in his State. The report will specifically reflect what has been done to carry out the items set forth in § 1901.653. The report will be sent to the National Office, Attention, Coordinator of Indian Activities.

§ 1901.656-1901.700 [Reserved]

(7 U.S.C. 1989; 42 U.S.C. 1480; 42 U.S.C. 2942; 5 U.S.C. 301; Sec. 10 P.L. 93-357, 88 Stat. 392; delegation of authority by the Sec. of Agri., 7 CFR 2.23; delegation of authority by the Asst. Sec. for Rural Development, 7 CFR 2.70; delegations of authority by Dir., OEO 29 FR 14764 33 FR 9850.)

NOTE.—The Farmers Home Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: January 7, 1978.

SUBCHAPTER K—PROPERTY MANAGEMENT

[FmHA Instruction 1955-C]

PART 1955—REAL ESTATE AND CHATTEL PROPERTIES

Subpart C—Disposal of Acquired Property

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) revises various sections of its regulations to initiate use of a new form for reporting the sale of inventory property; to clarify that the interest rates and terms herein apply in the sale of Consolidated Farm and Rural Development Act (CONACT) property and to assure that the proper State Official determines rates, terms and qualified bids in the sale of surplus property; to incorporate affirmative fair housing marketing plan requirements; to assure that credit sales may be made to above-moderate income Rural Housing applicants; and to set forth the use of funds in certain closing situations. These changes are intended to facilitate the proper disposal of acquired properties.

EFFECTIVE DATES: January 27, 1978. Comments must be received on or before February 27, 1978.

ADDRESS: Submit written comments to the Office of the Chief, Directives Management Branch, Farmers Home Administration; U.S. Department of Agriculture, Room 6316, Washington, D.C. 20250. All written comments made pursuant to this notice will be available for public inspection at the address given above.

FOR FURTHER INFORMATION CONTACT:

Mr. R. M. Yates, 202-447-3752.

SUPPLEMENTARY INFORMATION: Section 1955.116 (a) and (b); § 1955.117 (a), (b), (d), and (e); § 1955.118 (c), (e), and (f) of Subpart C of Part 1955 of Title 7, Code of Federal Regulations (41 FR 32698, as amended at 42 FR 38383) are revised. The major revision are as follows:

1. In § 1955.116, paragraph (a) (2)(v)(C) is added to initiate a new Form FmHA 465-6A, "Advice of Mortgaged Real Estate Sold," to be completed by FmHA County Supervisors; paragraphs (b)(1), (b)(3)(i)(B), (b)(4)(iii) and (b)(4)(iv) of this section reflect editorial changes.

2. In § 1955.117, paragraphs (a), (b), (d), and (e) are amended as follows:

a. Paragraph (a)(1) is revised and new paragraphs (a)(1)(i) and (a)(2)(iii) are added to reflect FmHA's Affirmative Fair Housing Marketing Plan referenced in the FEDERAL REGISTER document published at 42 FR 45894 and 45895, dated September 13, 1977. The present paragraph (a)(1)(i) (A) through (G) are revised and redesignated (a)(1)(ii) (A) through (G); paragraphs (a)(1)(ii) and (a)(1)(iii) are redesignated (a)(1) and (iii) and (a)(1)(iv), respectively.

b. Paragraphs (b)(1) and (d)(4) are revised to reflect the fact that Rural Housing applicants with above-moderate income are eligible for credit sales; paragraphs (d)(6) and (e)(4) through (e)(7) are revised to utilize new Form FmHA 465-6A in reporting sales of inventory property, and to correct reference to the promissory note.

3. In § 1955.118, paragraphs (c)(3), (e)(2), and (f) are revised to clarify the situations in which the uniform fee or commission set by the State Director in the sale of inventory property will not be due the real estate brokers and the priority in which earnest money collected by a broker will be used.

It is the policy of this Department that rules related to public property, loans, grants, benefits or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. These amendments, however, are not published for proposed rulemaking since the purpose of the changes is to facilitate the sale of acquired property

regulations with other Agency regulations, and any delay would be contrary to public interest. The Agency is, however, interested in receiving public comments. Such comments may be sent to the address given in the "address" section of the Preamble.

Accordingly, §§ 1955.116, 1955.117, and 1955.118 as amended, read as follows:

(1) Section 1955.116 is amended as follows:

(a) By adding paragraph (a) (2)(v)(C):

(b) By revising paragraphs (b)(1), (b)(3)(i)(B); (b)(4)(iii) and (b)(4)(iv), as set forth below:

§ 1955.116 Sale of real estate that was acquired pursuant to the Consolidated Farm and Rural Development Act (CONACT).

(a) Sale of suitable property. . . .

(2) . . . .

(v) . . . .

(C) When the transaction is closed, the County Supervisor will send the original and one copy of Form FmHA 465-6A, "Advice of Mortgaged Real Estate Sold," to the Finance Office and a copy to the State Director.

(b) Sale of surplus property. . . .

(1) Rates and terms for surplus property. Such property will be offered for cash or terms of not less than a 5 percent downpayment with the remaining balance amortized over a period not to exceed 25 years. The interest rate for housing property sold under the CONACT will be the current Section 515 RRH rate plus ½ percent; for Business and Industry Property, the interest rate will be the established insured Business and Industry rate for profit corporations plus ½ percent. The interest rate for all other surplus property will be the current operating loan rate plus ½ percent. The State Director will determine the rates and terms for surplus property within these limitations and will include the determined rates and terms in all advertisements and announcements. If, after extensive sales efforts, the State Director is unable to conclude a sale of surplus property, he may request the Administrator to grant more favorable rates and terms, which rates and terms in any event must require a downpayment and may not be more favorable than those legally permissible for eligible borrowers. The policy of the Government is that surplus property shall be offered for sale for cash or terms that will provide the best net return to the Government. In no case, however, may the terms be longer than the period for which the property will serve as adequate security.

(3) Method of Sale. . . .

(i) . . . .

(B) Successful bids. If the State Director or designated State staff member determines that the highest qualified bid represents the best price obtainable, the bid will be accepted by signing Form FmHA 465-10. The State Director will give this executed form to the successful bidder or his representative. If the bidder or his representative is not present at the bid opening, the form will be sent by certified mail, return receipt requested, to the bidder. The State Director will send the deposit of the successful bidder to the Finance Office with the name and case number of the former borrower and the inventory advice number so the deposit can be processed.

(4) Processing. . . .

(iii) Farm property. Upon acceptance of the bid or offer by the State Director, the County Supervisor will provide the escrow agent, designated attorney, or title insurance company the necessary information and instructions for closing the sale. The State Director will execute and acknowledge the Quitclaim Deed. Deed execution may not be redelegated. When the transaction is closed, the County Supervisor will send the original and copy of Form FmHA 465-6A to the Finance Office and a copy to the State Director.

(iv) Organization property. Upon acceptance of the bid or offer, the State Director will forward the original Form FmHA 465-10, the names and legal description to be placed in the deed, the amount and terms of the note and mortgage, and other pertinent material to OGC requesting that they provide the appropriate legal instruments and instructions for closing the transaction. The State Director will execute and acknowledge the Quitclaim Deed. Deed execution may not be redelegated. When the transaction is closed, the County Supervisor will send the original and copy of Form FmHA 465-6A to the Finance Office and a copy to the State Director.

(2) Section 1955.117 is amended as follows:

(a) By revising paragraph (a)(1); by adding paragraph (a)(1)(i); by revising and redesignating the current paragraphs (a)(1)(i) (A) through (G) to (a)(1)(ii) (A) through (G); by redesignating without change, the current paragraphs (a)(1)(ii) and (a)(1)(iii) to (a)(1)(iii) and (a)(1)(iv), respectively; and by adding paragraph (a)(2)(iii).

(b) By revising paragraph (b)(1); by revising paragraphs (d)(4), (d)(6), and (d)(6)(i); by revising paragraph (e)(4); by adding a new paragraph (e)(5) and redesignating the current paragraph (e)(5) to (e)(6); by revising and redesignating the current paragraph (e)(6) to (e)(7); and by deleting the present paragraph (e)(7). These changes are set forth below:

§ 1955.117 Sale of real estate that secured Rural Housing (RH) loans.

(a) Method of sale. . . .

(1) Sale by FmHA employees. If a prospective purchaser eligible to buy acquired property is not available, the County Supervisor will post notices and signs to adequately inform interested parties that the property is for sale. The property also may be advertised in the newspaper or other media having general distribution in the marketing area when the State Director determines that such advertisement will assist in the sale of acquired properties. See FmHA Instruction 2024-F available in any FmHA Office.

(i) In accordance with § 1901.203(c) of this Chapter, FmHA affirmative action, the County Supervisor will make a special effort to reach those prospective buyers in the marketing area who traditionally would not be expected to apply for such housing because of existing racial or socio-economic patterns.

(ii) The advertisement or notice for printed media will be in display type but not legal notice style, can include pictures of property, and will contain sufficient information to readily identify the property including:

(A) A brief description of each property, its location, and conveniences,  
(B) Terms of the sale,  
(C) Time the property may be inspected by prospective buyers,  
(D) Place where additional information can be obtained,  
(E) A statement that the Government reserves the right to reject any or all offers,  
(F) Nondiscrimination statement, and

(G) Flood Plain statement.  
(iii) The State Director, with the advice and approval of OGC, will develop a standard form of advertisement and notice to be used in the State.

(iv) The County Supervisor, if unable to sell acquired property, may submit a detailed report to the State Director documenting his efforts to sell the property and requesting authority to offer the property for sale by real estate brokers.

(2) Sale by real estate brokers.

(iii) The broker listing acquired housing properties on a term basis or

V  
4  
3  
1  
9  
  
J  
A  
2  
7  
  
7  
8  
UMI

who agrees to list five or more acquired properties on an individual listing basis within a calendar year must submit Form HUD-935.2, "Affirmative Fair Housing Marketing Plan," or be signatory to a voluntary affirmative marketing agreement approved by FmHA. A signed copy of the approved marketing agreement will be attached to the original Form FmHA 1955-C-2, "Non-exclusive Real Property Master Listing Agreement," and retained in the County Office file.

(b) Sale of suitable property. . . .

(1) All housing properties of two units or less will be offered only to eligible applicants (including above moderate income section 502) for the first 15 days after they are offered for sale.

(d) Processing sale to eligible applicants. . . .

(4) The current interest rate for the type of loan being made will apply (low or moderate, above-moderate RH, RRH, etc.)

(6) Loan closing and title clearance for a credit sale and any subsequent additional loan closed simultaneously with the credit sale will be the same as for an initial loan except.

(i) The property will be conveyed by a Quitclaim Deed. The State Director, with the assistance of OGC, will develop a Quitclaim Deed. Deed execution by the State Director may not be redelegated. When the transaction is closed, the County Supervisor will send the original and copy of Form FmHA 465-6A to the Finance Office and a copy to the State Director.

(e) Processing sale to ineligible applicants. . . .

(4) For loans to individuals and all RH borrowers, Form FmHA 440-16 will be used. The Quitclaim Deed will be executed and acknowledged by the State Director. Deed execution may not be redelegated. The County Supervisor will provide the escrow agent, designated attorney, or the title insurance company the necessary information and instructions for closing the sale. The assistance of OGC may be requested to provide closing instructions in exceptional or complex cases.

(5) For loans to organizations, except RH, Form FmHA 440-22, will be used. Closing instructions for organization loans will be requested from OGC.

(6) Payments will be made by cash, cashier's check, certified check, postal

or bank money order, bank draft, or purchaser's check. Such payments will be handled in accordance with Part 1862 of this Chapter (FmHA Instruction 451.2).

(7) After the transaction is closed, the County Supervisor will send the original and one copy of form FmHA 465-6A to the Finance Office and a copy to the State Director.

3. Section 1955.118 is amended by revising paragraphs (c)(3), (e)(2) and (f), as set forth below:

§ 1955.118 Selection and use of real estate brokers.

(c) Listing agreements. . . .

(3) A uniform fee or commission will be established by the State Director within a given sales area and will not exceed commissions paid for similar types of services provided by the broker to other sellers of real property. In effect, FmHA provides the services of a listing broker and in most cases, the loan financing.

(e) Conditions for sale by real estate brokers. . . .

(2) The real estate broker's commission will be that established pursuant to paragraph (c)(3) of this section and will be paid from proceeds of the sale if sufficient funds are available. Otherwise, Standard Form 1034 or other approved voucher will be processed to pay such commission. The cost will be charged to the appropriate insurance fund as a nonrecoverable cost. The broker's commission will not be paid until the transaction is closed. No commission or fee will be due or payable if the property is purchased by the broker, his or her salesperson(s), relatives (spouse, brother, sister, parents, and children), or affiliates.

(f) Processing offers obtained by real estate brokers. Such offers will be accepted or rejected in the order received in the County Office. Offers will be reviewed for compliance with price, repayment ability of buyer, and terms of sale if credit is involved. The first acceptable offer received will be accepted regardless of whether a higher offer is received later. Earnest money collected from a broker will be used in the following priority: (1) To pay closing cost, (2) to pay broker's commission, and (3) to be transmitted to Finance Office.

(7 U.S.C. 1989; 42 U.S.C. 1480; 42 U.S.C. 2942; 5 U.S.C. 301; Sec. 10 Pub. L. 93-357, 88 Stat. 392; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; dele-

gation of authority by the Assistant Secretary for Rural Development, 7 CFR 2.70; delegations of authority by Director, OEO 29 FR 14764, 33 FR 9850.)

NOTE.—The Farmers Home Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: January 10, 1978.

GORDON CAVANAUGH,  
Administrator, Farmers  
Home Administration.

[3410-34]

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 72—TEXAS (SPLENETIC) FEVER IN CATTLE

Area Quarantined

AGENCY: Animal and Plant Health Inspection, USDA.

ACTION: Final rule.

SUMMARY: These amendments quarantine the Commonwealth of Puerto Rico because of the existence of vectors of splenic or tick fever. This action is deemed necessary to prevent the spread of the disease.

EFFECTIVE DATE: January 20, 1978.

FOR FURTHER INFORMATION CONTACT:

Glen O. Schubert, Chief Staff Veterinarian, Bacterial and Parasitic Diseases, Sheep, Goat, Equine, and Ectoparasites Staff, Room 737, Federal Building, 6505 Belcrest Road, Hyattsville, Md. 20782, 301-436-8322.

SUPPLEMENTARY INFORMATION: These amendments quarantine the Commonwealth of Puerto Rico because of the existence of cattle fever ticks which are vectors of splenic or tick fever. This action is deemed necessary to prevent the spread of the disease. The restrictions pertaining to the interstate movement of cattle and certain materials from quarantined areas as contained in 9 CFR Part 72, as amended, will apply to the quarantined area.

Accordingly, §§ 72.2 and 72.3 of Part 72, Title 9, Code of Federal Regulations, as amended, which quarantined portions of the State of Texas, the Virgin Islands of the United States, and the Island of Guam because of splenic or tick fever in cattle, a contagious, infectious, and communicable disease, or because of the existence of

vectors of said disease, are hereby amended in the following respects:

1. In § 72.2 the section heading and the text are amended to read:

§ 72.2 Splenic or tick fever in cattle in Texas, the Virgin Islands of the United States, and vectors of said disease in the Commonwealth of Puerto Rico and the Island of Guam: Restrictions on movement of cattle.

Notice is hereby given that the contagious, infectious, and communicable disease known as splenic or tick fever exists in cattle in portions of the State of Texas and the Virgin Islands of the United States. Notice is also hereby given that ticks which are vectors of said disease exist in the Commonwealth of Puerto Rico and the Island of Guam. Therefore, portions of the State of Texas, the Virgin Islands of the United States, the Commonwealth of Puerto Rico, and the Island of Guam are hereby quarantined as provided in §§ 72.3 and 72.5, and the movement of cattle therefrom into any other State or Territory or the District of Columbia shall be made only in accordance with the provisions of this part and Part 71 of this chapter.

2. In § 72.3, the section heading and the text are amended to read:

§ 72.3 Areas quarantined in the Virgin Islands of the United States, the Commonwealth of Puerto Rico, and the Island of Guam.

The entire territories of the Virgin Islands of the United States, the Commonwealth of Puerto Rico and the Island of Guam are quarantined.

(Secs. 4-7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791-792, as amended; secs. 1-4, 33 Stat. 1264, 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132 (21 U.S.C. 111-113, 115, 117, 120, 123-126, 134b, 134f); 37 FR 28464, 28477; 38 FR 19141.)

The amendments impose certain further restrictions necessary to prevent the interstate spread of Texas (splenic) or tick fever in cattle, and must be made effective immediately to accomplish their purpose in the public interest. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendments are impracticable and contrary to the public interest, and good cause is found for making them effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 20th day of January 1978.

NOTE.—The Animal and Plant Health Inspection Service has determined that this

document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A-107.

R. I. BROWN,  
Acting Deputy Administrator,  
Veterinary Services.  
(FR Doc. 78-2284 Filed 1-26-78; 8:45 am)

[3410-34]

SUBCHAPTER E—VIRUSES, SERUMS, TOXINS, AND ANALOGOUS PRODUCTS; ORGANISMS AND VECTORS

PART 101—DEFINITIONS

Miscellaneous Amendments

AGENCY: Animal and Plant Health Inspection Service (APHIS).

ACTION: Final rule.

SUMMARY: This amendment defines two terms which are used in the testing of biological products and which are found in the regulations issued under the Virus-Serum-Toxin Act. Correct interpretation of the meaning of a regulation is difficult when terms used in the regulation are not well defined. The purpose of this amendment is to clarify the meaning of two such terms by defining them in the regulations.

EFFECTIVE DATE: This amendment becomes effective January 27, 1978.

FOR FURTHER INFORMATION CONTACT:

Dr. R. J. Price, Biologics Licensing and Standards Staff, USDA, APHIS, VS, Room 827, Federal Building, Hyattsville, Md. 20782, 301-436-8245.

SUPPLEMENTARY INFORMATION: Some terms which apply to the evaluation of biological products are defined in Part 101 of the regulations issued under the Virus-Serum-Toxin Act. These definitions permit the individuals responsible for conducting evaluation tests to make accurate and uniform interpretations of the results.

The term "healthy" is used in the regulations to describe an animal that is suitable to be used in a test. This amendment includes a definition of this term. This amendment also includes a definition of the term "unfavorable reaction" which is used when referring to a change in the health of a test animal subsequent to initiating an evaluation test. Such change would be determined by the individual responsible for conducting the test and would occur during a time period specified in the test protocol. The cause of such change would be attributed to either the product being tested or to unrelated factors and the test results evaluated accordingly.

Section 101.5 is amended by adding two new paragraphs to read:

§ 101.5 Testing terminology.

(m) *Healthy*. Apparently normal in all vital functions and free of signs of disease.

(n) *Unfavorable reactions*. Overt adverse changes which occur in healthy test animals subsequent to initiation of a test and manifested during the observation period prescribed in the test protocol which are attributable either to the biological product being tested or to factors unrelated to such product as determined by the responsible individual conducting the test.

(21 U.S.C. 151 and 154; 37 FR 28477, 28646; 38 FR 19141.)

This amendment makes administrative changes to provide a definition for each of two terms used in the regulations without making substantive changes in the regulations. In order for them to be of maximum benefit, they must be made effective immediately.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure concerning these amendments are impracticable and unnecessary, and good cause is found for making these amendments effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 20th day of January 1978.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

R. I. BROWN,  
Acting Deputy Administrator,  
Veterinary Services.

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

(Rev. 6, Amdt. 15)

PART 120—BUSINESS LOAN POLICY

Eligibility of Cable TV and Radio and Television Broadcasters for Financial Assistance

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: SBA hereby amends its loan policy regulation that has hitherto

to barred financial assistance to radio and television broadcasters and limited assistance to cable TV operators. Financial assistance will be made available to otherwise eligible small business concerns engaged in, or seeking to enter, the fields of broadcasting or the operation of cable TV systems.

**EFFECTIVE DATE:** January 27, 1978.  
**FOR FURTHER INFORMATION CONTACT:**

Arthur E. Armstrong, Director, Office of Financing, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416, phone 202-653-6574.

**SUPPLEMENTARY INFORMATION:** On November 10, 1977, SBA published in the *FEDERAL REGISTER* notice of proposed rulemaking that would allow financial assistance to facilitate the acquisition of a radio, television, or cable TV facility. See 42 FR 58538. On November 25, 1977 (42 FR 60159) this notice was clarified by publication of a supplementary notice.

By the present amendment, SBA is extending to concerns presently or prospectively engaged in these industries eligibility for financial assistance under its existing business loan program. Generally speaking, SBA financial assistance will be available to qualified applicants for the same purposes that financial assistance is available to qualified applicants in other industries "to enable small-business concerns to finance plant construction, conversion, or expansion . . . or to finance the acquisition of equipment, facilities, machinery, supplies, or materials; or to supply such concerns with working capital . . ." Section 7(a) of the Small Business Act. That section, however, conditions extension of a business loan on a reasonable assurance of repayment. No such assurance exists unless the applicant has obtained all necessary official approvals for construction, expansion, modernization, or transfer of a broadcasting or cable TV facility. Accordingly, no financial assistance may be disbursed by SBA or by any participating lender until all necessary permits have been obtained.

Numerous comments were received in response to the Notice of Proposed Rulemaking. The following explanations should answer those comments which are not reflected in the final regulation.

#### 1. LIMITATIONS ON AMOUNT OF SBA ASSISTANCE

SBA is aware that the amount of financial assistance that it can extend to any one applicant may not be adequate in the context of the broadcasting or cable TV industries. It should be noted that two or more otherwise eligible broadcasters may apply for an

SBA "pool loan" pursuant to section 7(a)(5) of the Small Business Act, if they form a group corporation which would serve their separate individual needs with a common facility. See 13 CFR § 122.9.

#### 2. ISSUANCE OF "COMMITMENT LETTERS"

SBA recognizes that the owners of a broadcasting or cable TV operation may be unwilling to enter into serious negotiation with a prospective transferee unless it can demonstrate the necessary financial resources. So also, the Federal Communications Commission (FCC) or the cable TV franchising authority may inquire into the financial viability of a prospective operator. To meet this need for evidence of the availability of financing, SBA has been requested to issue letters of commitment.

While recognizing the problem, SBA does not believe that it requires SBA to issue letters of commitment, which it does not do at present. SBA's present form of loan authorization should meet the need for evidence of favorable action on an application for financial assistance. See 13 CFR 122.19.

#### 3. CONTROL OF PROGRAM CONTENT

As the regulation states, SBA has no intention of attempting to influence, in any way, the content of any borrower's program or program schedule; and program content will not be grounds for accelerating the maturity of any loan. SBA has no intention of operating any broadcasting station or cable TV system after default but SBA reserves its creditor right relating to collateral.

#### 4. COMPETING APPLICATIONS

SBA will process applications for financial assistance from two or more applicants competing against each other for the same license or franchise. The FCC will decide which applicant is best qualified to serve the public interest.

#### 5. FINANCIAL ASSISTANCE TO OTHER OPINION-MOLDERS

The premise underlying SBA's general policy of denying financial assistance to "opinion molders" is set forth in 13 CFR 120.2(d)(4), which is quoted hereafter. The rationale for the exception created today in favor of broadcasters and cable TV operators is that these industries are already subject to Government regulation. In the case of broadcasters, the regulation is by the FCC; in the case of cable TV operators, regulation is by local franchising authorities operating under FCC guidelines. Participants in these industries are subject to "equal time" and "fairness" rules and each participant holds its license or franchise only so long as it operates in the public inter-

est. No such restrictions apply to other opinion molders such as publishers and producers of "audio-visual materials".

#### 6. RESTRICTION OF ASSISTANCE TO "DISADVANTAGED" APPLICANTS

Although the regulation adopted today is expected to further the entrepreneurial participation in the broadcasting and cable TV industries of individuals whose participation in the free enterprise system is hampered by social or economic disadvantages, the furtherance of that policy does not require that SBA financial assistance be limited to enterprises owned by such individuals. SBA would not be obliged to deny an application solely on the ground that it has already made a certain number of loans to applicants in the same industry. Each application for financial assistance will be considered on its own merits.

Pursuant to the authority of section 5 of the Small Business Act, as amended, 15 U.S.C. 634, Part 120 of Title 13, CFR, is amended, in the manner set forth below:

1. Section 120.2(d)(4) is revised as follows:

#### § 120.2 Business loans and guarantees.

(d) Financial assistance will not be granted by SBA:

(4) If the applicant is engaged in the creation, origination, expression, dissemination, propagation, or distribution of ideas, values, thoughts, opinions or similar intellectual property, regardless of medium, form, or content. Financial assistance to such applicants is barred in order to avoid Government interference, or the appearance thereof, with the constitutionally protected freedoms of speech and press: *Provided, however*, That nothing herein shall preclude financial assistance to any otherwise eligible applicant engaged in one or more of the following activities: . . .

2. Paragraph (d)(4)(v) of § 120.2 is replaced by a new paragraph (d)(4)(v) as follows:

#### § 120.2 Business loans and guarantees.

(d) . . .  
(4) . . .

(v) *Broadcasting and cable TV:* Operators of commercial broadcasting (radio and television) stations and cable TV systems under the regulatory jurisdiction of the Federal Communications Commission (FCC) or a cable TV franchise granted in conformity with FCC standards, are eligible to receive SBA financial assistance. Appli-

cations for SBA financial assistance may be filed by concerns that have not received the necessary official approvals to acquire, construct, or operate broadcasting stations or cable TV systems, but no financial assistance may be disbursed by SBA or by any participating lender until all necessary official approvals have been obtained. In determining whether financial assistance will be extended to any applicant, no consideration will be given to the applicant's present or proposed program schedule, or to the content of any particular program; but SBA reserves the right to exercise all the rights and remedies afforded a creditor under the laws of the United States and of any jurisdiction in which a debtor may operate. While SBA believes that the extension of financial assistance to enterprises described in this paragraph will be particularly helpful to enterprises owned by socially or economically disadvantaged members of minority groups, the availability of financial assistance from SBA is not limited to enterprises owned by such persons.

(Catalog of Federal Domestic Assistance Program No. 59.012)

Dated: January 19, 1978.

A. VERNON WEAVER,  
Administrator.

##### Title 14—Aeronautics and Space

#### CHAPTER II—CIVIL AERONAUTICS BOARD

##### SUBCHAPTER E—ORGANIZATION REGULATIONS (Regulation OR-126, Amdt. 68)

#### PART 385—DELEGATION AND REVIEW OF ACTION UNDER DELEGATION; NONHEARING MATTERS

##### Expansion of Delegation of Authority to the Director, Bureau of Operating Rights

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

**SUMMARY:** This rule expands the authority delegated by the Board to the Director, Bureau of Operating Rights, to act, when such action is in accordance with established Board precedent, on applications by persons for relief, pursuant to section 101(3) of the Act, in order to hold out, arrange and coordinate the operation of air ambulance flights as indirect air carriers. This delegation is at the initiative of the Board, and will expedite decision on this type of application and relieve unnecessary administrative burdens.

**DATES:** Effective: January 24, 1978.  
Adopted: January 24, 1978.

#### FOR FURTHER INFORMATION CONTACT:

John V. Coleman, Chief, Supplementary Services Division, 1825 Connecticut Avenue NW., Washington, D.C. 20428, 202-673-5088.

**SUPPLEMENTARY INFORMATION:** From time to time the Board receives applications from persons requesting relief from the Act, under section 101(3), in order to engage in the operation of air ambulance flights as indirect air carriers. There are now well-established Board precedents in this area. In the vast majority of such cases, disposition of the applications involves no significant policy issues or other matters requiring the Board's consideration, and could be handled by the staff. We are, therefore, delegating to the Director, Bureau of Operating Rights, the authority to grant or deny applications for relief, filed under section 101(3) of the Act, to hold out, arrange, and coordinate the operation of air ambulance flights as indirect air carriers.

Since this amendment is administrative in nature, affecting a rule of agency organization and procedure, the Board finds that notice and public procedures are unnecessary, and that the rule may become effective immediately.

Accordingly, the Board amends Part 385 of its Organization Regulations to add a new paragraph (nn) to § 385.13, to read as follows:

§ 385.13 Delegation to the Director, Bureau of Operating Rights.

(nn) Grant or deny, in accordance with established Board precedent, applications for relief, filed under section 101(3) of the Act, to hold out, arrange, and coordinate the operation of air ambulance flights as indirect air carriers.

(Sec. 204(a) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 49 U.S.C. 1324; Reorganization Plan No. 3 of 1961, 75 Stat. 837, 26 FR 5989, 49 U.S.C. 1324 (note).)

By the Civil Aeronautics Board.

#### CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

##### SUBCHAPTER A—GENERAL

#### PART 14—PUBLIC HEARING BEFORE A PUBLIC ADVISORY COMMITTEE

##### Biometric and Epidemiological Methodology Advisory Committee; Termination

AGENCY: Food and Drug Administration.

ACTION: Final rule.

**SUMMARY:** Pursuant to § 14.55(b) (21 CFR Part 14.55(b)) of the public advisory committee procedures, the Food and Drug Administration announces the termination of the Biometric and Epidemiological Methodology Advisory Committee by the Secretary, Department of Health, Education, and Welfare on December 23, 1977. This action is taken because the purposes for which this committee was established are to be accomplished through alternative measures.

**EFFECTIVE DATE:** January 27, 1978.

#### FOR FURTHER INFORMATION CONTACT:

Richard L. Schmidt, Committee Management Officer (HFS-20), Food and Drug Administration, Depart-

ment of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-2765.

**SUPPLEMENTARY INFORMATION:** The committee's functions were to review and evaluate scientific studies and data with respect to, and otherwise advise the Commissioner on, epidemiological and biometrical methodology.

The purposes for which this committee was established are to be accomplished through alternative measures and on December 23, 1977, the committee was terminated.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371(a))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 14 is amended in §14.100 *List of standing advisory committees* by deleting paragraph (c)(4) and marking it reserved.

**Effective date.** Since this is a technical conforming amendment to Part 14, the Commissioner finds that there is good cause for the rule to be effective immediately upon publication in the FEDERAL REGISTER, January 27, 1978.

(Sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371(a)).)

Dated: January 19, 1978.

WILLIAM F. RANDOLPH,  
Acting Associate Commissioner  
for Compliance.

#### [4110-03]

##### PART 14—PUBLIC HEARING BEFORE A PUBLIC ADVISORY COMMITTEE—DENTAL DRUG PRODUCTS ADVISORY COMMITTEE; TERMINATION

AGENCY: Food and Drug Administration.

ACTION: Rule.

**SUMMARY:** Pursuant to §14.55(b) (21 CFR Part 14.55(b)) of the public advisory committee procedures, the Food and Drug Administration announces the termination of the Dental Drug Products Advisory Committee by the Secretary, Department of Health, Education, and Welfare on December 23, 1977. This action is taken because the purposes for which this committee was established are to be accomplished through alternative measures.

**FOR FURTHER INFORMATION CONTACT:**

Richard L. Schmidt, Committee Management Officer (HFS-20), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-2765.

**SUPPLEMENTARY INFORMATION:** The committee's functions were to

review and evaluate available data concerning safety and effectiveness of marketed and investigated prescription drugs for use in the practice of dentistry.

The purposes for which this committee was established are to be accomplished through alternative measures and on December 23, 1977, the committee was terminated.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371(a))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 14 is amended in §14.100 *List of standing advisory committees* by deleting paragraph (c)(7) and marking it reserved.

**Effective date.** Since this is a technical conforming amendment to Part 14, the Commissioner finds that there is good cause for the rule to be effective immediately upon publication in the FEDERAL REGISTER, January 27, 1978.

(Sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371(a)).)

Dated: January 19, 1978.

WILLIAM F. RANDOLPH,  
Acting Associate Commissioner  
for Compliance.

#### [4110-03]

##### SUBCHAPTER B—FOOD FOR HUMAN CONSUMPTION

(Docket No. 76N-0140)

##### PART 182—SUBSTANCES GENERALLY RECOGNIZED AS SAFE

##### PART 184—DIRECT FOOD SUBSTANCES AFFIRMED AS SAFE

Rue

AGENCY: Food and Drug Administration.

ACTION: Final rule.

**SUMMARY:** The Food and Drug Administration (FDA) is affirming that rue is generally recognized as safe (GRAS) as a direct human food ingredient with specific limitations. The safety of this ingredient has been evaluated pursuant to the comprehensive safety review being conducted by this agency.

**EFFECTIVE DATE:** This regulation shall be effective February 27, 1978.

**ADDRESS:** Written objections may be sent to the office of the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

**FOR FURTHER INFORMATION CONTACT:**

Corbin I. Miles, Bureau of Foods (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street

SW., Washington, D.C. 20204, 202-472-4750.

**SUPPLEMENTARY INFORMATION:** In the FEDERAL REGISTER of December 7, 1976 (41 FR 53622), a proposal was published to affirm that rue is generally recognized as safe for use as a direct human food ingredient with specific limitations. The proposal was based on safety information developed for oil of rue, the major constituent of rue, that published as part of a final order on December 7, 1976 (41 FR 53620). This action is in accord with the announced FDA review of the safety of GRAS and prior-sanctioned food ingredients.

In accordance with §170.35 (21 CFR 170.35), relating to the affirmation of GRAS food ingredients, copies of the scientific literature review on oil of rue, a report of the teratology screening tests for the ingredient and the report of the Select Committee are available for public review in the office of the Hearing Clerk, Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

In addition to proposing to affirm the GRAS status of rue with specific limitations, the Commissioner gave public notice that he was unaware of any prior-sanctioned food ingredient use for this ingredient other than for the proposed conditions of use. Persons asserting additional or extended uses, in accordance with approvals granted by the U.S. Department of Agriculture or the Food and Drug Administration prior to September 6, 1958, were given notice to submit proof of such sanction so that the safety of the prior-sanctioned use could be determined at this time. That notice was also an opportunity to have prior-sanctioned uses of rue approved by issuance of an appropriate regulation under Part 181 (21 CFR Part 181)—Prior-Sanctioned Food Ingredients, provided the prior-sanctioned use could be affirmed as safe on the basis of information and data now available to the Commissioner. Notice was also given that failure to submit proof of an applicable prior sanction in response to the proposal would constitute a waiver of the right to assert such sanction at any future time.

No reports of prior-sanctioned use for rue were submitted in response to the proposal. Therefore, in accordance with that proposal, any right to assert a prior sanction for a use of rue under conditions different from those set forth in this regulation has been waived.

No comments were received in response to the Commissioner's proposal and supporting data and information on rue. The Commissioner therefore concludes that no change in the proposal to affirm the GRAS status of rue is warranted. Accordingly, it is being promulgated without change.

Title 32—National Defense

##### CHAPTER VI—DEPARTMENT OF THE NAVY

##### SUBCHAPTER F—ISLANDS UNDER NAVY JURISDICTION

##### PART 763—RULES GOVERNING PUBLIC ACCESS

##### Entry Regulations for Kahoolawe Island, Hawaii

AGENCY: Department of the Navy, Department of Defense.

ACTION: Final rule.

**SUMMARY:** This rule sets forth regulations governing entry upon Kahoolawe Island, Hawaii. These regulations limit entry upon Kahoolawe Island to authorized persons because the island is used as a target area for bombing and gunnery practice in order to maintain and improve combat readiness of United States military forces.

**EFFECTIVE DATE:** January 3, 1978.

**ADDRESS:** Any written comment on these regulations should be sent to: Commandant, Fourteenth Naval District, Box 110, Pearl Harbor, Hawaii 96860.

**FOR FURTHER INFORMATION CONTACT:**

Captain Peter B. Walker, JAGC, U.S. Navy, Staff General Advocate, Commander in Chief, U.S. Pacific Fleet, FPO San Francisco 96610. Telephone number: 808-471-0624.

**SUPPLEMENTARY INFORMATION:** Pursuant to the authority conferred by 50 U.S.C. 797, as implemented by Department of Defense Directive 5200.8 of August 20, 1954, together with the authority conferred under 5 U.S.C. 301, 10 U.S.C. 6011, as delegated in 32 CFR 700.702 and 32 CFR 700.714, the Commandant, Fourteenth Naval District, on January 3, 1978, adopted the "Entry regulations for Kahoolawe Island, Hawaii" (COMFOURTEEN-INST 5510.35A). Kahoolawe Island was placed under the jurisdiction of the Secretary of the Navy by Executive Order No. 10436 of February 20, 1953, to be used for naval purposes. The island is presently being used and will continue to be used as a target area for bombing and gunnery practice in order to maintain and improve combat readiness of United States Armed Forces. Further, as a result of the large amounts of unexploded ordnance present on the island and in the adjacent waters, inherently dangerous conditions exist in this area. Accordingly, these regulations limit entry upon Kahoolawe Island to authorized personnel and to those persons who have obtained advance consent pursuant to the regulations.

On January 4, 1978, the contents of these regulations were published in the FEDERAL REGISTER (43 FR 785-786) to provide the public with advance notice prior to final publication of the regulations as they will appear in the Code of Federal Regulations. Accordingly, a new Part 763 in Subchapter F of Title 32, CFR, entitled, "Rules Governing Public Access," is established, and a new Subpart A, entitled "Entry Regulations for Kahoolawe Island, Hawaii," is added to Part 763 of Title 32, CFR. Moreover, it has been determined, in accordance with 32 CFR 296 and 701.57, that publication of these regulations for public comment prior to their adoption is impracticable and unnecessary, since the nature and national importance of the operations on Kahoolawe Island, as well as the existing dangerous conditions thereon, mandate the immediate, uninterrupted effectiveness of these regulations. Interested persons, however, are invited, on a continuing basis, to comment in writing on these regulations. All written material received will be con-

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 701(a), 52 Stat. 1055, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348, 371(a))) and under authority delegated to the Commissioner (21 CFR 5.1), Parts 182 and 184 are amended as follows:

§182.10 [Amended]

1. In Part 182, §182.10 *Spices and other natural seasonings and flavorings* is amended by deleting the entry for "Rue".

2. In Part 184 by adding new §184.1698 to read as follows:

§184.1698 Rue.

(a) Rue is the perennial herb of several species of *Ruta* (*Ruta montana* L., *Ruta graveolens* L., *Ruta bracteosa* L., and *Ruta calepensis* L.). The leaves, buds, and stems from the top of the plant are gathered, dried, and then crushed in preparation for use, or left whole.

(b) The ingredient is used in all categories of food in accordance with §184.1(b)(2) of this chapter at concentrations not to exceed 2 parts per million.

(c) Prior sanctions for this ingredient different from the uses established in this section do not exist or have been waived.

**Effective date.** This regulation is effective on February 27, 1978.

(Secs. 201(s), 409, 701(a), 52 Stat. 1055, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348, 371(a)).)

Dated: January 19, 1978.

WILLIAM F. RANDOLPH,  
Acting Associate Commissioner  
for Compliance.

##### SUBCHAPTER D—DRUGS FOR HUMAN USE

(Docket No. 75N-0020)

##### PART 440—PENICILLIN ANTIBIOTIC DRUGS

##### Updating and Technical Revisions

Correction

In FR Doc. 77-33332 appearing on page 59852 in the issue of Tuesday, November 22, 1977, in §440.180a(a)(2) on page 59865, in the first line, "labeled" should read "labeled".

sidered before taking action on any revisions or amendments to Subpart A of Part 763, 32 CFR or the regulations upon which it is based, and they may be changed in light of comments received.

Therefore, Title 32, CFR, is hereby amended by adding a new Part 763, and a Subpart A to Part 763, providing as follows:

**Subpart A—Entry Regulations for Kahoolawe Island, Hawaii**

- Sec.  
763.1 Purpose.  
763.2 Definition.  
763.3 Background.  
763.4 Entry restrictions.  
763.5 Entry procedures.  
763.6 Violations.

**AUTHORITY:** 50 U.S.C. 797; DOD Dir. 5200.8 of August 20, 1954; 5 U.S.C. 301; 10 U.S.C. 6011, 32 CFR § 700.702; 32 CFR § 700.714; Exec. Order No. 10-436, 3 CFR, 1949-1953 Comp., p. 930, (1958).

**Subpart A—Entry Regulations for Kahoolawe Island, Hawaii**

**§ 763.1 Purpose.**

The purpose of this subpart is to promulgate regulations governing entry upon Kahoolawe Island, Hawaii.

**§ 763.2 Definition.**

For the purposes of this Subpart, Kahoolawe Island includes only that portion reserved for naval purposes by Executive Order No. 10436 of February 20, 1953.

**§ 763.3 Background.**

(a) Kahoolawe Island has been used and will continue to be used as a target area for the foreseeable future for bombing and gunnery practice in order to maintain and improve combat readiness of United States Armed Forces. It is vital to national defense that this use of Kahoolawe Island be continued without undue or unnecessary interruption. Because of the large amounts of unexploded ordnance present on the island and in adjacent waters, inherently dangerous conditions exist in these areas.

(b) For prevention of interruption of the stated use of Kahoolawe Island by any unauthorized person on the island, and prevention of injury to any such person as a consequence of the dangerous conditions which exist, as well as for other reasons, it is essential to restrict entry upon the island to authorized persons only.

**§ 763.4 Entry restrictions.**

Except for military personnel and civilian employees of the United States in the performance of their official duties, entry upon Kahoolawe Island or remaining upon Kahoolawe Island

by any person for any purpose whatsoever without the advance consent of the Commandant, Fourteenth Naval District, or his authorized representative, is prohibited. See 18 U.S.C. 1382; the Internal Security Act of 1950, section 21 (50 U.S.C. 797); Department of Defense Directive 5200.8 of August 20, 1954; Chief of Naval Operations Instruction 5511.9A of October 1, 1954; Secretary of the Navy Instruction 5400.14 of July 30, 1974; Chief of Naval Operations Instruction 5450.190 of February 22, 1975; and Chief of Naval Operations Instruction 5400.24B of November 25, 1977.

**§ 763.5 Entry procedures.**

(a) Any person or group of persons desiring the advance consent of the Commandant, Fourteenth Naval District or his authorized representative shall, in writing, submit a request to the Commandant, Fourteenth Naval District at the following address:

Commandant, Fourteenth Naval District, Box 110, Pearl Harbor, Hawaii 96860.

(b) Each request for entry will be considered on an individual basis weighing the operational and training commitments of Kahoolawe Island, security, and safety with the purpose, size of party, duration of visit, destination, and military resources which would be required by the granting of the request.

**§ 763.6 Violations.**

(a) Any person entering or remaining on Kahoolawe Island without the advance consent of the Commandant, Fourteenth Naval District, or his authorized representative shall be subject to the penalties prescribed by 18 U.S.C. 1382, which provides in pertinent part: "Whoever, within the jurisdiction of the United States, goes upon any military, naval . . . reservation, post, fort, arsenal, yard, station, or installation, for any purpose prohibited by law or lawful regulation . . . shall be fined not more than \$500 or imprisoned not more than six months, or both."

(b) Moreover, any person who willfully violates this subpart is subject to a fine not to exceed \$500 or imprisonment for not more than one (1) year, or both as provided in 50 U.S.C. 797.

Dated: January 20, 1978.

K. D. LAWRENCE,

**Title 36—Parks, Forests and Public Property**

**CHAPTER II—FOREST SERVICE, DEPARTMENT OF AGRICULTURE**

**PART 261—NATIONAL FOREST SYSTEM PROHIBITIONS**

**Permits for Chattooga River**

**AGENCY:** Forest Service, Department of Agriculture.

**ACTION:** Final regulations.

**SUMMARY:** This action requires private and commercial users to obtain a permit to float the Chattooga Wild and Scenic River. Permits will include conditions of use to protect river values and provide for floater safety. Safety regulations have drastically reduced the high number of fatalities occurring prior to regulations.

**EFFECTIVE DATE:** January 27, 1978.

**FOR FURTHER INFORMATION CONTACT:**

Forest Supervisor Donald W. Eng, Francis Marion and Sumter National Forests, 1801 Assembly Street, Second Floor, Columbia, S.C. 29201. 803-765-5222.

**SUPPLEMENTARY INFORMATION:** On May 27, 1977, the Forest Service published an interim rule (42 FR 27244) with a proposed amendment to Subpart C of 36 CFR 261.70. The proposed amendment adding new § 261.77, Prohibitions in Region 8, Southern Region, would prohibit acts or omissions within the areas of the Sumter National Forest and the Chattahoochee National Forest for the purposes of public safety and establishing reasonable rules of public conduct. Interested persons were given 90 days in which to submit written data, views, or objections regarding the interim regulations.

No written objections have been received and the interim regulations are hereby adopted without change and are set forth below.

Dated: January 16, 1978.

LAWRENCE M. WHITFIELD,  
Regional Forester, Region 8,  
Southern Region, Forest Service, Department of Agriculture.

Subpart C of Chapter II of title 36 of the Code of Federal Regulations is amended by revising § 261.77 as follows:

**§ 261.77 Prohibitions in Region 8, Southern Region.**

(a) Using or occupying any area of the Sumter National Forest or the Chattahoochee National Forest abutting the Chattooga River for the purpose of entering or going upon the River in, on, or upon any floatable object or craft of every kind or de-

scription, unless authorized by permit obtained through registration at Forest Service Registration Stations abutting the Chattooga River located at Highway 28, Low-Water Bridge, Earl's Ford, Sandy Ford, Highway 76, Woodall Shoals, or Overflow Bridge or unless authorized under special use permit.

(b) Using or occupying within the scope of any commercial operation or business any area of the Sumter National Forest or the Chattahoochee National Forest abutting the Chattooga River for the purpose of entering or going upon the River in, on, or upon any floatable object or craft of every kind or description, unless authorized by special use permit.

(c) Violating or failing to comply with any of the terms or conditions of any permit authorizing the occupancy and use specified in paragraphs (a) or (b) of this section is prohibited.

(d) Entering, going, riding, or floating upon any portion or segment of the Chattooga River within the boundaries of the Chattahoochee National Forest in, on, or upon any floatable object or craft of every kind or description, unless authorized by a permit obtained through registration at Forest Service Registration Stations abutting the Chattooga River located at Highway 28, Low-Water Bridge, Earl's Ford, Sandy Ford, Highway 76, Woodall Shoals, or Overflow Bridge or unless authorized under special use permit.

(e) Entering, going, riding, or floating within the scope of any commercial operation or business upon any portion or segment of the Chattooga River within the boundaries of the Chattahoochee National Forest in, on, or upon any floatable object or craft of every kind or description unless authorized by special use permit.

(f) Violating or failing to comply with any of the terms or conditions of any permit authorizing the occupancy and use specified in paragraph (d) or (e) of this section is prohibited.

**[8320-01]**

**Title 38—Pensions, Bonuses, and Veterans' Relief**

**CHAPTER I—VETERANS ADMINISTRATION**

**PART 2—DELEGATIONS OF AUTHORITY**

**PART 21—VOCATIONAL REHABILITATION AND EDUCATION**

**Subpart D—Administration of Educational Benefits; 38 U.S.C. Chapters 34, 35, and 36**

**CONFLICTS OF INTEREST**

**AGENCY:** Veterans Administration.

**ACTION:** Final regulation.

**SUMMARY:** This amendment is intended to make clear that the Admin-

istrator is delegating to the Director, Education and Rehabilitation Service, the power to make determinations of conflict of interest as to employees of the Veterans Administration and of the State approving agencies, but that authority to make such determinations as to officers of such groups is not delegated. This will make less confusing the rules being used. This amendment is also intended to make clear the extent of the delegation of authority by the Administrator as to determinations involving conflict of interest and the criteria to be applied in making such determinations. The Veterans Administration also makes editorial changes which reflect the agency's policy of using precise terms for gender in its regulations.

**EFFECTIVE DATE:** January 19, 1978.

**FOR FURTHER INFORMATION CONTACT:**

June C. Schaeffer, Assistant Director for Policy and Program Administration, Education and Rehabilitation Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420, 202-389-2092

**SUPPLEMENTARY INFORMATION:** On page 57328 of the FEDERAL REGISTER of November 2, 1977, there was published a notice of proposed regulatory development to amend Part 21 relative to authority to make determinations involving conflicts of interest.

Interested persons were given 30 days in which to submit comments, suggestions or objections regarding the proposed regulations. One comment was received.

The person commenting suggested delaying implementation of the proposed change to §§ 21.4001 and 21.4005 until such time as these sections have been amended so as to apply also to possible conflicts of interest involving employees and officers of the Veterans Administration or the State approving agencies who are also employees or officers of nonprofit schools.

The regulations concerning conflicts of interest are based upon 38 U.S.C. 1783. This section of the United States Code is addressed only to possible conflicts of interest involving officers and employees of schools operating for profit. It does not mention conflicts of interest involving officers and employees of nonprofit schools. While the suggestion may have merit, the Veterans Administration does not have the statutory authority to make the suggested additional change.

The proposed change to §§ 21.4001 and 21.4005 is deemed proper and is hereby adopted.

Approved: January 19, 1978.  
By direction of the Administrator.

RUFUS H. WILSON,  
Deputy Administrator.

1. In Part 2, § 2.80 is revised to read as follows:

§ 2.80 Director, Education and Rehabilitation Service is delegated authority to waive penalties for conflicting interests as provided by § 21.4005 of this chapter.

This delegation of authority is identical to § 21.4001(c)(1) of this chapter.

2. In Part 21, § 21.4001(c)(1) is revised to read as follows:

§ 21.4001 Delegations of authority.

(c) Authority is delegated to the Director, Education and Rehabilitation Service, to exercise the functions required of the Administrator for: (1) Waiver of penalties for conflicting interests as provided by § 21.4005;

3. In § 21.4005, paragraphs (a)(1) and (2), (b), (c) and (e) are revised and paragraph (f) is added so that the revised and added material reads as follows:

§ 21.4005 Conflicting interests.

(a) General. (1) Every officer or employee of the Veterans Administration who has, while such an officer or employee, owned any interest in, or received any wages, salary, dividends, profits, gratuities, or services from, any school operated for profit in which a veteran or eligible person was pursuing a course of education under 38 U.S.C. chs. 32, 34, 35, or 36 will be immediately dismissed from his or her office or employment.

(2) If the Administrator finds that any person who is an officer or employee of a State approving agency has, while he or she was such an officer or employee, owned any interest in, or received any wages, salary, dividends, profits, gratuities, or services from, a school operated for profit in which a veteran or eligible person was pursuing a course of education or training under chapters 32, 34, 35, or 36, payments under § 21.4153 to such State approving agency will be discontinued unless such agency takes, without delay, such steps as may be necessary to terminate the employment of such person and payments will not be resumed while such person is an officer or employee of the State approving agency, or State Department of Veterans' Affairs or State Department of Education.

(b) Waiver. (1) Where a request is made for waiver of application of paragraph (a)(1) of this section, it will be

considered that no detriment will result to the United States or to veterans or eligible persons by reason of such interest or connection of such officer or employee of the Veterans Administration, if the officer or employee:

(i) Acquired his or her interest in the school by operation of law, or before the statute became applicable to the officer or employee, and his or her interest has been disposed of and his or her connection discontinued, or

(ii) Meets all of the following conditions:

(a) His or her position involves no policy determinations, at any administrative level, having to do with matters pertaining to payment of educational assistance allowance, or special training allowance.

(b) His or her position has no relationship with the processing of any veteran's or eligible person's application for education or training.

(c) His or her position precludes him or her from taking any adjudicative action on individual applications for education or training.

(d) His or her position does not require him or her to perform duties involved in the investigation of irregular actions on the part of schools or veterans or eligible persons in connection with 38 U.S.C. chs. 32, 34, 35, or 36.

(e) His or her position is not connected with the processing of claims by, or payments to, schools, or students enrolled therein under the provisions of 38 U.S.C. chs. 32, 34, 35, or 36.

(f) His or her work is not connected in any way with the inspection, approval, or supervision of schools desiring to train veterans or eligible persons.

(2) Where a request is made for waiver of application of paragraph (a) (2) of this section, it will be considered that no detriment will result to the United States or to veterans or eligible persons by reason of such interest or connection of such officer or employee of a State approving agency, if the officer or employee:

(i) Acquired his or her interest in the school by operation of law, or before the statute became applicable to the officer or employee, and his or her interest has been disposed of and his or her connection discontinued, or

(ii) Meets all of the following conditions:

(a) His or her position does not require him or her to perform duties involved in the investigation of irregular actions on the part of schools or veterans or eligible persons in connection with 38 U.S.C. chs. 32, 34, 35, or 36.

(b) His or her work is not connected in any way with the inspection, approval, or supervision of schools desiring to train veterans or eligible persons.

(c) *Authority.* (1) Authority is delegated to the Director, Education and

Rehabilitation Service, and to the field station head in cases of Veterans Administration employees under his or her jurisdiction, to waive the application of paragraph (a) (1) of this section in the case of any Veterans Administration employee who meets the criteria of paragraph (b) (1) of this section and to deny requests for waiver which do not meet such criteria. If the circumstances warrant, the request may be submitted to the Administrator for decision.

(2) Authority is delegated to the Director, Education and Rehabilitation Service, in cases of State approving agency employees to waive the application of paragraph (a)(2) of this section in the case of any such person who meets the criteria of paragraph (b)(2) of this section and to deny requests for waiver which do not meet such criteria. If the circumstances warrant, the request may be submitted to the Administrator for decision.

(3) Authority is reserved to the Administrator to waive the requirement of paragraphs (a) (1) and (2) of this section in the case of an officer of the Veterans Administration or a State approving agency and in the case of any employee of either who does not meet the criteria of paragraph (b) of this section.

(e) *Notice to veterans and eligible persons.* The veteran or eligible person will be notified in writing sent to his or her latest address of record when:

(1) The course or courses are disapproved by the State approving agency, or

(2) The State approving agency fails to disapprove the course or courses within 15 days after the date of written notice to the agency, and no waiver has been requested, or

(3) Waiver has been denied.

The veteran or eligible person will be informed that he or she may apply for enrollment in an approved course in another school, but that in the absence of such transfer, educational assistance allowance payments will be discontinued effective the date of discontinuance of the course, or the 30th day following the date of such letter, whichever is earlier.

(f) *Definition of "officer."* For the purposes of this section a person will be considered to be an "officer" of the State approving agency or the Veterans Administration, when he or she has authority to exercise supervisory authority.

## Title 40—Protection of Environment

## CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

## SUBCHAPTER E—PESTICIDE PROGRAMS [OPP-260027A]

## PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Revocation of Tolerances for Decachloro-octahydro-1,3,4-metheno-2H-cyclobuta[cd]pentalen-2-one

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule revokes the tolerance for the insecticide decachloro-octahydro-1,3,4-metheno-2H-cyclobuta[cd]pentalen-2-one (trade name: Kepone). The revocation was proposed by the EPA. The revocation will prevent the introduction of bananas containing residues of Kepone into the United States.

EFFECTIVE DATE: January 27, 1978.  
FOR FURTHER INFORMATION CONTACT:

Mr. Frederick Hageman, Office of Special Pesticide Reviews (WH-566), Office of Pesticide Programs, EPA, 401 M Street SW., Washington, D.C., 202-755-8026.

**SUPPLEMENTARY INFORMATION:** On August 31, 1977, the EPA published a notice of proposed rulemaking in the FEDERAL REGISTER (42 FR 43869) on the initiative of the Agency that 40 CFR 180 be amended by revoking the Kepone tolerance for residues of decachloro-octahydro-1,3,4-metheno-2H-cyclobuta[cd]pentalen-2-one in or on the raw agricultural commodity bananas at 0.01 part per million (ppm). No requests for referral to an advisory committee were received in response to this notice or proposed rulemaking.

One comment was received from the National Canners Association recommending that the revocation order take into consideration those bananas that might contain Kepone residues resulting from treatment prior to the issuance of the revocation.

The Agency concludes that since Kepone application is restricted to the soil and base of the banana plant only, no direct uptake into the fruit itself is likely to occur. However, mechanical contamination is a possibility if batches of bananas are placed on the ground in a harvest-type operation. Should Kepone residues occur in bananas, the Agency will determine a safe action level. It has been concluded, therefore, that the proposed revocation is necessary to protect the public health and should be adopted as previously proposed.

Any person adversely affected by this regulation may, on or before February 27, 1978, file written objections with the Hearing Clerk, EPA, Room M-3708, 401 M Street SW., Washington, D.C. 20460. Such objections should be submitted in triplicate and specify the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by the grounds legally sufficient to justify the relief sought.

Effective on January 27, 1978, Part 180, Subpart C, is amended by revoking § 180.287 as set forth below.

Dated: January 24, 1978.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

STATUTORY AUTHORITY: Sec. 408 (e), (m) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a (e), (m)).

§ 180.287 [Deleted]

Section 180.287 Decachloro-octahydro-1,3,4-metheno-2H-cyclobuta[cd]pentalen-2-one; tolerance for residues is deleted from Subpart C.

## Revocation of Public Land Order No. 5608

AGENCY: Bureau of Land Management.

ACTION: Final rule.

SUMMARY: This order will revoke PLO No. 5608. The Forest Management Act of October 22, 1976, requires an Act of Congress to remove such lands from the national forest.

EFFECTIVE DATE: January 27, 1978.

FOR FURTHER INFORMATION CONTACT:

Eldon G. Hayes, 202-343-8731

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714, it is ordered as follows:

Public Land Order No. 5608 of November 16, 1976, which excluded Homesteads No. 205 and No. 222 of the Clear Lake Group, U.S. Survey No. 4979, from the Chugach National Forest, is hereby revoked, for the

reason that section 9 of the Forest Management Act of October 22, 1976, states that an act of Congress is needed to return lands to the public domain.

GUY R. MARTIN,  
Assistant Secretary of  
the Interior.

## CHAPTER X—INTERSTATE COMMERCE COMMISSION

## SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. No. 1298]

## PART 1033—CAR SERVICE

Substitution of Maintenance of Way Ballast Cars for Gondola Cars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Service Order No. 1298).

SUMMARY: There is a substantial shortage of gondola cars on the Burlington Northern Inc. for shipments of pulpwood logs. The BN has an available supply of maintenance of way ballast cars due to decrease in work on tracks during the winter months. Service Order No. 1298 authorizes BN, with consent of shipper, to substitute BN maintenance of way ballast cars for gondola cars for loading pulpwood logs from any station on the BN and destined to any other station on the BN.

DATES: Effective 12:01 a.m., January 24, 1978. Expires 11:59 p.m., March 31, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, Telex 89-2742.

**SUPPLEMENTARY INFORMATION:** The Order is printed in full below.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 23rd day of January 1978.

An acute shortage of gondola cars for transporting shipments of pulpwood logs exists on Burlington Northern Inc. (BN). The BN has an available supply of maintenance of way ballast cars that may be substituted for this traffic. Use of these maintenance of way ballast cars for the transportation of pulpwood logs is precluded by certain tariff provisions, thus curtailing shipments of pulpwood logs. There is a

## RULES AND REGULATIONS

need for the use of these maintenance of way ballast cars to supplement the supplies of gondola cars for transporting shipments of pulpwood logs. It is the opinion of the Commission that an emergency exists requiring immediate action to promote car service in the interest of the public and the commerce of the people. Accordingly, the Commission finds that notice and public procedure herein are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1298 Service Order No. 1298.

(a) *Substitution of maintenance of way ballast cars for gondola cars.* Each common carrier by railroad subject to the Interstate Commerce Act shall observe, enforce, and obey the following rules, regulations, and practices with respect to its car service:

(1) *Substitution of cars.* The Burlington Northern Inc. (BN) may substitute its maintenance of way ballast cars for gondola cars ordered for shipments of pulpwood logs from any station on the BN and destined to any other station on the BN, subject to the conditions provided in paragraphs 2 through 6 of this order.

(2) *Cars to be applied.* Cars listed in the Official Railway Equipment Register, ICC-R.E.R. No. 405, issued by W. J. Trezise, or successive issues thereof as having mechanical designations "HTS" or "MWB" and bearing reporting marks assigned to the BN.

(3) *Concurrence of shipper required.* The concurrence of the shipper must be obtained before maintenance of way ballast cars are substituted for gondola cars.

(4) *Exclusive BN movement required.* Shipments of pulpwood logs for which maintenance of way ballast cars are substituted for gondola cars must originate and terminate at stations on the BN and must not be routed over any other carrier; except that shipments may originate or terminate in terminal switching service on connecting lines which do not participate in the line-haul.

(5) *Minimum weights.* Maintenance of way ballast cars substituted for gondola cars as authorized by this order shall be loaded to full visible capacity. Freight charges shall be assessed for the actual weight of each car loaded subject to a minimum weight of 50,000 lbs. per car.

(6) *Endorsement of billing.* Bills of lading and waybills covering movements authorized by this order shall contain a notation that shipment is moving under authority of Service Order No. 1298.

(b) *Rules and regulations suspended.* The operation of tariffs or other rules and regulations, insofar as they con-

flict with the provisions of this order, is hereby suspended.

(c) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

(d) *Effective date.* This order shall become effective at 12:01 a.m., January 24, 1978.

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., March 31, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

(49 U.S.C. 1(10-17).)

It is further ordered, That, copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

H. G. HOMME, Jr.,  
Acting Secretary.

[7035-01]

(S.O. No. 1299)

## PART 1033—CAR SERVICE

Consolidated Rail Corp. Ordered To Deliver Empty Boxcars to Boston and Maine Corp., Robert W. Meserve and Benjamin Lacy, Trustees (BM); BM Ordered To Deliver Empty Boxcars to Maine Central Railroad Co.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Service Order No. 1299).

SUMMARY: An acute shortage of boxcars for transporting shipments of paper exists on the Maine Central Railroad Co. American Rail Box Car Co. (RBOX) owns a large fleet of plain 50-ft. boxcars for general service by any line participating in a so-called membership pool. In excess of 2,400 RBOX cars are located on the lines of Consolidated Rail Corporation (CR). Service Order No. 1299 orders CR to deliver to the Boston and Maine Corp. a weekly total of 50 empty plain RBOX boxcars, and BM to deliver to the Maine Central a weekly total of 50 empty plain RBOX boxcars.

DATES: Effective 12:01 a.m., January 24, 1978. Expires 11:59 p.m., February 12, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, Telex 89-2742.

## SUPPLEMENTARY INFORMATION: The Order is printed in full below.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 24th day of January 1978.

An acute shortage of boxcars for transporting shipments of paper exists on the Maine Central Railroad Co. (MeC), in spite of efforts of the Car Service Division of the Association of American Railroads to expedite the return of MeC boxcars to that line. The American Rail Box Car Co. (RBOX) owns a fleet of more than 9,900 plain 50-ft. boxcars for general service by any line participating in a so-called membership pool. However, the pool agreement does not permit RBOX to direct the empty movement of these cars unless they have declared surplus by a pool member. In excess of 2,400 RBOX cars are located on the lines of the Consolidated Rail Corp. (CR) none of which have been made available by CR to RBOX for redistribution.

In the opinion of the Commission an emergency exists requiring redistribution of a portion of the RBOX cars located on CR in the interest of the public and the commerce of the people. Accordingly, the Commission finds that notice and public procedure herein are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1299 Service Order No. 1299.

(a) *Consolidated Rail Corp. ordered to deliver empty boxcars to Boston and Maine Corp., Robert W. Meserve and Benjamin Lacy, trustees (BM): BM ordered to deliver empty boxcars to Maine Central Railroad Co.* Each common carrier by railroad subject to the Interstate Commerce Act shall observe, enforce, and obey the following rules, regulations, and practices with respect to its car service:

(1) The Consolidated Rail Corp., shall deliver to the Boston and Maine Corp., Robert W. Meserve and Benjamin Lacy, Trustees (BM) a weekly total of fifty (50) empty plain boxcars owned by the American Rail Box Car Co., and bearing RBOX identification marks.

(2) The BM shall deliver to the Maine Central Railroad Co. a weekly total of fifty (50) plain boxcars bearing RBOX identifying marks.

(b) The rate of delivery specified in this direction shall be maintained within weekly periods ending each Sunday at 11:59 p.m., so that at the

end of each seven days the full delivery required for that period shall have been made.

(c) Cars applied under this direction shall be so identified on empty car cards, movement slips, and interchange records as moving under the provisions of this direction.

(d) The carriers delivering the empty boxcars as described above must advise Joel E. Burns, Director, Bureau of Operations, Interstate Commerce Commission, Washington, D.C. 20423 each Wednesday as to the number of cars, covered by this direction, delivered during the preceding week, ending each Sunday at 11:59 p.m.

(e) The carriers receiving the cars described above must advise Joel E. Burns, Director, Bureau of Operations, Interstate Commerce Commission, Washington, D.C. 20423 each Wednesday as to the number of cars received during the preceding week, ending each Sunday at 11:59 p.m.

(f) *Regulations suspended.* The operation of all rules and regulations, insofar as they conflict with the provisions of this direction, is hereby suspended.

(g) *Effective date.* This direction shall become effective at 12:01 a.m., January 24, 1978.

(h) *Expiration date.* This direction shall expire at 11:59 p.m., February 12, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

It is further ordered, That a copy of this direction shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement; and that notice of this direction be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael. Member Robert S. Turkington not participating.

H. G. HOMME, Jr.,  
Acting Secretary.

(FR Doc. 78-2385 Filed 1-26-78; 8:45 am)

[7035-01]

## SUBCHAPTER B—PRACTICE AND PROCEDURE

## PART 1100—GENERAL RULES OF PRACTICE

AGENCY: Interstate Commerce Commission.

ACTION: Notice requiring immediate compliance with rule.

## RULES AND REGULATIONS

SUMMARY: By this publication the Commission gives formal notice of an intent to require an applicant in an emergency temporary authority proceeding to timely file a petition seeking reconsideration of an order of the Motor Carrier Board in which it is adversely affected. Protestants are not always informed of the filing of an emergency temporary authority application because notice of such filing is not published, and in view of the informal nature of these proceedings applicants have been allowed an unspecified time to seek reconsideration. By this action applicants will be required to expeditiously process an application on a current record, in keeping with an asserted need for emergency transportation.

EFFECTIVE DATE: January 27, 1978.

FOR FURTHER INFORMATION CONTACT:

John Hedetniemi, Special Assistant to the Director, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423, phone 202-275-7792.

SUPPLEMENTARY INFORMATION: Petitions seeking reconsideration in emergency temporary authority proceedings were previously accepted without applying the time rule set forth in 49 CFR 1100.225(f). The Commission has now determined that where emergency temporary authority is granted, the time rule will not be invoked because protestants may not have had adequate notice of the presence of an application, or of the action of the Motor Carrier Board. But, where such an application is denied, applicants should be required to seek reconsideration within 20 days of the date of service of a denial order, there being an allegation inherent in the application that the need for service is immediate and urgent. Moreover, parties representing applicants receive telephone notice in such matters as soon as the Board's decision is reached, and several days may elapse before a denial order is served, giving applicants, in most instances, more than 20 days to petition. Therefore, no reason appears to exempt applicants from the rule requiring them promptly to file their appeals.

The situation with respect to replies to petitions is unchanged and the Commission will continue to follow the guidelines set forth in 49 CFR 1131.6. Petitions, because of the urgency of the transportation need, will be accorded expeditious handling, but replies thereto will be considered if received before the petitions can be processed. Replies, received after consideration has been given to petitions, will be treated as petitions for reconsideration and given corresponding accelerated action.

The above requirement, to file petitions within 20 days of the initial deci-

sion of the Motor Carrier Board, is mandatory, and all petitions seeking reconsideration of denial orders, filed after publication of this notice in the FEDERAL REGISTER, should be in accordance with said rule. Extensions of time to file are not contemplated.

Decided December 20, 1977.

By the Commission.

H. G. HOMME, Jr.,  
Acting Secretary.

## Title 50—Wildlife and Fisheries

## CHAPTER 1—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

## PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

## Final Threatened Status and Critical Habitat for the Leopard Darter

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service issues this rulemaking which would determine the leopard darter (*Percina pantherina*) to be a Threatened species and which would determine Critical Habitat for that species. The leopard darter occurs in southeast Oklahoma and in western Arkansas.

DATE: This final rulemaking becomes effective on February 27, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Keith M. Schreiner, Associate Director—Federal Assistance, Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240, 202-343-4646.

## SUPPLEMENTARY INFORMATION:

## BACKGROUND

The Fish and Wildlife Service published a Notice in the March 18, 1975, FEDERAL REGISTER (Vol. 40, No. 53, pp. 12297-12298) to the effect that a status review of 29 fishes was being conducted. The leopard darter was one of those species. As a result of this Notice, responses were received from the Governors of Arkansas and Oklahoma, the only States in which this species is known to occur. One comment was received from a biologist. These comments and supportive documents have been reviewed and a summary published in the FEDERAL REGISTER. The comments were published July 6, 1976 (FR Vol. 41, No. 130, pp. 27735-27738), as part of the proposal to determine the leopard darter to be Threatened and portions of the Little River system to be its Critical Habitat. Comments on the proposed rulemak-

ing are summarized below. The information received as a result of the Notice of Review and the proposed rulemaking has been considered and is incorporated into the administrative record of this rulemaking. The information presently available indicates the leopard darter is a Threatened species as provided for by the Act.

#### SUMMARY OF COMMENTS AND RECOMMENDATIONS

Section 4(b)(1)(C) of the Act requires that a summary of all comments and recommendations received be published in the FEDERAL REGISTER prior to altering the List of Endangered and Threatened Wildlife and Plants. Comments received in response to the Notice of Review of the leopard darter (March 18, 1975, FR Vol. 40, No. 53, pp. 12297-12298) were summarized in the proposed rulemaking to determine the Critical Habitat and Threatened status for the darter (July 6, 1976, FR Vol. 41, No. 130, pp. 27735-27738). A total of 25 comments were received as a result of the above proposal.

Nineteen of the 25 comments received supported the proposal. These responses were from the State of Oklahoma, U.S. Forest Service, conservation organizations, professional biologists and interested individuals. A summary of these comments are presented below.

(1) The comments received from the Governor of Oklahoma indicated that he was in general agreement with the proposed Critical Habitat and Threatened Status for the leopard darter. While he agreed that Threatened Status seemed appropriate to the existing conditions, the situation is rapidly changing in the area inhabited by the darter and a further review of its classification may be needed in the near future. His primary concern was over the rapid loss of habitat for the darter due to a variety of factors. These factors were discussed in his response as follows: "While loss of habitat through large reservoir construction poses one of the most immediate threats to the survival of the leopard darter, there are a number of other factors at work in McCurtain County which may ultimately have more impact than the several dams proposed for the Little River watershed. McCurtain County currently ranks twelfth in growth among Oklahoma's 77 counties. Much of this has been the result of a major increase in activity by the timber industry, but there has also been much growth due to other economic development. McCurtain County will be significantly affected over the next few years by such factors as sewage effluents; solid waste; urban sprawl; new industries and their effluents; sediment from construction; overgrazed pastures; logging roads and

clearcuts (many large clearcuts are already present on the banks of streams within the leopard darter's range—including Glover Creek); chemical runoff from industries as well as agricultural and forestry operations; and gravel mining. There is also a significant increase in the number of people participating in various types of outdoor recreation in this part of the state. The combined impact of all of these factors acting at once cannot be ignored." We agree that the rapid increase in the development of this area does contribute to the threats of the leopard darter and its habitat.

The Governor agreed that the streams proposed for Critical Habitat were critical to the leopard darter. He did suggest that the Service give consideration to several creeks that are tributaries of the streams which were proposed as Critical Habitat. The Governor also pointed out an error in the description of Critical Habitat segment of the East Fork of Glover Creek. The upstream end of the Critical Habitat lies four miles NNE of the town of Behtel, Okla., not NNW as indicated in the proposed rulemaking in the FEDERAL REGISTER. This correction has been made in the final rulemaking.

(2) The U.S. Forest Service's comments indicated that they had no objection to the proposal for the leopard darter. They did express concern that failure to identify key tributaries within the Critical Habitat area might be detrimental to the conservation of the species. They also provided locality data for one record of the leopard darter in the Ouachita National Forest in Arkansas.

(3) Five conservation organizations responded to the proposal. The Ozark Society agreed with the proposed Threatened status and the proposed Critical Habitat. The remaining four organizations—Monitor, Inc., Oklahoma Chapter of the Sierra Club, Environmental Defense Fund, and the Oklahoma Wildlife Federation—agreed with the Critical Habitat delineation, however, all four suggested an Endangered status rather than the Threatened status as proposed.

While the situation is serious, we do not believe the data indicate that the leopard darter is likely to become extinct in the foreseeable future. As was indicated by the Governor of Oklahoma, however, the area inhabited by the leopard darter is undergoing rapid alteration, and the Service is planning to monitor closely the habitat and populations of the species in the future.

The six professional biologists who responded to the proposal supported Threatened status for the leopard darter. They also supported the Critical Habitat delineation with one exception. It was recommended by Dr.

Clark Hubbs, University of Texas Zoology Department, that the extreme lower part of Glover Creek, below or downstream from Oklahoma Highway 7, be deleted from the Critical Habitat area. Dr. Hubbs has established, through field work and observations, that leopard darters occurring in this section of the Glover Creek are probably waifs from the upstream population. We have, therefore, not included this area in the final determination.

Six individuals responded to our proposal expressing their support, but they did not include any biological data.

Of the 25 comments received, 6 expressed concern over the proposed listing and delineation of critical habitat. These responses were from the Southwestern Division of the Army Corps of Engineers, Red River Valley Association, Little River Conservation District, Idabel Chamber of Commerce and Agriculture, Broken Bow Chamber of Commerce, and one private individual.

The Army Corps of Engineers recommended that the rulemaking be suspended pending extensive studies by the U.S. Fish and Wildlife Service and that an environmental statement in compliance with NEPA be prepared.

The Corps of Engineers recommended that the proposal be suspended for the following reasons:

(a) The information published in the FEDERAL REGISTER of July 6, 1976, does not contain enough data to support the proposed determination. To base this decision on the comments of one biologist is questionable. This is substantiated by the fact that at each time our Tulsa District personnel have sampled waters in the Little River Basin, the known range of the leopard darter has expanded.

(b) The statement that: "Recent evidence (1974 and 1975) available to us, however, indicates that at least the population of the leopard darter occurring in Glover Creek, Okla., is relatively stable and secure . . ." apparently stems from Tulsa District's extensive environmental studies of the Glover Creek basin in conjunction with the proposed Lukfata Lake project. To our knowledge only one other recent extensive survey (Ethridge, unpublished masters thesis, "A Survey of the Fishes of the Cossatot River," Northeastern Louisiana State University, Monroe, La.) has been completed in the Little River stream system. If other stream areas within the basin were sampled as intensively and thoroughly as Glover Creek, evidence of secure and stable leopard darter populations in those areas would probably be found. The enclosed unpublished data (enclosure 1), recently collected by the Corps in the Mountain Fork, Upper Little River, and Cossatot River, lend credence to that.

(c) On page 27735 of the publication in the FEDERAL REGISTER the proposal states, "Historically the Leopard Darter, *Percina pantherina*, was found throughout most of the upland large stream habitat of the Little River Drainage of Arkansas and Oklahoma." That statement is not supported by actual collections (Eley et al. 1975). Factual data would limit the known range of *Percina pantherina* to the Upper Little River, Mountain Fork, Cossatot River, and Glover Creek. Potential habitat occurs throughout the tributaries of the Little River; however, the history of the leopard darter is meager.

(d) The proposal also states: "From its once widespread range in the Little River drainage of Oklahoma and Arkansas, the alteration of its habitat through impoundment and pollution has greatly reduced its distribution and numbers." The statement is erroneous and gives an incorrect impression of the known range and abundance of the leopard darter. The entire range of the leopard darter has never been fully studied. Therefore, it may or may not have been . . . once widespread . . . To our knowledge, data have not been published (Eley et al. 1975) that provided population estimates for this fish. Impoundments, existing and under construction, in the Little River Basin could result in only a nine percent reduction in the total potential habitat of *P. pantherina* (Eley et al. 1975). Data collection records (Eley et al. 1975) indicate the *P. pantherina* is more abundant and has a greater range than was previously believed. The recent collections also support that statement.

(e) The words "invariably" and "virtually," referring to alteration of the Cossatot River by Gillham Dam and the authorized Lukfata Lake on Glover Creek, are subjective and are not supported with evidence presented in the proposed rulemaking. The copy of the draft environmental assessment that was secured from your office in response to our request to review the environmental assessment, which was stated in the proposed rules to be on file, does not contain supportive evidence.

(f) On page 27736 under "Critical Habitat Determination" the proposal reads: "Based on information received from experts on this species in Arkansas and Louisiana plus data presented in a recent publication by Eley et al., entitled 'Current Status of the leopard darter, *Percina pantherina* (Southwestern Naturalist, Oct., 1975, Vol. 20, No. 3, pages 343-354), the following areas are proposed as Critical Habitat for the leopard darter, *Percina pantherina*." The experts should be named and the data on which they based their information should be listed. In our opinion, the reference to

Eley et al. has been misrepresented in your proposal. This document has been taken out of context and gives the reader a false impression of the findings in that paper. Dr. Eley states on page 353 of the paper, "Recent field studies using improved collection techniques indicate that *P. pantherina* is more abundant and has a greater range than was previously believed. Despite all of the potentially damaging results of man's activities, the present status of the leopard darter can best be described as rare or uncommon but certainly not immediately threatened with extinction."

(g) Recently, during the three-day study of the Cossatot River by Corps personnel, six specimens of *Percina pantherina* were discovered. Five of these were taken above Gillham Reservoir in Howard County, Ark., near the crossing of State Highway 4. The other specimen was taken from the Cossatot River 2 miles below Gillham Dam which is of special significance. Another specimen was collected in the fall of 1975 near Lockesburg, Ark., which is near the mouth of the Cossatot River. It will be interesting to follow up at these locations since the water releases at Gillham were designed to prevent disruption of the natural biology downstream. Followup studies would determine any possible effect of the lake's presence.

(h) Based on current data, the range and population of the leopard darter is greater than previously known. The assumption that . . . Gillham Dam will, in all probability, result in elimination of the species in that system . . . is incorrect based on collection data which show leopard darter populations above Broken Bow, Pine Creek, and Gillham Lakes. A population exists also below Gillham Dam which will probably not be seriously disrupted since water releases from the dam are designed to maintain the biology of the stream. Likewise, the authorized Lukfata Lake would not threaten the existence of the leopard darter, but would occupy only a small portion of the habitat. Based on what is believed to be the most extensive study in existence on the occurrence of the leopard darter, the Tulsa District of the Corps of Engineers has found no evidence that either the existing dams or the proposed Lukfata Dam threaten the existence of the species.

The director has considered the above comments and the attachment submitted by the Southwestern Division of the Army Corps of Engineers. The Director has also considered other information obtained by the Fish and Wildlife Service subsequent to the proposed rulemaking. The response to the Army Corps of Engineers' comments presented below is based on information presently available.

(a) The information published in the FEDERAL REGISTER proposal represents

a summary of information available on the status of the leopard darter. While only one professional biologist responded to the notice of review, the decision to propose this species as threatened was based on information from several sources. While Corps of Engineers biologists have found additional localities for the species, the localities have with two exceptions been within the known range of the species.

(b) The comments in the proposed rulemaking referring to the status of the Glover Creek population were based in part on the Tulsa District Army Corps of Engineers environmental studies. Other biologists working in the area have indicated that the Glover Creek leopard darter population was the strongest known. Other streams with appropriate habitat (Rolling Fork and Saline River) within the Little River drainage have been well sampled over the years; however, to date the leopard darter has never been taken in these streams.

(c) The introductory statement referring to the historical range of the leopard darter is correct and is supported by Army Corps of Engineers data. The factual data indicates it occurs in four of the six upland large streams tributary to the Little River. Data presently available indicates that potential habitat does not occur throughout all tributaries of the Little River. Many of the tributaries to the Little River are low gradient streams without suitable substrate to support populations of the leopard darter.

(d) The statement in the proposed rulemaking indicating that the distribution and numbers of the leopard darter have been reduced is correct. Impoundments in the Little River system, which destroyed known localities for this species, obviously reduced its habitat and numbers. The Army Corps of Engineers' comment that impoundments, existing and under construction in the Little River basin would effect only 12 percent of the potential habitat is misleading. We feel that many areas listed as potential habitat by Eley et al. 1975 should not be considered potential habitat since numerous samples taken in these areas have failed to demonstrate the species' presence. In some cases, streams listed as potential habitat bear little or no resemblance to those streams known to be inhabited by the leopard darter.

(e) Use of the words "invariably" and "virtually," referring to impacts of impoundment projects within the range of leopard darters, are appropriate. Use of these words is based, in part, on information presented by Eley et al., 1975, page 350, which indicates that: "In the past, impoundments constructed to provide flood control and to develop water resources have been responsible for most habitat

UMI

losses." This statement was made in reference to the leopard darter's habitat.

(f) In the process of status and critical habitat determinations, we generally do not name the individuals who contribute information relative to a particular species in the FEDERAL REGISTER publication. However, names of individuals and the type of information they contributed is available on request from the U.S. Fish and Wildlife Service/Office of Endangered Species, Washington, D.C. 20240. We do not feel that the utilization of distributional data in Dr. Eley's 1975 publication on the status of the leopard darter in our determination of critical habitat misrepresented the findings of that study.

(g) The three localities where the leopard darter was recently collected in the Cossatot River, two localities below the reservoir and one locality above the reservoir, should be monitored to evaluate long-term effects of the Gillham Reservoir. The leopard darter populations isolated in short segments of a stream above a reservoir are in a very precarious position. Evidence for this statement is found in a recent Arkansas Game and Fish Commission report of a fish kill on Mountain Fork River above Broken Bow Reservoir which killed fish along several miles of streams. Once a population above a reservoir is extirpated by pollution or other causes, there is no chance for repopulation from downstream areas because of the barrier formed by the dam and reservoir. Other threats to the isolated populations above reservoirs, which was mentioned in Dr. Eley's 1975 paper (page 351), are genetic drift and the change in the species composition and relative abundance of fishes in the streams above the reservoir.

(h) Extirpation of the leopard darter from areas above Gillham Reservoir was addressed in the above response. The conclusion reached concerning the status of the leopard darter population below Gillham dam is based on knowledge of past cases of darter populations below dams. Dr. Eley's 1975 paper discussed the fact that the multiple level outlets provide a capability for selective withdrawal which could lessen downstream impacts. However, he also points out that other operating priorities may prevent operation to maintain optimum downstream temperatures. He also discusses the possible changes in composition of fish populations below the dam which may adversely affect the leopard darter. We conclude that the area below the dams are probably not suitable habitat.

Comments from four organizations, the Red River Valley Association, Little River Conservation District, Idabel Chamber of Commerce and Agriculture and Broken Bow Chamber of

Commerce, all expressed concern over the proposal and objected to any further action on the proposal. None of the comments contained any biological data relative to the leopard darter which would support their position.

One citizen from the area responded objecting to the proposal.

CONCLUSION

After a thorough review and consideration of all the information available, the Director has determined that the leopard darter, *Percina pantherina*, is threatened due to one or more of the factors described in section 4(a) of the Act. This review amplifies and substantiates the description of those factors included in the proposed rulemaking (FEDERAL REGISTER Vol. 41, No. 130, July 6, 1976). Those factors were described as follows:

1. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Historically, the leopard darter, *Percina pantherina*, was found throughout most of the upland large stream habitats of the Little River drainage of Arkansas and Oklahoma. The habitat is typically clear, swift shoal areas in moderate to large streams. In these streams it is most frequently found in gravel areas with some sand intermixed. It also occurs along the borders of stream channels.

In the past, several of man's activities have resulted in the destruction or modification of habitat of the leopard darter. The single most important factor which has resulted in most habitat destruction has been the impoundments constructed in the Little River drainage. Other factors responsible for habitat alteration to a lesser extent include siltation from agricultural operations, commercial gravel operations, industrial and municipal effluents, and road construction. Both impoundment and pollution presently represent serious threats to the leopard darter.

From its once widespread range in the Little River drainage of Oklahoma and Arkansas, the alteration of its habitat through impoundment and pollution has greatly reduced its distribution and numbers. The present known distribution is Little River above Pine Creek Reservoir, Glover Creek, and Mountain Fork above Broken Bow Reservoir. Additionally, in a recent survey of the Cossatot River fishes, the leopard darter was found at two localities. These localities are below the recently completed Gillham Dam on the Cossatot River and should not be considered as supporting viable populations because upstream impoundments invariably result in the loss of populations occurring downstream.

The data presently available indicate that the leopard darter population in

Glover Creek is a relatively strong, viable population and thus the species is being proposed as threatened rather than endangered. Glover Creek in its present state has good water quality and offers good habitat for the leopard darter and numerous other stream-dwelling organisms. The proposed Lukfata Reservoir impoundment and subsequent alterations of Glover Creek, however, would drastically change the situation and virtually eliminate the leopard darter in this creek.

2. *Overutilization for commercial, sporting, scientific, or educational purposes.* Not applicable.

3. *Disease or predation.* Not applicable.

4. *The inadequacy of existing regulatory mechanisms.* Not applicable.

5. *Other natural or manmade factors affecting its continued survival.* Not applicable.

CRITICAL HABITAT

Section 7 of the Act, entitled "Inter-agency Cooperation" states:

The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the conservation of endangered species and threatened species listed pursuant to section 4 of this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of such endangered species and threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected States, to be critical.

An interpretation of the term critical habitat was published by the Fish and Wildlife Service and the National Marine Fisheries Service in the FEDERAL REGISTER of April 22, 1975 (40 FR 17764-17765). After a review of the available information for this species, the areas delineated below were found to qualify as critical habitat. Specifically, these areas were found to have environmental elements necessary for successful reproduction and growth.

The areas delineated do not necessarily include the entire critical habitat of this fish and modifications to critical habitat descriptions may be proposed in the future. In accordance with section 7 of the Act, all Federal departments and agencies would be required to insure that actions authorized, funded, or carried out by them do not result in the destruction or adverse modification of the critical habitat of the leopard darter.

All Federal departments and agencies shall, in accordance with section 7 of the Act, consult with the Secretary of the Interior with respect to any action which is considered likely to

affect critical habitat. Consultation pursuant to section 7 should be carried out using the procedures contained in the "Guidelines to Assist the Federal Agencies in Complying with section 7 of the Endangered Species Act of 1973" which have been made available to the Federal agencies by the Service.

EFFECTS OF THE RULEMAKING

In addition to the effects discussed above, the effects of these determinations and this rulemaking include, but are not necessarily limited to, those discussed below.

Endangered species regulations already published in Title 50 of the Code of Federal Regulations set forth a series of general prohibitions and exceptions which apply to all endangered species. These regulations are found at 50 CFR 17.21 and are summarized below.

With respect to the leopard darter in the United States, all prohibitions of section 9(a)(1) of the Act, as implemented by 50 CFR 17.21, would apply. These prohibitions, in part, would make it illegal for any person subject to the jurisdiction of the United States to take, import or export, ship in interstate commerce in the course of a commercial activity, or sell or offer for sale this species in interstate

or foreign commerce. It also would be illegal to possess, sell, deliver, carry, transport, or ship any such wildlife which was illegally taken. Certain exceptions would apply to agents of the Service and State conservation agencies.

Regulations published in the FEDERAL REGISTER of September 26, 1975 (40 FR 44412), codified at 50 CFR 17.22 and 17.23, provided for the issuance of permits to carry out otherwise prohibited activities involving endangered or threatened species under certain circumstances. Such permits involving endangered species are available for scientific purposes or to enhance the propagation or survival of the species. In some instances, permits may be issued during a specified period of time to relieve undue economic hardship which would be suffered if such relief were not available.

NATIONAL ENVIRONMENTAL POLICY ACT

An environmental assessment has been prepared in conjunction with this action. It is on file in the Service's Office of Endangered Species, 1612 K Street NW., Washington, D.C. 20240, and may be examined during regular business hours or can be obtained by mail. The action taken in determining the leopard darter to be a threatened

species and portions of selected streams of the Little River drainage in Arkansas and Oklahoma is not a major Federal action which would significantly affect the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, thus it does not require an environmental impact statement.

The primary author of this rulemaking is Dr. James D. Williams, Office of Endangered Species, 202-343-7814.

AUTHORITY

These amendments are prepared under sections 4 and 7 of the Endangered Species Act of 1973 (16 U.S.C. 1533, 1536).

REGULATIONS PROMULGATION

Accordingly, Part 17, Subchapter B of Chapter I, Title 50 of the Code of Federal Regulations, is amended as set forth below:

1. Section 17.11 is amended by adding, in alphabetical order, under Fishes, the following to the list of animals:

§ 17.11 Endangered and threatened wildlife.

SPECIES AND RANGE

Common name	Scientific name	Population	Known distribution	Portion of range where threatened or endangered	Status	When listed	Special rules
Fishes: Darter, leopard .....	<i>Percina pantherina</i> .....	NA	U.S.A. (Arkansas, Oklahoma).	Entire.....	T	31	17.44(d)

2. Section 17.44 is amended by adding a new § (d) as follows:

§ 17.44 Special rules—fishes.

(d) Leopard darter (*Percina pantherina*).

(1) All provisions of § 17.31 apply to this species, except that it may be taken in accordance with applicable State law.

(2) Any violation of State law will also be a violation of the Act.

3. Also, the Service amends § 17.95(e) Fishes by adding critical habitat of the leopard darter after that of the slackwater darter as follows:

§ 17.95 Critical habitat—fish and wildlife.

(e) Fishes.

LEOPARD DARTER  
(*Percina pantherina*)

Oklahoma. McCurtain and Pushmataha Counties. Little River, main

channel in Pushmataha County from mouth of Cloudy Creek (T. 3 S.; R. 20 E.; Section 3) upstream to the Pushmataha-Le Flore County line. Black Fork Creek in Pushmataha County from its junction with Little River (T. 1 S.; R. 20 E.; Section 22) upstream to Oklahoma Highway 144 crossing (T. 1 S.; R. 19 E.; Section 12). Glover Creek, main channel in Pushmataha County from Oklahoma Highway 7 crossing (T. 5 S.; R. 23 E.; Section 28) upstream to the junction of the East Fork and West Fork of Glover Creek. East Fork of Glover Creek, main channel in Pushmataha County from its junction with the West Fork Glover Creek (T. 3 S.; R. 23 E.; Section 7) upstream to 4 air miles north-northeast of the community of Bethel (T. 2 S.; R. 24 E.; Section 5). West Fork Glover Creek, main channel in Pushmataha County from its junction with the East Fork Glover Creek upstream to the community of Battiest (T. 2 S.; R. 23 E.; Section 7). Mountain Fork Creek, main channel in McCurtain County, from

mouth of Boktukola Creek (T. 2 S.; R. 25 E.; Section 9), 6 air miles southwest of Smithville, upstream to the Oklahoma-Arkansas State line. Arkansas. Polk County. Mountain Fork Creek, main channel from the Arkansas-Oklahoma State line upstream to the community of Mountain Fork (T. 1 S.; R. 32 W.; Section 29).

## RULES AND REGULATIONS

CRITICAL HABITAT FOR THE LEOPARD  
DARTER

NOTE.—The Department of the Interior has determined that this document does not contain a major action requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

Dated: January 18, 1978.

KEITH M. SCHREINER,  
Acting Director,  
Fish and Wildlife Service.

(FR Doc. 78-2182 Filed 1-26-78; 8:45 am)

## proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[3410-15]

## DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

[7 CFR Part 1701]

## ELECTRIC PROGRAM

Proposed Revision of REA Bulletin on Power  
Supply Surveys

AGENCY: Rural Electrification Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Rural Electrification Administration (REA) proposes to revise REA Bulletin 111-3, Power Supply Surveys, issued August 4, 1969. This REA bulletin sets forth REA policies with regard to Power Supply Surveys and certifications thereto by the Administrator in relation to the approval of loans and loan guarantees for certain generation and/or transmission facilities. The circumstances that created the need for this action arose from Senate Report 95-296 requesting that REA streamline its Power Supply Survey procedure. The intended effect of this action is to limit REA's Power Supply Surveys only to those cases where the facilities to be constructed would displace existing contractual arrangements with a private power company.

DATE: Public comments must be received by REA on or before February 27, 1978.

ADDRESS: Interested persons may submit written data, views or comments to the Power Survey Officer, Rural Electrification Administration, Room 3863, South Building, U.S. Department of Agriculture, Washington, D.C. 20250. All written submissions made pursuant to this notice will be made available for public inspection in the Office of the Power Survey Officer during regular business hours.

FOR FURTHER INFORMATION  
CONTACT:

Mr. Richard B. Bulman, Power Survey Officer, Rural Electrification Administration, Room 3863, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-5755.

SUPPLEMENTARY INFORMATION: Notice is hereby given that pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et. seq.), REA proposes to revise REA Bulletin 111-3.

A copy of the proposed revised REA Bulletin 111-3 may be secured in person or by written request from the Power Survey Officer. The text of the proposed revision is as follows:

## REA BULLETIN 111-3

## SUBJECT: POWER SUPPLY SURVEYS

I. Purpose. This bulletin sets forth REA policy with regard to Power Supply Surveys and certifications thereto by the Administrator in relation to the approval of loans and loan guarantees for certain generation and/or transmission facilities.

II. Policy—A. Requirement for Power Supply Surveys. A Power Supply Survey is required prior to acceptance by REA of applications for loans or loan guarantees for generation and/or major transmission where the facilities to be constructed would displace existing contractual arrangements with a private power company. No such application will be accepted for consideration by REA unless (a) a Power Supply Survey has been completed, or (b) it is determined by the Administrator that completion of the Survey requires full review of the application.

Where a Survey is required, the applicant shall provide a full description of existing contractual arrangements for power supply, a statement of any special problems, a general summary of power supply needs, copies of any proposals made by the existing supplier, and a summary of negotiations with the existing supplier.

B. Conduct of Survey. 1. The Survey shall be so conducted as to determine the basis upon which the existing supplier is prepared to cooperate in the development of an assured source of power financed with the proposed loan or loan guarantee.

2. If arrangements satisfactory to the Administrator under (1) above are not available and the existing supplier has made a proposal for continuing the existing supply arrangements, the Survey shall determine whether the proposal is reasonable for purposes of the Rural Electrification Act.

3. If the Administrator finds such proposal unreasonable for purposes of the Rural Electrification Act, REA will advise the existing supplier wherein the proposal is unreasonable and endeavor to have such proposal made reasonable. The REA borrower or potential borrower shall be made a party to any negotiations between REA and such power supplier. When necessary to avoid dilatory tactics or protracted delays, the Administrator shall advise the parties in such cases of a definite time limit for negotiations under the Survey, and final cutoff date for proposals which are to be considered in evaluation of the application.

C. Certifications Required When Survey Procedure Results in a Loan or Loan Guarantee by REA. No loan or loan guarantee for generation and/or transmission facilities will be approved except in compliance with all applicable bulletins and, if a Power Supply Survey is required pursuant to paragraph II-A, unless certification is made by

the Administrator to the Secretary of Agriculture that the loan or loan guarantee has been approved after completion of a Survey that shows that the loan or loan guarantee is (a) needed to provide an assured source of power which has been developed in cooperation with the existing power supplier; or (b) needed because the proposal from the existing supplier to provide the facilities or service to be financed was found to be unreasonable for the purposes of the Rural Electrification Act, the supplier was advised of the provisions that made its proposal unreasonable, REA attempted to have such proposal made reasonable, and the existing supplier had failed or refused to do so within the time set by the Administrator. A loan or loan guarantee requiring a Power Supply Survey shall also be certified to the Comptroller General, the Senate and House of Representatives of the United States, as directed by the respective bodies, if it (i) exceeds \$10,000,000 and is certified pursuant to (a) above, or (ii) is certified pursuant to (b) above. Such additional certifications shall be accompanied by the following information:

1. The name and address of the applicant borrower and the date of the application.
2. Description and estimated cost of the proposed generation facilities. Indicate if the proposed facilities are the initial or additional unit or units of a plant comprised of one or more units.
3. Description and estimated cost of proposed transmission facilities, including any immediate or future plans to interconnect with other transmission systems.
4. Description of any long-range plans the applicant may have for construction of additional generation and transmission facilities and the estimated cost of the planned facilities.
5. Comparison of the estimated costs of generation by the applicant borrower with the cost of power available from the existing supplier, including the final offer by the supplier including terms and conditions offered to meet applicant's long-term energy needs.
6. Summary of the efforts made by the applicant and by REA to obtain the applicant's power and energy requirements from existing power suppliers and the reasons why such efforts have not been successful.
7. Explanation of the applicant's reasons for seeking an REA loan or loan guarantee.
8. The amount of electric energy which the applicant will cease to purchase from the existing supplier upon construction of the generating plant for which REA financing is being sought.
9. Explanation of the extent to which the feasibility of the requested loan or loan guarantee for generation and transmission facilities depends upon the use of a portion of the facilities by others (including Federal power marketing agencies).
10. Details of the applicant's plans to sell or otherwise make available any of the power and energy from the proposed generation facilities to other (including Federal power marketing agencies).

## PROPOSED RULES

11. Names of State agencies and commissions having jurisdiction over the applicant borrower.

Dated: January 20, 1978.

DAVID A. HAMIL,  
Administrator.

## PUBLIC INFORMATION

REA Specifications for Enclosures Containing Protective Equipment With Exposed Energized Parts

AGENCY: Rural Electrification Administration.

ACTION: Proposed rule.

SUMMARY: REA proposes to revise REA Specification U-7, REA Specifications for Enclosures Containing Protective Equipment With Exposed Energized Parts. This revision is intended to bring REA specifications up to date with existing standards publications. Because of the extent of the revision, the entire specification is published below. On issuance of REA Specification U-7, Appendix A to Part 1701 will be modified accordingly.

DATE: Public comments must be received by REA no later than February 27, 1978.

ADDRESS: Interested persons may submit written data, views, comments to the Director, Power Supply and Engineering Standards Division, Rural Electrification Administration, Room 3304, South Building, U.S. Department of Agriculture, Washington, D.C. 20250. All written submissions made pursuant to this notice will be made available for public inspection in the Office of the Director, Power Supply and Engineering Standards Division during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Mr. Rowland C. Hand, Sr., Director, Power Supply and Engineering Standards Division, Rural Electrification Administration, Room 3304, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, telephone number 202-447-4413.

SUPPLEMENTARY INFORMATION: Notice is hereby given that pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), the text of the proposed revision of REA Specification U-7 is as follows:

REA SPECIFICATIONS FOR ENCLOSURES CONTAINING PROTECTIVE EQUIPMENT WITH EXPOSED ENERGIZED PARTS

Spec. No. U-7

I. Scope.—These specifications cover enclosures containing protective equipment

with exposed energized parts for use on underground distribution systems of REA borrowers.

II. General.—The enclosures furnished under these specifications shall conform in all respects to the following requirements: Enclosures shall be tamper-resistant and designed so that no wires or other objects can be inserted into vents, joints, or other openings to contact energized components.

III. Material.—Material shall be a minimum of 14 gauge sheet steel or equivalent. Corner angles and channels shall be 12 gauge steel or equivalent.

IV. Grounding.—All enclosures shall be furnished with grounding connectors equivalent to item bu of REA Bulletin 43-5.

V. Finish.—All metallic surfaces shall be hot dip galvanized in accordance with ASTM Specification A153, A525 or mill galvanized 2½ ounce. A rust-resistant primer and finish coat of paint shall be applied and shall be free of runs, sags and blisters.

VI. Locking.—In addition to the regular locking provisions, all doors shall be secured by recessed, captive, penta-head bolts. The bolt arrangement shall be in accordance with REA Drawing A-3759 which is part of these specifications.

VII. Anchoring.—All enclosures shall have provisions inside the enclosure for anchoring each corner to the mounting pad.

VIII. Dead Front.—All electrical equipment enclosures shall have no exposed energized parts when the enclosure door is open. This can be accomplished by using a separate barrier between the door and energized equipment. If other access panels are removable without first opening the door, a separate barrier shall be provided.

A copy of the proposed revision of Drawing A-3759 may be secured in person or by written request from the Director, Power Supply and Engineering Standards Division.

Dated: January 23, 1978.

RICHARD F. RICHTER,  
Assistant Administrator—  
Electric.

## REA SPECIFICATIONS FOR SECONDARY PEDESTALS

Proposed Revision of REA Specification U-6

AGENCY: Rural Electrification Administration.

ACTION: Proposed rule.

SUMMARY: REA proposes to revise REA specification U-6, REA specifications for secondary pedestals. This revision is intended to bring REA specifications up to date with existing standards publications. Because of the extent of the revision, the entire specification is published below. On issuance of REA specification U-6, appendix A to Part 1701 will be modified accordingly.

DATE: Public comments must be received by REA no later than February 27, 1978.

ADDRESS: Interested persons may submit written data, views, comments to the Director, Power Supply and Engineering Standards Division, Rural Electrification Administration, Room 3304, South Building, U.S. Department of Agriculture, Washington, D.C. 20250. All written submissions made pursuant to this notice will be made available for public inspection in the Office of the Director, Power Supply and Engineering Standards Division, during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Mr. Rowland C. Hand, Sr., Director, Power Supply and Engineering Standards Division, Rural Electrification Administration, Room 3304, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, telephone No. 202-447-4413.

SUPPLEMENTARY INFORMATION: Notice is hereby given that pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), the text of the proposed revision of REA Specification U-6 is as follows:

## REA SPECIFICATION FOR SECONDARY PEDESTALS—SPEC. NO. U-6

I. Scope. These specifications cover secondary pedestals for use on REA underground distribution systems.

II. General. The pedestals furnished under these specifications shall conform in all respects to the requirements of these specifications. Pedestals shall be tamper-resistant and designed so that no wires or other objects can be inserted into vents, joints, or other openings to contact energized components.

III. Material. The pedestals may be fabricated may be fabricated of metallic or non-metallic material. Metallic pedestals shall be of 14 gage sheet steel or equivalent (minimum). Corner angles and channels shall be 12 gage steel or equivalent.

Fiber reinforced or other plastic materials shall be of a high impact type (ASTM D256); it shall be flame retardant (ASTM D635 or equivalent) and resistant to ultraviolet radiation.

IV. Grounding. All metallic pedestals shall be furnished with grounding connectors equivalent to item bu of REA Bulletin 43-5.

V. Finish. All metallic surfaces shall be hot dip galvanized in accordance with ASTM Specification A153, A525, or mill galvanized 2½ ounces. A rust-resistant primer and finish coat of paint shall be applied and shall be free of runs, sags, and blisters.

Fiber reinforced plastic shall be weather and fade resistant. All pedestals shall be made in a workmanlike manner. They shall be reasonably smooth and free from sharp projections.

VI. Locking. In addition to the regular locking provisions, all doors shall be secured by recessed, captive, penta-head bolts. The bolt arrangement shall be in accordance with REA Drawing A-3759 which is a part of these specifications.

VII. Anchoring. All pedestals shall have provisions for mounting on a power pedestal stake (item U gr) or other approved anchoring device.

## PROPOSED RULES

A copy of the proposed revision of Drawing A-3759 may be secured in person or by written request from the Director, Power Supply and Engineering Standards Division.

Dated: January 23, 1978.

RICHARD F. RICHTER,  
Assistant Administrator—  
Electric.

## REA SPECIFICATIONS FOR SECTIONALIZING AND SINGLE-PHASE TRANSFORMER ENCLOSURES

Proposed Revision of REA Specification U-4

AGENCY: Rural Electrification Administration.

ACTION: Proposed rule.

SUMMARY: REA proposes to revise REA Specification U-4, REA Specifications for Sectionalizing and Single-Phase Transformer Enclosures. This revision is intended to bring REA specifications up to date with existing standards publications. Because of the extent of the revision, the entire specification is published below. On issuance of REA Specification U-4, Appendix A to Part 1701 will be modified accordingly.

DATE: Public comments must be received by REA no later than February 27, 1978.

ADDRESS: Interested persons may submit written data, views, comments to the Director, Power Supply and Engineering Standards Division, Rural Electrification Administration, Room 3304, South Building, U.S. Department of Agriculture, Washington, D.C. 20250. All written submissions made pursuant to this notice will be made available for public inspection in the Office of the Director, Power Supply and Engineering Standards Division during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Mr. Rowland C. Hand, Sr., Director, Power Supply and Engineering Standards Division, Rural Electrification Administration, Room 3304, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, telephone number 202-447-4413.

SUPPLEMENTARY INFORMATION: Notice is hereby given that pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), the text of the proposed revision of REA Specification U-4 is as follows:

REA SPECIFICATIONS FOR SECTIONALIZING AND SINGLE-PHASE TRANSFORMER ENCLOSURES

Spec. No. U-4

I. Scope.—These specifications cover enclosures for modular sectionalizing equipment and single-phase transformers for use on REA underground distribution systems.

II. General.—The enclosures furnished under these specifications shall conform in all respects to the following requirements. Enclosures shall be tamper-resistant and designed so that no wires or other objects can be inserted into vents, joints, or other openings to contact energized components.

III. Material.—The enclosures may be fabricated of metallic or non-metallic material. Non-metallic enclosures may only be used in areas accessible only to qualified persons. Metallic enclosures shall be of 14 gauge sheet steel or equivalent (minimum). Corner angles and channels shall be 12 gauge steel or equivalent. Fiber reinforced or other plastic materials shall be of a high impact type (ASTM D256); it shall be flame retardant (ASTM D635 or equivalent) and resistant to ultraviolet radiation.

IV. Grounding.—All metallic enclosures shall be furnished with grounding connectors equivalent to item bu of REA Bulletin 43-5.

V. Ventilation.—Enclosures shall have adequate louvers to permit circulation of air around the equipment. Vents shall be properly shielded and guarded to prevent objects from being pushed into energized components.

VI. Finish.—All metallic surfaces shall be hot dip galvanized in accordance with ASTM Specification A153, A525 or mill galvanized 2½ ounce. A rust-resistant primer and finish coat of paint shall be applied and shall be free of runs, sags and blisters. Fiber reinforced plastic shall be weather and fade resistant. All enclosures shall be made in a workmanlike manner. They shall be reasonably smooth and free from sharp projections.

VII. Locking.—In addition to the regular locking provisions, all doors shall be secured by recessed, captive, penta-head bolts. The bolt arrangement shall be in accordance with REA Drawing A-3759 which is a part of these specifications.

VIII. Anchoring.—All enclosures shall have provisions inside the enclosure for anchoring each corner to the mounting pad.

IX. Dead Front.—All transformers and other electrical equipment enclosures shall have no exposed energized parts when the enclosure door is open. This can be accomplished by using a separate barrier between the door and energized equipment. If other access panels are removable without first opening the door, a separate barrier shall be provided. On transformer enclosures, the high voltage side shall be equipped to receive elbow terminators. The bushings may be located either on the transformer or the barrier. The low voltage side shall be equipped with provisions for mounting completely insulated secondary terminals. These may also be located on the transformer or the barrier.

A copy of the proposed revision of Drawing A-3759 may be secured in person or by written request from the Director, Power Supply and Engineering Standards Division.

Dated: January 23, 1978.

Food Safety and Quality Service

[7 CFR Part 2853]

## MEATS, PREPARED MEATS, AND MEAT PRODUCTS (GRADING CERTIFICATION, AND STANDARDS)

NOTE.—This document originally appeared in the FEDERAL REGISTER for Monday, January 23, 1978. It is reprinted in this issue to meet requirements for publication on an assigned day of the week. (See the inside cover of this issue for information about agencies publishing on assigned days of the week.)

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule will revise certain official U.S. standards for grades of meat and the related meat grading regulations and a companion rule proposed under 9 CFR Parts 316 and 317 will revise Federal meat inspection regulations pertaining to marking and labeling requirements. The proposed changes provide that meat will be graded only in the form of carcasses or sides and in the plant in which the animals were slaughtered. Also, certain trimming procedures and chilling conditions necessary for carcasses to be graded are clarified. The changes proposed in meat inspection regulations specify that all carcasses, parts, and meat of cattle and sheep must be identified by USDA quality grade or as ungraded. The proposed changes are designed to make grade determinations more accurate and uniform and less subject to fraud and to provide more complete grade information to consumers.

DATE: Comments must be received on or before May 1, 1978.

ADDRESS: Written comments to: Hearing Clerk, Room 1077 South, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR ADDITIONAL INFORMATION ON COMMENTS, SEE SUPPLEMENTARY INFORMATION.

FOR FURTHER INFORMATION CONTACT:

Jerry Goodall, Acting Director, Meat Quality Division, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-4727.

SUPPLEMENTARY INFORMATION: The proposal under this part defines a beef carcass precisely than formerly; specifies that meat from cattle and sheep will be graded only as carcasses or sides and only in establishments in which the animals are slaughtered; specifies that a beef carcass shall be presented for grading only after it has been sufficiently chilled so that its

physical attributes (intramuscular fat or marbling; color, texture, and firmness of the lean; etc.) are developed adequately to permit an accurate grade determination; clarifies the conditions under which quality and yield grade designation marks may be removed from officially graded beef; specifies that to be eligible for grading, a beef carcass shall have the kidneys and the kidney, pelvic, and heart fat removed from it prior to presentation for grading; and lastly, specifies that a beef carcass shall have been ribbed for at least 30 minutes prior to the time it is presented for grading.

In addition, this proposal, in several of its parts, solicits specific comments and facts from all interested and affected parties on additional conditions that could be imposed upon the meat grading system but which the Department desires further information as to their beneficial and/or adverse affects upon producers, packers, and consumers.

The changes proposed in this document, as well as those for which additional information is being sought, are intended to: (a) assist producers of meat animals in receiving a price for live animals that is commensurate with the retail value of the meat that an accurate grade designation predicts; (b) assist consumers in making informed value judgments in the marketplace so as to avoid having to pay more for meat than the true value of the meat purchased; (c) assist Federal graders in making more accurate grade determinations by better controlling those factors that contribute to variation in the present system; (d) assist supervisors and managers of Federal meat grading service to operate the service more efficiently; and (e) minimize the opportunity to defeat or circumvent the grading system by providing greater specificity and delineation to the system.

The change in meat inspection regulations requires that carcasses, parts, and meat of cattle and sheep that have been USDA graded must retain the grademarks until sold to the consumer and meat that have not been USDA graded must be marked or labeled "U.S. UNGRADED." The specific changes in inspection regulations (9 CFR Parts 316 and 317) appear elsewhere in this issue of the FEDERAL REGISTER.

**Comments.** Changes proposed in meat grade standards and meat grading and labeling regulations are expected to have a significant impact on all parts of the livestock and meat industry and on the consuming public. It is anticipated that there may be widespread interest in the proposed changes. In order that all those affected have ample opportunity to comment, oral as well as written views, data, or arguments will be received on

the proposal. In this regard, a public hearing will be held on the proposed changes contained in this notice and those concerning inspection regulations appearing elsewhere in this issue of FEDERAL REGISTER. Hearing sessions will be held at locations beginning on the dates listed below:

1. March 16, 1978—Washington, D.C. 20250, Jefferson Auditorium, S. Agriculture Bldg., 14th & Independence SW.

2. March 21, 1978—San Francisco, Calif. 94111, Custom's House, 555 Battery St., Room 503.

3. March 23, 1978—Omaha, Nebr. 68102, Omaha Hilton Hotel, 1610 Dodge Street.

4. March 28, 1978—Atlanta, Ga. 30303, Federal Office Bldg., Room 556, 275 Peachtree Street NE.

Each day's session of the hearing will commence at 9:30 a.m., local time, unless the presiding official otherwise specifies during the course of the hearing. Any of the sessions may be continued beyond 1 day if necessary. Persons who wish to be heard are requested to notify the Administrator, Food Safety and Quality Service, Washington, D.C. 20250, within 20 days of the date of publication of this notice stating the session at which they wish to present a statement and how much time they will need to present the statement. However, any person who wishes to be heard at the hearing will be afforded opportunity to be heard, whether or not that person has given such advance notice.

In addition, all persons who desire to submit written date, views or arguments in connection with this proposal and/or the proposed changes in meat labeling regulations (9 CFR Parts 316 and 317) shown elsewhere in this issue of the FEDERAL REGISTER, are invited to file such material, in duplicate, with the Hearing Clerk, Room 1077 South, United States Department of Agriculture, Washington, D.C. 20250, on or before May 1, 1978. Comments must be signed and include the address of the sender and should bear a reference to the date and page number of this issue of the FEDERAL REGISTER. Also, since the comments will be considered in the resolution of these proposals, they should include definitive information which explain and support the sender's views. All written submissions and transcripts of the comments at the public hearing will be made available for public inspection at the Office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

**Background.** The USDA meat grading and inspection programs and the national meat marketing system have been plagued in recent years with bribery and corruption and with merchandising practices which may tend to mislead consumers and other purchasers of meats. The changes pro-

posed by these revisions in grade standards and grading regulations (7 CFR Part 2853) are a part of USDA's efforts to improve the integrity of the systems and to increase the dependence which the general public can place in the Federal grading and inspection programs. The changes are needed because of several instances of bribery and other corruptive practices which have occurred in recent years involving meatpackers and USDA meat graders and/or meat inspectors. In 1974-76, for example, 17 firms, 36 meatpacking officials, and 17 USDA employees (who were relieved of official duties upon indictment and subsequently discharged from employment) were convicted of bribery and related offenses in California and Arizona. Since early 1975 it has been necessary to take administrative actions against packers in South Dakota, Iowa, Kansas, Texas, and California because of the illegal removal of grade stamps from meats. In this same period, another USDA agency, the Packers and Stockyards Administration, issued four formal complaints and assisted State or local officials with 10 other complaints, many of which were related in whole or part to violations or misrepresentation of USDA meat grades.

Changes in marking and labeling requirements in meat inspection regulations (9 CFR Parts 316 and 317) appear to be necessary because of the widespread use of merchandising practices by retailers, home freezer purveyors, and others that can confuse consumers and other purchasers as to the quality or yield grade and true value of beef and other meats.

This proposed rule and the companion rule proposed in the Federal meat inspection regulations, also discussed in this section, would revise official U.S. standards for grades of meat and related meat grading regulations and would revise marking and labeling requirements for such meats so that the opportunities for actions and practices such as those outlined above would be minimized. These proposals, if adopted, could eliminate certain elements of subjectivity in meat grading and some possible causes of identifying cuts of meat with inappropriate grades; could increase the efficiency of marketing meat items; and would initiate new rules regarding identification of meat (except pork, which is not federally graded) and the retention of grade identification on all beef carcasses and cuts. In addition to the corrective measures, these changes could help make Federal grades more useful to and more easily understood by producers, processors, and particularly consumers.

The Federal grading of meat is a voluntary service which was originally designed to facilitate marketing. The

cost of the service is paid for by fees collected from those who request that meat be graded.

During the 50 years that the service has been provided by the Federal Government, the demand for Federal meat grading has steadily increased. Based on estimates of the number of fed cattle produced in 1976 by USDA's Economics, Statistics, and Cooperatives Service and the quantities of beef graded by FSQS' meat grading service, it is estimated that nearly three-fourths of the fed beef produced is federally graded. Most of the fresh beef cuts reaching consumers through retail stores are from fed beef. Consumers have come to depend upon the Federal meat grade designation as the primary tool for making comparative cost and value judgments in the purchase of meat at the retail level.

This consumer dependence upon and desire for Federal grade designations of meat at the retail level has been largely responsible for the widespread use of the Federal meat grading service by the meatpacking and processing industries. This same consumer acceptance of and desire for grade designations on retail cuts of meat has led to the widespread and common use of meat grades in the promotion and advertising of meats at the retail level. Since Federal grades are used extensively as the basis for trading between meatpackers and others, and relatively wide spreads in price frequently result between grades, it is necessary that Federal meat grading be conducted as accurately and uniformly as possible in order to achieve equity among all persons affected by grades, from the producer to the consumer.

Because of the increased demand for Federal meat grading and its general acceptance by both industry and consumers, it has been necessary to make the meat grading service as widely available as possible while at the same time attempting to meet the needs of both industry and the consumer. In the past, meat has been graded for quality (a prediction of the palatability of the lean meat in a carcass) and for yield (a prediction of the amount of retail cuts that may be expected from a carcass) in a number of forms and geographic locations other than as a carcass or at the establishment of slaughter, respectively. Under the current meat grading regulations, meat may be graded as carcasses, quarters, and wholesale cuts in the establishment of slaughter as well as in establishments that are further down the distribution and/or processing and marketing line. These practices were adopted for the reasons cited above but they have resulted in: (1) inaccuracies in grading, (2) difficulties in supervising and managing the grading service, (3) increases in the cost of grading, (4) representations which

may mislead or confuse consumers about the quality grade of meat, (5) producers of meat animals being paid a price which may not reflect the true value of their animals marketed for slaughter, and (6) bribery and fraudulent practices on the part of some Federal graders and/or operators of packing plants.

Presently, some beef is offered for grading when certain physical attributes of the carcass (grading factors) that are used for determining grade (e.g. marbling, color, texture, and firmness of the lean) are not developed to the extent necessary to permit an accurate grade determination to be made. This practice results in graders having to reevaluate many carcasses for grade with resultant increases in the cost of grading. The proposed procedures require that grade factors be developed to the extent that an accurate grade determination can be made. The development of these factors is a function of the conditions under which carcasses are chilled and the length of time between ribbing of the carcass and the presentation of the carcasses for grading. Therefore, it is proposed that a requirement of 30 minutes elapsed time between ribbing and presentation for grading be imposed as a means of assuring that grade factors are adequately developed in a carcass prior to its presentation for grading. This requirement should improve the condition of carcasses so that accurate grade designations can be made on increased numbers of carcasses when first offered for grading. The proposed requirement should: (1) make the beef quality grades more accurate and uniform, (2) make it possible for supervisors to more effectively review graders' work, (3) expedite the handling of carcasses, and (4) decrease the overall cost of grading. However, also requiring that carcasses be chilled for no more than a specified time so as to attain adequate development of time and temperature dependent grade factors in the ribeye may serve to further reduce the variables that affect an accurate grade designation and could lead to considerable savings of energy. In connection with a possible chill time and temperature requirement, which is not specified in this proposal, the Department requests comments and facts from all interested and affected parties that would assist in making a decision relative to the merits of mandatory time and temperature requirements for grading.

The proposed requirement that the kidney and all kidney, pelvic, and heart fat be removed from carcasses before they are offered for grading should simplify the determination of yield grade and increase the uniformity of application of the yield grade standards, thereby making the yield

grades a more useful means of assuring that producers of animals receive payment and consumers expend payment proportionate to the value offered or received.

Under the present regulations, carcasses can be graded with all of the kidney, pelvic, and heart fat left in place or with some or all of these fats removed. There is little difference in the accuracy of the yield grades for predicting the yield of retail cuts from carcasses in which the kidney, pelvic, and heart fat has been left in place or removed. However, removal of these fats can have a considerable effect on the yield of retail cuts from individual quarters and wholesale cuts. For example, consider two carcasses, both of Yield Grade 3.5, but with carcass No. 1 graded prior to removal of kidney, pelvic, and heart fat and carcass No. 2 graded after removal of these fats. The only reason that carcass No. 2 would qualify as a Yield Grade 3.5 would be because of the removal of kidney, pelvic, and heart fat. Otherwise, carcass No. 2 would have been at least Yield Grade 4.0. Further, because the bulk of these fats are located in the hindquarter, the forequarters of the two carcasses would be very different in fatness and yield of retail cuts. The forequarter of carcass No. 2 is much more typical of a Yield Grade 4 than of Yield Grade 3. Requiring the kidney, pelvic, and heart fat to be removed will eliminate such variations in yields of trimmed retail cuts from individual quarters and wholesale cuts. In recognition of such differences, USDA now identifies carcasses graded after removal of kidney, pelvic, and heart fat differently than carcasses graded with these fats in place. However, the significance of this difference in identification is not fully understood by purchasers of beef, especially small retailers and consumers who buy quarters or wholesale cuts. Removal of these internal fats prior to grading should eliminate this source of confusion and make it possible to uniformly grade and mark beef for yield grade.

Since the emphasis placed on kidney, pelvic, and heart fat in determining yield grade essentially reflects the effect of the weight of this fat on the predicted yields of retail cuts from a carcass, the elimination of these fats as factors in the yield grade equation does not require any change in the emphasis placed on the three remaining grade factors. Also, in order that there will be a minimum of confusion to graders, producers, packers, retailers, and others in adapting to the revised standards, each proposed yield grade would continue to include carcasses with the same general combinations of external fat thickness, area of ribeye and carcass weight as now included in each of these grades.

The yield of retail cuts from a carcass of each yield grade should be sub-

stantially increased under the proposed standards. This is because the carcass weight would be decreased by the weight of the kidney and the kidney, pelvic, and heart fat that has been removed, but the weight of the retail cuts would remain the same. Consequently, carcasses of a given yield grade would be worth more per pound than carcasses of that yield grade under the present standards. However, the total value received by a producer is not expected to change significantly because the higher carcass price per pound would be largely offset by the lighter weight of the carcass. At the same time, it is reasonable to expect that certain advantages would accrue to consumers through these changes. For example, the kidney, pelvic, and heart fat would be used more efficiently at the point of slaughter; these fats would not have to be chilled, thus saving energy; and they would not be included as part of a carcass' shipping weight, thus decreasing shipping costs which should be reflected in somewhat lower retail prices. Also, it would be possible to utilize more of these fats for edible purposes than is permitted under present industry processing practices. All of these advantages should result in more efficient marketing of beef.

A change also is being proposed in the conditions under which the yield grade designations may be removed from grade-identified steer, heifer, cow, and bullock beef. Under the proposal, the yield grademark could not be removed from a carcass or its cuts when the natural fat cover is  $\frac{1}{4}$  inch or less thick any place on the carcass or cut. If the fat cover of the carcass is reduced to  $\frac{1}{4}$  inch or less by trimming, the yield grademarks could be removed. Thickness of natural or trimmed fat cover is easily determined by use of a calibrated probe. In that the original yield grade of a carcass was determined, in part, by the thickness of the natural fat cover, trimming of fat cover will significantly affect the ratio of fat to lean in retail cuts obtained from trimmed carcasses. However, because the price paid for a carcass is most often determined by the yield grade assigned to that carcass and because yield grade is affected by fat cover, it does not appear to be in the best interests of either the producer or consumer to insist that the original yield grade of a carcass be maintained on all subsequent wholesale and retail cuts of meat from which substantial amounts of fat cover have been removed.

Concern also has been expressed to the Department that the value of meat to the consumer at retail is determined by the ratio of intermuscular fat to lean as well as by the ratio of fat on the exterior of the cut and the marbling or intramuscular fat. Be-

cause trimming of fat from carcasses and wholesale cuts may be expected to affect the price of meat at retail and may mislead consumers into believing that a trimmed retail cut was derived from a carcass of better yield grade than that from which it actually was derived, the Department is soliciting specific comments and facts on the effect of a requirement that the yield grade of meat be carried through all steps of processing and retailing and that the yield grade be that originally assigned to the carcass. The Department is particularly interested in learning of the benefits and/or adverse effects upon producers, packers, and consumers if such a requirement were imposed.

Changes in terms and definitions are offered in this proposal in order to enhance simplicity and to achieve more universal understanding of the grade standards. The term carcass has been defined in the beef carcass standards and this definition includes an explanation of the manner in which a carcass shall be dressed before it may be presented for grading. This definition also is intended to reduce subjectivity and to increase specificity of the grading process. Achievement of these ends will assure that all persons who are affected by grades are dealt with equitably. To further assure that both producers and consumers are receiving and paying fair market prices for the value delivered or received, the Department has been advised that certain additional requirements be included in the definition of a carcass. These requirements are not included in this proposed regulation, but the Department is requesting that specific comments and facts be provided on the advisability, the benefits, and the disadvantages of including a requirement that such items as the "hanging tender," the "cod" or "udder fat," and the "skirts" (diaphragm) be removed from carcasses before carcasses are eligible for presentation for grading.

Because of the importance of USDA quality grade information to consumers, the Department is also proposing changes in meat inspection marking and labeling regulations (amendments to 9 CFR Parts 316 and 317 shown elsewhere in this issue of the FEDERAL REGISTER) that will require carcasses, parts, and meat of cattle and sheep sold at retail to be marked or labeled with quality grade information. Such meats would be identified with official USDA quality grades or be marked or labeled as "U.S. UNGRADED." (Other species of livestock which are inspected under the Federal Meat Inspection Act are not included in this rulemaking procedure since USDA does not apply consumer quality grades to such products.)

Accurate information with respect to grade is considered essential to achiev-

ing equity in pricing of producers' livestock and for the protection of consumers and other purchasers of meats. USDA grades have become the basis for pricing live slaughter cattle and sheep as well as carcasses and wholesale cuts. The use of such grade terms in advertising, promotion, and labeling of meats also has grown significantly in the retail trade. Consumers have responded with the result that leading retailers in most major market areas feature USDA Choice beef and lamb extensively in their advertising and merchandising programs. Frequently, other retailers in these market areas use ungraded meat and/or a mixture of graded and ungraded meat and advertise and merchandise it in such a manner that consumers could be misled and believe that all such meats are of the same quality as graded meat. In other instances, meat is merchandised and advertised in a way that causes consumers to confuse Federal inspection marks and USDA grade-marks. These practices could misrepresent the quality of meat and permit such meats to compete unfairly with graded meats to the detriment of consumers and the public, generally. As a consequence of consumers not having accurate grade information, they often have to pay greater than the true value for meats they purchase. Therefore, because of the increased use of quality grades and because of the importance of such grades to consumers, it is proposed that carcasses, parts, and meat of cattle and sheep bear quality grade information to assure that their labeling will not be misleading.

Under the proposal to revise inspection regulations, such carcasses, parts, and meat will be required to bear, from the time they leave an official establishment and at all times thereafter, the appropriate USDA quality grade or the words "U.S. UNGRADED." Such carcasses, parts, or meat shall bear this information either thereon or on their containers, as is more specifically detailed in the proposed regulations. These requirements would also be applicable to imports. In addition, since this is a misbranding provision, such requirements would be applicable to retail establishments that are exempt from routine inspection under the Federal Meat Inspection Act.

For the reasons outlined, it is proposed that certain sections of the regulations and standards appearing in 7 CFR Part 2853 (formerly Part 53) as they relate to meats, prepared meats, and meat products be revised as set forth below.

**Subpart A—Regulations**

1. In § 2853.1, the definitions for "Quality grade" and "Yield grade" are revised to read as follows:

**§ 2853.1 Meaning of words.**

*Quality grade.* A designation based on those characteristics of meat which most appropriately predict the palatability characteristics of the lean.

*Yield grade.* A designation which best reflects the proportion of retail cuts that may be expected from a beef carcass; or which may be expected from a lamb, yearling mutton, or mutton carcass.

2. The second sentence of § 2853.4 is revised to read as follows:

**§ 2853.4 Kind of service.**

... Class, grade, and other quality may be determined under said standards for meat of cattle, sheep or swine in carcass form only. ...

3. Except for the first four sentences, all of § 2853.5 is deleted.

4. Section 2853.13, paragraph (b) is revised as follows:

**§ 2853.13 Accessibility and refrigeration of products; access to establishments.**

(b) Grading will be furnished for meat only if it is properly chilled, that is, so that the grade factors are developed to the extent that an accurate grade determination can be made. Determination of class, grade, or other quality of meat under the standards in Subpart B of this part will not be made if such meat is in a frozen state. Carcasses of all species shall be graded only in the establishments where the animals are slaughtered. Also, to be eligible for grading, beef carcasses must be ribbed for a minimum of 30 minutes prior to being offered for grading.

5. In § 2853.17, paragraph (a), the words "and wholesale cuts" are deleted.

6. In § 2853.17, paragraph (c), second sentence, the phrase "and eligible cuts from bull and bullock carcasses" is deleted.

**Subpart B—Standards**

**CARCASS BEEF**

7. Section 2853.102 is revised as follows:

**§ 2853.102 Scope.**

These standards for grades of beef are written primarily in terms of carcasses. However, they also are applicable to the grading of sides. To simplify phrasing of the standards, the words "carcass" and "carcasses" are used to also mean "side" or "sides." For purposes of these standards, a carcass is defined as the two sides of a slaughtered animal which result from split-

ting it lengthwise through its approximate median plane and after removal of: (1) the head, (2) the legs, (3) all viscera—including the kidneys and the thymus gland, (4) all kidney, pelvic, and heart fat, (5) all but two tail vertebrae, and (6) the spinal cord. The head shall be removed between the occipital bone and the first cervical vertebra, and the front and hind legs not below the knee and hock joints, respectively.

8. In § 2853.103, paragraph (b)(5), the last sentence is deleted.

9. In § 2853.104, paragraph (t) is deleted, paragraphs (u), (v), (w), and (x) are designated as (t), (u), (v), and (w), respectively; and paragraphs (a), (i), and (r) are revised as follows:

**§ 2853.104 Application of standards for grades of carcass beef.**

(a) The grade of a steer, heifer, cow, or bullock carcass consists of separate evaluations of two general considerations: (1) The indicated percent of closely trimmed, boneless retail cuts expected to be derived from the four major wholesale cuts of a carcass (round, loin, rib, and chuck) herein referred to as the "yield grade," and (2) the characteristics of the lean which most appropriately predict its palatability, herein referred to as the "quality grade." When officially graded, the grade of a steer, heifer, cow, or bullock carcass consists of both the quality grade and the yield grade. The yield grade designations must remain on all such grade-identified beef whose natural surface fat thickness is  $\frac{1}{2}$  inch thick or less at its thickest place on the carcass. Beef whose surface fat has been trimmed after grading to not more than  $\frac{1}{2}$  inch in thickness at any point may, as a result of such trimming, have the yield grademark removed. Retail beef cuts need not be yield graded. In those instances in which removal of the yield grade is permitted, the USDA grade shall consist of the quality grade designation only. The grade of a bull carcass consists of the yield grade only.

(i) To meet the demand of export trade, carcasses ribbed other than between the 12th and 13th ribs may be approved for grading by the Food Safety and Quality Service. In such cases, they shall be identified with the word "EXPORT" in such a manner that will clearly distinguish them from other officially graded beef.

(r) The yield grade of a beef carcass is determined by considering three characteristics: (1) The amount of external fat, (2) the area of the ribeye muscle, and (3) the hot carcass weight.

10. Section 2853.105 is revised as follows:

**§ 2853.105 Specifications for official United States standards for grades of carcass beef (Yield).**

(a) The yield grade of a beef carcass is determined on the basis of the following equation: Yield grade =  $3.40 + (2.50 \times \text{adjusted fat thickness, inches}) + (0.0038 \times \text{hot carcass weight, pounds}) - (0.32 \times \text{ribeye area, square inches})$ . In the above equation, hot carcass weight is the hot weight of the carcass as described in section 2853.102.

(b) The following descriptions provide a guide to the characteristics of carcasses in each yield grade to aid in determining yield grades.

(1) *Yield Grade 1.* (i) A carcass in Yield Grade 1 usually has only a thin layer of external fat over the ribs, loins, rumps, and clods, and slight deposits of fat in the flanks and cod or udder. There is usually a very thin layer of fat over the outside of the rounds and over the tops of the shoulders and necks. Muscles are usually visible through the fat in many areas of the carcass.

(ii) A 475-pound carcass of this yield grade which is near the borderline of Yield Grades 1 and 2 might have twenty-five hundredths inch of fat over the ribeye and 12.0 square inches of ribeye.

(iii) A 775-pound carcass of this yield grade which is near the borderline of Yield Grades 1 and 2 might have thirty-five hundredths inch of fat over the ribeye and 16.5 square inches of ribeye.

(2) *Yield Grade 2.* (i) A carcass in Yield Grade 2 usually is nearly completely covered with fat but the lean is plainly visible through the fat over the outside of the rounds, the top of shoulders, and the necks. There usually is a slightly thin layer of fat over the loins, ribs, and inside rounds and the fat over the rumps, hips, and clods usually is slightly thick. There are usually small deposits of fat in the flanks and cod or udder.

(ii) A 475-pound carcass of this yield grade which is near the borderline of Yield Grades 2 and 3 might have forty-five hundredths inch of fat over the ribeye and 10.5 square inches of ribeye.

(iii) A 775-pound carcass of this yield grade which is near the borderline of Yield Grades 2 and 3 might have fifty-five hundredths inch of fat over the ribeye and 15.0 square inches of ribeye.

(3) *Yield Grade 3.* (i) A carcass in Yield Grade 3 usually is completely covered with fat and the lean usually is visible through the fat only on the necks and the lower part of the outside of the rounds. There usually is a slightly thick layer of fat over the

loins, ribs, and inside rounds and the fat over the rumps, hips, and clods usually is moderately thick. There usually are slightly large deposits of fat in the flanks and cod or udder.

(ii) A 475-pound carcass of this yield grade which is near the borderline of Yield Grades 3 and 4 might have seven-tenths inch of fat over the ribeye and 9.5 square inches of ribeye.

(iii) A 775-pound carcass of this yield grade which is near the borderline of Yield Grades 3 and 4 might have eight-tenths inch of fat over the ribeye and 14.0 square inches of ribeye.

(4) *Yield Grade 4.* (i) A carcass in Yield Grade 4 usually is completely covered with fat. The only muscles usually visible are those on the shanks and over the outside of the plates and flanks. There usually is a moderately thick layer of fat over the loins, ribs, and inside rounds and the fat over the rumps, hips, and clods usually is thick. There are large deposits of fat in the flanks and cod or udder.

(ii) A 475-pound carcass of this yield grade which is near the borderline of Yield Grades 4 and 5 might have one and five-hundredths inch of fat over the ribeye and 9.0 square inches of ribeye.

(iii) A 775-pound carcass of this yield grade which is near the borderline of Yield Grades 4 and 5 might have one and fifteen-hundredths inch of fat over the ribeye and 13.5 square inches of ribeye.

(5) *Yield Grade 5.* A carcass in Yield Grade 5 usually has more fat on all of the various parts and a smaller area of ribeye than a carcass in Yield Grade 4.

#### VEAL AND CALF CARCASSES

11. Section 2853.112 is revised as follows:

#### § 2853.112 Scope.

These standards for grades of veal and calf are written primarily in terms of carcasses. However, they also are applicable to the grading of sides. To simplify the phrasing of the standards, the words "carcass" and "carcasses" are used also to mean "side" or "sides."

12. In § 2853.115, the first sentence in paragraph (d) is deleted; in the first sentence of paragraph (e), the words "or portions of such carcasses" are deleted; and in paragraph (g) the last sentence is deleted.

#### LAMB, YEARLING MUTTON, AND MUTTON CARCASSES

13. In § 2853.123, paragraph (c)(5) is revised as follows:

#### § 2853.123 Application of standards.

• • • • •

#### (c) *Yield Grade*

• • • • •

(5) The yield grade descriptions are defined primarily in terms of carcasses. However, the yield grade standards also are applicable to the grading of sides.

14. In § 2853.127, paragraph (b) is deleted and paragraph (c) is designated as paragraph (b).

A draft Impact Analysis of this proposal has been prepared in accordance with Federal Docket 77-33571 and is available from the Hearing Clerk, Room 1077 South, United States Department of Agriculture, Washington, D.C. 20250.

Done at Washington, D.C., on this 19th day of January, 1978.

#### GRADE MARKING

NOTE.—This document originally appeared in the FEDERAL REGISTER for Monday, January 23, 1978. It is reprinted in this issue to meet requirements for publication on an assigned day of the week. (See the inside cover of this issue for information about agencies publishing on assigned days of the week.)

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule will amend the Federal meat inspection regulations by adding marking and labeling requirements that all carcasses, parts, and meat of cattle and sheep be identified by USDA quality grade or as ungraded. There has been an ever increasing use of quality grades by industry and a dependence on quality grades by consumers. In conjunction with related changes proposed in grade standards and grading regulations in 7 CFR 2853, this proposal is intended to assure that consumers will not be misled when shopping for meat.

DATE: Comments must be received on or before May 1, 1978.

ADDRESS: Written comments to: Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR ADDITIONAL INFORMATION ON COMMENTS, SEE SUPPLEMENTARY INFORMATION.

FOR FURTHER INFORMATION CONTACT:

Mr. Irwin Fried, Acting Director, Product Labels and Standards Staff, Technical Services, Meat and Poultry Inspection Program, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-6042.

**SUPPLEMENTARY INFORMATION:** Comments. Interested persons are invited to submit written comments concerning this proposal. All comments must be sent in duplicate to the Hearing Clerk. Comments should show specific parts of the proposal(s) to which reference is intended. Also, views may be presented at four public hearing sessions to be held in March. Details are shown in a related proposal to change meat grading standards and regulations (7 CFR 2853) appearing elsewhere in this issue of the FEDERAL REGISTER. Comments on this proposal and the grading proposal may be combined. All written comments submitted pursuant to this notice and the transcript of the public hearing will be made available for public inspection in the Office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

**Background.** A discussion of the background and reasons for these proposed amendments to the Federal meat inspection regulations is included in the supplementary information section of a proposal to amend the meat grading standards and regulations (7 CFR 2853) included elsewhere in this issue of the FEDERAL REGISTER.

Accordingly, it is proposed that Parts 316 and 317 of the Federal meat inspection regulations (9 CFR 316 and 317) be amended as set forth below.

1. A new § 316.17 (9 CFR 316.17) is added to read as follows:

#### § 316.17 Grade marking.

(a) Any carcass or part thereof of cattle or sheep required under the regulations in this Part 316 to be marked with the official inspection legend shall also be marked with the appropriate USDA quality grade, or, if ungraded, shall be marked "U.S. Ungraded." A USDA grademark shall be applied only under the supervision of Food Safety and Quality Service employees and in the manner prescribed under the regulations in 7 CFR 2853. A "U.S. Ungraded" statement shall be applied continuously and roller marked in letters not less than ¼ inch in height with the letters appearing in not less than 1 inch intervals. Any such carcass, part, or meat cut which has previously been marked with a USDA quality grade and from which said mark has been removed by trimming must either be remarked in accord with this section or labeled with the appropriate USDA quality grade in the type size required by § 317.20.

(b) The requirements of this section shall also be applicable to any such carcass, part, or meat in a retail store which is not required to be marked with the official inspection legend because it has been prepared in compliance with the retail exemptions in Part 303 of this subchapter.

2. A new section 317.20 (9 CFR 317.20) is added to read as follows:

#### § 317.20 Grade labeling.

All immediate and shipping containers of any parts of cattle or sheep shall be labeled with the appropriate USDA quality grade, or, if ungraded, shall be labeled as "U.S. Ungraded." The labeling required by this section shall appear on the principal display panel in type size not smaller than that required for the net weight declaration in § 317.2(h) of this part.

A draft impact analysis of this proposal has been prepared in accordance with Federal Docket 77-33571 and is available from the Hearing Clerk, Room 1077 South, U.S. Department of Agriculture, Washington, D.C. 20250.

Done at Washington, D.C., on this 19th day of January 1978.

[Docket No. 77N-0039]

#### ALGINATES

#### Affirmation of GRAS Status With Certain Limitations

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This is a proposal to affirm the generally recognized as safe (GRAS) status of ammonium, calcium, potassium, and sodium alginates as direct human food ingredients with specific limitations, and to amend the food additive regulation for propylene glycol alginate. The safety of these ingredients has been evaluated pursuant to the comprehensive safety review being conducted by the agency.

DATES: Comments by March 28, 1978.

ADDRESS: Written comments to the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Corbin Miles, Bureau of Food (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204, 202-472-4750.

**SUPPLEMENTARY INFORMATION:** The Food and Drug Administration is

conducting a comprehensive safety review of direct and indirect human food ingredients classified as generally recognized as safe (GRAS), or subject to a prior sanction. The Commissioner of Food and Drugs has issued several notices, and proposed regulations, published in the FEDERAL REGISTER of July 26, 1973 (38 FR 20040), initiating this review. Pursuant to this review, the safety of ammonium, calcium, potassium, sodium, and propylene glycol alginates has been evaluated. In accordance with the provisions of §§ 170.35 and 171.1, the Commissioner proposes to affirm the GRAS status of ammonium, calcium, potassium, and sodium alginates with specific limitations, and to amend the food additive regulation for propylene glycol alginate.

Alginic acid, the acid from which the alginates are made, is a natural polyuronide constituent of several species of brown algae, red algae, and bacteria. It is a linear polymer that contains 1:4 linked  $\beta$ -D-mannuronic and  $\alpha$ -L-guluronic acid residues. The various derivatives are made by the appropriate treatment of alginic acid. The ammonium, calcium, potassium, and sodium salts of alginic acid are listed in §§ 182.7133, 182.7187, 182.7610, and 182.7724 as GRAS for use in food as stabilizers, pursuant to regulations published in the FEDERAL REGISTER of January 31, 1961 (26 FR 938), and subsequently recodified.

A representative cross-section of food manufacturers was surveyed to determine the specific foods in which the alginates were used and the levels of usage. Information from surveys of consumer consumption was obtained and combined with the manufacturing information to obtain an estimate of consumer exposure to these ingredients. In 1970, the use of alginates in food was about 2.4 million pounds, almost twice the 1960 total. Only the salts and the ester of alginic acid were used because the acid has limited solubility in water.

The alginates have been the subject of a search of the scientific literature from 1920 to the present. The parameters used in the search were chosen to discover any articles that considered (1) chemical toxicity, (2) occupational hazards, (3) metabolism, (4) reaction products, (5) degradation products, (6) any reported carcinogenicity, teratogenicity, or mutagenicity, (7) dose response, (8) reproductive effects, (9) histology, (10) embryology, (11) behavioral effects, (12) detection and (13) processing. A total of 374 abstracts on alginates was reviewed and 41 particularly pertinent reports from the literature survey have been summarized in a scientific literature review.

The scientific literature review shows, among other studies, the following information as summarized in

the report of the Select Committee on GRAS Substances (hereafter referred to as the Select Committee), selected by the Life Sciences Research Office of the Federation of American Societies for Experimental Biology:

Results of many studies in a variety of animal species suggest that orally administered alginates are of relatively low toxicity. Nilsson and Wagner studied the effects of adding propylene glycol alginate or sodium alginate at various levels in the diet of mice for one year, chicks for 7 weeks, rats for 10 weeks, guinea pigs for 26 weeks, and cats for about 14 weeks. In general, no toxic effects were noted in diets containing 5 percent alginate, and in some species higher levels were without toxicity and did not cause a decrease in rate of gain. Dogs given sodium alginate or propylene glycol alginate at 5 or 15 percent of the diet for 1 year also showed no adverse effects.

There is some uncertainty concerning digestion and absorption of alginates in experimental animals; the question relates to the degree of "digestion" by intestinal enzymes or degradation by intestinal flora and subsequent absorption. Viola et al. concluded that sodium alginate is digested and absorbed by rats. Nilsson and Wagner indicated that bacterial enzymes were responsible for algin breakdown. Studies using  $^{14}$ C-labeled sodium or propylene glycol alginates revealed no digestion or absorption in rat or mouse feeding trials.

Sodium alginate decreases the intestinal absorption of strontium and to a lesser extent several other metal ions, including calcium, magnesium, iron, copper, zinc, barium, tin, cadmium, manganese, and mercury, but not lead or cobalt. These studies designed primarily to measure absorption of radionuclides from food, did not indicate any toxic manifestations of oral administration of the alginate.

Little is known about the digestion and absorption of alginates in man. Millis and Reed gave six human subjects 8 g of sodium alginate per day for 7 days, with no interference with the absorption of calcium or other adverse effects, and Feldman et al. gave four men 45 g of alginic acid per day for 7 days with only a mild laxative effect and a slight increase in fecal excretion of sodium and potassium.

The toxicity of parenterally administered alginates depends upon the salt. Calcium alginate given intravenously to rats has an LD<sub>50</sub> of 64 mg per kg, and sodium alginate under the same conditions has an LD<sub>50</sub> of 1000 mg per kg. Presumably, the rather insoluble calcium salt precipitates and causes emboli. Sodium alginate given intravenously in mice or rabbits is considerably more toxic than when given intraperitoneally, but the intraperitoneal injection of from 100 to 250 mg per

kg of sodium alginate produced damage to the tubular epithelium of the kidneys and liver necrosis in cats.

Mutagenic tests with propylene glycol alginate on rats and mice using three different methods gave negative results. There was no measurable mutagenic response or alternation in the recombination frequency for *Saccharomyces cerevisiae* in either the host-mediated assay or in the *in vitro* tests on *Salmonella typhimurium*, but an increased mitotic recombination frequency was observed when *S. cerevisiae* was exposed to 1 percent propylene glycol alginate. No adverse effects were observed on either metaphase chromosomes from rat bone marrow or anaphase chromosomes from *in vitro* cultures of human lung cells. No significant adverse responses were noted in the dominant lethal gene test on rats. The Select Committee has no information available as to the mutagenic effects of ammonium, calcium, potassium, or sodium alginates.

Teratologic tests with propylene glycol alginate on mice, rats, and hamsters produced negative results. Oral intubation of up to 170 mg per kg of the test compound in anhydrous corn oil (1.0 ml per kg of body weight) to pregnant mice from day 6 through day 15 of gestation exerted no clearly discernible effect on nidation or on maternal or fetal survival. The frequency of abnormalities in either the soft tissues or skeletal tissues of the fetuses in the test groups did not differ from that occurring spontaneously in the sham-treated controls. However, in a group of pregnant mice dosed at a level of 780 mg per kg daily (day 6 through day 15 of gestation), a significant number of maternal deaths occurred (7 out of 32) and there was an increased number of resorptions (early fetal deaths). Pregnant rats given up to 720 mg per kg per day for 10 days (day 6 through day 15 of gestation) showed no teratologic effects and negative results were obtained with pregnant hamsters given up to 700 mg per kg per day for 5 days (day 6 through day 10 of gestation). Propylene glycol, evaluated in an identical test procedure, was not teratogenic for mice, rats, hamsters, and rabbits, and maternal toxicity was not observed even at very high dosage. The Select Committee is not aware of any data on the teratologic effects of ammonium, calcium, potassium, or sodium alginates.

In tests with infant Swiss albino mice, Epstein et al. found no increase in tumors after several subcutaneous injections of alginic acid (total dose, 60 mg). No other carcinogenicity studies on the alginates have been found.

No allergic reactions to the alginates have been reported. Both sodium alginate and propylene glycol alginate were found to be nonirritating when applied to rabbits' eyes and skin.

All of the available safety information on alginates has been carefully evaluated by qualified scientists of the Select Committee. It is the opinion of the Select Committee that:

"The available information on the alginates reveals no significant adverse toxicological effects from oral administration in nonpregnant animals or humans in daily amounts greatly exceeding those currently consumed in the diet. However, in pregnant mice, very large doses of propylene glycol alginate, while not teratogenic, cause a significant increase in maternal mortality. Such increased maternal toxicity does not occur at a dose of propylene glycol alginate which is 26-fold greater than that estimated to be the average daily adult dietary intake. No information is available concerning the behavior of other alginates in this respect but studies of propylene glycol, made by the same investigators using the same test procedure, have demonstrated that it is not teratogenic and is without maternal toxicity even at very large doses. This indicates that the adverse effects reported for propylene glycol alginate may be due to the alginate moiety."

"It is noteworthy that similar toxic effects have been observed in identical tests on a large number of other polysaccharides (gum arabic, sterculia gum, carob bean gum, guar gum, gum ghatti, gum tragacanth, carrageenan, methyl cellulose, and agar-agar) fed at very high levels. The relative sensitivity of the several animal species to these effects varies depending on the particular polysaccharide tested, but in all cases very large doses are required. Until these effects have been adequately explained, it appears to be inappropriate to conclude that unrestricted use of such substances in food would be without hazard."

It is the conclusion of the Select Committee that there is no evidence in the available information on ammonium, calcium, potassium, sodium, and propylene glycol alginates that demonstrates, or suggests reasonable grounds to suspect, a hazard to the public when they are used at levels that are now current and in the manner now practiced. However, it is not possible to determine, without additional data, whether a significant increase in consumption of these substances would constitute a dietary hazard. Based upon his own evaluation of available information on the alginates (including reports of mutagenic tests on ammonium, potassium and sodium alginates, which were not available when the Select Committee formed its conclusion), the Commissioner concurs with this conclusion. The Commissioner therefore concludes that continued safe use of these ingredients requires specific limitations to preserve current conditions of use.

Although propylene glycol alginate is not on the GRAS list, its safety was evaluated during the safety review of the GRAS listed alginates. The ingredient is listed in § 172.858 (21 CFR 172.858) for use in food as an emulsifier, stabilizer, and thickener. However, several additional uses of this substance were reported to the National Academy of Sciences/National Research Council (NAS/NRC) in their survey of food manufacturers. It was reported to be used as a flavoring agent, formulation aid and surfactant. As noted in the paragraph above, the Select Committee concluded, and the Commissioner concurred, that there is no evidence in the available information which indicates that propylene glycol alginate is a health hazard when used at levels that are current and in the manner now practiced. Consequently, the Commissioner is reasonably certain that the uses of this ingredient under § 172.858 Propylene glycol alginate are safe and further that § 172.858 should be amended to provide for the uses revealed in the NAS/NRC survey.

There are several other uses of the alginates regulated as food additives. In § 173.340, propylene glycol alginate can be used in food processing as a defoaming agent. In § 172.210 as a defoamer and dispensing adjuvant in coatings for fresh citrus fruit, and in §§ 176.170 and 176.180 as a component in paper and paperboard food-packaging materials. Ammonium and sodium alginates are listed in § 173.310(c) as compounds from which boiler water additives can be prepared. During the safety review of the alginates, the Commissioner considered these uses and concludes that they do not affect the decision to affirm the GRAS status of ammonium, calcium, potassium, and sodium alginates. This proposed action does not affect the uses cited in this paragraph.

Also, the Commissioner is concerned that harmful concentrations of heavy metals may be accumulated in commercial alginates, particularly if algae are harvested from coastal waters contaminated with significant levels of heavy metals. Heavy metals, such as mercury, have been found in aquatic animal life at levels exceeding those which are considered safe for human ingestion. Further, the current Food Chemicals Codex limitation of "heavy metals as lead" lacks the element specificity that modern analytical methods can provide. Therefore, the Commissioner will investigate the background levels of individual heavy metals (arsenic, cadmium, lead, mercury, selenium and zinc) in samples of these alginate salts during the comment period on this proposal. If the investigation indicates that specific heavy metal specifications need be adopted for the continued safe use of

the ingredients, those specifications will be adopted as part of the final regulations. All available data and information on the heavy metal contents of these alginate salts are solicited as comments on this proposal.

The levels of use adopted in this proposal for various categories of food are the maximum levels reported to the NAS/NRC. In their survey of food manufacturers, Use of any of these ingredients in any manner not permitted by the proposed regulations will result in its becoming a food additive for which no regulation currently exists.

Copies of the scientific literature review on alginates, reports of teratogenic and mutagenic tests for propylene glycol alginate, reports of mutagenic tests for ammonium, potassium and sodium alginates, and the report of the Select Committee are available for review at the office of the Hearing Clerk, Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, and may be purchased from the National Technical Information Service, 5285 Port Royal Road, Springfield, Va. 22151, as follows:

Title	Order No.	Price code	Price
Alginates (scientific literature review).	PB-221-226...	A04	\$4.50
Propylene glycol alginate (teratology tests).	PB-221-786.	A03	4.00
Propylene glycol alginate (mutagenic tests).	PB-221-826.	A06	5.50

Alginates (Select Committee report).	PB-265-503/AS.	A02	3.50

\*Price subject to change.

This proposed action does not affect the present use of alginates for pet food or animal feed.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 701(a), 52 Stat. 1055, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes that Parts 172, 182, and 184 be amended as follows:

#### PART 172—FOOD ADDITIVES PERMITTED FOR DIRECT ADDITION TO FOOD FOR HUMAN CONSUMPTION

1. In § 172.858 by revising the introductory text and paragraphs (a) and (b) to read as follows:

##### § 172.858 Propylene glycol alginate.

The food additive propylene glycol alginate (CAS Reg. No. PM9005-37-2)

may be used as an emulsifier, flavoring adjuvant, formulation aid, stabilizer, surfactant or thickener in foods in accordance with the following prescribed conditions:

(a) The additive meets the specifications of the Food Chemicals Codex, 2d ed. (1972) as amended by the first supplement,\* and shall have up to 85 percent of the carboxylic acid groups esterified with the remaining groups either free or neutralized.

(b) The additive is used or intended for use in the following foods when standards of identity established under section 401 of the act do not preclude such use:

(1) As a stabilizer in ice cream, frozen custard, ice milk, fruit sherbet, and water ices at a level not to exceed 0.5 percent by weight of the finished product.

(2) As an emulsifier, flavoring adjuvant, stabilizer, or thickener in baked goods at a level not to exceed 0.5 percent by weight of the finished product.

(3) As an emulsifier, stabilizer, or thickener in cheeses and in fats and oils at a level not to exceed 0.9 percent by weight of the finished product.

(4) As an emulsifier, stabilizer, or thickener in gelatins and puddings at a level not to exceed 0.5 percent by weight of the finished product.

(5) As a stabilizer or thickener in gravies at a level not to exceed 0.5 percent by weight of the finished product.

(6) As a stabilizer or thickener in sweet sauces at a level not to exceed 0.4 percent by weight of the finished product.

(7) As an emulsifier, flavoring adjuvant, formulation aid, stabilizer, or thickener, and surface active agent in other foods, where applicable, at a level not to exceed 0.1 percent by weight of the finished product.

#### PART 182—SUBSTANCES GENERALLY RECOGNIZED AS SAFE

§§ 182.7133, 182.7187, 182.7610 and 182.7724 [Deleted]

2. By deleting §§ 182.7133 Ammonium alginate, 182.7187 Calcium alginate, 182.7610 Potassium alginate, and 182.7724 Sodium alginate.

#### PART 184—DIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE

3. By adding new §§ 184.1133, 184.1187, 184.1610 and 184.1724 to read as follows:

§ 184.1133 Ammonium alginate.

(a) Ammonium alginate (CAS Reg. No. PM9005-34-9) is the ammonium salt of alginic acid, a natural polyuronide constituent of certain brown and red algae. Ammonium alginate is prepared by the neutralization of purified alginic acid with ammonium hydroxide.

(b) The ingredient meets the specifications of the Food Chemicals Codex, 2d ed. (1972) as amended by the first supplement.\*

(c) The ingredient is used in food in accordance with § 184.1(b)(2) of this chapter, under the following conditions:

reacting purified alginic acid with calcium chloride.

(b) The ingredient meets the specifications of the Food Chemicals Codex, 2d ed. (1972) as amended by the first supplement.\*

(c) The ingredient is used in food, in accordance with § 184.1(b)(2) of this chapter, under the following conditions:

#### MAXIMUM USAGE LEVELS PERMITTED

Foods (as served)	Percent	Functions
Confections, frostings, § 170.3(n)(9) of this chapter.....	0.4	Stabilizer, thickener, § 170.3(o)(28) of this chapter.
Fats and oils, § 170.3(n)(12) of this chapter.....	.5	Do.
Gelatin, puddings, § 170.3(n)(22) of this chapter.....	.5	Do.
Gravies and sauces, § 170.3(n)(24) of this chapter.....	.4	Do.
Jams and jellies, § 170.3(n)(28) of this chapter.....	.4	Do.
Sweet sauces, § 170.3(n)(43) of this chapter.....	.5	Do.
All other food categories.....	.1	Humectant, § 170.3(o)(16) of this chapter; stabilizer, thickener, § 170.3(o)(28) of this chapter.

##### § 184.1187 Calcium alginate.

(a) Calcium alginate (CAS Reg. No. PM9005-35-0) is the calcium salt of alginic acid, a natural polyuronide constituent of certain brown and red algae. Calcium alginate is prepared by

\*Copies may be obtained from: National Academy of Sciences, 2101 Constitution Ave. NW., Washington, D.C. 20037.

## MAXIMUM USAGE LEVELS PERMITTED

Foods (as served)	Percent	Functions
Gelatins, puddings, § 170.3(n)(22) of this chapter .....	0.25	Stabilizer, thickener, § 170.3(o)(28) of this chapter.
Gravies and sauces, § 170.3(n)(24) of this chapter .....	.1	Do.
All other food categories .....	.002	Do.

## § 184.1610 Potassium alginate.

(a) Potassium alginate (CAS Reg. No. PM9005-36-1) is the potassium salt of alginic acid, a natural polyuronide constituent of certain brown and red algae. Potassium alginate is prepared by the neutralization of purified alginic acid with potassium bicarbonate.

(b) The ingredient meets the specifications of the Food Chemicals Codex, 2d ed. (1972) as amended by the first supplement.

(c) The ingredient is used in food, in accordance with § 184.1(b)(2) of this chapter, under the following conditions:

## MAXIMUM USAGE LEVELS PERMITTED

Foods (as served)	Percent	Functions
Confections and frostings, § 170.3(n)(9) of this chapter .....	0.1	Stabilizer, thickener, § 170.3(o)(28) of this chapter.
All other food categories .....	.01	Do.

## § 184.1724 Sodium alginate.

(a) Sodium alginate (CAS Reg. No. PM9005-38-3) is the sodium salt of alginic acid, a natural polyuronide constituent of certain brown and red algae. Sodium alginate is prepared by the neutralization of purified alginic acid with sodium bicarbonate.

(b) The ingredient meets the specifications of the Food Chemicals Codex, 2d ed. (1972) as amended by the first supplement.

(c) The ingredient is used in food, in accordance with § 184.1(b)(2) of this chapter, under the following conditions:

## MAXIMUM USAGE LEVELS PERMITTED

Food (as served)	Percent	Functions
Baked goods and baking mixes, § 170.3(n)(1) of this chapter .....	0.33	Stabilizer, thickener, § 170.3(o)(28) of this chapter.
Gelatins and puddings, § 170.3(n)(22) of this chapter .....	4.0	Firming agent, § 170.3(o)(10) of this chapter; flavor adjuvant, § 170.3(o)(12) of this chapter; stabilizer, thickener, § 170.3(o)(28) of this chapter.
Hard candy, § 170.3(n)(25) of this chapter .....	10.0	Stabilizer, thickener, § 170.3(o)(28) of this chapter.
All other food categories .....	1.0	Emulsifier, § 170.3(o)(8) of this chapter; firming agent, § 170.3(o)(10) of this chapter; flavor enhancer, § 170.3(o)(11) of this chapter; flavor adjuvant, § 170.3(o)(12) of this chapter; processing aid, § 170.3(o)(24) of this chapter; stabilizer and thickener, § 170.3(o)(28) of this chapter; surface active agent, § 170.3(o)(29) of this chapter.

The Commissioner hereby gives notice that he is unaware of any prior sanction for the use of these ingredients in food under conditions different from those proposed herein. Any person who intends to assert or rely on such a sanction shall submit proof of

its existence in response to this proposal. The regulation proposed above will constitute a determination that excluded uses would result in adulteration of the food in violation of section 402 of the act, and the failure of any person to come forward with proof of

such an applicable prior sanction in response to this proposal constitutes a waiver of the right to assert or rely on such sanction at any later time. This notice also constitutes a proposal to establish a regulation under Part 181 (21 CFR Part 181), incorporating the same provisions, in the event that such a regulation is determined to be appropriate as a result of submission of proof of such an applicable prior sanction in response to this proposal.

Interested persons may, on or before March 28, 1978 submit to the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

The Food and Drug Administration has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A-107. A copy of the inflation impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Dated: January 23, 1978.

JOSEPH P. HILE,  
Associate Commissioner,  
for Compliance.

[Docket No. 77N-0252]

## METHADONE IN MAINTENANCE AND DETOXIFICATION

Joint Proposed Revision of Conditions for Use

## Correction

In FR Doc. 77-31163 appearing at page 56897 in the issue for Friday, October 28, 1977, make the following corrections:

(1) On page 56899, in the first column in the first paragraph beneath the center heading "MINIMUM URINE TESTINGS; USES AND FREQUENCY", in the seventh line, the word "any" should read "and".

(2) On page 56901, in the middle column, in § 291.505(d)(3)(i)(c), begin-

ning in the eleventh line, the sentence "Withdrawal signs may be observed during the initial period of abstinence." should be deleted.

(3) On page 56905, in the first column, in § 291.505(d)(8)(i)(c), in the first line, "resume" should read "assume".

(4) On page 56907, in the first column, in § 291.505(f)(2)(viii), in the fifth line, between the words "responsible" and "official" insert the word "hospital".

## DEPARTMENT OF LABOR

## Occupational Safety and Health Administration

[29 CFR Part 1990]

## IDENTIFICATION, CLASSIFICATION AND REGULATION OF TOXIC SUBSTANCES POSING A POTENTIAL OCCUPATIONAL CARCINOGENIC RISK

## Extensions of Time for Written Submissions; Rescheduling of Hearing

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Extensions of time to file notices of intention to appear, written comments, testimony and documentary evidence; and rescheduling of rulemaking hearing.

SUMMARY: This notice extends the time for written submissions concerning the rulemaking proceeding on the "cancer policy" proposed on October 4, 1977 (42 FR 54148) and provides an additional opportunity for the public to submit responses to previously submitted witness statements. The rulemaking hearing is also rescheduled.

DATES: February 28, 1978: for submitting written comments, notices of in-

## LIMITED OPPORTUNITY TO ADD TO WITNESS STATEMENTS

Parties who have timely filed their witness statements and documentary evidence may supplement these statements to respond specifically to evidence introduced in witness statements which the party shows could have not been anticipated from OSHA's proposal. These additional statements must be brief in comparison to the party's original submission. They must indicate clearly which specific data or evidence in a particular witness statement is being discussed. Absent extraordinary circumstances, no supplemental witnesses will be permitted to testify regarding these additional statements.

## RESCHEDULING OF PUBLIC HEARING

The informal public hearing on the cancer policy is rescheduled to commence at 9:30 a.m. on May 16, 1978 in the Departmental Auditorium, Constitution Avenue between 12th and 14th Streets NW., Washington, D.C.

In all other respects, the notice of October 4, 1978 (42 FR 54148) remains in effect.

Signed at Washington, D.C., this 24th day of January, 1978.

EULA BINGHAM,  
Assistant Secretary of Labor.

## COAL MINE HEALTH NOISE STANDARD

Use of Noise Dosimeters

AGENCY: National Institute for Occupational Safety and Health (NIOSH).

ACTION: Findings of fact.

SUMMARY: This notice contains findings of fact from the public hearing held on September 29, 1977, concerning proposed amendments to the coal mine health noise standard (30 CFR Parts 70 and 71). The amendments, published on June 2, 1977 (42 FR 28151), proposed to permit the use of noise dosimeters for determining noise exposure of workers in coal mines.

FOR FURTHER INFORMATION CONTACT:

B: Thomas Scheib, Chief, Coal Mine Standards Activity, Division of Criteria Documentation and Standards Development, NIOSH, 5600 Fishers Lane, Room 8A-44, Rockville, Md. 20857, phone 301-443-4614.

SUPPLEMENTARY INFORMATION: Section 101(g) of the Federal Coal

tention to appear, witness statements and documentary evidence from the public. April 4, 1978: for submitting all testimony and documentary evidence from OSHA witnesses. April 25, 1978: for the public to submit additions to testimony. May 16, 1978: for the rulemaking hearing.

## FOR FURTHER INFORMATION CONTACT:

Mr. James Foster, Office of Public Affairs, Occupational Safety and Health Administration, 3rd Street and Constitution Avenue NW., Room N3641, Washington, D.C. 20210, telephone 202-523-8151.

SUPPLEMENTARY INFORMATION: On October 4, 1977, a notice was published in the FEDERAL REGISTER (42 FR 54148) of a proposed new general regulation concerning the identification, classification and regulation of toxic substances that may pose a carcinogenic risk to workers.

The notice scheduled a rulemaking hearing and set deadlines for the submission of Agency and public statements and comments. A later FEDERAL REGISTER notice (42 FR 60753) extended these deadlines.

Subsequently, several interested parties requested additional extensions of time to submit their witness statements. The bases for the requests are the broad scope of the hearing and, in some cases, the desire to make unified presentations requiring time for organization. OSHA has also been asked to give interested parties an additional opportunity to present evidence in response to OSHA's witness statements.

OSHA has decided to grant these requests as set forth below. In all other respects the procedures and requirements of the October 4, 1977 FEDERAL REGISTER notice apply.

## SUBMISSION OF WRITTEN COMMENTS

Written comments from interested parties must be submitted no later than February 28, 1978. Comments must be submitted in quadruplicate to the Docket Officer, Docket No. H-090, Technical Data Center, Room S-6212, U.S. Department of Labor, 3rd Street and Constitution Avenue NW., Washington, D.C. 20210, Telephone: 202-523-7396.

## FILING OF NOTICES OF INTENTION TO APPEAR AND STATEMENTS OF WITNESSES AND DOCUMENTARY EVIDENCE FROM THE PUBLIC

Notices of intention to appear, documentary evidence and witness statements must now be submitted no later than February 28, 1978. They must be received by the OSHA Division of Consumer Affairs, Docket No. H-090, Room N3635, U.S. Department of Labor, Third Street and Constitution Avenue NW., Washington, D.C. 20210, telephone 202-523-8024 by February 28, 1978.

Mine Health and Safety Act of 1969 (30 U.S.C. 811(g)), hereinafter referred to as the "Act," provides, in part, that within 60 days after completion of any public hearing on proposed mandatory health or safety standards, the Secretary who held the hearing shall make findings of fact which shall be public.

Proposed amendments to 30 CFR Parts 70 and 71 which would permit the use of personal noise dosimeters to meet the measurement requirements of the coal mine health noise standard were developed by NIOSH under section 101 of the Act and transmitted to the Secretary of the Interior for publication in accordance with the Act. The amendments were published under a notice of proposed rulemaking on June 2, 1977, at 42 FR 28151, and interested parties were afforded a period of 45 days within which to submit written comments, suggestions, and objections and to request a public hearing. On August 23, 1977, the Secretary of the Interior, in accordance with section 101(f) of the Act, published a notice (42 FR 42362) that objections to the amendments had been filed stating the specific grounds for such objections and that a public hearing had been requested. Following the notice, the Department of Health, Education, and Welfare published a notice fixing the time and place of a hearing (42 FR 43646) to be held for the purpose of receiving relevant evidence on the following issues:

(1) Whether promulgation of the proposed changes in the coal mine health noise standard should be delayed until after the draft American National Standards Institute (ANSI) Standard Specification for Personal Noise Dosimeters S1.25 is finalized and approved;

(2) Whether the requirement § 70.505, that sound level meters meet ANSI, "Specification for Sound Level Meters", S1.4-1971 (Type S2A) should be revised to require that only sound level meters certified by NIOSH be permitted to be used;

(3) Whether the noise dosimeter is a reliable and accurate instrument and whether its use in underground and surface coal mines is desirable; and

(4) Whether the cost of using noise dosimeters to determine noise exposure in coal mines would be prohibitive.

The hearing on the proposed amendments to the coal mine health noise standard was held on September 29, 1977, at the Department of Health, Education, and Welfare. Presentations were made by the following organizations; Mining Enforcement and Safety Administration, GenRad Corp., the National Institute for Occupational Safety and Health, Bituminous Coal Operator's Association, Inc., Jim Walters Resources, and Quest Electronics. The official hearing record remained

open until October 31, 1977, in order to receive supplemental information from interested parties, and to receive the results of research which was in progress at the time of the hearing. A verbatim transcript of the proceeding together with other supporting information is available for public inspection during regular business hours at the National Institute for Occupational Safety and Health, Room 8-11, Parklawn Building, 5600 Fishers Lane, Rockville, Md.

## FINDINGS

On the basis of the evidence presented at the public hearing and on other information available to the Department, the Director, National Institute for Occupational Safety and Health, under authority delegated from the Secretary of Health, Education, and Welfare and the Assistant Secretary for Health (35 FR 11150), finds:

1. With respect to delaying promulgation of the proposed amendments to the coal mine health noise standard until after approval of the American National Standards Institute Standard Specification for Personal Noise Dosimeters (S1.25), that:

(a) While there are no current national standards which specify operating tolerances and electro-acoustic tests for personal noise dosimeters, such equipment has been manufactured to operate within tolerances of Type S2A sound level meters as specified by the American National Standards Institute (ANSI S1.4(1971)).

(b) Under the present coal mine health noise standard, noise level measurements are taken only with instruments which are approved by the Bureau of Mines or the Mining Enforcement and Safety Administration and which meet the operational specifications of the American National Standards Institute for sound level meters S1.4-1971 (Type S2A).

(c) Personal noise dosimeters are currently being used to assess employee noise exposure for compliance purposes by several industries, by State agencies, and by Federal inspectors representing the Occupational Safety and Health Administration and the Metal and Nonmetal Division of the Mining Enforcement and Safety Administration.

(d) Publication of an American National Standards Institute standard specification for personal noise dosimeters will not necessarily result in conformance of all personal noise dosimeters to the specifications or requirements of the standard, or uniformity of performance in equipment produced by a given manufacturer.

(e) The testing criteria and tolerances adopted by the Mining Enforcement and Safety Administration to determine acceptability of personal noise dosimeters represent a major advance-

ment in the characterization of equipment performances necessary for accurate measurement of coal miner noise exposure. However, as a minimum, a criterion for performance at dosimeter threshold (the level at which the dosimeter begins to record noise exposure) should be added to the list of test criteria, and the model acceptance criteria by MESA, requiring that only one out of three instruments pass all test criteria, should be improved in order to guarantee uniformity of measurement devices for compliance purposes. Adoption of these provisions would necessitate a review and possible revision of the list of personal noise dosimeters currently accepted by the Mining Enforcement and Safety Administration.

(f) Under the circumstances, delaying the amendments permitting the use of personal noise dosimeters until publication of the final ANSI standard at some future time is not justified.

2. With respect to replacing the requirement in § 70.505, that sound level meters meet ANSI, "Specification for Sound Level Meters", S1.4-1971 (Type S2A) with the requirement that only sound level meters certified by NIOSH be used, that:

Notice of this proposed change was insufficient to apprise the public of the issue involved.

3. With respect to the desirability, reliability, and accuracy of the personal noise dosimeter, that:

(a) Use of personal noise dosimeters is desirable and necessary for the prevention of occupational disease in that the determination of the noise exposure for approximately 11,000 coal miners employed in high noise occupations cannot be determined by conventional hand-held sound level meter procedures because the nature of their work conditions pose a safety hazard to the person conducting the noise survey.

(b) Data and information available from one state agency and one Federal agency routinely using personal noise dosimeters to assess employee noise exposure indicate that the personal noise dosimeter is a highly reliable measurement instrument with annual failure rates of less than 4.5 percent. Most failures are attributable to microphone interferences resulting in an inability of the instrument to achieve calibration tolerances. Thus, there is a need for annual recalibration of personal noise dosimeters including, as a minimum, frequency response testing and visual inspection of the microphone for any foreign matter or defects.

(c) Equipment vibration levels, electromagnetic field, relative humidity, and temperatures found in coal mines are unlikely to affect dosimeter performance.

(d) Inadvertent and extraneous noises may be integrated by personal

noise dosimeters, thus, affecting dosimeter readings; however, this problem can be minimized by spot checking of noise levels with sound level meters, or by full-shift observation of the measurement by a "qualified" person as is required for supplemental noise surveys in § 70.509(b) of the current coal mine health noise standard.

(e) Field and laboratory comparisons of personal noise dosimeters with other noise survey instruments or systems meeting ANSI S1.4-1971 tolerances for type I or type II instruments, indicate that noise dosimeters will yield comparable results to these other noise measurement instruments.

(f) Instrument errors (including calibrator error) are less than 1 dB, and these errors combined with other possible errors associated with microphone placement and calibration drift will be within the +2 dBA tolerance permitted by the Mining Enforcement and Safety Administration for purposes of citing noise violations.

4. With regard to the cost of personal noise dosimeters, that:

The cost of personal noise dosimeters is, on the average, only slightly higher than the cost of sound level

meters meeting ANSI S1.4-1971 type S2A specifications, and in some models of personal dosimeters the cost is less than the comparable type S2A sound level meter for purchases of multiple units.

Dated: January 24, 1978.

J. DONALD MILLAR,  
Acting Director, National Institute for Occupational Safety and Health.

## INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1241]

[No. 36557]

## ANNUAL, SPECIAL OR PERIODIC REPORTS

Reporting Railroad Track Maintenance

AGENCY: Interstate Commerce Commission.

ACTION: Postponement of report and order.

SUMMARY: The Commission has voted to postpone the issuance of the Report and Order in the above entitled proceeding (42 FR 32819, June 28, 1977) until April 15, 1978, as provided for in section 17(9)(e) of the Interstate Commerce Act (49 U.S.C. 17). This proceeding has been extended in order to obtain additional clarification of specific issues related to reporting railroad track maintenance and, a related topic, depreciation and betterment accounting for railroad track structures. The Commission believes that clarification of the specific issues related to these topics can best be obtained through participation of interested parties in an informal conference. The Informal Conference will be held by the Commission on February 15, 1978, in Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Mr. Ronald Young, Chief, Section of Accounting, Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, phone No.: 202-275-7448.

H. G. HOMME, Jr.,  
Acting Secretary.

### ACTION

#### PRIVACY ACT OF 1974

##### Notice of New System of Records

#### AGENCY: ACTION.

**ACTION:** Notification of Privacy Act system of records.

**SUMMARY:** This notice is published to inform the public that ACTION proposes to establish a system of records titled Former Volunteer/Staff Resource Record (AF/FVL-1). The purpose of this system is to offer former ACTION volunteers and staff an opportunity to participate in a resource group which will take part in furthering the mission of ACTION to mobilize people for voluntary action at home and abroad. Any interested person may submit written views, comments or other data to our Office of the General Counsel.

**DATES:** Comments must be received on or before February 27, 1978.

**ADDRESS:** ACTION, 806 Connecticut Avenue NW., Office of the General Counsel, Room 607, Washington, D.C. 20525.

#### FOR FURTHER INFORMATION CONTACT:

Mr. John F. Nolan, Administration and Finance, ACTION, Washington, D.C. 20525, 202-254-8105.

#### System name:

Former Volunteer/Staff Resource Record (AF/FVL-1).

#### System location:

ACTION, Office of Former Volunteer Liaison, 806 Connecticut Avenue NW., Washington, D.C. 20525.

#### Categories of individuals covered by the system:

All former staff and volunteers.

#### Categories of records in the system:

Individual former staff and former volunteer files containing the following information about the particular individual: name, current address; current home and business phone number, social security number; date of birth; next of kin name and address; preservice, service, and post-service education, employment and training experience; trade skills; language

skills; educational level; teaching experience; current interest in voluntary service; type of volunteer/staff duty assignments and location of assignments.

#### Authority for maintenance of the system:

The Peace Corps Act, as amended (22 U.S.C. 2501, et seq.); and the Domestic Volunteer Service Act of 1973 (42 U.S.C. 4951).

#### Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Information in this file will be used by the ACTION agency to involve former staff and volunteers with policy formation, program evaluation, recruitment, foreign and domestic disaster relief, and to keep up-to-date addresses for mailing publications and public affairs releases.

#### Policies and practices for storing, retrieving, accessing, retaining and disposing of records in the system:

**Storage:** Files are maintained on magnetic discs and tapes which are stored in a locked room when not in immediate use in a building with a 24-hour guard.

#### Retrievability:

Records are indexed by categories such as skills, social security number, and alphabetical order.

#### Safeguards:

Records in the system are available only to appropriate officials of ACTION with the need for access to such records for the performance of their duties.

#### Retention and disposal:

Records are begun following end of staff and/or volunteer service and retained for the "life" of the volunteer/staffer. These records have no present destruction data and are now expected to be destroyed 50 years after establishment.

#### System manager and address:

Coordinator, Office of Former Volunteer Liaison, ACTION, 806 Connecticut Avenue NW., Washington, D.C. 20525.

#### Record source categories:

Information supplied by former staff and former volunteers.

#### Notification, access and contest procedures:

Individuals wishing to see information in their records, inquire if this system of records contains information about them, or contest/correct information should provide their name, any former name, date of birth, social security number, dates of service if known, location of service and type of volunteer (peace Corps or VISTA) or staff. Individuals should address their inquiries to: Director, Administrative Services Division, Office of Administration and Finance, ACTION, 806 Connecticut Avenue NW., Washington, D.C. All inquiries should have "Privacy Act Request" noted on the envelope.

This notice is issued in Washington, D.C., on January 24, 1978.

SAM BROWN,  
Director.

### DEPARTMENT OF AGRICULTURE

#### Animal and Plant Health Inspection Service

#### JAPANESE BEETLE QUARANTINE AND CONTROL PROGRAM

##### Notice of Meetings

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Notice of public meetings.

**SUMMARY:** Meetings are to be held in order to provide a public forum for a discussion of the status of the Japanese beetle quarantine and control program.

#### TIME, DATE, AND PLACE OF MEETINGS:

February 28, 1978, at 1 p.m. Holiday Inn, Shannon Room (Baltimore-Washington International Airport) 6500 Elkridge Landing Road, Baltimore, Md. 21090.

March 14, 1978, at 1 p.m. Ramada Inn, East Continental Room (Sky Harbor Airport) 3801 East Van Buren Street, Phoenix, Ariz. 85008.

**SUPPLEMENTAL INFORMATION:** These meetings, which are open to all interested agencies, groups, and individuals, are designed to brief the public on the current Japanese beetle situation, and create an opportunity for an open discussion of the Department's program in this area.

## NOTICES

These meetings will be conducted by representatives of the Animal and Plant Health Inspection Service (APHIS), which is the lead Government Agency involved in the present cooperative Federal-State Japanese beetle program.

At present, Japanese beetles are found in 22 States east of the Mississippi River and in the State of Missouri. A federal quarantine program is currently being conducted to prevent the spread of this insect into areas where it is not currently located. The agenda will include presentations from APHIS on the history and biology of the Japanese beetle in the United States, a history of regulatory and control actions, and a discussion of the economic significance of the Japanese beetle. Throughout the program, the questions and views of all interested members of the public will be solicited.

#### FOR FURTHER INFORMATION CONTACT:

James O. Lee, Jr., Deputy Administrator, Plant Protection and Quarantine Programs, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 302-E, Administration Building, 14th and Independence Avenue, SW., Washington, D.C. 20250, 301-447-5601.

#### RESOURCE MANAGEMENT PLAN, TIMBER MANAGEMENT PLAN—ELDORADO NATIONAL FOREST

##### Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final

environmental statement for the proposed revision of the ten-year Timber Management plan for the Eldorado National Forest, USDA-FS-R5-FES(Adm)-77-03. Portions of the Forest are located in El Dorado, Amador, Placer and Alpine Counties, Calif.

The environmental statement concerns proposed changes in harvesting timber from the Eldorado National Forest and analyzes the environmental effects of the proposed new plan. The recommended alternatives is the harvest of 137.5 million board feet per year.

The draft environmental statement was transmitted to the Council on Environmental Quality (CEQ) on March 30, 1977. The final environmental statement was transmitted to the Environmental Protection Agency (EPA) on January 19, 1978.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3230 12th St. and Independence Ave. SW., Washington, D.C. 20250.  
Regional Forester, U.S. Forest Service, Room 529, 630 Sansome Street, San Francisco, Calif. 94111.  
Eldorado National Forest, Supervisor's Office, 100 Forni Road, Placerville, Calif. 95667.

Placerville Ranger Station, 3491 Carson Court, Placerville, Calif. 95667.  
Georgetown Ranger Station, Georgetown, Calif. 95634.  
Pacific Ranger Station, Pollock Pines, Calif. 95726.  
Amador Ranger Station, Jackson, Calif. 95642.

A limited number of single copies are available, upon request, from Forest Supervisor Joseph H. Harn, Eldorado National Forest, 100 Forni Road, Placerville, Calif. 95667.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

ROBERT W. CERMAK,  
Deputy Regional Forester.

#### Agriculture Marketing Service

#### FARMERS AND RANCHERS LIVESTOCK AUCTION, INC., CHARLOTTE, ARK., ET AL.

##### Proposed Posting of Stockyards

The Chief, Registrations, Bonds, and Reports Branch, Packers and Stockyards, Agriculture Marketing Service, United States Department of Agriculture, has information that the livestock markets named below are stockyards as defined in section 302 of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 202), and should be

made subject to the provisions of the Act.

AR-158.—Farmers and Ranchers Livestock Auction, Inc., Charlotte, Ark.

FL-125.—Madison Stockyard, Inc., Madison, Fla.

MO-243.—Adair County Livestock Market Center, Inc., Kirksville, Mo.

MO-244.—Missouri Feeder Pig Auctions, Inc., Middletown, Mo.

VA-150.—Lynchburg Livestock Market, Inc., Lynchburg, Va.

Notice is hereby given, therefore, that the said Chief, pursuant to authority delegated under the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), proposes to issue a rule designating the stockyards named above as posted stockyards subject to the provisions of the Act as provided in section 302 thereof.

Any person who wishes to submit written data, views, or arguments concerning the proposed rule, may do so by filing them with the Chief, Registrations, Bonds, and Reports Branch, Packers and Stockyards, Agriculture Marketing Service, United States Department of Agriculture, Washington, D.C. 20250, by February 13, 1978. All written submissions made pursuant to this notice shall be made available for public inspection at such times and places in a manner convenient to the public business (7 U.S.C. 1.27(b).)

Done at Washington, D.C., this 23d day of January, 1978.

EDWARD L. THOMPSON,  
Chief, Registrations, Bonds, and  
Reports Branch, Livestock  
Marketing Division.

#### Rural Electrification Administration

#### DAIRYLAND POWER COOPERATIVE, LACROSSE, WIS.

##### Proposed Loan Guarantee

Under the authority of Pub. L. 93-32 (87 Stat. 65) and in conformance with applicable agency policies and procedures as set forth in REA Bulletin 20-22 (Guarantee of Loans for Bulk Power Supply Facilities), notice is hereby given that the Administrator of REA will consider providing a guarantee supported by the full faith and credit of the United States of America for a loan in the approximate amount of \$12,650,000 to this cooperative. The loan funds will be used to finance spare rotors for the Genoa Station No. 3, previously approved modifications to the LaCrosse boiling water reactor, and modifications at Cassville and Alma Stations.

Legally organized lending agencies capable of making, holding, and servicing the loan proposed to be guaran-

teed may obtain engineering and economic information on the proposed project including the proposed schedule for loan advances to Dairyland and projected financial forecast data relating to Dairyland's operations from Mr. John P. Madgett, Manager, Dairyland Power Cooperative, P.O. Box 817, La-Crosse, Wis. 54601.

In order to be considered, proposals must be submitted on or before February 27, 1978, to Mr. Madgett. The right is reserved to give such consideration and make such evaluation or other disposition of all proposals received, as Dairyland and REA deem appropriate. Prospective lenders are advised that the guaranteed financing for this project is available from the Federal Financing Bank under a standing agreement with the Rural Electrification Administration.

Copies of REA Bulletin 20-22 are available from the Director, Information Services Division, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250.

Dated at Washington, D.C., this 16th day of January 1978.

JOSEPH VELLONE,  
Administrator, Rural  
Electrification Administration.

## [6320-01]

[Docket 31645; Order 78-1-105]

## PERIMETER AVIATION LTD.

## Statement of Tentative Findings and Conclusions and Order To Show Cause

Adopted by the Civil Aeronautics

Board at its office in Washington, D.C. on the 24th day of January 1978.

In the matter of application of Perimeter Aviation Ltd. for a foreign air carrier permit pursuant to section 402 of the Federal Aviation Act of 1958.

By application filed November 9, 1977, Perimeter Aviation Ltd. (Perimeter) requests a foreign air carrier permit to engage in charter foreign air transportation of persons and their accompanying baggage, and plane-load charter foreign air transportation of property, between any point or points in Canada and the United States, using "small aircraft" pursuant to the Nonscheduled Air Service Agreement executed on May 8, 1974, by the Governments of the United States and Canada.

## FITNESS OF APPLICANT FOR A FOREIGN AIR CARRIER PERMIT

Perimeter was incorporated under the Companies Act of the Province of Manitoba on September 13, 1960. The Air Transport Committee of the Canadian Transport Commission has issued

Perimeter license No. A.T.C. 378/67 (CF), dated March 22, 1967, a class 9-4 license which authorizes the holder to operate international charter commercial air services from a base at Winnipeg, Manitoba. The licensee is restricted in its operation to the use of Groups A, B, and C aircraft. The Canadian Department of Transport, Civil Aviation Branch, has issued Perimeter Operating Certificate No. 2002, dated February 23, 1977, which certifies that Perimeter is adequately equipped and able to conduct a safe operation.

The applicant's balance sheet as of December 31, 1976, showed current assets of \$607,251 and current liabilities of \$529,850. Total assets and liabilities were \$1,023,495. For the year ended December 31, 1976, the company realized a net profit of \$41,328. The applicant states that at no time since its inception has it been unable to meet current financial obligations nor has it defaulted on any commitment to provide transportation.

The applicant owns or leases the following aircraft:

Type of Aircraft	Number owned or leased	Passenger seating capacity	Maximum authorized takeoff weight (pounds)
Lear Jet 35A.....	1	8	17,000
Cessna Citation 500.....	1	8	12,000
Beechcraft Queenair A65.....	1	10	7,700
Beechcraft Duke A60.....	1	5	6,775
Beechcraft Baron 58P.....	1	5	6,100
Beechcraft Baron B55.....	1	5	5,100
Beechcraft Travelair E95.....	1	4	4,200

During the last five years the applicant has had no safety or tariff violations. The applicant has experienced one accident. On August 11, 1977, a Beechcraft Travelair crashed on landing. There were no deaths or serious injuries.

## "PUBLIC INTEREST" IN AWARD OF THE AUTHORITY SOUGHT

The applicant relies upon the Nonscheduled Air Service Agreement

signed by the Governments of Canada and the United States on May 8, 1974, as the basis for the grant of the requested authority. By diplomatic note No. 584, dated November 18, 1977, the Government of Canada designated the applicant under the Agreement to perform charter services with small aircraft. The aircraft the applicant plans to use in its operations between the United States and Canada are within the scope of the designation.

## OWNERSHIP AND CONTROL OF THE APPLICANT

The officers of the corporation are William Joseph Wehrle, President and Director, and Orla (Toonstra) Gillis, Secretary. Both officers are Canadian

Under Canadian Air Transport Committee regulations, aircraft are grouped according to the maximum authorized takeoff weight on wheels as follows: Group A—not greater than 4,300 pounds, Group B—over 4,300 pounds, but not greater than 7,000 pounds, and Group C—over 7,000 pounds, but not greater than 18,000 pounds.  
\*See Docket 26473.

citizens. The outstanding capital stock of Perimeter is held by William Wehrle, president of the company, (10,000 shares) and Remor Limited (10,000 shares). Remor Ltd. is a Canadian corporation. Perimeter's long-term debt is held by the Bank of Montreal (\$91,082), William J. Wehrle (\$59,517), and Remor Limited (\$206,777). Perimeter is the owner of two-thirds of the issued common shares of Perimeter (Inland) Ltd., a Canadian commercial air carrier.

In view of the foregoing and all the facts of record, the Board tentatively finds and concludes:

1. That Perimeter Aviation Ltd. is substantially owned and effectively controlled by nationals of Canada;

2. That it is in the public interest to issue a foreign air carrier permit for small aircraft operations to Perimeter Aviation Ltd. authorizing it to engage in charter foreign air transportation with small aircraft of persons and their accompanied baggage and plane-load charters of property between any point or points in Canada and the United States;

3. That the public interest requires that the exercise of the privileges granted by the permit shall be subject to the terms, conditions, and limitations contained in the specimen form of permit attached to this order, and to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board;

4. That Perimeter Aviation Ltd. is fit, willing, and able properly to perform the above-described foreign air transportation and to conform to the provisions of the Act and the rules, regulations, and requirements of the Board thereunder;

5. That except to the extent granted, the application of Perimeter Aviation Ltd. in Docket 31645 should be denied; and

6. That an evidentiary hearing is not required in the public interest.\*

## ACCORDINGLY, IT IS ORDERED THAT:

1. All interested persons are directed to show cause why the Board should not make final its tentative findings and conclusions, and why a foreign air carrier permit in the form of the specimen permit attached to this order should not, subject to the approval of the President pursuant to section 801 of the Act, be issued to Perimeter Aviation Ltd.;

\*We also tentatively find that our proposed action will not constitute a "major regulatory action" under the Energy Policy and Conservation Act as defined in section 313.4(a)(1) of the Board's Regulations.

2. Any interested person having objection to the issuance of an order making final the Board's tentative findings and conclusions and issuing the permit shall, within 21 days after the adoption of this order, file with the Board and serve upon the persons named in paragraph 5, a statement of objections specifying the part or parts of the tentative findings and conclusions objected to, together with a summary of testimony, statistical data and such evidence expected to be relied upon in support of the statement of objections. If an evidentiary hearing is requested, the objector should state in detail why such hearing is considered necessary and what relevant and material facts he would expect to establish through such hearing which cannot be established in written pleadings;

3. If timely and properly supported objections are filed, further consideration will be given to the matters and issues raised by the objections before further action is taken by the Board; *Provided*, That the Board may proceed to enter an order in accordance with its tentative findings and conclusions if it is determined that there are no factual issues present that warrant the holding of an evidentiary hearing;

4. In the event no objections are filed, all further procedural steps will be deemed to have been waived, and the Board may proceed to enter an order in accordance with its tentative findings and conclusions; and

5. This order shall be served upon Perimeter Aviation Ltd. and the Ambassador of Canada in Washington, D.C.

This order will be published in the FEDERAL REGISTER and will be transmitted to the President.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,  
Secretary.

## SPECIMEN PERMIT

## PERMIT TO FOREIGN AIR CARRIER FOR SMALL AIRCRAFT OPERATIONS

Perimeter Aviation Ltd. is hereby authorized, subject to the provisions hereinafter set forth, the provisions of the Federal Aviation Act of 1958 and the orders, rules, and regulations issued thereunder, to engage in charter foreign air transportation as follows:

Charter flights of persons and their accompanied baggage, and plane-load charter flights of property, between

\*Since provision is made for the filing of objections to this order, petitions for reconsideration will not be entertained.

any point or points in Canada and any point or points in the United States.

The holder shall be authorized to perform those types of charters originating in Canada as are now, or may hereafter be, prescribed for carriage by small aircraft in Annex B (III)(B) of the Nonscheduled Air Service Agreement between the United States and Canada, signed May 8, 1974, including any amendments, supplements, reservations, or supersessions to that Agreement; *Provided*, That any such charters may be performed only to the extent authorized by the Air Carrier Regulations of the Canadian Transport Commission applicable to operations by small aircraft, and the authority of the holder to perform such charters shall be subject to those Regulations. The authority of the holder to perform United States-originating charters shall, in accordance with Annex B (III)(A) of such Nonscheduled Air Service Agreement, be limited to commercial air transportation of passengers and their accompanied baggage, and property, on a time, mileage, or trip basis, where the entire plane-load capacity of one or more aircraft has been engaged by a person for his own use or by a person for the transportation of a group of persons and/or their property, as agent or representative of such groups, or such small aircraft operations as may be authorized pursuant to any amendment, supplement, reservation, or supersession to that Agreement.

This permit shall be subject to the following terms, conditions, and limitations:

(1) In the performance of the charter operations authorized by this permit, the holder shall not use "large aircraft" as defined in Annex A (I)(A) of the Nonscheduled Air Service Agreement between the United States and Canada, signed May 8, 1974, including amendments, supplements, reservations, or supersessions to that Agreement.

(2) The holder shall not engage in foreign air transportation between the United States and any point or points, other than a point or points in Canada, or transport any property or persons whose journey includes a prior, subsequent, or intervening movement by air (except for the move-

\*Annex B (III)(B) presently authorizes Canadian-originating small aircraft charters of the types prescribed in section (II)(B); but only to the extent applicable to small aircraft pursuant to Canadian Transport Commission Regulations. The applicable types of charters presently authorized are: Single Entity Passenger, Single Entity Property, Pro Rata Common Purpose, and Inclusive Tour. (In some instances split passenger charters are authorized.)

ment of passengers independently of any group) to or from a point not in the United States or Canada: *Provided*, That the Board may, upon application by the holder, or by regulation, authorize the performance of charters where such movements are involved.

(3) The holder shall not perform United States-originating charter flights which at the end of any calendar quarter would result in the aggregate number of all United States-originating charter flights performed by the holder on or after May 8, 1974 exceeding by more than one-third the aggregate number of all Canadian-originating charter flights performed by the holder on or after May 8, 1974: *Provided*, That the Board may authorize the performance of charters not meeting the requirements set forth. For the purpose of making such computation the following shall apply:

(a) A charter shall be considered to originate in the United States (or Canada) if the passengers or property are first taken on board in that country, and shall be considered as one flight whether the charter be one-way, round-trip, circle tour, or open jaw, even if a separate contract is entered into for a return portion of the charter trip from Canada (or the United States).

(b) The computation shall be made separately for (i) "small aircraft" flights of persons; and (ii) "small aircraft" flights of property.

(c) In the case of a lease of aircraft with crew for the performance of a charter flight on behalf and under the authority of another carrier, the flight shall be included in the computation if the holder is the lessee, and shall not be included if the holder is the lessor.

(d) There shall be excluded from the computation:

(i) flights utilizing aircraft having a maximum authorized takeoff weight on wheels (as determined by Canadian Transport Commission regulations) not greater than 18,000 pounds; and

(ii) flights originating at a United States terminal point of a route authorized pursuant to the Air Transport Services Agreement between the United States and Canada, signed January 17, 1966, as amended, or any agreement which may supersede it, or any supplementary agreement thereto which establishes obligations or privileges thereunder (if, pursuant to any such agreement, the holder also holds a foreign air carrier permit authorizing individually ticketed or individually waybilled service over such route, and provides some scheduled service on any route pursuant to any such agreement), when such flights serve either (a) a Canadian terminal point on such route, or (b) any Canadian intermediate point authorized for service on such route by such foreign air carrier permit.

(4) The holder may grant stopover privileges at any point or points in the United States only to passengers and their accompanied baggage moving on a Canadian-originating flight operating under a contract for round-trip charter transportation to be provided solely by the holder and as to which the same aircraft stays with the passengers throughout the journey: *Provided*, That the Board may authorize the performance of charters not meeting the requirements set forth.

(5) The Board, by order or regulation and without hearing, may require advance approval of individual charter trips conducted by the holder pursuant to the authority granted by this permit, if it finds such action to be required in the public interest.

(6) The holder shall conform to the airworthiness and airman competency requirements prescribed by the Government of Canada for Canadian international air service.

(7) This permit shall be subject to all applicable provisions of any treaty, convention, or agreement affecting international air transportation now in effect, or that may become effective during the period this permit remains in effect, to which the United States and Canada shall be parties.

(8) This permit shall be subject to the condition that the holder shall keep on deposit with the Board a signed counterpart of CAB Agreement 18900, an agreement relating to liability limitations of the Warsaw Convention and the Hague Protocol approved by Board Order E-23680, May 13, 1966, and a signed counterpart of any amendment or amendments to such agreement which may be approved by the Board and to which the holder becomes a party.

(9) The holder (1) shall not provide foreign air transportation under this permit unless there is in effect third-party liability insurance in the amount of \$1,000,000 or more to meet potential liability claims which may arise in connection with its operations under this permit, and unless there is on file with the Docket Section of the Board a statement showing the name and address of the insurance carrier and the amounts and liability limits of the third-party liability insurance provided, and (2) shall not provide foreign air transportation of persons unless there is in effect liability insurance sufficient to cover the obligations assumed in CAB Agreement 18900, and unless there is on file with the Docket Section of the Board a statement showing the name and address of the insurance carrier and the amounts and liability limits of the passenger liability insurance provided. Upon request, the Board may authorize the holder to supply the name and address of an insurance syndicate in lieu of the name and address of the member insurers.

(10) By accepting this permit, the holder waives any right it may possess to assert any defense of sovereign immunity from suit in any action or proceeding instituted against the holder in any court or other tribunal in the United States (or its territories or possessions) based upon any claim arising out of operations by the holder under this permit.

The exercise of the privileges granted by this permit shall be subject to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board.

This permit shall become effective on \_\_\_\_\_. Unless otherwise terminated at an earlier date pursuant to the terms of any applicable treaty, convention, or agreement, this permit shall terminate (1) upon the effective date of any treaty, convention, or agreement, or amendment thereto, which shall have the effect of eliminating the charter foreign air transportation here authorized from the transportation which may be operated by carriers designated by the Government of Canada (or in the event of the elimination of part of the charter foreign air transportation here authorized, the authority granted here shall be terminated to the extent of such elimination), or (2) upon the effective date of any permit granted by the Board to any other carrier designated by the Government of Canada in lieu of the holder hereof, or (3) upon the termination or expiration of the Non-scheduled Air Service Agreement, between the United States and Canada, signed May 8, 1974: *Provided, however*, That clause (3) of this paragraph shall not apply if prior to the occurrence of the event specified in clause (3), the operation of the foreign air transportation here authorized becomes the subject of any treaty, convention, or agreement to which the United States and Canada are or shall become parties.

In witness whereof, the Civil Aeronautics Board has caused this permit to be executed by the Secretary of the Board, and the seal of the Board to be affixed on the \_\_\_\_\_.  
Issuance of this permit to the holder approved by the President of the United States on \_\_\_\_\_ in Order \_\_\_\_\_.

Secretary.

## TRAFFIC CONFERENCE 1 OF THE INTERNATIONAL AIR TRANSPORT ASSOCIATION

(Docket 30332; Agreement C.A.B. 27097)

Order

Agreement adopted by Traffic Conference 1 of the International Air Transport Association relating to specific commodity rates.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of Traffic Conference 1 of the International Air Transport Association (IATA). The agreement, adopted by mail vote, has been assigned the above CAB agreement number.

The agreement would delete the rates for Item 1421 (Cut Flowers, Inc. Mimosa) from Bogota/Medellin to Baltimore / Charlotte / Jacksonville / Norfolk / Orlando / Philadelphia / Tampa / Washington / Boston / Cleveland / Detroit / Hartford / and Pittsburgh.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14, it is not found that Resolution 100(Mail 199)590, incorporated in Agreement CAB 27097, is adverse to the public interest or in violation of the Act.

Accordingly, it is ordered that: Agreement CAB 27097 is approved.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board unless within such period a petition for review is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

JAMES L. DEEGAN,  
Chief, Passenger and Cargo  
Rates Division, Bureau of  
Fares and Rates.

PHYLLIS T. KAYLOR,  
Secretary.

## KIRSTEIN LEATHER CO. AND CLASSY LEATHER GOODS CORP.

Determinations of Eligibility To Apply for  
Trade Adjustment Assistance

Petitions were accepted for filing on January 20, 1978, from two firms: (1) Kirstein Leather Co., 72 Main Street, Saco, Maine 04072, a tanner of hides and processor of leather; and (2) Classy Leather Goods Corp., 15 East 32nd Street, New York, N.Y. 10016, a producer of handbags. The petitions were submitted pursuant to section

251 of the Trade Act of 1974 (Pub. L. 93-618) and § 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315). Consequently, the U.S. Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of the petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business on February 6, 1978.

JACK W. OSBURN, Jr.,  
Chief, Trade Act Certification  
Division, Office of Planning  
and Program Support.

## MANAGEMENT-LABOR TEXTILE ADVISORY COMMITTEE

## Public Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (1976 ed.), notice is hereby given that a meeting of the Management-Labor Textile Advisory Committee will be held on February 22, 1978 at 1:30 p.m. in Room 3817, Department of Commerce, 14th and Constitution Avenue NW., Washington, D.C. 20230.

The Committee was established by the Secretary of Commerce on October 18, 1961 to advise U.S. Government officials on problems and conditions in the textile and apparel industry and furnish information on world trade in textiles and apparel.

The agenda for the meeting will be as follows:

1. Review of import trends.
2. Implementation of textile agreements.
3. Report on conditions in the domestic market.
4. Other business.

A limited number of seats will be available to the public on a first-come basis. The public may file written statements with the Committee before or after each meeting. Oral statements may be presented at the end of the meeting to the extent time is available.

Copies of the minutes of the meeting will be made available on written request addressed to the DIBA Freedom of Information Officer, Freedom of Information Control Desk, Room 3012, U.S. Department of Commerce, Washington, D.C. 20230.

Further information concerning the Committee may be obtained from Arthur Garel, Director, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202-377-5078.

Dated: January 24, 1978.

EDWARD GOTTFRIED,  
Acting Director,  
Office of Textiles.

## GULF OF MEXICO FISHERY MANAGEMENT COUNCIL SUBPANELS OF THE ADVISORY PANEL

## Public Meeting

Subpanels of the Advisory Panel of the Gulf of Mexico Fishery Management Council, established under section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265), will meet February 13-16, 1978, at Barclay Inn, 5303 West Kennedy Boulevard, Tampa, Florida. The meeting of spiny lobster and coral subpanels starts at 1 p.m. on February 13, 1978, and will adjourn at about noon on February 14, 1978. The meeting of the coastal herring and swordfish subpanels starts at 1 p.m., February 15, 1978, and will adjourn at about noon on February 16, 1978.

*Proposed Agenda:* (1) Management Plans; (2) Orientation; and (3) Other fishery management business, if any.

These meetings are open to the public. For more information on seating, changes to the agenda, and/or written comments, contact Wayne E. Swingle, Executive Director, Gulf of Mexico Fishery Management Council, 5401 West Kennedy Boulevard, Tampa, Florida 33607, Telephone: 813-228-2815.

Dated: January 24, 1978.

WINFRED H. MEIBOHM,  
Associate Director, National  
Marine Fisheries Service.

## [3510-13]

**PROPOSAL FROM THE INTERNATIONAL CON-  
FERENCE ON RECOGNITION OF NATIONAL  
PROGRAMS FOR TESTING LABORATORIES  
FOR AN INTERNATIONAL REGISTER OF OR-  
GANIZATIONS RESPONSIBLE FOR ACCRE-  
DITING TESTING LABORATORIES**

**Invitation for Comments**

The purpose of this notice is to call public attention to a proposal from the International Conference on Recognition of National Programs for Testing Laboratories for an international register of organizations responsible for accrediting testing laboratories, and to provide an opportunity through the Department of Commerce for interested parties to comment on that proposal.

In October 1977, representatives of seventeen countries, including the United States, and three international organizations met in Copenhagen to participate in the International Conference on Recognition of National Programs for Testing Laboratories. The U.S. delegation, headed by Dr. Howard I. Forman, Deputy Assistant Secretary of Commerce for Product Standards, consisted of seventeen public and private sector representatives. (Dr. Forman's Office of Product Standards administers the Department of Commerce's National Voluntary Laboratory Accreditation Program.) The Copenhagen conferees agreed that there was a need to pursue the possibility of developing arrangements whereby national governments and/or private sector organizations which accredit testing laboratories can recognize each other on a reciprocal basis, and thereby facilitate international trade. A second conference on this subject is planned for the week of October 23, 1978, in Washington, D.C.

The Copenhagen conferees established a task force to consider the feasibility of preparing an international register of laboratory accreditation organizations, and to identify items which might have a commonality of usage or interest in the programs of those organizations. The chairman of

the task force, Mr. Stanley S. Linton of the Government of the United Kingdom, in his letter of December 19, 1977 to the members of his task force, proposes certain alternative approaches to accomplishing the mission of this task force. Persons interested in reviewing and commenting upon those proposals and/or suggesting alternate procedures may request a copy of this letter and its appendices by writing to Dr. Howard I. Forman, Deputy Assistant Secretary for Product Standards, room 3876, U.S. Department of Commerce, Washington, D.C. 20230.

To assist the Department of Commerce in its response to the above mentioned letter, all interested persons are invited to send written comments on the proposal for an international register of organizations responsible for accrediting testing laboratories, and on the need for and methods of identifying items of common usage within the accreditation programs of those organizations, to Dr. Forman at the above address by February 17, 1978.

Dated: January 23, 1978.

JORDAN J. BARUCH,  
Assistant Secretary for  
Science and Technology.

## [3510-25]

**COTTON TEXTILE AGREEMENT WITH  
PAKISTAN, EFFECTIVE JANUARY 1, 1978  
IMPORT RESTRAINT LEVELS**

JANUARY 19, 1978.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Establishing import restraint levels for certain cotton textile products from Pakistan pursuant to a new multifiber agreement.

SUMMARY: The Governments of the United States and Pakistan exchanged notes, dated, respectively, January 4 and 9, 1978, establishing a new Bilateral Cotton Textile Agreement for the period beginning on January 1, 1978 and extending through June 30, 1982. Among the provisions of the agreement are those establishing specific levels of restraint for cotton textile products in Categories 313, 319, 363, 338 and 339, produced or manufactured in Pakistan and exported to the United States during the 12-month period beginning on January 1, 1978. Accordingly, there is published below a letter from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs directing that entry

for consumption or withdrawal from warehouse for consumption of cotton textile products in Categories 313, 319, 363, 338 and 339 be limited to the designated 12-month levels of restraint.

A description of the new textile categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on January 4, 1978 (43 FR 884).

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

EFFECTIVE DATE: February 6, 1978.

**FOR FURTHER INFORMATION  
CONTACT:**

Donald R. Foote, International  
Trade Specialist, Office of Textiles,  
U.S. Department of Commerce,  
Washington, D.C. 20230, 202-377-  
5423.

ROBERT E. SHEPHERD,  
Chairman, Committee for the  
Implementation of Textile  
Agreements, and Deputy Assistant  
Secretary for Domestic  
Business Development.

JANUARY 19, 1978.

COMMISSIONER OF CUSTOMS  
Department of the Treasury  
Washington, D.C.

DEAR MR. COMMISSIONER: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977, pursuant to the Bilateral Cotton Textile Agreement of January 4 and 9, 1978, between the Governments of the United States and Pakistan, and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 8, 1977, you are directed to prohibit, effective on February 6, 1978 and for the twelve-month period beginning on January 1, 1978 and extending through December 31, 1978, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in the following categories in excess of the indicated levels of restraint:

Category	12-month level of restraint <sup>1</sup>
313	56,419,000 yd <sup>1</sup> .
319	13,321,000 yd <sup>1</sup> .
363	4,700,000 numbers.
336	1,597,222 doz of which not more than 799,542 doz shall be in T.S.U.S.A. 380.0651 and 380.0652.
339	347,222 doz of which not more than 122,097 doz shall be in T.S.U.S.A. 382.0669 and 382.0671.

<sup>1</sup>The levels of restraint have not been adjusted to account for entries made prior to the effective date of this directive.

Entries of cotton textile products in the foregoing categories, produced or manufactured in Pakistan and exported to the United States prior to January 1, 1978, shall not be subject to this directive.

Cotton textile products in Categories 313, 319, 363, 338 and 339 which have been released from the custody of the U.S. Customs

Service under the provisions of 19 U.S.C. 1448(b) before February 6, 1978, shall not be denied entry under this directive.

The levels of restraint set forth above are subject to adjustment according to the provisions of the bilateral agreement of January 4 and 9, 1978 between the Governments of the United States and Pakistan which provide, in part that: (1) within the aggregate and group limits of the agreement, specific levels of restraint may be exceeded by designated percentages; (2) these same levels may be increased for carryover and carryforward; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Any appropriate adjustments under the provisions of the bilateral agreement referred to above will be made to you by letter.

A description of the categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on January 4, 1978 (43 FR 884).

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of Pakistan and with respect to imports of cotton textiles and cotton textile products from Pakistan have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT E. SHEPHERD,  
Chairman, Committee for the Imple-  
mentation of Textile Agreements,  
and Deputy Assistant Secretary for  
Domestic Business Development.

## [6820-33]

**COMMITTEE FOR PURCHASE FROM  
THE BLIND AND OTHER SEVERELY  
HANDICAPPED**

**PROCUREMENT LIST 1978**

**Additions**

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to Procurement List.

SUMMARY: This action adds to Procurement List 1978 commodities to be produced by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: January 27, 1978.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Va. 22201.

FOR FURTHER INFORMATION  
CONTACT:

C. W. Fletcher, 703-557-1145.

**SUPPLEMENTARY INFORMATION:**

On September 2, 1977, November 18, 1977, and December 2, 1977 the Committee for Purchase from the Blind and Other Severely Handicapped published notices (42 FR 44261), (42 FR 59543) and (42 FR 61297) of proposed additions to Procurement List 1978, November 14, 1977 (42 FR 59015).

After consideration of the relevant matter presented, the Committee has determined that the commodities listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48(c), 85 Stat. 77.

Accordingly, the following commodities are hereby added to Procurement List 1978:

**CLASS 7330**

Pad, Bakery (IB), 7330-00-379-4439, (GSA Regions 3 and 6 only).

**CLASS 5826**

Circuit Card Assembly (SH), 5826-00-237-9949.

**CLASS 6630**

Micro Bleeder (IB), 6630-01-NIB-0002.

C. W. FLETCHER,  
Executive Director.

## [6820-33]

**PROCUREMENT LIST 1978**

**Proposed Addition**

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Addition to Procurement List.

SUMMARY: The Committee has received a proposal to add to Procurement List 1978 a commodity to be produced by workshops for the blind and other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: March 2, 1978.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Va. 22201.

FOR FURTHER INFORMATION  
CONTACT:

C. W. Fletcher, 703-557-1145

**SUPPLEMENTARY INFORMATION:**

This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77.

If the Committee approves the proposed addition, all entities of the Federal Government will be required to procure the commodity listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodity to Procurement List 1978, November 14, 1977 (42 FR 59015):

## CLASS 1220

Case, Carrying 1220-00-765-5870, 1220-00-937-8286.

## DEPARTMENT OF ENERGY

Economic Regulatory Administration

## SYNTHETIC NATURAL GAS

Request for Comment on the Allocation of Naphtha for Synthetic Natural Gas Feedstock and Propane for Btu Enrichment—Algonquin SNG Corp.

AGENCY: Economic Regulatory Administration.

ACTION: Notice of request for comment.

SUMMARY: On August 29, 1975, the Federal Energy Administration (FEA) issued a Decision and Order (Order) to Algonquin Gas Transmission Co. (Algonquin), establishing a base period use and assigning a supplier of naphtha to be used as synthetic natural gas (SNG) feedstock at its Freetown, Mass., SNG facility. As a result of an appeal, FEA's Office of Exceptions and Appeals issued a Decision and Order on June 28, 1976, which remanded the Order to the FEA Assistant Administrator for Regulatory Programs for further findings of fact and conclusions of law. This notice requests public comments to assist the Economic Regulatory Administration (ERA) in evaluating Algonquin's pending petition under the amendments to 10 CFR 211.29 adopted on September 30, 1977.

DATE: Written comments to be submitted by February 24, 1978.

ADDRESS: Comments should be submitted to: Finn K. Neilsen, Economic Regulatory Administration, Office of Fuels Allocation, Room 6318, 2000 M Street NW., Washington, D.C. 20461.

## FOR FURTHER INFORMATION CONTACT:

Deanna Williams (DOE, Freedom of Information Reading Room), 12th and Pennsylvania Avenue NW., Room 2107, Washington, D.C. 20461, 202-566-9161.

Finn K. Neilsen (Economic Regulatory Administration, Office of Fuels Allocation), 2000 M Street NW., Room 6318, Washington, D.C. 20461, 202-254-9730.

SUPPLEMENTAL INFORMATION: On September 4, 1974, Algonquin submitted its petition for establishment of a base period volume of naphtha for its Freetown, Mass., SNG plant. On October 22, 1974, the FEA issued an assignment as amended on October

31, 1974, establishing a base period volume of 2,184,000 barrels of naphtha per calendar year.

On November 20, 1974, the FEA issued a notice (39 FR 40984, November 22, 1974), that a public hearing respecting Algonquin's petition for an upward adjustment of base period volumes pursuant to 10 CFR 211.29 would be held to receive oral statements from interested persons. Written comments respecting Algonquin's petition had previously been solicited and 14 comments were received. The public hearing was held on December 4, 1974, at which seven persons presented statements. Following the hearing Algonquin submitted additional information at FEA's request. Algonquin's final submission was filed on August 15, 1975. On August 29, 1975, FEA issued a Decision and Order (Order) assigning Algonquin 4,425,571 barrels of naphtha per year as SNG feedstock with Exxon Co. U.S.A., designated as the base period supplier for this volume.

On December 30, 1975, Algonquin petitioned FEA for the assignment of 7,550,000 gallons of propane for Btu enrichment of the SNG stream during the first and fourth calendar quarters. The proposed supplier of this propane is Petrolane Northeast Gas Service, Inc.

On March 22, 1976, the Petrochemical Energy Group appealed the FEA Order of August 29, 1975. On June 28, 1976, the Order was remanded to the FEA Assistant Administrator for Regulatory Programs (3 FEA 180,661), for further findings of fact and conclusions of law regarding Algonquin's service to firms which have alternate fuel capability on a continuing basis and any incremental pricing program implemented by Algonquin and its customers.

On September 30, 1977, the FEA amended 10 CFR § 211.29 of the Mandatory Petroleum Allocation Regulations and established new criteria by which to evaluate petitions for SNG feedstock allocations. The amended regulations provide that with respect to pending applications for SNG plant capacity existing on July 1, 1977, actions taken by the ERA under the new criteria will result in allocations of SNG feedstock no less favorable to the applicant than those which have been provided under the regulations in effect on July 1, 1977. An allocation, if granted, would allow Algonquin to continue operation of its Freetown, Mass., SNG facility at the same level and in a manner consistent with the August 29, 1975, Decision and Order.

On October 1, 1977, pursuant to the Department of Energy Organization Act, Pub. L. 95-91, and Executive Order 12009 (42 FR 46267, September 15, 1977) the Department of Energy (DOE) was established and the Secre-

tary of Energy assumed the functions of the FEA. The Administrator of the Economic Regulatory Administration (ERA) was delegated by the Secretary of Energy in Delegation Order 0204-4, the authority to administer the regulations promulgated under § 4(a) of the Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Comment procedure: A file containing all information and data filed in conjunction with Algonquin's petitions, other than confidential information which ERA has determined to be exempt from the disclosure requirements of 5 U.S.C. 522, is available for public inspection and copying at the DOE Freedom of Information Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Written comments regarding the Algonquin petition will be accepted and considered if filed by 4:30 p.m., February 24, 1978. Any person submitting written comments with respect to the Algonquin petition should submit ten (10) copies to ERA and should comply with the requirements of the ERA procedural regulations set forth at 10 CFR 205.33. Comments should be submitted to the Office of Fuel Allocation, Specialty Fuels Branch, ERA, Room 6318, 2000 M Street NW., Washington, D.C. 20461, Attention: Mr. Finn K. Neilsen. Comments should be identified on the outside of the envelope and on documents submitted to ERA with the designation "Allocation of SNG Feedstock and Btu Enrichment Product for Algonquin."

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, in one copy only, in accordance with procedures set forth in 10 CFR 205.9(f). Any material not accompanied by a statement of confidentiality will be considered to be non-confidential. The Department of Energy reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

Issued in Washington, D.C., January 23, 1978.

BARTON R. HOUSE,  
Assistant Administrator, Fuels  
Regulation, Economic Regula-  
tory Administration.

Federal Energy Regulatory Commission

[Docket Nos. ER78-229, ER76-633, ER76-661]

CENTRAL LOUISIANA ELECTRIC CO.

Compliance Filing

JANUARY 20, 1978.

Take notice that Central Louisiana Electric Co. (Central), on December 15, 1977, tendered for filing, pursuant to Ordering Paragraph (D) of the Commission's Order Approving Settlement issued September 15, 1977, a compliance report showing monthly billing determinants and revenues under prior, present, and settlement rates, the monthly revenue refund, and the monthly interest computation, together with a summary of such information.

Central indicates that refund checks were mailed to Elizabeth, La., Boyce, La., Gulf States Utilities, Southwest Louisiana Electric Membership Corporation at Melville, La., and Cajun Electric Power Cooperative, Inc., on December 9, 1977.

Any person desiring to be heard or to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20246, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such protests should be filed on or before February 10, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,  
Acting Secretary.

[Docket Nos. ER78-161, ER78-162 and ER78-175]

IOWA PUBLIC SERVICE CO.

Notice of Filing

JANUARY 20, 1978.

Take notice that Iowa Public Service Co. (Iowa) on December 27, 1977, tendered for filing a Wholesale Energy Agreement whereby Iowa will deliver wholesale power to the city of Lake View in addition to the services rendered under a 1968 agreement between the parties.

Iowa proposes an effective date of November 1, 1977, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions and protests should be filed on or before February 6, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,  
Acting Secretary.

[6740-02]

[Docket Nos. ER78-161, ER78-162 and ER78-175]

IOWA PUBLIC SERVICE CO.

Notice of Filing

JANUARY 20, 1978.

Take notice that Iowa Public Service Company (Iowa) on December 27, 1977, tendered for filing a Wholesale Energy Agreement whereby Iowa will deliver wholesale power to the city of Breda in addition to the services rendered under a 1968 agreement between the parties.

Iowa proposes an effective date of November 1, 1977, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions and protests should be filed on or before February 6, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make any protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,  
Acting Secretary.

[6740-02]

LANDS WITHDRAWN IN PROJECT NOS. 347 AND 418, COLORADO

Order Vacating Land Withdrawals Under Section 24 of the Federal Power Act

JANUARY 23, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act) Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977. On December 23, 1977, the Secretary issued an order amending DOE delegation Order No. 0204-1 further delegating to the FERC the authority to take action in this proceeding.

The Forest Service, U.S. Department of Agriculture, has requested that the land withdrawals for Project Nos. 347 and 418 be vacated insofar as they affect National Forest lands, thereby requiring Commission consideration under section 24 of the Federal Power Act. This order pertains to all lands currently withdrawn for these projects. The lands affected by the withdrawals are described in the attached Land List.

The subject lands lie along or near North and Middle St. Vrain Creeks, tributaries of St. Vrain Creek which is tributary to the South Platte River, in northwestern Boulder County, Colo.

The applicants for Project Nos. 347 and 418 contemplated construction of an extensive diversion-conduit system to convey water from Middle and North St. Vrain Creeks to proposed powerhouse sites on North St. Vrain Creek. Proceedings for both of these projects ended over 40 years ago without the issuance of a license.

A 1967 Bureau of Reclamation reconnaissance report on St. Vrain Creek cites two potential reservoir sites in the vicinity of the subject lands. These are the Buck Gulch site on Rock Creek, a tributary of North St. Vrain Creek, and the Coffintop site on South St. Vrain Creek. A small portion (about one acre) of the NW¼NE¼ of sec. 24, T. 3 N., R. 71 W., might be inundated in the event a 321-foot-high-dam (one of several alternatives) is constructed at the Coffintop site. The remaining lands under consideration herein lie beyond the limits of the Buck Gulch and Coffintop reservoir sites. The 1967 report states that the water supply available to the St. Vrain basin did not appear to be adequate for developing hydroelectric power.

## NOTICES

In earlier studies, the Bureau of Reclamation considered development of the Buck Gulch reservoir site in conjunction with a comprehensive plan which included two proposed downstream powerhouses (Buck Gulch and Cook Mountain) on North St. Vrain Creek; however, the power features of the plan were found infeasible. Numerous diversion dams, canals and laterals were also proposed in the comprehensive plan. Some of the subject lands might be utilized for diversion dam, conduit, or powerhouse location if such development ever occurs. The potential powerhouse sites are withdrawn in Power Site Reserve No. 427. The withdrawal of full subdivisions for the potential diversion dam or conduit locations, which are flexible, is not considered appropriate in this case.

The Geological Survey has recommended that the land withdrawals for Project Nos. 347 and 418 be vacated in their entirety.

The Commission orders: That the land withdrawals for Project Nos. 347 and 418 are hereby vacated in their entirety.

By the Commission.

LOIS D. CASHELL,  
Acting Secretary.

SIXTH PRINCIPAL MERIDIAN, COLORADO  
(ROOSEVELT NATIONAL FOREST)

1. Project No. 347.—(a) The following described lands were withdrawn pursuant to the filing on September 5, 1922, of an application for preliminary permit for Project No. 347 for which the Commission (FPC) gave notice of land withdrawal to the General Land Office (now Bureau of Land Management) by letter dated October 4, 1922:

- T. 3 N., R. 71 W.,  
Sec. 19, lot 2, S½NE¼, SE¼NW¼,  
NE¼SE¼;  
Sec. 20, NW¼SW¼, NE¼SE¼;  
Sec. 21, S½NW¼;  
Sec. 24, NW¼NE¼ (outside National Forest).  
T. 2 N., R. 72 W.,  
Sec. 4, NW¼SE¼.  
T. 3 N., R. 72 W.,  
Sec. 19, lots 1, 2, N½NE¼, SW¼NE¼,  
E¼NW¼;  
Sec. 23, S½NE¼, SE¼NW¼, E¼SW¼,  
N½SE¼;  
Sec. 24, NW¼NE¼, S½NE¼, S½NW¼,  
N½S¼;  
Sec. 34, SE¼NE¼;  
Sec. 35, W½NW¼.  
T. 3 N., R. 73 W.,  
Sec. 24, NE¼.

(Approximately 1,632 acres)

(b) The following described lands were withdrawn pursuant to the filing on October 19, 1928, of an application for license for Project No. 347 for which the Commission (FPC) gave notice of land withdrawal to the General Land Office by letters dated November 13 and 30, 1928:

- T. 2 N., R. 72 W.,  
Sec. 5, lot 2, SW¼NE¼, SE¼NW¼,  
N½SW¼, SW¼SW¼;  
Sec. 7, E¼SE¼;

- Sec. 8, SW¼SW¼;  
Sec. 18, E¼NE¼.  
T. 3 N., R. 72 W.,  
Sec. 18, lots 8, 9, 10, 17;  
Sec. 21, lots 8, 9, 10, 11, 14, 15;  
Sec. 23, lot 13;  
Sec. 28, lots 1, 8, 9.  
T. 2 N., R. 73 W.,  
Sec. 13, NE¼SE¼, S½SE¼.  
T. 3 N., R. 73 W.,  
Sec. 12, S½SW¼, SE¼SE¼;  
Sec. 23, SW¼NW¼.

(Approximately 1,258 acres)

2. Project No. 418.—The following described lands were withdrawn pursuant to the filing on June 9, 1923, of an application for license for Project No. 418 for which the Commission (FPC) gave notice of land withdrawal to the General Land Office by letter dated September 21, 1923:

- T. 3 N., R. 72 W.,  
Sec. 17, lots 8, 15;  
Sec. 19, lot 12;  
Sec. 20, lots 1, 2, 3, 4;  
Sec. 21, lots 1, 2, 3, 4, 5, 6, 7;  
Sec. 22, lots 3, 4, 5, 6, 7;  
Sec. 23, lot 12.

(Approximately 808 acres)

Federal lands (acreage not determined) involved in Project No. 418 which were previously withdrawn in connection with Project No. 347 were not listed in the September 21, 1923, notice.

(FR Doc. 78-2336 Filed 1-26-78; 8:45 am)

## [6740-02]

LANDS WITHDRAWN IN PROJECT NO. 847—  
OREGONOrder Vacating Land Withdrawal Under  
Section 24 of the Federal Power Act

JANUARY 23, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977. On December 23, 1977, the Secretary issued an order amending DOE delegation Order No. 0204-1 further delegating to the FERC the authority to take action in this proceeding.

The Forest Service, U.S. Department of Agriculture, has requested that the land withdrawal for Project No. 847 be vacated in its entirety, thereby requiring Commission consideration under Section 24 of the Federal Power Act. The lands affected by the withdrawal are described in the attached Land List.

The subject lands are withdrawn pursuant to the filing on November 23, 1927, of an application for preliminary

permit for Project No. 847 for which the Federal Power Commission gave notice of land withdrawal to the General Land Office (now Bureau of Land Management) by letter dated November 23, 1928, as construed to conform to survey by Bureau of Land Management letter dated April 18, 1952.

The lands lie in northwest Hood River County, Oregon. The applicant for Project No. 847 contemplated development of about 3,000 feet of head by the construction of low dams at Lost Lake (in the upper drainage area of Lake Branch of West Fork of Hood River) and Wahnum Lake (in the upper drainage area of East Fork of Eagle Creek) with about 20 miles of conduit to convey water from the lakes to a proposed powerhouse site near the town of Cascade Locks on the Columbia river. The application for the project was rejected on December 19, 1930. Current topographic maps show that the total drainage area of both lakes is only about 4 square miles. The development proposed in Project No. 847 is considered infeasible because of the small amount of water available.

The SW¼SW¼ of sec. 29, T. 2 N., R. 8 E., lies near a potential pumped storage site at Benson Plateau, in a roadless area of the Mount Hood National Forest. The Benson Plateau site is one of 530 potential pumped storage sites listed in a January 1976 Corps of Engineers report entitled "Pumped-Storage in the Pacific Northwest, an Inventory." A small portion of said SW¼SW¼ might be needed for the pumped storage project in the event of development; however, retention of this subdivision in the project withdrawal for possible protection of a minute part of the pumped storage site is considered inappropriate.

Under the circumstances, the land withdrawal for Project No. 847 no longer serves a useful purpose.

The Commission orders: That the withdrawal for Project No. 847 is hereby vacated in its entirety.

By the Commission.

LOIS D. CASHELL,  
Acting Secretary.

WILLAMETTE MERIDIAN, OREG. (MOUNT HOOD  
NATIONAL FOREST)

- T. 1 S., R. 8 E.,

## [6740-02]

(Docket No. DA-601-Idaho Bureau of Land  
Management)

LANDS WITHDRAWN IN POWER SITE RESERVE  
NO. 498 AND PROJECT NO. 406Finding and Order Vacating Land Withdrawal  
Under Section 24 of the Federal Power Act

JANUARY 23, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977. On December 23, 1977, the Secretary issued an order amending DOE delegation order No. 0204-1 further delegating to the FERC the authority to take action in this proceeding.

The Bureau of Land Management has requested revocation of Power Site Reserve No. 498, and the withdrawal for Project No. 406, insofar as they pertain to the following described lands, thereby requiring Commission consideration under section 24 of the Federal Power Act:

BOISE MERIDIAN, IDAHO

- T. 11 S., R. 21 E.,  
Sec. 21, E¼SE¼;  
Sec. 27, SW¼;  
Sec. 34, NW¼NE¼, S½NE¼, NW¼SE¼,  
E¼SE¼.

The lands lie about 12 miles southwest of the town of Burley in Cassia County Idaho.

Those portions (approximately 12 acres) of the lands lying within 25 feet of the center line of the Shoshone

## NOTICES

Falls-Oakley transmission line as shown on Exhibit K Sheet 2 of 15 (FPC No. 282-9) are withdrawn pursuant to the filing on April 16, 1923, of an application for license for Project No. 406. Project No. 406 was consolidated with Project No. 282, and the Shoshone Falls-Oakley line was included in the license for Project No. 282; however, the line was subsequently relocated and no longer occupies the subject lands.

Power Site Reserve No. 498, dated July 19, 1915, withdrew approximately 25 acres within said subdivisions for a proposed transmission line. The application for this transmission line was rejected by the Department of the Interior on November 29, 1916.

The withdrawal for Project No. 406 and Power Site Reserve No. 498 no longer serve a useful purpose insofar as they pertain to the subject lands.

The Commission finds: That there is no objection to the revocation of Power Site Reserve No. 498 insofar as it pertains to the subject lands.

The Commission orders: That the withdrawal for Project No. 406 is hereby vacated insofar as it pertains to the subject lands.

By the Commission.

LOIS D. CASHELL,  
Acting Secretary.

(FR Doc. 78-2338 Filed 1-26-78; 8:45 am)

## [6740-02]

(Docket Nos. RP78-3; RP78-4; RP78-9)

## SOUTHERN NATURAL GAS CO., ET AL.

Order Denying Rehearing and Granting  
Clarification

JANUARY 20, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "savings provisions" of section 705(b) of the DOE Act provide that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of these

proceedings were specifically transferred to the FERC by section 402(a)(1) or 402(a)(2) of the DOE Act.

The joint regulation adopted on October 1, 1977, by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR —, provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above mentioned authorities.

By our November 23, 1977 order in the subject dockets, we consolidated the proceedings in those dockets and denied the petitions of Southern Natural Gas Co. (Southern), East Tennessee Natural Gas Co. (East Tennessee), and Tennessee Gas Pipeline Co. (Tennessee), which petitions requested advance authorization to recoup the costs associated with an emergency gas purchase proposed to be made from Oklahoma Natural Gas Co. On December 21, and December 23, 1977 respectively, East Tennessee and Southern filed applications for rehearing of our November 23 order. Southern's application also contained a request for clarification of that order.

After careful review of the petitions for rehearing, we find that they fail to state grounds sufficient to warrant modification of our November 23 order. The arguments advanced in support of rehearing are simply reassertions of concerns considered by the Commission in our earlier determination to deny the requests for advance approval of the proposed emergency purchases. Accordingly, we will deny the petitions.

Southern's request for clarification asserts that uncertainty remains with respect to the question whether § 2.68 may be used to accomplish steps taken in anticipation and avoidance of an emergency prior to the outset of the emergency. Our response is that section 2.68 may be used to accomplish steps taken in anticipation and avoidance of an emergency. Although this conclusion is not specified in the text of § 2.68 itself, it is implied by the language used in Order No. 402 in promulgating section 2.68. Therein the

By telegram received January 18, 1978, East Tennessee submitted data on actual curtailments imposed and weather conditions experienced during the first portion of this winter; East Tennessee regards such data as pertinent to our action on its petition for rehearing. On January 18 and 19, 1978, related telegrams were received from the Tennessee Energy Authority, Chattanooga Gas Co., and a group of East Tennessee customers styled the East Tennessee Group. These latter telegrams express support for East Tennessee's petition for rehearing, and observe that the substantial effect which our determination thereon will have renders an expeditious disposition important.

Federal Power Commission adopted a policy to facilitate responses to requests made of non-jurisdictional distribution and pipeline companies for temporary assistance by jurisdictional concerns which are confronted with emergency gas supply situations. Specifically, it was declared that the exempt status of non-jurisdictional concerns would not be jeopardized by their short-term sale or transportation of gas in interstate commerce. We have previously interpreted this policy as authorizing the conduct of emergency transactions for the purpose of augmenting storage capacity in order to meet the requirements of a jurisdictional concern in a forthcoming heating season. (See Order Denying Petition For Emergency Relief And Granting Interventions, issued November 29, 1977 in Docket No. RP77-136-1.) The enlargement of storage capability being an anticipatory undertaking, it is clearly our view that preventive as well as curative steps may be taken in accordance with the policy of § 2.68.

The Commission finds: Southern and East Tennessee fail to state grounds sufficient to warrant the granting of their petitions for rehearing.

The Commission orders: (A) The petitions for rehearing filed by Southern and East Tennessee are denied.

(B) Southern's request for clarification is granted to the extent discussed herein.

(C) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,  
Acting Secretary.

(FR Doc. 78-2332 Filed 1-28-78; 8:45 am)

#### [6740-02]

[Docket Nos. G-14562; G-13680; G-13827; G-13948; G-19855; G-19580; G-19851; G-19900]

TENNESSEE GAS TRANSMISSION CO., ET AL.

#### Informal Conference

JANUARY 20, 1978.

Continental Oil Co., Mobil Oil Corp. (successor to Magnolia Petroleum Co.), Newmont Oil Co., Continental Oil Co., Atlantic Richfield Co. (successor to Atlantic Refining Co.), Cities Service Oil Co., and Getty Oil Co. (successor to Tidewater Oil Co.).

Take notice that an informal conference to discuss possible settlement will be held in the above-captioned proceeding on January 27, 1978, commencing at 10 a.m. in Room 8402 at the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426.

This proceeding involves the disposition of escrowed refund amounts gen-

erated by certain gas sales from the above-captioned producers to Tennessee Gas Transmission Co. from the early 60's to 1970. The escrowed funds, which amounted to \$1.84 million in mid-1976, were generated to cover a contingent severance tax liability to the State of Louisiana based on whether the gas involved, produced from within the Disputed Zone, was from Federal or State lands. Such lands were subsequently determined to be Federal. This proceeding was initiated by the above-captioned producers by a petition filed herein September 30, 1976, noticed by the Federal Power Commission on March 4, 1977. Pursuant to such notice, The Public Service Electric and Gas Co. (of New Jersey) filed a petition to intervene.

Any interested persons may attend the conference. However, this will not constitute permission to intervene as a party.

LOIS D. CASHELL,  
Acting Secretary.

#### [6740-02]

[Docket No. OR78-1 (Formerly ICC, Docket No. 1&S 9164, et al.)]

#### TRANS ALASKA PIPELINE SYSTEM: INVESTIGATION AND SUSPENSION

#### Order on Petition To Hold Concurrent Proceedings

JANUARY 23, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "savings provisions" of section 705(b) of the DOE Act provide that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of this proceeding were specifically transferred

The "Commission" when used in the context of an action taken prior to October 1, 1977, refers to the FPC; when used otherwise, the reference is to the FERC.

to the FERC by section 402(a) (1) or 402(a) (2) of the DOE Act.

The joint regulation adopted on October 1, 1977 by the Secretary and the FERC entitled, "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR —, provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above mentioned authorities.

On November 16, 1977, the State of Alaska (Alaska) filed a petition in Docket No. OR78-1 requesting the Federal Energy Regulatory Commission (FERC) to authorize that evidentiary hearings scheduled in the captioned proceeding be held concurrently with a related proceeding now before the Alaska Pipeline Commission (APC).

Public notice of the filing of the petition by Alaska was issued on December 6, 1977, with comments due to be filed with the FERC on or before December 19, 1977. Based on a review of the petition and comments filed in response to the petition the FERC will grant Alaska's petition and order that evidentiary hearings in this proceeding be held concurrently with the APC's proceeding.

In the November 16, 1977 petition, Alaska states that it is a protestant in the FERC proceeding in Docket No. OR78-1 and an intervenor in the proceeding scheduled before the APC, *In the Matter of Setting An Initial Tariff for the Intrastate Transportation of Petroleum Over the Trans Alaska Pipeline System By Exxon, Sohio, ARCO and Union Alaska Pipeline Companies*, APC Docket Nos. P-77-8, P-77-9, P-77-10 and P-77-11. Both proceedings concern a number of common issues, according to Alaska, in which the state has a vital interest. Alaska includes the following among those issues common to both the FERC and the APC proceedings:

- (a) The propriety of using a valuation rate base, original cost less depreciation rate base, or some other type of rate base;
- (b) The original cost of the Trans Alaska Pipeline System (TAPS) which should be allowed as prudently-invested, including the amount of interest during construction that should be capitalized;
- (c) The proper rate of return to be applied to the rate base;
- (d) The proper amount of operating expenses;
- (e) The treatment of income taxes;
- (f) The service life of TAPS; and
- (g) The legality of tariff rules and regulations.

Alaska states that both commissions are investigating the just and reasonable rates allowable for the shipment of crude oil via the Trans Alaska Pipeline System (TAPS). The only significant difference between the FERC and the APC investigations, it states, is that the FERC proceeding will establish a just and reasonable rate for the interstate shipment of crude oil over the entire 800 mile distance of the system, while the APC investigation will establish a rate for the intrastate shipment of crude over the 469 miles between Prudhoe Bay to North Pole, Alaska, or for the entire 800 miles from Prudhoe Bay to Valdez.

Alaska supports concurrent hearings between FERC and APC as being in the public interest in that they would provide a more efficient and expeditious disposition of the proceedings. Concurrent hearings would reduce the litigation burdens on the parties, as well as encourage expediency, according to Alaska. Alaska adds that the APC proceeding is divided into two phases: The first phase, beginning January 4, 1978, concerns "narrow issues relevant solely to intrastate tariffs"; the second phase will occur only if the APC is unable to hear the case jointly with the FERC.

Alaska emphasizes that it is not seeking consolidation of the proceedings. Rather, Alaska only requests concurrent taking of evidence. Alaska suggests that the Commission's existing regulation (18 CFR 1.37(e)(4)) provides a convenient and workable procedure to govern separate hearings held concurrently by each commission on the common issues in both proceedings. Each commission would designate a presiding officer, and those officers would jointly preside over the proceedings. Each officer would be fully empowered to make rulings governing the record in his or her commission's proceeding. Alaska believes that a very high percentage of the record developed in such concurrent proceedings would be common to both agencies. Divergent rulings during the hearings, however, would be carefully identified and defined, and each agency would have a separate record upon which to base its final decision. Moreover, since each agency has independent statutory responsibilities, Alaska proposes that the hearing officers not discuss, either on or off the record, the resolution of substantive issues, and that each agency independently resolve the issues before it on its own record. Alaska notes that such procedure would depart from § 1.37(e)(5) which contemplates consultation between the agencies prior to the issuance of orders in concurrent proceedings.

Alaska states that it has been advised that the APC is willing to accept the Presiding Administrative Law Judge's procedural schedule established by ruling issued October 13, 1977, in Docket No. OR78-1 and that the APC is agreeable to holding a concurrent hearing at the FERC headquarters.

Alaska further states that a petition for concurrent hearings is also being filed with the APC.

On December 2, 1977, the energy Co. of Alaska (ECA) filed a reply to Alaska's petition and moved for a one week postponement of the commencement of the FERC hearings. ECA states that it is a protestant in the captioned proceeding before this Commission and an intervenor in the APC proceeding. EPA states that it joins in Alaska's petition to hold concurrent hearings before the FERC and the APC, except with respect to those issues which only relate to the determination of intrastate rates.

On December 15, 1977, Chief Administrative Law Judge Zwerdling, in the absence of Presiding Judge Kane, granted a Staff request for a two weeks' extension of the dates for filing prehearing briefs by the parties. Also, due to scheduling conflicts of certain parties, the January 10, 1978, hearing date was postponed for approximately two weeks to be fixed by Presiding Judge Kane, in consultation with the parties, after his return.

On December 19, 1977, Exxon Pipeline Co. (Exxon) filed a reply to Alaska's petition for concurrent hearings. Exxon, a respondent in the captioned proceeding, states that it agrees that concurrent evidentiary hearings should lead to a more efficient and expeditious disposition of these proceedings. In addition, Exxon agrees that the FERC is empowered to hold simultaneous hearings with the APC and does not object to the procedure outlined in Alaska's petition with regard to the respective roles of the presiding officers of both agencies during concurrent hearings. Exxon states that it disagrees, however, to the extent that Alaska implies that the FERC is limited to determining a just and reasonable rate for the interstate shipment of crude oil the entire 800 mile distance from Prudhoe Bay to Valdez, Alaska, and not for rates charged for intermediate shipments through the Trans Alaska Pipeline, as well.

In a letter dated December 19, 1977, ARCO Pipe Line Co., also a respondent in the captioned proceeding, filed comments on Alaska's petition. ARCO states it does not object to the proposed concurrent hearings, subject to approval of a stipulation concerning the scope of the hearings which has been negotiated and will be submitted by the parties. ARCO further states that if concurrent proceedings are held, a presiding officer of one commission should not communicate with

Exxon notes the tariffs filed by certain of the TAPS carriers include intermediate and in-transit rules identical with those set forth in their intrastate tariffs. Those rules are under investigation in this proceeding via former ICC Docket No. 36611, et al., consolidated with this proceeding.

a presiding officer of the other commission, except on the record, in order to preserve the independence and impartiality of each presiding official. ARCO adds that it is authorized to state that Union Alaska Pipeline Co. concurs in these comments.

Finally, Sohio Pipe Line Co. filed comments in reply to Alaska's petition on December 19, 1977. It also states it has no objection to concurrent hearings being scheduled, assuming the proposed stipulation of the parties is finalized and executed.

After reviewing Alaska's petition for concurrent hearings and the parties' comments in support, the Commission shall grant the request. We find the procedure for conducting concurrent evidentiary hearings as it was outlined in Alaska's petition would be suitable to be applied in the captioned proceeding scheduled before the FERC. In particular, each commission would designate a presiding officer or officers, and those officers would jointly preside over the hearings. Each officer would fully control assembling the record and ruling on the admissibility of evidence for the record of that officer's commission. Participation in concurrent evidentiary proceedings will in no way preclude either commission from causing to be presented pertinent evidence with respect to matters in issue in the case before it.

On December 27, 1977 the parties to the captioned proceeding submitted the stipulation referred to above concerning the scope of the concurrent proceedings. The stipulation provides in part that the signatories, who are parties in the FERC proceeding, will not oppose Alaska's petition for concurrent hearings provided Alaska files with each Commission a request that any authorized concurrent proceedings be held in accordance with the August 16, 1977 pre-hearing ruling of Administrative Law Judge Glennon which separated the proceeding for hearing and adjudication into two phases. The stipulation is referred to Administrative Law Judge Kane for consideration and ruling, subject to appeal to the Commission pursuant to the Commission's Rules.

The presiding officer designated by the FERC shall be the official to make all rulings with respect to scheduling witnesses and hearing dates and to announce all other rulings where there is no disagreement on the ruling between the presiding officers of the respective commissions. However, this procedure is without prejudice to the right of a presiding officer of the APC to announce a divergent ruling, whether respecting the admissibility of evidence or any other matter. In the event of divergent rulings, each commission's separate record will be clearly identified and defined, and the rulings of the presiding officers of each

commission will be considered the ruling for his or her commission. If in any proceeding, the ruling of one presiding officer has the effect of admitting any voluminous exhibit or testimony which is excluded by the ruling of another presiding officer, the taking of such evidence will, whenever possible, be deferred until after the completion of all proceedings which can be conducted under concurrent rulings. When such testimony is taken, the transcript of such evidence will be made available to the other commission, if requested.

In conducting such concurrent hearings, it is hoped that the presiding officers designated by each commission would cooperate in order to minimize divergent rulings and to expedite completion of the hearing records. However, we agree with the comments of several of the parties that a presiding officer of one commission should refrain from communicating with a presiding officer of the other commission on matters of substance outside of the record in the proceedings. The separate decisions of the respective presiding officers of each commission will, of course, be reached independently on the separate record of that commission and without consultation on substantive matters with an official of the other commission.

The Commission finds: It is in the public interest to grant the request of the State of Alaska that evidentiary hearings scheduled in the captioned proceeding with respect to Phase I issues be held concurrently with hearings by the APC in the related proceeding before it.

The Commission orders: (A) The petition filed November 16, 1977, by the State of Alaska is hereby granted, subject to the provisions discussed, supra. Accordingly, evidentiary hearings scheduled with respect to Phase I issues in the captioned proceeding shall be held concurrently with hearings before the APC in the related proceeding at a time designated by Judge Kane.

(B) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,  
Acting Secretary.

[Docket No. ER77-483]

#### VIRGINIA ELECTRIC AND POWER CO.

##### Compliance Filing

JANUARY 20, 1978.

Take notice that Virginia Electric and Power Co. (VEPCO) on January 4, 1978, tendered for filing, pursuant to

the Commission order of July 25, 1977, VEPCO's Electric Tariff, First Revised Volume No. 1 and Agreements for the Purchase of Electricity under this Revised Tariff for each resale municipal customer, except the town of Windsor, the city of Greenville and the town of Wakefield. VEPCO indicates that the Agreements for these three customers will be forwarded to the Commission as soon as they are received by VEPCO. VEPCO also tendered for filing rate schedules which VEPCO states reflect the terms to the approved settlement agreements effective November 28, 1977.

VEPCO states that it is VEPCO's understanding that the filing of the Tariff and the rate schedules completes the Commission's requirements in Docket No. ER77-483.

Any person desiring to be heard or to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such protests should be filed on or before February 10, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,  
Acting Secretary.

[Docket Nos. E-9420; E-9421]

#### YANKEE ATOMIC ELECTRIC CO. AND PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE

##### Compliance Filing

JANUARY 20, 1978.

Take notice that on September 19, 1977, Yankee Atomic Electric Co. and Public Service Co. of New Hampshire ("Applicants") tendered for filing contract revisions providing for a 9.72 percent overall rate of return in determining cost of service charges by Applicants pertaining to Yankee Atomic Electric Co.'s nuclear generating station. Applicants state that the contract revisions, together with a revised cost of service study and depreciation study, are submitted in compliance with ordering paragraph C of the Commission's order of July 20, 1977 in the captioned proceeding. Applicants propose to place in effect the methods prescribed by the Commission upon acceptance of their compliance filing and thereafter submit a report of refunds based on those methods as effective from June 2, 1975.

Applicants state that copies of their filing have been mailed to counsel for all parties and the affected customers.

Any person desiring to be heard or protest said filing should file protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such protests should be filed on or before February 10, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,  
Acting Secretary.

##### CONDUCT OF EMPLOYEES

#### List of Positions Exempt From Disclosure Requirements of Section 603 of Public Law 95-91

The following is a list of specific positions and classes thereof, within the Department of Energy other than the Federal Energy Regulatory Administration, which are of a nonregulatory and nonpolicy-making nature at or below GS-12 of the General Schedule or the equivalent thereto. The individuals occupying these listed positions have been exempted from the disclosure requirements of subsection 603(a) of the Department of Energy Organization Act (Pub. L. 95-91). This list has been compiled pursuant to subsection 603(c) of Pub. L. 95-91.

Any individual occupying a position not listed below may request reconsideration of the determination by writing to:

Ralph D. Goldenberg, Office of the General Counsel, Department of Energy, Washington, D.C. 20545.

Geologist.....	1350	Do.
Geologist Graduate Student.....	1350	Do.

Hourly Paid Employees Occupational Code: 3359, 3414, 3506, 3806, 4740, 4749, and 5441.

## GRAND JUNCTION OFFICE

Position title	Series	Grade
Clerk.....	203	GS 12 and below.
Mail and Records Clerk.....	305	Do.
Secretary.....	318	Do.
Administrative Secretary.....	318	Do.
Clerk Typist.....	322	Do.
Data Support Specialist.....	332	Do.
Trainee.....	501	Do.
Geological Engineer.....	880	GS 9 and below.

## IDAHO OPERATIONS OFFICE

Position title	Series	Grade
Senior Personnel Security Officer.....	080	GS 12 and below.
Security Assistant.....	080	Do.
Security Representative.....	080	Do.
Fire Chief.....	081	Do.
Deputy Fire Chief.....	081	Do.
Captain.....	081	Do.
Lieutenant.....	081	Do.
Lieutenant-Inspector.....	081	Do.
Pump Operator.....	081	Do.
Fire Alarm Operator.....	081	Do.
Firefighter.....	081	Do.
Captain.....	0885	Do.
Security Officer.....	0885	Do.
Lieutenant.....	0885	Do.
Patrol Sergeant.....	0885	Do.
Area Sergeant.....	0885	Do.
Security Inspector.....	0885	Do.
Security Guide.....	0885	Do.
Traffic and Shipment Officer.....	0885	Do.
Personnel Specialist.....	203	Do.
Personnel Assistant.....	203	Do.
Personnel Clerk.....	203	Do.
Security Clerk.....	301	Do.
Administrative Assistant.....	301	Do.
Administrative and Clerical Assistant.....	301	Do.
Administrative Clerk.....	301	Do.
Institutional Relations Specialist.....	301	Do.

Position title	Series	Grade
Receptionist.....	301	Do.
ADP and Telecommunications Specialist.....	301	Do.
New College Hire—Plans, Budget, and Engineering.....	301	Do.
Dosimetry Technician.....	301	Do.
Personnel Metering Clerk.....	301	Do.
Mail Room Supervisor.....	305	Do.
Mail and Records Assistant.....	305	Do.
Secretary.....	312	Do.
Clerk-Stenographer.....	318	Do.
Medical Secretary.....	318	Do.
Executive Assistant.....	318	Do.
Secretary.....	318	Do.
Secretary-Timekeeper.....	318	Do.

## ENVIRONMENTAL PROTECTION AGENCY

[FRL 848-6; OPP-42046B]

## ALASKA

## Submission of State Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides—Approval Status

Section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136 et seq.), and the implementing regulations of 40 CFR Part 171 require each State desiring to certify applicators to submit a plan for such purpose, subject to approval by the Environmental Protection Agency (EPA). On June 27, 1977, the Alaska State Plan was approved contingent upon the promulgation of regulations by the Alaska Department of Environmental Conservation (ADEC) necessary for the implementation of the Alaska State Plan. Notice of contingent approval was published in the FEDERAL REGISTER on July 8, 1977 (42 FR 35183). Subsequently, on November 25, 1977, implementing regulations promulgated by the ADEC became effective. Having reviewed these regulations and finding that all requisite legal authorities required by FIFRA and 40 CFR Part 171 are now enacted and promulgated, the Regional Administrator, EPA Region X, hereby gives notice that the Alaska State Plan is now a fully approved State Plan.

Dated: January 20, 1978.

DONALD P. DUBOIS,  
Regional Administrator, U.S.  
Environmental Protection  
Agency, Region X.

## OREGON DEPARTMENT OF AGRICULTURE

## Issuance of Specific Exemption To Use Nortron To Control Winter Weeds in Perennial Ryegrass Seed Crop

The Environmental Protection Agency (EPA) has granted a specific exemption to the Oregon Department of Agriculture (hereafter referred to as the "Applicant") to use a maximum of 30,000 pounds of Nortron 1.5 EC (ethofumesate) for the control of winter weeds on 10,000 to 20,000 acres of newly-planted perennial ryegrass seed fields in the Willamette Valley of western Oregon. This exemption was granted in accordance with, and is subject to, the provisions of 40 CFR Part 166, which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

Dated: January 23, 1978.

WILLIAM S. HEFFELFINGER,  
Director of Administration.

(FR Doc. 78-2358 Filed 1-26-78; 8:45 am)

This notice contains a summary of certain information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the application on file with the Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 H Street SW., Room E315, Washington, D.C. 20460.

In October 1977, the EPA granted a specific exemption to the Applicant for use of a maximum of 60,000 pounds of active ingredient ethofumesate (Nortron 1.5 EC) to control annual bluegrass, rattail fescue, velvetgrass, and various other weed pests on 40,000 acres of annual ryegrass seed fields in the Willamette Valley. This use was permitted since there are currently no pesticides registered for control of these weed pests in annual ryegrass.

The Applicant subsequently requested a specific exemption for control of winter weeds in newly-seeded perennial ryegrass seed fields. According to the Applicant, winter weeds are serious problems in establishing newly-seeded plantings of perennial ryegrass in western Oregon. The weeds compete strongly with germinating and newly-emerged seedlings. The potential economic loss to the grower due to infestations of these weeds during the first year could be as high as \$100 per acre, the Applicant estimated. The currently unfavorable market for annual ryegrass combined with the favorable market for perennial ryegrass has resulted in many growers planting perennial ryegrass, the Applicant stated. The increase in new seedlings is estimated at 10,000 to 20,000 acres.

The Applicant stated that the presently acceptable method for establishment of a new stand of perennial ryegrass is to drill the seed into rows and apply a band of activated charcoal directly over the seed row. An overall treatment of diuron is then applied to the field. The activated charcoal allows the ryegrass to germinate through the diuron treatment; however, the charcoal band, which covers about twenty percent of the field, also allows weed seeds within the band to germinate through the chemical treatment. Diuron should not be applied after crops or weeds emerge. The following pesticides have also been registered by EPA for control of one or more of the aforementioned weed pests: IPC (propham), atrazine, benefin (Balan), and bensulide (Betasan). IPC and atrazine are registered for application to established perennial ryegrass stands; they should not be applied to newly-planted fields. Benefin and bensulide, which are registered for weed control in established lawns, inhibit germination or adversely affect the seedling.

The Applicant therefore requested that a single application of Nortron

1.5 EC be made at a rate of 1.5 pounds of active ingredient per acre on a maximum of 20,000 acres of perennial ryegrass seed fields in the Willamette Valley for control of Rattail Fescue (*Festuca myuros*), Annual Bluegrass (*Poa annua*), and Common Velvetgrass (*Holcus lanatus*). Applications will be made by licensed commercial applicators using ground and air equipment. Some growers may elect to apply ethofumesate (Nortron) with ground equipment on their own property. Application rates and procedures will be recommended by qualified Oregon State University extension agents. The Applicant further stated that this use will not result in any increase in acreage to be treated with ethofumesate above the 40,000 acres authorized in the previous exemption; therefore, no additional hazard to man or the environment beyond that which was evaluated and determined to be acceptable in the October specific exemption is expected. Nortron will be restricted for application to ryegrass grown for seed crop.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak has or is about to occur; (b) there is no pesticide presently registered and available for use to control these winter weeds in Oregon; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the weeds are not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until January 31, 1978, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. Nortron may be used at a rate of one and one-half pounds of active ingredient per acre in the Willamette Valley;
2. A single application may be made as a pre-emergent or early post-emergent treatment;
3. Nortron may be applied with both ground and air equipment;
4. A maximum of 30,000 pounds of active ingredient may be applied;
5. All applications will be made by State-licensed commercial applicators or by growers on their own property;
6. Crops other than perennial ryegrass will not be planted in treated fields within 12 months of application of Nortron. All ryegrass crops which are planted in treated fields within 12 months of application of Nortron will be grown for seed only and are subject to the same restrictions as treated grass;
7. Treated grass will not be grazed or cut for use as food and feed;

8. Grass seed and grass screenings will not be used as food and feed;

9. Ryegrass stubble and grass waste will be thoroughly tilled under after harvest;

10. Precautions will be taken to avoid spray drift to non-target areas;

11. All applicable directions, precautions, and restrictions on the Nortron label must be observed;

12. Prior to application of Nortron, the grower will be required to sign an agreement which states that he or she understands the provisions of the exemption and will observe all directions, restrictions, and precautions;

13. The Applicant is responsible for ensuring that all the provisions of this specific exemption are met and must submit a report summarizing the results of this program by October 1978;

14. The EPA shall be immediately informed of any adverse effects resulting from the use of Nortron in connection with this exemption; and

15. The total quantity of Nortron applied under authority of this specific exemption and the one issued in October, 1977, for treatment of annual ryegrass shall not exceed 60,000 pounds active ingredient.

Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

Dated: January 19, 1978.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

#### RECEIPT OF ENVIRONMENTAL IMPACT STATEMENTS

Pursuant to the President's Reorganization Plan No. 1, the Environmental Protection Agency is the official recipient for environmental impact statements (EIS) and is required to publish the availability of each EIS received weekly. The following is a list of environmental impact statements received by the environmental Protection Agency from January 16 through January 20, 1978. The date of receipt for each statement is noted in the statement summary. Under the Guidelines of the Council on Environmental Quality the minimum period for public review and comment on draft environmental statements is forty-five (45) days from this FEDERAL REGISTER notice of availability (March 13, 1978). The thirty (30) day period for each final statement begins on the day the statement is made available to the Environmental Protection Agency and to commenting parties.

Copies of individual statements are available for review from the original

ing agency. Back copies are also available at 10 cents per page from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

Dated: January 24, 1978.

PETER L. COOK,  
Acting Director,  
Office of Federal Activities.

#### DEPARTMENT OF AGRICULTURE

Contact: Mr. Errett Deck, Coordinator, Environmental Quality Activities, U.S. Department of Agriculture, Room 307A, Washington, D.C. 20250, 202-447-6827.

#### FOREST SERVICE

##### Draft

Gospel Hump, Nezperce & Payette National Forest, Wilderness, Idaho County, Idaho, January 18: Proposed is the recommendation for a wilderness study area of 238,830 acres of national forest land in the Nezperce and Payette National Forests in northern Idaho, and a land management plan for 212,444 acres of national forest land in the Nezperce National Forest. Principal environmental impacts resulting from the recommendations in this EIS are associated with timber harvest and culture, treatment of big game winter ranges, off-road vehicle use and general wilderness use. (ELR Order No. 80047.)

Union Creek channel improvement, Ne-shoba and Newton Counties, Miss., January 18: Proposed are flood control measures in the city of Union, Mississippi, to reduce flooding of streets, yards, and grounds from various storm sizes up to and including the 100 year event. Proposed plan implementation call for increasing the flow capacity of 1.73 miles of previously altered intermittent streams and construction of about 1,400 ft. levee. Adverse impacts involve the displacement of existing wildlife from 18 acres of mixed sapling and shrubby-type vegetation to be cleared during channel construction and repopulation with other species once vegetation is reestablished. (ELR Order No. 80048.)

Mt. Rogers, National Recreation Area and Scenic Highway, several counties, Virginia, January 20: Proposed is a long range development plan and unit plan for the Mount Rogers natural recreation area located in Carroll, Grayson, Smyth, Washington and Wythe Counties, Va. Volume II of the DEIS proposed the construction of approximately 67 miles of two-lane scenic highway, East-West between U.S. 58 and I-77. Dredge and fill permits will be required for major stream crossings if this action is implemented. (USDA-FS-RADES ADM. (780-2)/FHWA-VA-EIS-77-03-D. (ELR Order No. 80067.)

##### Final

Union Pass Planning Unit, Bridger-Teton National Forest, Sublette, Teton, and Fremont Counties, Wyo., January 19: Proposed is a comprehensive land use plan for the Union Pass Planning Unit, Bridger-Teton National Forest, Wyo. The unit contains approximately 180,000 acres of national forest, and about 1,800 acres of non-national forest land. Plan implementation activities involve wood production, water, livestock forage, wildlife, fisheries, mineral, oil and gas exploration, and recreation activities. Adverse impacts include short-term impacts on water

quality arising from road-construction, displacement of wildlife, and some soil erosion. Comments made by: USDA, HUD, DOI, EPA, and AHP. (ELR Order No. 80055.)

#### DEPARTMENT OF DEFENSE

##### ARMY CORPS

Contact: Dr. C. Grant Ash, Office of Environmental Policy Department, Attn: DAEN-CWR-P, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue SW., Washington, D.C. 20314, 202-693-6795.

##### Draft

Locks and Dam No. 1, rehabilitation, Minnesota, January 17: Proposed is the rehabilitation of locks and dam No. 1 in the St. Paul-Minneapolis reach of the Mississippi River at Mile 847.6 above the mouth of the Ohio River. Plan implementation calls for the closing and dewatering of the two locks from December 1 to May 1; rehabilitation should not affect the normal navigation season. Adverse impacts include increased water turbidity due to placement and removal of cofferdams; increased loads upon the Minneapolis sewer system; excavation of 4 acre of an island; adverse effects upon wildlife; and construction-related pollution. (St. Paul District.) (ELR Order No. 80043.)

Forest Grove Dam and Reservoir, Caney Creek, Henderson County, Tex., January 17: Proposed is the granting of a permit for the construction of a dam by the Texas Utilities Services Inc. on Caney Creek, Henderson County, Tex. Plan implementation calls for the construction of the Forest Grove Dam, circulating water intake canals and discharge structures, a pump station and pipeline and reservoir relocations. The reservoir will cover 4 to 5 miles of existing Caney Creek and will have a surface area of approximately 1,500 acres. Adverse impacts include the inundation of 1,500 acres of land and the associated displacement of wildlife; the loss of 5.2 miles of flowing stream and its ecosystem; and construction-related impacts. (Fort Worth District.) (ELR Order No. 80044.)

##### Final

Lakes Greeson, Ouachita, and Degray, operation and maintenance, several counties, Arkansas, January 19: proposed is the continuance of operation and maintenance activities at Lake Greeson, Lake Ouachita, and Degray Lake, Ark. The Lake Greeson and Lake Ouachita projects were authorized for the purposes of flood control and hydroelectric power generation. The Degray Lake project was authorized for flood control, hydroelectric power generation, water supply, navigation, and recreation. Adverse effects resulting from continued operation and maintenance include cold water release from hydroelectric power generation at Lake Greeson and Lake Ouachita, which has disrupted the once warmwater fishery downstream of each lake. (Vicksburg District.) Comments made by: EPA, USDA, DOI, DOT, and FPC. (ELR order No. 80056.)

Tillamook South Jetty Extension, Tillamook County, Oregon, January 19: Proposed is the extension of the south jetty at the entrance of Tillamook Bay an additional 1,500 feet to a point nearly opposite the north jetty. Channel width would be maintained at 1,200 feet. The jetty would be constructed to an elevation of 18 feet above mean low water with a crest width of 30 feet. Adverse effects include reduced

tidal interchange which would alter the flushing rate and could result in reduction of the bay's productivity. Approximately 6.75 acres of bottom habitat would be covered by the proposed extension. (Portland District.) Comments made by: EPA, USDA, DOC, DOI, ERDA, State and local agencies. (ELR Order No. 80080.)

Obion Creek Project, Kentucky, several counties, Kentucky, January 20: Proposed is a flood control project for Graves, Hickman, Carlisle, and Fulton Counties, Ky., which provides for about 34 miles of channel enlargement, about 8 miles of new channel construction and 3 miles of channel improvement of Hurricane Creek. The dredged material will be placed on a closed spoil bank along 8 miles of the new channel work. Adverse impacts include disruption of the benthic habitat, temporary increases in stream turbidity, noise, solid wastes, air pollution, and reduction in wildlife availability and fishery values. (Memphis District.) Comments made by: HUD, HEW, DOT, USDA, EPA, and DOI. (ELR order No. 80061.)

##### Supplement

Missouri River Levee System (S-1), Nebraska, January 18: This statement supplements a FEIS originally filed with CEQ in May of 1976. Since completion of the FEIS, it had been determined that a portion of the work to be done falls under the purview of section 404 of the Federal Water Pollution Control Act Amendments of 1972. A section 404 permit is required because permanent fill will be placed in wetlands in conjunction with the construction of 23,660 linear feet of levee and underseepage facilities along the right bank of the Missouri River at Bellevue, Nebr. Adverse impacts involve the elimination of approximately 1/4 acre of aquatic habitat in the Papillion Creek. (Omaha District.) (ELR order No. 80049.)

West Tennessee Tributaries Project (S-1), Tennessee, January 18: This statement supplements a FEIS originally filed with CEQ in July of 1975. This supplement addresses the written comments received by the corps concerning the West Tennessee Tributaries Project. (ELR order No. 80050.)

#### DEPARTMENT OF DEFENSE, AIR FORCE

Contact: Col. Luis F. Dominguez, Department of the Air Force, Room 5D431, Pentagon, Washington, D.C. 20330, 202-697-7799.

##### Final

MX: Buried Trench Construction and Test, Yuma County, Ariz., January 20: Proposed is the construction of two sections of underground tunnel in the San Cristobal Valley on the Luke Air Force range in Yuma County, Ariz. The proposed construction project will provide essential cost and construction data to analyze conceptual protective structures for the mobile, land-based intercontinental ballistic missile (ICBM) system known as MX. The trench will also serve as a test bed for mechanisms designed to punch through the tunnel roof and erect a dummy missile to simulate launch position. Long-term aesthetic degradation will result. Comments made by: USDA, DOD, DOI, DOT, EPA, and individuals. (ELR order No. 80065.)

#### DEPARTMENT OF DEFENSE, NAVY

Contact: Mr. Ed Johnson, Head, Environmental Impact Statement/RT&E Branch, Office of the Chief of Naval Operations, Department of the Navy, Washington, D.C. 20350, 202-697-3689.

##### Supplement

Kahoolawe Island Target Complex, Hawaii, January 16: This statement supplements a FEIS originally filed with CEQ in March, 1972. This supplement provides a more complete table of contents and updates the information contained in the final statement. Three new targets have been added to the target complex and overall use of the island for ground operations of the U.S. Marine Corps has increased. Adverse impacts include erosion; and the possible extinction of five species of rare plants. (ELR order No. 80039.)

#### DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Contact: Mr. Richard H. Brown, Director, Office of Environmental Quality, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-6308.

##### Draft

Concept 80 West Development, Lakewood, Jefferson County, Colo., January 18: Proposed is the granting of HUD/FHA mortgage insurance for the Concept 80 West, Lake Borough Village, housing development in Lakewood, Colo. Plan implementation calls for the construction of 168 single family houses and 662 multifamily units. Adverse impacts include increased water usage, soil erosion, increased demand on social services, and construction-related pollution. (ELR Order No. 80051.)

Westland Creek Village Subdivision, Harris County, Tex., January 19: Proposed is the granting of HUD-FHA mortgage insurance for the development of the 628-acre Westland Creek Village Subdivision located in Harris County, Tex. The development will contain approximately 2,000 single family homes and 400 multifamily homes and shopping areas. Adverse impacts include the loss of agricultural land and an increased demand for fossil fuels through heavy dependence upon the automobile. (ELR Order No. 80059.)

##### Final

Piney Ridge Village, Carroll County, Md., January 20: This statement contains a proposal for mortgage insurance for the Piney Ridge Village in Carroll County, Md. The site of the proposed Piney Ridge Village planned unit development is 450 acres comprising most of the southwestern quadrant of the major intersection of State Route 26 and Route 32. Development will include construction of 1,695 dwelling units, and community centers. Land has been reserved for development of public open space and school areas. Adverse effects include increases in air pollution and community noise levels, and increased storm water runoff. Comments made by: EPA, DOI, and USDA.

Kendall Square Urban Renewal, Cambridge County, Mass., January 19: Proposed is the completion of an ongoing urban renewal project approved in 1965 and centered around NASA in the eastern part of the city of Cambridge, Mass. The planned uses of the Kendall Square urban renewal project are light industry, technical and general office space, retail stores, a fire station, possible hotel and residential, and a parking garage. Negative effects include complete relocation of six businesses, and construction-related impacts. Comments made by: COE, DOI, NRC, USDA, GSA, EPA, ERDA, and DOT. (ELR Order No. 80057.)

## SECTION 104(h)

The following are community development block grant statements prepared and circulated directly by applicants pursuant to section 104(h) of the 1974 Housing and Community Development Act. Copies may be obtained from the office of the appropriate local chief executive. Copies are not available from HUD.

## Final

Boykin, Ala.—Water System and Road Improvements, Wilcox County, Ala., January 18: Proposed is the construction of a water system and road paving project in the Boykin Community, Wilcox County, Ala. The water project will consist of 10.5 miles of water mains. Six-inch pipe will be used for all mains with the exception of the short dead end lines that do not indicate future expansion; a 125,000 gallon elevated storage tank will be located at the north end of the system. The road improvement project consists of upgrading 2.84 miles of the present gravel surfaced roadways that run through the Boykin Community. Construction activities will cause short-term disruption. Comments made by: HEW, EPA, DOI, and COE. (ELR Order No. 80052.)

Kitsap County, Wash.—Wastewater Facilities, Kitsap County, Wash., January 16: Proposed is the extension of existing sewerage facilities in the unincorporated community of Manchester, Wash., to serve the planned 148-unit Megan Heights Subdivision and surrounding land area. The proposed sewer extension potential service area is bounded by Chester Street on the north, State Route 160 on the south, Puget Drive on the east, and Nebraska Street on the west. The Kitsap County Department of Development proposes to extend the present Manchester sewer district sewer interceptor from Hemlock Street to California Avenue. Adverse effects include the removal of trees and other vegetation. Comments made by DOT. (ELR Order No. 80040.)

## INTERSTATE COMMERCE COMMISSION

Contact: Mr. Richard I. Chais, Chief, Section of Energy and Environment, Room 3373, 12th and Constitution Avenue NW., Washington, D.C. 20423, 202-275-7692.

## Draft

Railroad Abandonment, Bonita Junction-Seagoville, several counties in Texas, January 19: The Southern Pacific Transportation Co. proposes to abandon 144.14 miles of branch line railroad between Bonita Junction and Seagoville, Tex. Adverse impacts include alterations in highway traffic volumes; highway deterioration, fuel consumption; and increased air and noise pollution. (Docket No. AB12, Sub-No. 53.) (ELR Order No. 80058.)

## DEPARTMENT OF INTERIOR

Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 4256 Interior Bldg., Department of the Interior, Washington, D.C. 20240, 202-343-3891.

## BUREAU OF RECLAMATION

## Final

ANG Coal Gasification Co., Mercer County, N. Dak., January 20: The Bureau of Reclamation proposes to make available to ANG Coal Gasification Co. 17,000 acre-feet of water annually for coal gasification needs

## NOTICES

from Garrison Reservoir through a 40-year water service contract. The gasification complex, to be located in southwestern North Dakota, would produce 250 million cubic feet per day of synthetic natural gas for use in the Michigan and Wisconsin market areas. Major adverse impacts include use of 600 acres of land, disturbance of 12,500 acres of land, and emissions of 14,665 lbs. of sulfur dioxide, 6,143 lbs. of nitrogen oxides, and 693 lbs. of particulates each hour. FES 78-1. Comments made by: DOT, USDA, DOD, HEW, HUD, EPA, FPC, FEA, ERDA, and STAT. (ELR Order No. 80062.)

## NUCLEAR REGULATORY COMMISSION

Contact: Mr. Voss A. Moore, Assistant Director for Environmental Projects, P-518, Washington, D.C. 20555, 301-492-8446.

## Final

Radioactive Materials Transportation, January 16: This statement has been prepared in connection with the NRC re-evaluation of its present regulations governing air transportation of radioactive materials, to provide sufficient analysis to determine the effectiveness of the present rules and of possible alternatives to those rules. The statement discusses the environmental impact of radioactive material in all modes of transportation under the regulations in effect as of June 30, 1975. It then examines principal alternative modes to be considered. Comments made by: TVA, HEW, EPA, DOI, FEA, ERDA, and DOT. (ELR Order No. 80041.)

## DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 7th Street SW., Washington, D.C. 20590, 202-426-4357.

## FEDERAL AVIATION ADMINISTRATION

## Draft

Lansing Municipal Airport, Improvements, Cook and Lake Counties, Ill., January 17: Proposed is an airport development program for the Lansing Municipal Airport in Lansing, Ill. Plan implementation calls for the acquisition of 434.4 acres in fee simple and 14.5 acres in aviation easements; reconstruction and extension of runway 9-27 from 75 x 2432 to 75 x 3800 feet; construction of 35,000 sq. yds. of aircraft apron, a north parallel taxiway to runway 9-27, a visual slope indicator, one corporate hangar, 4 20-unit T-hangers and a 10,000 sq. yd. parking lot; and the installation of lighting systems. (ELR Order No. 80045.)

## Final

North Bend Municipal Airport Development, Coos County, Ore., January 16: The proposed action involves the development of the North Bend Municipal Airport, North Bend, Oregon. Development items include: a runway extension of 1,987 feet on the runway 4 end, a 200-foot runway safety area and an approach lighting system beyond the extended runway 4 end, a fill of approximately 45.7 acres of the mudflat southwest of the existing runway 4 end for the runway extension and runway safety area, and a runway extension of 700 feet on the runway 31 end. Adverse effects are loss of Benthic flora and fauna, reduced area for recreation, and reduced productivity of the estuary as a whole. Comments made by: EPA, USDA, DOC, COE, HEW, HUD, DOI, DOT, and ERDA. (ELR Order No. 80042.)

## FEDERAL HIGHWAY ADMINISTRATION

## Draft

MI-29, Reconstruction, Algonac, St. Clair County, Mich., January 20: Proposed is the reconstruction of 1.5 miles of MI-29 from the west city limits to Channelsyde Drive, City of Algonac, St. Clair County, Mich. Several alternatives have been included. Adverse impacts include displacement of families, residential dwellings, and other structures; alteration of surface drainage patterns; removal of ornamental and natural vegetation; and construction-related impacts. (FHWA-MICH-EIS-77-04-D) (ELR Order No. 80064.)

## Final

Louisiana North-South Expressway, several counties, Louisiana, January 19: This statement is an in-depth study which proposes the development and recommendation of route locations and design features for approximately 300 miles of expressway in central and northern Louisiana. To facilitate analysis, the study area was initially divided into three legs. The first leg extended from Opelousas to Alexandria; the second from Alexandria to Shreveport; and the third from Alexandria to Monroe. Detailed studies have been made of the study corridor areas and the potential physical, social, economic, and environmental impacts of alternative alignments and design concepts. (Region 6) (5 Vols.) Comments made by: COE, DOT, DOC, USDA, DOI, EPA, FPC, and GSA. (ELR Order No. 80054.)

Nebraska 370, Bellevue, Sarpy County, Nebr., January 17: Proposed is the improvement of two segments of approximately 1.25 miles of Nebraska 370 within the city of Bellevue from two to four lanes. The additional right-of-way for construction will require acquisition of two residences, two businesses, and the relocation of three mobile homes. Since a motel, one church, 73 homes and a number of businesses exceed the design noise levels, a full detailed study of all noise abatement measures will be made. Comments made by: FAA, USDA, COE, DOD, EPA, and DOI. (ELR Order No. 80046.)

9.5 mile N.H. Route 101 relocation, Rockingham County, N.H., January 18: Proposed is the relocation of 9.5 miles of New Hampshire Route 101 from, roughly, Interstate Route 93 in Manchester to Interstate Route 95 in Hampton. Project termini are N.H. Route 101 approximately 2 miles west of Candia Center and N.H. Route 101 approximately 1.5 miles east of the town of Raymond. The road will be an ultimate 4-lane facility, passing through rural wooded land. Adverse effects include acquisition of 260 acres of land and the relocation of two homes, one mobile home, one cabin, and two storage trailers. (Region 1) Comments made by: EPA, HUD, DOI, HEW, and USDA. (ELR Order No. 80053.)

S.T.H. 83, Waukesha County, Waukesha County, Wis., January 20: Proposed is the improvement of S.T.H. 83 located in the southeastern part of Wisconsin in the town and village of Mukwonago. The termini of this 2.5 mile project area at the south is the new S.T.H. 83-S.T.H. 15 interchange and at the north, it is the existing S.T.H. 83. Project alternatives are to remain on the existing alignment, "do nothing," and relocate a new roadway. Adverse effects will vary depending upon the alternative chosen. Comments made by: HUD, DOI, EPA, DNR, USDA, HEW, DOD, DOT, State and local

agencies and groups and individuals. (ELR Order No. 80063.)

[FRL 848-5; OPP-42033B]

## STATE OF NEW YORK

## State Plan for Certification of Pesticide Applicators; Approval Status

Section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136b), and the implementing regulations of 40 CFR Part 171, require each State desiring to certify applicators to submit a plan for such purpose, subject to approval by the Environmental Protection Agency (EPA). On June 29, 1976, the Honorable Hugh L. Carey, Governor of the State of New York, submitted a State Plan for Certification of Pesticide Applicators to EPA.

A summary of the New York State Plan was published in the FEDERAL REGISTER on October 28, 1967 (41 FR 47283). On January 10, 1977, the plan was approved contingent upon enactment of an approvable amendment to delete or clarify the exemption from Title 13 of Article 33 of the New York Environmental Conservation Law (ECL) granted to public employees in section 33-0103(1)(b) of the ECL, and pending EPA approval of implementing regulations to be promulgated by the Department of Environmental Conservation (DEC). Notice of contingent approval was published in the FEDERAL REGISTER on January 27, 1977 (42 FR 5122).

By letter dated October 5, 1977, from the Acting First Deputy Commissioner, the DEC submitted its determination that the exemption granted to public officials engaged in the performance of their official duties from certain provisions in Article 33 of the ECL, including Title 13—Unlawful Acts, does not apply to the unlawful act of applying restricted use pesticides without certification under Title 9—Permits and Certifications. Therefore, while the subject amendment would serve a clarifying function, it is not essential in light of this interpretation by the DEC.

On December 23, 1976, the DEC promulgated rules and regulations relating to the application of pesticides, Part 325 of Title 6 of the Codes, Rules and Regulations of the State of New York, which became effective on December 27, 1976 and were submitted to EPA for review. Having completed this review, the Regional Administrator, EPA Region II, hereby gives notice that the terms and conditions of contingent approval have been satisfied and that the New York State Plan is now a fully approved plan.

## NOTICES

Dated: January 13, 1978.

ECKARDT C. BECK,  
Regional Administrator, U.S.  
Environmental Protection  
Agency, Region II.

[FR Doc. 78-2288 Filed 1-26-78; 8:45 am]

[6730-01]

## FEDERAL MARITIME COMMISSION

## AGREEMENT FILED

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10128; or may inspect the agreement at the field offices located at New York, N.Y., New Orleans, La.; San Francisco, Calif.; and Old San Juan, P.R. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, by February 6, 1978. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated herein after) and the statement should indicate that this has been done.

AGREEMENT No. T-2631-2.

FILING PARTY: Edward S. Bagley, Esquire, Terriberry, Carroll, Yancey & Farrell, 2100 International Trade Mart, New Orleans, La. 70130.

SUMMARY: Agreement No. T-2631-2 restates and modifies the basic agreement (as heretofore amended) between the members of the New Orleans Steamship Association (NOSA) setting forth the method of funding and implementing the guaranteed annual income plan negotiated with the New Orleans locals of the International Longshoremen's Association, AFL-CIO (ILA). Among other things, Agreement No. T-2631-2: (a) Provides that the contributions formerly paid by NOSA members to an escrow account will now be paid directly to the

Administrator of NOSA/ILA pension, welfare, vacation, and holiday funds; (b) makes certain technical changes to conform the agreement to the provisions of the labor contracts providing for the NOSA/ILA guaranteed annual income plan; and (c) provides for the accumulation of additional funds to meet NOSA's anticipated liability under the NOSA/ILA guaranteed annual income plan. Agreement No. T-2631-2 does not, however, revise the contributions by NOSA's members under the basic agreement, as previously amended.

By order of the Federal Maritime Commission.

Dated: January 24, 1978.

FRANCIS C. HURNEY,  
Secretary.

## MATSON NAVIGATION CO.—PROPOSED RATE INCREASES IN THE UNITED STATES PACIFIC COAST/HAWAII DOMESTIC TRADE

### Adoption of Environmental Negative Declaration

By publication in the FEDERAL REGISTER on October 25, 1977, notice was given that the Federal Maritime Commission's Office of Environmental Analysis ("OEA") had determined that environmental issues relative to the above referenced proceeding did not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 ("NEPA"), 42 U.S.C. §4321 et seq. and that the preparation of a detailed environmental impact statement was not required under section 4332(2)(c) of NEPA.

Ten days were permitted for filing exceptions to the Negative Declaration. No exceptions have been filed.

Notice is hereby given that the Federal Maritime Commission has this date adopted the Environmental Negative Declaration.

By the Commission.

FRANCIS C. HURNEY,  
Secretary.

[Independent Ocean Freight Forwarder License No. 1245]

## MONUMENTAL SECURITY STORAGE CO.

### Order of Revocation

The bond issued in favor of Monumental Security Storage Co., 3006 Druid Park Drive, Baltimore, Md. 21215, FMC No. 1245, was cancelled effective January 11, 1978.

By letter dated December 14, 1977, the licensee was advised by the Federal Maritime Commission that Independent Ocean Freight Forwarder License

No. 1245 would be automatically revoked or suspended unless a valid surety bond was filed with the Commission on or before January 11, 1978.

Section 44(c), Shipping Act, 1916, provides that no independent ocean freight forwarder license shall remain in force unless a valid bond is in effect and on file with the Commission. Rule 510.9 of Federal Maritime Commission General Order 4, further provides that a license will be automatically revoked or suspended for failure of a licensee to maintain a valid bond on file.

The licensee has failed to furnish a valid surety bond.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (revised) Section 5.01(d) dated August 8, 1977:

It is ordered, That Independent Ocean Freight Forwarder License No. 1245 issued to Monumental Security Storage Co. be returned to the Commission for cancellation.

It is further ordered, That Independent Ocean Freight Forwarder License No. 1245 be and is hereby revoked effective January 11, 1978.

It is further ordered, That a copy of this Order be published in the FEDERAL REGISTER and served upon Monumental Security Storage Co.

LEROY F. FULLER,  
Director, Bureau of  
Certification and Licensing.

## GENERAL SERVICES ADMINISTRATION

[Federal Property Management Regs.; Temporary Reg. F-455]

## DEPARTMENT OF DEFENSE

### Delegation of Authority

1. *Purpose.* This regulation delegates authority to the Department of Defense to represent, in conjunction with the Administrator of General Services, the interests of the executive agencies of the Federal Government in a natural gas rate proceeding.

2. *Effective date.* This regulation is effective immediately.

3. *Delegation.* (a) Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, particularly sections 201(a)(4) and 205(d) (40 U.S.C. 481(a)(4) and 486(d)), authority is delegated to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government before the Federal Energy Regulatory Commission involving the application of the El Paso Natural Gas Co., for an increase in its natural gas rates. The authority

delegated to the Secretary of Defense shall be exercised concurrently with the Administrator of General Services.

(b) The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

(c) This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration, and shall be exercised in cooperation with the responsible officers, officials, and employees thereof.

JAY SOLOMON,  
Administrator of  
General Services.

JANUARY 16, 1978.

# [6820-22]

## REGIONAL PUBLIC ADVISORY PANEL ON ARCHITECTURAL AND ENGINEERING SERVICES

### Meeting

JANUARY 19, 1978.

Pursuant to Pub. L. 92-463, notice is hereby given of a meeting of the Regional Public Advisory Panel on Architectural and Engineering Services, Region 3, on February 16 and 17, 1978, from 9 a.m. to 4 p.m., in Room 2636 of the GSA Regional Office Building, Seventh and D Streets SW., Washington, D.C. The meeting will be devoted to the initial stage of the process for screening and evaluating prospective architect-engineer firms to furnish professional services required in connection with two building renovation projects and one new construction project, as follows: (1) Appraisers Stores, Baltimore, Md. (GS-03B-88092/89019); (2) Federal Building No. 3, Sultland, Md. (GS-03B-88097/89022); and (3) FBI Academy, Quantico, Va. (GS-03B-88148/89029). The meeting will be open to the public.

JOHN F. GALUARDI,  
Regional Administrator.

# [4110-03]

## DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

### Food and Drug Administration

### ADVISORY COMMITTEE

### Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). This notice also sets forth a summary of the pro-

cedures governing committee meetings and methods by which interested persons may participate in open public hearings conducted by the committees and is issued under section 10(a) (1) and (2) of the Federal Advisory Com-

Committee name	Date, time, and place	Type of meeting and contact person
Long Term Protocol Subgroup of the Psychopharmacological Agents Advisory Committee.	Feb. 27, 9 a.m. Conference Room C, Parklawn Bldg., 5600 Fishers Lane, Rockville, Md.	Open public hearing 9 a.m. to 10 a.m.; open committee discussion 10 a.m. to 5 p.m.; (HFD-120), Julius J. Cinque, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3800.

*General function of the committee.* Reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational prescription drugs for use in the practice of psychiatry and related fields.

*Agenda.—Open public hearing.* Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee.

*Open committee discussion.* Development of long term (Phase IV) protocols.

FDA public advisory committee meetings may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. There are no closed portions for the meetings announced in this notice. The dates and times reserved for the open portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairman determines will facilitate the committee's work.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this FEDERAL REGISTER notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity

to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairman's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion. A list of committee members and summary minutes of meetings may be obtained from the Public Records and Documents Center (HFC-18) 5600 Fishers Lane, Rockville, MD 20857, between the hours of 9 a.m. and 4 p.m., Monday through Friday. The FDA regulations relating to public advisory committees may be found in 21 CFR Part 14.

Dated: January 19, 1978.

WILLIAM F. RANDOLPH,  
Acting Associate Commissioner  
for Compliance.

[FR Doc. 78-2194 Filed 1-26-78; 8:45 am]

## CONTRACEPTIVES AND OTHER VAGINAL DRUG PRODUCTS PANEL

### Meeting Place Change

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Contraceptives and Other Vaginal Drug Products Panel meeting scheduled for February 3 and 4, 1978, in Conference Room A, Parklawn Building, 5600 Fishers Lane, Rockville, Md., on February 3, and at the Holiday Inn, Chevy Chase, Md., on February 4, has been changed to meet at the Holiday Inn, Bethesda, Md., on February 4, 1978.

FOR FURTHER INFORMATION CONTACT:

Armond Welch, Bureau of Drugs (HFD-510), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4960.

SUPPLEMENTARY INFORMATION: Under the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-

463, 86 Stat. 770-776 (5 U.S.C. App. I)), the Food and Drug Administration (FDA) announced in a notice published in the FEDERAL REGISTER of January 13, 1978 (43 FR 1999), meetings of FDA public advisory committees and other required information in accordance with provisions set forth in section 10(a) (1) and (2) of the act.

Notice is hereby given that the meeting of the Contraceptives and Other Vaginal Drug Products Panel scheduled for February 3 and 4, 1978, will meet in Conference Room A, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857, on February 3, and at the Holiday Inn, Bethesda, Md. 20014, on February 4. The open public hearing will begin at 9 a.m. on February 3.

Dated: January 19, 1978.

WILLIAM F. RANDOLPH,  
Acting Associate Commissioner  
for Compliance.

[FR Doc. 78-2195 Filed 1-26-78; 8:45 am]

# [4110-03]

[Docket No. 76N-0292; DESI 6811]

## ISONIAZID

Drugs for Human Use; Drug Efficacy Study Implementation; Labeling Revision

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice sets forth revised labeling for products containing isoniazid both as a single ingredient and as a component of a combination. The labeling includes a boxed warning statement that highlights the association between hepatitis and isoniazid therapy.

DATE: Supplements to approved NDA's due on or before March 28, 1978.

ADDRESSES: Communications forwarded in response to this notice should be identified with the reference number DESI 6811, directed to the attention of the appropriate office named below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857.

Supplements (identify with NDA number): Division of Anti-Infective Drug Products (HFD-140), Room 12B-45, Bureau of Drugs.

Original abbreviated new drug applications and supplements thereto (identify as such): Division of Generic Drug Monographs (HFD-530), Bureau of Drugs.

Requests for opinion of the applicability of this notice to a specific product: Division of Drug Labeling Compliance (HFD-310), Bureau of Drugs.

FOR FURTHER INFORMATION CONTACT:

Herbert Gerstenzang, Bureau of

Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3650.

**SUPPLEMENTARY INFORMATION:** A notice was published in the FEDERAL REGISTER of October 12, 1976 (41 FR 44724) (DESI 6811) concerning certain single-entity and combination products containing isoniazid. The notice stated the effective indications but did not set forth full labeling. A previous notice published in the FEDERAL REGISTER of October 7, 1971 (36 FR 19520) had set forth full labeling for isoniazid based upon information available at that time. As discussed below, it is now appropriate to revise the full labeling on the basis of more recent information concerning isoniazid.

Although the association believes isoniazid and a risk of hepatitis has been known for years, and the current labeling includes warning statements on this risk, a review of recent information reveals an increasing risk in relation to increasing age. In addition there is an increased risk in alcohol abusers. The Director of the Bureau of Drugs is now requiring a Box Warning on the risk of hepatitis and the action to be taken to monitor this risk and to avoid aggravating hepatitis if it occurs.

In addition, because of the risk, it is appropriate to prioritize use of isoniazid for prophylactic purposes in various categories of patients and the new Indications section provides such priorities.

Other changes are also required in the labeling for isoniazid products. Accordingly, full labeling for single-entity isoniazid products is now revised to read as follows:

#### ISONIAZID

#### WARNING

Severe and sometimes fatal hepatitis associated with isoniazid therapy may occur and may develop even after many months of treatment. The risk of developing hepatitis is age related. Approximate case rates by age are: 0 per 1,000 for persons under 20 years of age, 3 per 1,000 for persons in the 20-34 year age group, 12 per 1,000 for persons in the 35-49 year age group, 23 per 1,000 for persons in the 50-64 year age group, and 8 per 1,000 for persons over 65 years of age. The risk of hepatitis is increased with daily consumption of alcohol. Precise data to provide a fatality rate for isoniazid-related hepatitis is not available; however, in a U.S. Public Health Service Surveillance Study of 13,838 persons taking isoniazid, there were 8 deaths among 174 cases of hepatitis.

Therefore, patients given isoniazid should be carefully monitored and interviewed at monthly intervals. Serum transaminase concentration becomes elevated in about 10-20 percent of patients, usually during the first few months of therapy but it can occur at any time. Usually enzyme levels return to normal despite continuance of drug but in

some cases progressive liver dysfunction occurs. Patients should be instructed to report immediately any of the prodromal symptoms of hepatitis, such as fatigue, weakness, malaise, anorexia, nausea, or vomiting. If these symptoms appear or if signs suggestive of hepatic damage are detected, isoniazid should be discontinued promptly, since continued use of the drug in these cases has been reported to cause a more severe form of liver damage.

Patients with tuberculosis should be given appropriate treatment with alternative drugs. If isoniazid must be reinstituted, it should be reinstituted only after symptoms and laboratory abnormalities have cleared. The drug should be restarted in very small and gradually increasing doses and should be withdrawn immediately if there is any indication of recurrent liver involvement.

Preventive treatment should be deferred in persons with acute hepatic diseases.

#### DESCRIPTION

Isoniazid is the hydrazide of isonicotinic acid. (Other descriptive information to be included by manufacturer or distributor should be confined to an appropriate description of the chemical and physical properties of the drug and the formulation.)

#### ACTIONS

Isoniazid acts against actively growing tubercle bacilli.

Within 1 to 2 hours after oral administration, isoniazid produces peak blood levels which decline to 50 percent or less within 6 hours. It diffuses readily into all body fluids (cerebrospinal, pleural, and ascitic fluids), tissues, organs, and excreta (saliva, sputum, and feces). The drug also passes through the placental barrier and into milk in concentrations comparable to those in the plasma. From 50 to 70 percent of a dose of isoniazid is excreted in the urine in 24 hours.

Isoniazid is metabolized primarily by acetylation and dehydrazination. The rate of acetylation is genetically determined. Approximately 50 percent of Blacks and Caucasians are "slow inactivators" and the rest are "rapid inactivators"; the majority of Eskimos and Orientals are "rapid inactivators."

The rate of acetylation does not significantly alter the effectiveness of isoniazid. However, slow acetylation may lead to higher blood levels of the drug, and thus an increase in toxic reactions.

Pyridoxine (B<sub>6</sub>) deficiency is sometimes observed in adults with high doses of isoniazid and is considered probably due to its competition with pyridoxal phosphate for the enzyme apotryptophanase.

#### INDICATIONS

For all forms of tuberculosis in which organisms are susceptible.

For preventive therapy for the following groups, in order of priority:

1. Household members and other close associates of persons with recently diagnosed tuberculous disease.

2. Positive tuberculin skin test reactors with findings on the chest roentgenogram consistent with nonprogressive tuberculous disease, in whom there are neither positive bacteriologic findings nor a history of adequate chemotherapy.

3. Newly infected persons.

4. Positive tuberculin skin test reactors in the following special clinical situations: prolonged therapy with adrenocorticosteroids; immunosuppressive therapy; some hematologic and reticuloendothelial diseases, such as leukemia or Hodgkin's disease; diabetes mellitus; silicosis; after gastrectomy.

5. Other positive tuberculin reactors under 35 years of age.

The risk of hepatitis must be weighed against the risk of tuberculosis in positive tuberculin reactors over the age of 35. However, the use of isoniazid is recommended for those with the additional risk factors listed above (1-4) and on an individual basis in situations where there is likelihood of serious consequences to contacts who may become infected.

#### CONTRAINDICATIONS

Previous isoniazid-associated hepatic injury; severe adverse reactions to isoniazid, such as drug fever, chills, and arthritis; acute liver disease of any etiology.

#### WARNINGS

See the boxed warning.

#### PRECAUTIONS

Use of isoniazid should be carefully monitored in the following:

1. Patients who are receiving phenytoin concurrently. Isoniazid may decrease the excretion of phenytoin or may enhance its effects. To avoid phenytoin intoxication, appropriate adjustment of the anticonvulsant should be made.

2. Daily users of alcohol. Daily ingestion of alcohol may be associated with a higher incidence of isoniazid hepatitis.

3. Patients with current chronic liver disease or severe renal dysfunction.

Periodic ophthalmologic examinations during isoniazid therapy are recommended when visual symptoms occur.

#### USAGE IN PREGNANCY AND LACTATION

It has been reported that in both rats and rabbits, isoniazid may exert an embryocidal effect when administered orally during pregnancy, although no isoniazid-related congenital anomalies have been found in reproduction studies in mammalian species (mice, rats, and rabbits). Isoniazid should be prescribed during pregnancy only when therapeutically necessary. The benefit of preventive therapy

should be weighed against a possible risk to the fetus. Preventive treatment generally should be started after delivery because of the increased risk of tuberculosis for new mothers.

Since isoniazid is known to cross the placental barrier and to pass into maternal breast milk, neonates and breast-fed infants of isoniazid treated mothers should be carefully observed for any evidence of adverse effects.

#### CARCINOGENESIS

Isoniazid has been reported to induce pulmonary tumors in a number of strains of mice.

#### ADVERSE REACTIONS

The most frequent reactions are those affecting the nervous system and the liver.

**Nervous system reactions.** Peripheral neuropathy is the most common toxic effect. It is dose-related, occurs most often in the malnourished and in those predisposed to neuritis (e.g., alcoholics and diabetics), and is usually preceded by paresthesias of the feet and hands. The incidence is higher in "slow inactivators".

Other neurotoxic effects, which are uncommon with conventional doses, are convulsions, toxic encephalopathy, optic neuritis and atrophy, memory impairment, and toxic psychosis.

**Gastrointestinal reactions.** Nausea, vomiting, and epigastric distress.

**Hepatic reactions.** Elevated serum transaminases (SGOT; SGPT), bilirubinemia, bilirubinuria, jaundice, and occasionally severe and sometimes fatal hepatitis. The common prodromal symptoms are anorexia, nausea, vomiting, fatigue, malaise, and weakness. Mild and transient elevation of serum transaminase levels, occurs in 10 to 20 percent of persons taking isoniazid. The abnormality usually occurs in the first 4 to 6 months of treatment but can occur at any time during therapy. In most instances, enzyme levels return to normal with no necessity to discontinue medication.

In occasional instances, progressive liver damage occurs, with accompanying symptoms. In these cases, the drug should be discontinued immediately. The frequency of progressive liver damage increases with age. It is rare in persons under 20, but occurs in up to 2.3 percent of those over 50 years of age.

**Hematologic reactions.** Agranulocytosis; hemolytic, sideroblastic, or aplastic anemia; thrombocytopenia; and eosinophilia.

**Hypersensitivity reactions.** Fever, skin eruptions (morbilliform, maculopapular, purpuric, or exfoliative), lymphadenopathy, and vasculitis.

**Metabolic and endocrine reactions.** Pyridoxine deficiency, pellagra, hyperglycemia, metabolic acidosis, and gynecomastia.

**Miscellaneous reactions.** Rheumatic syndrome and systemic lupus erythematosus-like syndrome.

#### OVERDOSAGE

**Signs and symptoms.** Isoniazid overdosage produces signs and symptoms from 30 minutes to 3 hours after ingestion. Nausea, vomiting, dizziness, slurring of speech, blurring of vision, and visual hallucinations (including bright colors and strange designs) are among the early manifestations. With marked overdosage, respiratory distress and CNS depression, progressing rapidly from stupor to profound coma, are to be expected, along with severe, intractable seizures. Severe metabolic acidosis, acetoneuria, and hyperglycemia are typical laboratory findings.

**Treatment.** Untreated or inadequately treated cases of gross isoniazid overdosage can terminate fatally, but good response has been reported in most patients brought under adequate treatment within the first few hours after drug ingestion.

Secure the airway and establish adequate respiratory exchange. Gastric lavage within the first 2 to 3 hours is advised, but should not be attempted until convulsions are under control. To control convulsions administer I.V. short-acting barbiturates and I.V. pyridoxine (usually 1 mg/1 mg isoniazid ingested).

Obtain blood samples for immediate determination of gases, electrolytes, BUN, glucose, etc.; type and cross-match blood in preparation for possible hemodialysis.

Rapid control of metabolic acidosis is fundamental to management. Give IV sodium bicarbonate at once and repeat as needed, adjusting subsequent dosage on the basis of laboratory findings (i.e., serum sodium, pH, etc.).

Forced osmotic diuresis must be started early and should be continued for some hours after clinical improvement to hasten renal clearance of drug and help prevent relapse; monitor fluid intake and output.

Hemodialysis is advised for severe cases; if this is not available, peritoneal dialysis can be used along with forced diuresis.

Along with measures based on initial and repeated determination of blood gases and other laboratory tests as needed, utilize meticulous respiratory and other intensive care to protect against hypoxia, hypotension, aspiration pneumonia, etc.

**NOTE.**—For preventive therapy of tuberculous infection it is recommended that physicians be familiar with the joint recommendations of the American Thoracic Society, American Lung Association, and the Center for Disease Control, as published in the American Review of Respiratory Diseases Vol. 110, No. 3, September 1974, or CDC's morbidity and Mortality Weekly Report, Vol. 24, No. 8, February 22, 1975.

#### DOSAGE AND ADMINISTRATION

For treatment of tuberculosis: Isoniazid is used in conjunction with other effective antituberculous agents. If the bacilli become resistant, therapy must be changed to agents to which the bacilli are susceptible.

Usual oral dosage: Adults—5 mg/kg up to 300 mg daily in a single dose; infants and children—10-20 mg/kg depending on severity of infection, (up to 300-500 mg daily) in a single dose.

For preventive therapy: Adults—300 mg per day in a single dose; infants and children—10 mg/kg (up to 300 mg daily) in a single dose.

Continuous administration of isoniazid for a sufficient period is an essential part of the regimen because relapse rates are higher if chemotherapy is stopped prematurely. In the treatment of tuberculosis, resistant organisms may multiply and the emergence of resistant organisms during the treatment may necessitate a change in the regimen.

Concomitant administration of pyridoxine (B<sub>6</sub>) is recommended in the malnourished and in those predisposed to neuropathy (e.g., alcoholics and diabetics).

The above labeling for single-entity isoniazid products also applies to the isoniazid component of combination products and should be incorporated into the labeling of such combinations. For combinations, the statement under Indications that reads: "For all forms of tuberculosis in which the organisms are susceptible" should be changed to read as follows:

For all forms of tuberculosis in which organisms are susceptible, and when the patient has been titrated on the individual components and it has therefore been established that this fixed dosage meets the foregoing needs.

This fixed-dosage combination drug is not recommended for initial therapy of tuberculosis or for preventive therapy.

Copies of the following references are available for public examination in the office of the Hearing Clerk (HFC-20), Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, and may be seen between the hours of 9 a.m. and 4 p.m. Monday through Friday.

This notice applies not only to any isoniazid product subject to the drug efficacy study but to any such product that is the subject of a new drug application approved either before or after the drug amendments of 1962 and also to any identical, related, or similar drug product (21 CFR 310.6), whether or not it is the subject of an approved new drug application. Any drug manufacturer or distributor may request an opinion of the applicability of this notice to a specific drug product by writing to the Division of Drug Labeling Compliance (address given above). Supplements containing revised labeling for drug products affected by this notice shall be submitted on or before March 28, 1978. The revised labeling may be put into use before approval of the supplemental new drug application, as provided for in 21 CFR 314.8 (d) and (e).

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050-1053, as amended (21 U.S.C. 352, 355)) and under the authority delegated to the Director of the Bureau of Drugs (21 CFR 5.70).

## NOTICES

Dated: January 18, 1978.

Food and Drug Administration  
PANEL ON REVIEW OF VITAMIN, MINERAL,  
AND HEMATINIC DRUG PRODUCTS

## Notice of Renewal

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. I)), the Food and Drug Administration announces the renewal of the Panel on Review of Vitamin, Mineral, and Hematinic Drug Products by the Secretary, Department of Health, Education, and Welfare.

DATE: Authority for this committee will expire on February 28, 1978, unless the Secretary formally determines that continuance is in the public interest.

FOR FURTHER INFORMATION CONTACT:

Richard L. Schmidt, Committee Management Officer (HFS-20), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-2765.

Dated: January 19, 1978.

## Health Resources Administration

## ADVISORY COMMITTEES

## Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory bodies scheduled to assemble during the month of February 1978:

## NATIONAL COUNCIL ON HEALTH PLANNING AND DEVELOPMENT

Date and Time: February 10, 1978, 8:30 a.m.-5:00 p.m.

Place: 1st Floor Auditorium, Hubert H. Humphrey Building, 200 Independence Avenue SW, Washington, D.C. 20201.

Type of Meeting: Open for entire meeting.  
Purpose: The National Council on Health Planning and Development is responsible for advising and making recommendations with respect to (1) the development of national guidelines under section 1501 of Pub.

L. 93-641, (2) the implementation and administration of Titles XV and XVI of Pub. L. 93-641, and (3) an evaluation of the implications of new medical technology for the organization, delivery and equitable distribution of health care services. In addition, the Council advises and assists the Secretary in the preparation of general regulations to carry out the purposes of section 1122 of the Social Security Act and on policy matters arising out of the implementation of it, including the coordination of activities under that section with those under other parts of the Social Security Act or under other Federal or federally assisted health programs. The Council considers and advises the Secretary on proposals submitted by the Secretary under the provisions of section 1122(d)(2) that health care facilities or health maintenance organizations be reimbursed for expenses related to capital expenditures notwithstanding that under section 1122(d)(1) there would otherwise be exclusion of reimbursement for such expenses.

Agenda: To advise on the development of the National Guidelines for Health Planning and to review the progress of the health planning program.

Anyone wishing to participate, obtain a roster of members, minutes of meetings, or other relevant information should contact Mr. Daniel I. Zwick, Office of Planning, Evaluation and Legislation, Room 10-22, Center Building, 3700 East-West Highway, Hyattsville, Md. 20782. Telephone 301-436-7270.

## NATIONAL ADVISORY COUNCIL ON HEALTH PROFESSIONS EDUCATION

Date and Time: February 13-14, 1978, 8:30 a.m.

Place: Conference Room No. 10, Building 31, National Institutes of Health, 6th Floor, C-Wing, Bethesda, Md. 20014.

Types of Meetings: Open February 13-8:30 a.m.-12:30 p.m. (10:30 a.m.-12:30 p.m. will be structured study for Council members.) Closed for remainder of the meeting.

Purpose: The Council advises the Secretary concerning the programs authorized by the Health Professions Educational Assistance Act of 1976, including recommendations on contracts, grant applications for construction, capitation, special projects, and financial need. These and other programs are designed to enable the health professions education institutions to meet the Nation's health manpower requirements.

Agenda: Agenda items for the open portion of the meeting will include a report by the Administrator, HRA: Bureau update; 1979 Budget; discussion of future meeting dates; and the review of draft documents prepared for use in implementing Pub. L. 94-484. The remainder of the meeting will be closed to the public for the review of applications submitted under the Family Medicine Residency Program. The closing is in accordance with the provisions set forth in section 552b(c)(6), Title 5 U.S. Code, and the Determination by the Administrator, Health Resources Administration, pursuant to Pub. L. 92-463.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should contact Mrs. Lynn Stevens, Bureau of Health Manpower, Room 9-50, Center Building, 3700 East-West Highway, Hyattsville, Md. 20782, telephone 301-436-6508.

## GRADUATE MEDICAL EDUCATION NATIONAL ADVISORY COMMITTEE

Date and Time: February 17, 1978, 9:00 a.m.

Place: Conference Room 7-32, Center Building, 3700 East-West Highway, Hyattsville, Md. 20782.

Type of Meeting: Open for entire meeting.  
Purpose: The Graduate Medical Education National Advisory Committee is responsible for advising and making recommendations with respect to: (1) present and future supply and requirements of physicians by specialty and geographic location; (2) ranges and types of numbers of graduate training opportunities needed to approach a more desirable distribution of physician services; and (3) the impact of various activities which influence specialty distribution and the availability of training opportunities including systems of reimbursement and the financing of graduate medical education.

Agenda: Discussion will focus on review of consultant/staff discussions taking place since the previous meeting. Topics discussed include issues associated with the financing of graduate medical education; physician extenders; and the development of a manpower model.

A portion of the meeting will be available for comments and participation by the public. Due to limited seating, attendance by the public will be provided on a first-come, first-serve basis.

Anyone wishing to obtain a roster of members, minutes of meeting, or other relevant information should contact Dr. Frederick V. Featherstone, Bureau of Health Manpower, Room 4-42, Center Building, 3700 East-West Highway, Hyattsville, Md. 20782, telephone 301-436-6430. Agenda items are subject to change as priorities dictate.

Dated: January 18, 1978.

JAMES A. WALSH,  
Associate Administrator for Operations and Management.  
[FR Doc. 78-2221 Filed 1-26-78; 8:45 am]

## [4110-83]

## LIST OF URBAN AND RURAL POVERTY AREAS

## Availability

Notice is hereby given that State health planning and development agencies and the Department of Health, Education, and Welfare regional offices have available a listing of urban and rural poverty areas. Title XVI of the National Health Planning and Resources Development Act of 1974 (Pub. L. 93-641), provides assistance to eligible applicants through project grants, allotments, loans and loan guarantees with interest subsidies for construction, conversion and modernization of medical facilities. The Act provides that the level of Federal participation in a project shall not exceed a percentage specified in the Act unless the project is located in an area determined by the Secretary to be an urban or rural poverty area, in which case the Federal share may cover up to 100 percent of the cost of

## NOTICES

the project. The term "urban or rural poverty area" has been defined as a census tract, census county division, or minor civil division, as applicable, in which a certain percentage of the residents have incomes below the poverty level (the "area percentage"). Under section 1633(15) of the Act, the area percentage must be one that, when the populations of all areas with poverty populations at or above that percentage are aggregated, will yield a total population which is the same percentage of the total population of the United States population with incomes below the poverty level, plus or minus five percent. Thus, the statute sets up absolute outer limits within which the Secretary may set the area percentage, but gives the Secretary discretion within those limits. The Secretary has decided to establish the rule that the area percentage will be as low as the law allows (21.92 percent), so that the benefits of being located in an urban or rural poverty area will be open to as many facilities as possible within the statutory constraints. That is, if the area percentage of population in poverty (from the U.S. Census figures for 1970) is 21.92 percent or higher, the area would qualify for Federal assistance through Title XVI in excess of the normal maximum.

If the percentage is not known to the applicant, or verification is desired, copies of the listing of urban and rural poverty areas are available at the DHEW regional offices and State health planning and development agencies listed below.

National Institutes of Health  
NATIONAL DIABETES ADVISORY BOARD  
Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of meetings of the National Diabetes Advisory Board on February 7, 23, and 24, 1978, 8:30 a.m. to 5 p.m., at the Twin Bridges Marriott, U.S. 1 and I-95, Washington, D.C.

The Board meeting will be held on February 24, 1978 and the Ad Hoc Insulin Study Committee meetings will be held on February 7 and 23, 1978.

The meetings, which will be open to the public are being held to continue review of the status and implementation of the long-range plan to combat diabetes formulated by the National Commission on Diabetes and to review and evaluate the status of insulin supplies for diabetic patients in the United States. Attendance by the public will be limited to space available.

Mr. Raymond M. Kuehne, Executive Director of the Board, P.O. Box 30174, Bethesda, Md. 20014, 301-496-8045, will provide summaries of the meeting and a roster of the committee members.

Office of Human Development Services  
FAMILY MEDIAN INCOME BY STATE  
Eligibility for Social Services

Under the provision of sections 2002(a)(5)(B), 2002(a)(6) (A) and (B), and 2002(a)(14)(A) of Title XX of the Social Security Act, promulgation is made of the median income of a family of four for each State and the States as a whole, applicable to the period October 1, 1978 through September 30, 1979. This promulgation is made for the purpose of determining the extent of Federal financial participation (FFP) in State expenditures under Title XX. The above listed sections impose certain limitations with respect to the availability of FFP based upon the relationship of the income of the family of a service recipient to the median income of a family of four in the State, adjusted in accordance with regulations prescribed by the Secretary to take into account the size of the family.

Estimates of the median income of families of four persons for each State and the District of Columbia were developed by the Bureau of the Census. In developing the median income scale, the Bureau of the Census used three sources of data: (1) The 1977 Current Population Survey, (2) the 1970 Census of Population, and (3) per capita personal income estimates from the Bureau of Economic Analysis. The methodology for adjusting median income for families of different size is specified in 45 CFR 228.60.

The median income for a family of four, by State, for fiscal year 1979—with calculations at the 80 percent, 90 percent, and 115 percent levels—are set forth below for use by States in establishing income ceilings and fee schedules under Title XX of the Social Security Act:

MEDIAN INCOME FOR FAMILIES OF 4

State	Median income	80 pct of median income	90 pct of median income	115 pct of median income
Alabama	15,346	12,277	13,811	17,648
Alaska	28,571	22,857	25,714	32,857
Arizona	17,131	13,705	15,418	19,701

##### GENERAL CLINICAL RESEARCH CENTERS COMMITTEE

###### Meeting

NOTE.—This document originally appeared in the FEDERAL REGISTER for Wednesday, January 25, 1978. It is reprinted in this issue to meet requirements for publication on an assigned day of the week. (See the inside cover of this issue for information about agencies publishing on assigned days of the week.)

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the General Clinical Research Centers Committee, Division of Research Resources, on February 6 and 7, 1978, at the LaPlaya Hotel, Camino Real at 8, Carmel-by-the-Sea, Calif.

The meeting will be open to the public on February 6, 1978, from 9 a.m. to 11 a.m., to discuss administrative matters. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on February 6 from 11 a.m. to 5 p.m., and on February 7 from 9 a.m. to adjournment for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the application.

Mr. James Augustine, Information Officer, Division of Research Resources, National Institutes of Health, Room 5B13, Building 31, Bethesda, Md. 20014, telephone 301-496-5545, will provide summaries of the meeting and rosters of the Committee members. Dr. Ephraim Y. Levin, Executive Secretary of the General Clinical Research Centers Committee, Room 5B51, Building 31, National Institutes of Health, Bethesda, Md. 20014, telephone 301-496-6595, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Programs No. 13.333, National Institutes of Health.)

Dated: January 12, 1978.

SUZANNE L. FREMEAUX,  
NIH Committee  
Management Officer.

##### NATIONAL ADVISORY RESEARCH RESOURCES COUNCIL

###### Amended Meeting

Notice is hereby given of an addition to the agenda of the meeting of the National Advisory Research Resources

Council, Division of Research Resources, January 30-31, 1978, Conference Room 10, Building 31-C, National Institutes of Health, Bethesda, Md. 20014, which was published in the FEDERAL REGISTER on December 16, 1977 (42 FR 35880).

The open portion of the meeting, scheduled for January 30, will include additionally a Primate Supply Status Report by a member of the DRR staff, a General Discussion by the members of the National Advisory Research Resources Council, and a discussion of the DRR Forward Plan 1980-84.

Dated: January 20, 1978.

SUZANNE L. FREMEAUX,  
Committee Management  
Officer, NIH.

##### NATIONAL HEART, LUNG, AND BLOOD INSTITUTE

###### Meeting

Notice is hereby given of the meeting on the state-of-the-art in Cooley's anemia research and treatment sponsored by the National Heart, Lung, and Blood Institute; February 13, 1978, in the National Institutes of Health, Bethesda, Md., Building 31, Wing C, Conference Room 9.

This meeting will be open to the public on February 13, 1978 from 9:30 a.m. to adjournment. The agenda will include a discussion of the dimension of the problem of Cooley's anemia research and treatment, the public and private resources for the diagnosis of, screening for, and research on Cooley's anemia; and the most fruitful areas for future research. Attendance will be limited to space available.

Mr. John B. Lyons, Administrative Officer, Division of Blood Diseases and Resources, National Heart, Lung, and Blood Institute, Building 31, Room 4A21, Bethesda, Md. 20014, phone 301-496-3533 will provide additional information.

Dated: January 19, 1978.

SUZANNE L. FREMEAUX,  
Committee Management  
Officer, NIH.

##### NATIONAL COMMISSION ON DIGESTIVE DISEASES

###### Meeting

Pursuant to Pub. L. 92-463, notice is hereby given that the National Commission on Digestive Diseases will hold a public hearing on March 2, and a Commission meeting on March 3, 1978, in Washington, D.C. 20201, places and

times listed below. The entire two days will be open to the public. Attendance by the public will be limited to space available.

The Commission will hold the public hearing March 2, 10:00 a.m. to 6:00 p.m. at the Department of Health, Education, and Welfare, Hubert Humphrey Building Auditorium, 2nd and C Streets SW. On March 3, the Commission will hold a meeting, 9:00 a.m. to 5:00 p.m., at the same location, in Room, 529A, to discuss business matters and reports.

Any member of the public who wishes to appear before the Commission on March 2 shall file a written statement or detailed summary of his remarks with the Commission before February 15, 1978. Statements or summaries may be sent to Dr. Thomas P. Vogl, Executive Secretary, National Commission on Digestive Diseases, Room 6C16, the Federal Building, 7550 Wisconsin Avenue, Bethesda, Md. 20014. The time allotted to each participant will be determined by the Commission Chairman based upon the number of individuals who request an opportunity to make presentations.

Messrs. James N. Fordham or Leo E. Treacy, Office of Scientific and Technical Reports, NIAMDD, National Institutes of Health, Building 31, Room 9A04, Bethesda, Md. 20014, telephone 301-496-3583, will provide summaries of the Commission meeting.

(Catalog of Federal Domestic Assistance Program No. 13.484, National Institutes of Health.)

Dated: January 20, 1978.

## DEPARTMENT OF LABOR

Employment and Training Administration

## EMPLOYMENT TRANSFER AND BUSINESS COMPETITION DETERMINATIONS

## Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 U.S.C. 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining

whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.

2. Employment trends in the same industry in the local area.

3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.

4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).

5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice to: Deputy Assistant Secretary for Employment and Training, 601 D Street NW., Washington, D.C. 20213.

Signed at Washington, D.C., this 23rd day of January 1978.

ERNEST G. GREEN,  
Assistant Secretary for  
Employment and Training.

APPLICATIONS RECEIVED DURING THE WEEK  
ENDING JANUARY 20, 1978

Name of applicant, location of enterprise,  
and principal product or activity

Champion Products, Inc. (Tenant of Chango County Industrial Development Authority), Norwich, N.Y., manufacture of athletic uniforms.

EXPANDED JOB CORPS CENTER AT FORMER  
ST. FRANCIS SEMINARY, SPRINGDALE, OREG.

Determination of Negative Environmental  
Impact

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice-finding of negative environmental impact.

SUMMARY: The purpose of this notice is to announce a determination by the Department under the National Environmental Policy Act and 40 CFR

Part 1500 that the consolidation of three existing Job Corps programs at the former St. Francis Seminary in Springdale, Oreg., does not constitute a major Federal action which will significantly affect the environment.

## FOR FURTHER INFORMATION:

Contact Raymond E. Young, Acting Director, Job Corps, Room 6100, Patrick Henry Building, 601 D Street NW., Washington, D.C. 20213, telephone 202-376-6995.

**SUPPLEMENTARY INFORMATION:** Title IV of the Comprehensive Employment and Training Act (CETA) of 1973, as amended, 29 U.S.C. 911 et seq., directs the Secretary of Labor to establish Job Corps centers to provide occupational training to disadvantaged youths ages 16 through 21. The Secretary has issued regulations published at 29 CFR Part 97a, implementing Title IV of CETA. Pursuant to his authority the Secretary is consolidating the Job Corps operations at the St. Francis Seminary location.

Pursuant to 40 CFR Part 1500, the Department of Labor has conducted an environmental assessment as part of a site utilization study and has determined that preparation of an environmental impact statement is not required since the expansion of this Job Corps center is not a major Federal action which will significantly affect the quality of the human environment within the meaning of 40 CFR 1500.6(c). The Portland Job Corps Center is a training center with residential, nonresidential and educational facilities for approximately 275 disadvantaged youth, men, and women, ages 16 through 21, who need and can benefit from intensive employment-related services. The function of the center and the staff of approximately 80 is to provide skill training in selected vocational courses and continuing and/or remedial education in academic subjects.

The use of facility is for the same purpose as used by the previous occupant, specifically residential living and education.

The center is a self-contained facility located on the Sandy River near Springdale, Oreg. The site is located on approximately 52 acres. Seven existing buildings will be utilized and three additional buildings will be erected.

Water is supplied to the center by the city.

On-site sewage treatment facilities will be upgraded as required to meet applicable standards. This will be accomplished either by the remodeling of the existing plant or by the installation of a new prepackaged plant with tertiary treatment.

The expanded Job Corps center will be operated in compliance with the Job Corps Environmental Standards

published at 29 CFR 97a.116, and with applicable Federal, State and local regulations concerning environmental health.

The consolidated Job Corps center will comply with the water quality and related standards of the State and local Government, and with the standards established pursuant to the Federal Water Pollution Control Act, 33 U.S.C. 1251 et seq., with Executive Order 11752, and with regulations and guidelines of the U.S. Environmental Protection Agency.

The center expansion will be designed, operated, and maintained so as to conform to Federal air quality standards, including those found in Executive Order 11752 and 40 CFR Part 86.

Signed at Washington, D.C., this 29th day of December, 1977.

RAYMOND E. YOUNG,  
Acting Director, Job Corps.

[4510-30]

FEDERAL SUPPLEMENTAL BENEFITS  
(EMERGENCY UNEMPLOYMENT  
COMPENSATION)

Ending of Federal Supplemental Benefits  
Program in All States

This notice announces the ending of the Federal supplemental benefit periods and additional eligibility periods in all States, due to the termination of the program at the end of January 1978.

The Emergency Unemployment Compensation Act of 1974 (Pub. L. 93-572, enacted December 31, 1974) created a temporary program of supplementary unemployment benefits (referred to as Federal supplemental benefits) for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Under the law the program expires in each State at the end of the last week that ends on or before January 31, 1978.

As the Federal supplemental benefits programs ends, there are Federal supplemental benefit periods in effect in the following States:

Alaska, Maine, New Jersey, New York, Pennsylvania, Puerto Rico, Rhode Island, Vermont, and Washington.

The benefit period and the program terminate in New York with the week ending on January 29, 1978, and in New Jersey with the week ending on January 31, 1978. In all the other States listed the benefit periods and the program terminate with the week ending on January 28, 1978.

In addition, there are additional eligibility periods which remain in effect in the States of Connecticut and Michigan, and in those States the ad-

ditional eligibility periods and the program also terminate with the week ending on January 28, 1978.

Signed at Washington, D.C., on January 24, 1978.

ERNEST G. GREEN,  
Assistant Secretary for  
Employment and Training.

Employment and Training Administration

## FEDERAL-STATE EXTENDED BENEFITS

National "Off" Indicator for Extended Benefits

This notice announces the National "off" indicator for Extended Benefit Periods in the States, and the ending of Extended Benefit Periods in all but ten States, effective on January 28, 1978.

## BACKGROUND

The Federal-State Extended Unemployment Compensation Act of 1970 (title II of Pub. L. 91-373), as implemented in State unemployment compensation laws, created the Extended Benefit Program as a permanent feature of the Federal-State Unemployment Compensation Program. Extended Benefits are payable under State laws for up to 13 weeks to individuals who have exhausted their rights to regular benefits under the State laws or under permanent Federal unemployment compensation laws administered by the States. Extended Benefits are payable only during an Extended Benefit Period, which may be triggered "on" in a State by either a State or National indicator, when insured unemployment in the State or in the Nation reaches the high rates set in the Act. Similarly, an Extended Benefit Period will end in a State or in all States when insured unemployment drops below the high rates set in the Act.

There was a National "on" indicator for the week ending on August 13, 1977, and an Extended Benefit Period therefore commenced with the week beginning on August 28, 1977, in all States in which an Extended Benefit Period was not already in effect. Extended Benefit Periods have remained in effect in all States since that date by reason of the National "on" indicator. Now that there has been a National "off" indicator for the week ending on January 7, 1978, the Extended Benefit Program will no longer remain in effect in most States after the week which ends on January 28, 1978.

## DETERMINATION OF "OFF" INDICATOR

I have determined in accordance with the Act, as amended by section 311(a) of the Unemployment Compen-

## NOTICES

sation Amendments of 1976 (Pub. L. 94-566, approved October 20, 1976; 90 Stat. 2667, 2678), and as authorized by the Secretary of Labor's Order 4-75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a National "off" indicator for Extended Benefits for the week ending on January 7, 1978, and that Extended Benefit Periods terminate with the week ending on January 28, 1978, in all States with respect to which there was also a State "off" indicator for the week ending on January 7, 1978.

In the following ten States, however, Extended Benefit Periods will continue in effect after January 28, 1978, because State indicators remain "on" in those States:

Alaska, Hawaii, Maine, New Jersey, New York, Pennsylvania, Puerto Rico, Rhode Island, Vermont, and Washington.

In the Virgin Islands, where the Extended Benefit Period took effect on January 1, 1978, following the approval of the Virgin Islands unemployment compensation law under section 3304(a) of the Federal Unemployment Tax Act, (26 U.S.C. 3304(a)), the Extended Benefit Period also ends on January 28, 1978.

#### INFORMATION FOR CLAIMANTS

Individuals currently filing claims for Extended Benefits in States in which Extended Benefit Periods will end on January 28, 1978, will receive written notices from the employment security agency of their State, advising them of the end of the Extended Benefit Period with respect to that State and the termination of further payments of Extended Benefits.

Persons who wish information about their rights to Extended Benefits in any State should contact the nearest employment office or unemployment compensation claims office in their locality.

Signed at Washington, D.C., on January 24, 1978.

ERNEST G. GREEN,  
Assistant Secretary for  
Employment and Training.

#### [4510-30]

##### PROPOSED JOB CORPS CENTER AT THE FATHER JUDGE SEMINARY IN MONROE, VA.

##### Determination of Negative Environmental Impact

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice-finding of negative environmental impact.

SUMMARY: The purpose of this notice is to announce a determination

by the Department under the National Environmental Policy Act and 40 CFR Part 1500 that the establishment of a Job Corps center at the Father Judge Seminary site does not constitute a major Federal action which will significantly affect the environment.

#### FOR FURTHER INFORMATION:

Contact Raymond E. Young, Director, Job Corps, Room 6100, Patrick Henry Building, 601 D Street NW., Washington, D.C. 20213, telephone 202-376-6995.

#### SUPPLEMENTARY INFORMATION:

Title IV of the Comprehensive Employment and Training Act (CETA) of 1973, as amended, 29 U.S.C. 911 et seq., directs the Secretary of Labor to establish Job Corps centers to provide occupational training to disadvantaged youths ages 16 through 21. The Secretary has issued regulations published at 29 CFR Part 97a, implementing Title IV of CETA. Pursuant to his authority, the Secretary is planning to establish a Job Corps center at the former Father Judge Seminary location provided an agreement can be reached on acquisition of the facilities.

Pursuant to 40 CFR Part 1500, the Department of Labor has conducted an environmental assessment as part of a site utilization study and has determined that preparation of an environmental impact statement is not required since the establishment of this Job Corps center is not a major Federal action which will significantly affect the quality of the human environment within the meaning of 40 CFR 1500.6(c). The proposed Monroe, Va., Job Corps Center will be a training center with residential and educational facilities for approximately 350 disadvantaged youth, men, and women, ages 16 through 21, who need and can benefit from intensive employment-related services. The function of the center and the staff of approximately 120 will be to provide skill training in selected vocational courses and continuing and/or remedial education in academic subjects.

The proposed use of the facility is intended for essentially the same purpose as used by the previous occupant, specifically, residential living and education.

The center will be a self-contained facility located on State Route 655, near Monroe, Va., approximately 12 miles north of Lynchburg, Va.

Water is supplied by 3 wells and 3 springs. Electric power is supplied by Appalachian Power Co. Sewage disposal is provided by an on-site sewage treatment plant which is inadequate. Provision has been made in the budget to provide new sewage treatment facilities and to modify existing boilers to meet current OSHA codes.

New construction will be required for vocational shop facilities and warehousing.

The proposed Job Corps center will be operated in compliance with the Job Corps Environmental Standards published at 29 CFR 97a.116, and with applicable Federal, State and local regulations concerning environmental health.

The proposed Job Corps center will comply with the water quality and related standards of the State and local government, and with the standards established pursuant to the Federal Water Pollution Control Act, 33 U.S.C. 1251 et seq., with Executive Order 11752, and with regulations and guidelines of the U.S. Environmental Protection Agency.

The center installation will be designed, operated, and maintained so as to conform to Federal air quality standards, including those found in Executive Order 11752 and 40 CFR Part 86.

Signed at Washington, D.C., this 3rd day of January, 1978.

RAYMOND E. YOUNG,  
Director, Office of Job Corps and  
Young Adult Conservation  
Corps.

#### [4510-30]

##### YOUTH COMMUNITY CONSERVATION AND IMPROVEMENT PROJECTS (YCCIP) AND YOUTH EMPLOYMENT AND TRAINING PROGRAMS (YETP) FOR YOUTHS WHO ARE MEMBERS OF MIGRANT AND OTHER SEASONALLY EMPLOYED FARMWORKER FAMILIES

##### Conditions for Competition

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: This notice announces the conditions for competition, the availability of funds, the implementing schedule for submitting proposals, and the review criteria to be used for youth community conservation and improvement projects (YCCIP) and youth employment and training programs (YETP) for youths who are members of migrant and other seasonally employed farmworker families. Funds are to be awarded on a competitive basis to those grantees selected to operate YCCIP and/or YETP programs and are operating section 303 programs for migrant and seasonal farmworkers and their families during 1978 under the Comprehensive Employment and Training Act (CETA) of 1973, as amended.

#### FOR FURTHER INFORMATION CONTACT:

Paul A. Mayrand, Director, Office of Farmworker Programs, U.S. Department of Labor, Room 7122, 601 D Street NW., Washington, D.C. 20213.

SUPPLEMENTARY INFORMATION: Pursuant to the Youth Employment

and Demonstration Projects Act (YEDPA) of 1977, the Office of Farmworker Programs (OFF) of the Department of Labor (DOL) announces the availability of funds to implement youth community conservation and improvement projects (YCCIP) and youth employment and training programs (YETP) for youths who are members of migrant and seasonal farmworker families.

YCCIP and YETP grants will be made only to those grantees operating migrant and seasonal farmworker programs during 1978 under section 303 of the Comprehensive Employment and Training Act (CETA) of 1973, as amended, and only to those section 303 grantees selected as a result of a competitive process for YCCIP and YETP funds.

The selection procedures and other rules applying to YCCIP and YETP funds for youths who are members of migrant and seasonal farmworker families were published in the FEDERAL REGISTER on Friday, January 13, 1978, as Subpart J—Youth Community Conservation and Improvement Projects for section 303 grantees, and Subpart K—Youth Employment and Training Programs for section 303 grantees, of Part 97 of regulations under CETA.

In those regulations, it was stated that the proposal for YCCIP and YETP funds for youths who are members of migrant and seasonal farmworker families would be due on a date to be set by the Director, Office of Farmworker Programs, and published in the FEDERAL REGISTER.

This publication constitutes formal notice that proposals for YCCIP and YETP funds for programs for youths who are members of migrant and seasonal farmworker families must be hand delivered or posted by registered or certified mail no later than 3 p.m., February 13, 1978.

Each eligible applicant must submit three copies of the proposed YCCIP and/or YETP plans to the address listed below:

U.S. Department of Labor, Employment and Training Administration, 601 D Street NW., Room 7122, Patrick Henry Building, Washington, D.C. 20213; Attention: Director, Office of Farmworker Programs.

Two copies of the proposed YCCIP and/or YETP plans shall also be submitted directly to the appropriate Regional Administrator for Employment and Training at the same time the three copies are submitted to the above addressed and labeled: YCCIP and/or YETP plans for CETA 303 farmworker programs.

Proposed YCCIP and/or YETP plans sent by mail to the preceding address must be registered or certified with return receipt requested. In order to be considered as submitted on time by the Employment and Training Administration, the following conditions must be met:

1. The proposed YCCIP and YETP plans must be registered or certified by the Postal Service on or before 3 p.m., February 13, 1978. No deviation in this condition shall be made by the Employment and Training Administration. All proposed YCCIP and/or YETP plans received bearing postmarks after 3 p.m. shall be returned without consideration.

2. Proposed YCCIP and/or YETP plans delivered by hand must be taken to the address given previously in this section. All eligible applicants who deliver proposed YCCIP and/or YETP plans will be given a receipt bearing a time and date of delivery. Proposed YCCIP and/or YETP plans will be accepted daily between the hours of 8:15 a.m. and 4:45 p.m., Washington, D.C., time except Saturdays, Sundays, and holidays. Proposed YCCIP and/or YETP plans will not be received by hand-delivery after 3 p.m., e.d.t., on February 13, 1978. No deviation in this condition shall be made and no proposed YCCIP and/or YETP plan delivered after 3 p.m., e.d.t., February 13, 1978, shall be accepted.

To reduce delay in implementing this process, grant application materials were sent to all section 303 grantees with programs for 1978. These grant application materials contained detailed information, instructions, and forms necessary for submitting YCCIP and YETP proposals, exclusive of the rating criteria contained herein.

Those section 303 grantees which intend to submit YCCIP and YETP grant applications, or both, are requested to notify both the Director, Office of Farmworker Programs, at the address previously cited, and the appropriate A-95 Clearinghouse by Standard Form 424 on or before February 3, 1978, so that appropriate arrangements may be made for prompt review of grant application.

Based upon proposals received from 303 grantees, the review panels will be using the following criteria to recommend those applicants to be awarded YCCIP and YETP grants.

A. *Program development.* Range 0-15 points. The program development factor is a rating of the proposed program's potential impact on the needs of youths and its fulfillment of the intent of the Youth Employment and Demonstration Projects Act (YEDPA). The rating will consider the following elements:

1. *Training.* The proposed program offers training, and/or work opportunities in a number of occupational categories. The effect of these training opportunities in enhancing the employability of youths must be clearly defined. Applicants are also responsible for defining and clarifying "meaningful work experience" if it is an activity in the proposal.

2. *Services.* The proposed program provides necessary supportive services

to assist youth to participate in employment and training activities which will enhance their employability.

3. *Program impact.* The proposed program will directly impact on the problems and needs of youth in the particular target area. Applicants must describe how the proposed program will supplement and not substitute for services already being provided by the applicant to youth.

The highest rating of 15 shall be awarded to an organization which has adequately analyzed the economic situation of the target area and identified the social and economic needs of the youth population, and has developed a program based on this analysis and identification, which provides training and supportive services that can be successfully implemented within the existing target area economic and labor market situations to meet these needs.

B. *Delivery system.* Range 0-15 points. The delivery system factor is a rating of the applicant's system for delivering the comprehensive program services and its potential ability to provide effective and timely services to youth. This rating shall include the potential effectiveness of subgrantees in providing services specifically for farmworker youth.

Applicants must describe the relationship of the proposed delivery system to other employment and training delivery systems for youth within the target area.

The highest rating of 15 shall be awarded to an organization whose delivery system demonstrates efficient operation and whose subgrantees (if any) delivery systems are coordinated with the applicant's into a functioning unit.

C. *Administrative capability.* Range 0-30 points. The administrative capability factor is a rating of the applicant's management experience and efficiency. The rating shall include consideration of the managerial expertise of the organization's present and proposed staff in managerial and decision-making positions. This factor shall also consider administrative efficiency based on comparative administrative cost.

The applicant must provide complete descriptions of both its management information system (MIS) and self-assessment procedures. Since YEDPA will be funded for only 1 year, the applicant must clearly demonstrate its ability to provide services, to provide accurate and complete reports on the status of the youth program and conduct self-assessment surveys to identify internal problems in order to take the necessary corrective action to improve the quality of services to youth. The MIS description should identify how compiled program data will be analyzed and utilized by the

applicant to improve the program and to provide narrative and statistical program summaries.

Applicants must also describe the procedures followed to identify and select subgrantees which have demonstrated competence and merit at the local level.

The highest rating of 30 shall be awarded to organizations which can demonstrate the capability to administer efficiently multiactivity delivery system with comparatively low administrative costs.

**D. Responsiveness to youth.** Range 0-15 points. The responsiveness to youth factor is a rating of the organization's active and visible involvement of youth in its planning and the proposed involvement of youth in implementing its proposed program of services. The rating will also consider the sensitivity of the organization's present and proposed staff in program positions to the needs of youth.

The highest rating of 15 shall be awarded to organizations which clearly demonstrate that youth will be actively involved in the planning, review and implementation of youth programs.

**E. Linkages and coordination.** 0-15 points. The linkage and coordination factor is a rating of an organization's demonstrated and documented programmatic ties with appropriate State and local agencies, private nonprofit organizations, and other groups providing resources and services to youth. The highest rating of 15 shall be awarded to applicants which would operate programs incorporating services at less than, or at no cost to section 303 from other agencies for the purpose of providing manpower and other services to youth and whose funding request includes letters of commitment for these services.

**F. Experimentation and innovation.** Range 0-10 points. The experimental

tion and innovation factors is a rating of the organization's capability to adequately describe a concept to be tested by the proposed program design, to utilize appropriate data and rationale as a premise for any hypothesis and to develop procedures and measures for testing the hypothesis. Applicants must clarify the areas in which the proposed program is either experimental or innovative.

The highest rating of 10 shall be awarded to organizations which clearly define the programmatic areas of experimentation and the internal administrative mechanisms to be used to measure any hypothesis regarding the needs of youth.

Signed in Washington, D.C., this 18th day of January 1978.

LAMOND GODWIN,  
Administrator, Office of  
National Programs.

#### INVESTIGATIONS REGARDING CERTIFICATIONS OF ELIGIBILITY TO APPLY FOR WORKER ADJUSTMENT ASSISTANCE

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of

articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 3, 1978.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 3, 1978.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 11th day of January 1978.

MARVIN M. FOOKS,  
Director, Office of  
Trade Adjustment Assistance.

## Wage and Hour Division

## FIRE PROTECTION AND LAW ENFORCEMENT EMPLOYEES OF PUBLIC AGENCIES

## Study of Average Number of Hours Worked

AGENCY: Employment Standards Administration, Labor.

ACTION: Notice.

SUMMARY: The Department of Labor is required by the Fair Labor Standards Amendments of 1974 to conduct a study of the average number of hours in tours of duty worked by fire protection and law enforcement personnel employed by public agencies. The study was to have been completed and the results to have been published by January 1, 1978, but as a result of unexpected delays the study has not yet been concluded. Accordingly, until the study is done and the results have been published, public agencies availing themselves of the partial overtime exemption for law enforcement and fire protection employees in the Fair Labor Standards Act shall continue to compensate such employees at premium overtime rates for tours of duty in excess of 216 hours in a work period of 28 consecutive days. Where such employees have work periods of less than 28 days (but more than 7 days), premium overtime compensation shall be paid for tours of duty which in the aggregate exceed a correspondingly lower number of hours.

DATE: This notice takes effect January 1, 1978, and remains in effect until the results of the study of average number of hours are published in the FEDERAL REGISTER.

## FOR FURTHER INFORMATION CONTACT:

Paul G. Campbell, Director, Division of Minimum Wage and Hour Standards, Wage and Hour Division, 200 Constitution Avenue NW., Room S-3508, Washington, D.C. 20210, telephone 202-523-7043.

## SUPPLEMENTARY INFORMATION:

Section 7(k) of the Fair Labor Standards Act of 1938, as amended, (29 U.S.C. 201, et seq.) provides, effective January 1, 1978, as follows:

No public agency shall be deemed to have violated (the normal 40-hour overtime standard of the Act) with respect to the employment of any employee in fire protection activities or any employee in law enforcement activities (including security personnel in correctional institutions) if—

(1) In a work period of 28 consecutive days the employee receives for tours of duty which in the aggregate exceed the lesser of (A) 216 hours, or (B) the average number of hours (as determined by the Secretary pursuant to section 6(c)(3) of the Fair Labor Standards Amendments of 1974) in tours of duty of employees engaged in such activities in work periods of 28 consecutive days in calendar year 1975; or

(2) In the case of such an employee to whom a work period of at least 7 but less than 28 days applies, in his work period the employee receives for tours of duty which in the aggregate exceed a number of hours which bears the same ratio to the number of consecutive days in his work period as 216 hours (or if lower, the number of hours referred to in clause (B) of paragraph (1)) bears to 28 days, compensation at a rate not less than one and one-half times the regular rate at which he is employed.

The study referred to in section 7(k) is described in section 6(c)(3) of the Fair Labor Standards Amendments of 1974:

The Secretary of Labor shall in the calendar year beginning January 1, 1976, conduct: (A) A study of the average number of hours in tours of duty in work periods in the preceding calendar year of employees (other than employees exempt from section 7 of the Fair Labor Standards Act of 1938 by section 13(b)(20) of such Act) of public agencies who are employed in fire protection activities, and (B) a study of the average number of hours in tours of duty in work periods in the preceding calendar year of employees (other than employees exempt from section 7 of the Fair Labor Standards Act of 1938 by section 13(b)(20) of such Act) of public agencies who are employed in law enforcement activities (including security personnel in correctional institutions). The Secretary shall publish the results of each such study in the FEDERAL REGISTER.

The Fair Labor Standards Act wage and hour survey, which is being conducted pursuant to section 6(c)(3) of the 1974 amendments, is in the process of being concluded. Until this survey is concluded and the results thereof are published in the FEDERAL REGISTER, public agencies availing themselves of the exemption provided by section 7(k) of the Fair Labor Standards Act, shall continue to compensate affected employees at a rate of not less than 1½ times their regular rates of pay for all hours worked in excess of 216 in a work period of 28 consecutive days. For those employees who have a work period of at least 7 but less than 28 consecutive days, no overtime compensation is required until the ratio between the number of days in the work period and the hours worked during such work period exceeds the ratio between a work period of 28 days and 216 hours (7.1429), at which point all additional hours are paid for at 1½ times the employees' regular rates of pay. This is the same standard which has been in effect since January 1, 1977.

"Public agency" is defined in section 3(x) of the Fair Labor Standards Act as "the government of the United States; the government of a State or political subdivision thereof; any agency of the United States (including the United States Postal Service or Postal Rate Commission), a State, or a political subdivision of a State; or any interstate governmental agency." In *National League of Cities v. Usery*, 426 U.S. 833 (1976), the Supreme Court held that the minimum wage and overtime compensation provisions of the Fair Labor Standards Act cannot constitutionally be applied to State and local governmental employees engaged in areas of traditional governmental functions. The Court specifically mentioned fire prevention and police protection as being traditional governmental functions. To the extent that this ruling affects the overtime provisions as described in this notice, those provisions no longer apply.

3779

FEDERAL REGISTER, VOL. 43, NO.19—FRIDAY, JANUARY 27, 1978

Signed at Washington, D.C., on this 19th day of January 1978.

XAVIER M. VELA,  
Administrator, Wage and Hour  
Division, U.S. Department of  
Labor.

## [3510-12]

NATIONAL ADVISORY COMMITTEE  
ON OCEANS AND ATMOSPHERE

## Meeting

JANUARY 24, 1978.

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5, U.S.C. App I (Supp V, 1975), notice is hereby given that the National Advisory Committee on Oceans and Atmosphere (NACOA) will hold a meeting Thursday and Friday, February 16-17, 1978. These sessions will be open to the public and will be held in Room 6802 of the U.S. Department of Commerce Building, 14th Street between Constitution Avenue and E Street NW., Washington, D.C., beginning at 9 a.m. on both days.

The Committee, consisting of 18 non-Federal members appointed by the President from State and local governments, industry, science and other appropriate areas, was established by Congress by Pub. L. 95-63, on July 5, 1977. Its duties are to (1) undertake a continuing review, on a selective basis, of national ocean policy, coastal zone management, and the status of the marine and atmospheric science and service programs of the United States; (2) advise the Secretary of Commerce with respect to the carrying out of the programs administered by the National Oceanic and Atmospheric Administration; and (3) submit an annual report to the President and to the Congress setting forth an assessment, on a selective basis, of the status of the Nation's marine and atmospheric activities, and submit such other reports as may from time to time be requested by the President or the Congress.

The agenda will include the following topics:

FEBRUARY 16, 1978

- 0900 Opening Remarks
- 0915 Commissioning Ceremony and Welcoming Remarks—Honorable Sidney Harman, Under Secretary of Commerce, Congressman John Murphy, Chairman, House Merchant Marine and Fisheries Committee, Dr. Frank Press, Science Advisor to the President and Director, Office of Science and Technology Policy.
- 1000 Break (members will be photographed for building passes in Room 2830B).
- 1030 Work and Views of Other Advisory Bodies—Mr. Harlan Cleveland, Director, Program in International Affairs, Aspen Institute of Humanistic Studies; Chair-

man, Department of Commerce Weather Modifications Advisory Board. Dr. Thomas F. Malone, Director, Holcomb Research Institute, Butler University; Member, Weather Modification Advisory Board. Mr. John Hussey, Director, Public Relations-Government Affairs, Monsanto Company; Chairman, NOAA Coastal Zone Management Advisory Committee.

1200 Lunch.

1400 Implementing the National Marine Fishery and Conservation Act of 1976—Mrs. Patsy Mink, Assistant Secretary for Oceans and International Environmental and Scientific Affairs, Department of State. Mr. Robert Schoning, Director, National Marine Fisheries Service, NOAA.

1500 The National Oceanic and Atmospheric Administration—Mr. Richard A. Frank, Administrator, NOAA.

1545 NACOA Plans—Chairman.

1700 Adjourn.

FEBRUARY 17, 1978

0900 Opening Remarks.

0905 The U.S. Coast Guard—Rear Admiral Raymond Wood, Chief, Office of Public and International Affairs.

1000 Organizing for Natural Resources Management—Mr. William Harsch, Deputy Associate Director, Natural Resources/Environment Division, President's Reorganization Project.

1045 NACOA Work Session.

1800 Adjourn.

The public is welcome at these sessions and will be admitted to the extent of the seating available. Persons wishing to make formal statements should notify the Chairman in advance of the meeting. The Chairman retains the prerogative to place limits on the duration of oral statements and discussions. Written statements may be submitted before or after each session.

Additional information concerning this meeting may be obtained through the Committee's Executive Director, Dr. Douglas L. Brooks, whose mailing address is: National Advisory Committee on Oceans and Atmosphere, 3300 Whitehaven Street NW. (Room 434, PG No. 1), Washington, D.C. 20235. The telephone number is 254-8418.

DOUGLAS L. BROOKS,  
Executive Director.

(FR Doc. 78-2441 Filed 1-26-78; 8:45 am)

## [4110-02]

NATIONAL ADVISORY COUNCIL ON  
THE EDUCATION OF DISADVANTAGED CHILDREN

## MEETING

Notice is hereby given, pursuant to Pub. L. 92-463, that the next meeting of the National Advisory Council on the Education of Disadvantaged Children will be held on Friday, February 10 and on Saturday, February 11, 1978. The meeting will be held on Friday from 9 a.m. until 5 p.m., and on Saturday from 9:30 a.m. until 1 p.m.

The two-day meeting will be held at 425 13th Street NW., suite 1012, Washington, D.C. 20004.

The National Advisory Council on the Education of Disadvantaged Children is established under section 148 of the Elementary and Secondary Act (20 U.S.C. 2411) to advise the President and the Congress on the effectiveness of compensatory education to improve the educational attainment of disadvantaged children.

The purpose of the meeting is for Council to review and adopt the final draft Annual and special reports; discuss details for upcoming visits to Puerto Rico and San Diego, Calif.; and, plan further activities of Council.

Because of limited space, all persons wishing to attend should call for reservations by February 6, 1978, area code 202-724-0114.

Records shall be kept of all Council proceedings and shall be available for public inspection at the Office of the National Advisory Council on the Education of Disadvantaged Children, located at 425 13th Street NW., Suite 1012, Washington, D.C. 20004.

Signed at Washington, D.C., on January 24, 1978.

ROBERTA LOVENHEIM,  
Executive Director.

(FR Doc. 78-2340 Filed 1-26-78; 8:45 am)

## [7510-01]

NATIONAL AERONAUTICS AND  
SPACE ADMINISTRATION

(Notice 78-2)

## JAPAN ENGINEERING DEVELOPMENT CO.

Intent To Grant Foreign Exclusive Patent  
License

In accordance with the NASA foreign licensing regulations, 14 CFR 1245.405(e), the National Aeronautics and Space Administration announces its intention to grant to the Japan Engineering Development Co., Tokyo, Japan, a limited, exclusive patent license in Japan for the four NASA-owned inventions covered by the Japanese counterparts of: (1) U.S. Application Serial No. 760,795 for "Detection of Microbial Infection in Blood and Antibiotic Determinations," filed by NASA on January 19, 1977; (2) U.S. Application Serial No. 807,762 for "Boron Trifluoride Coatings for Thermoplastic Materials," filed by NASA on June 17, 1977; (3) U.S. Application Serial No. 814,005 for "Multilevel Metallization Method for Fabricating a Metal Oxide Semiconductor Device," filed by NASA on July 8, 1977; and (4) U.S. Application Serial No. 752,748 for "Polymeric Electrolytic Hygrometer," filed by NASA on December 21, 1976. Copies of the above U.S. patent applications can be purchased from the Na-

tional Technical Information Services, Springfield, Va. 22161, at a cost of \$3.75 a copy. Interested parties should submit written inquiries or comments within 60 days to the Assistant General Counsel for Patent Matters, Code GP-4, National Aeronautics and Space Administration, Washington, D.C. 20546.

Dated: January 20, 1978.

S. NEIL HOSENBALL,  
General Counsel.

(FR Doc. 78-2314 Filed 1-26-78; 8:45 am)

## [7510-01]

(Notice 78-1)

## SUPERCritical WING PATENTS

## Patent Licensing Plan

Notice is hereby given that the National Aeronautics and Space Administration (NASA) has adopted a patent licensing plan for the supercritical wing invention covered by the United States and foreign patents held by NASA on behalf of the United States of America. The intent to adopt this patent licensing plan for this invention was previously announced in the FEDERAL REGISTER of February 14, 1977 (42 FR 9066).

The invention to be licensed under this plan is entitled "Airfoil Shape for Flight at Subsonic Speeds" and is covered by U.S. Patent No. 3,952,971, which was issued to NASA on April 27, 1976. The invention was made by Dr. Richard T. Whitcomb, an employee of the NASA Langley Research Center, Hampton, Va. NASA also has patents for the invention in Canada (Patent No. 953,699, issued August 27, 1974); France (Patent No. 72-39755, issued July 18, 1977); Great Britain (Patent No. 1,406,826, issued January 14, 1976); Australia (Patent No. 474,789, issued November 12, 1976); Israel (Patent No. 40,766, issued September 26, 1975); and Italy (Patent No. 975,491, issued July 20, 1974). Applications for patent are currently pending in Netherlands, West Germany, Sweden and Japan.

The patented invention pertains to an airfoil shape for flight at subsonic speeds above the critical Mach number in a range of Mach 0.7 to Mach 1.0. The supercritical airfoil greatly increases the options available to the aeronautical designer for increasing speed and/or efficiency and for reducing weight and noise in the aircraft.

The patent licenses for the manufacture and sale of aircraft employing this patented airfoil will be granted pursuant to the authority contained in the National Aeronautics and Space Act of 1958 (42 U.S.C. 2457(g)) as implemented by the NASA Domestic Patent Licensing Regulations (14 CFR 1245.2) and the NASA Foreign Patent Licensing Regulations (14 CFR 1245.4).

The basic features of the plan are as follows:

## LICENSES UNDER THE U.S. PATENT

NASA will grant non-exclusive royalty-free licenses under the U.S. patent for the manufacture of the patented invention in the United States. Any such license will include a royalty-free license for the licensee to sell the invention in the United States and under the patents in each foreign country in which NASA holds a patent.

## LICENSES UNDER FOREIGN PATENTS

Under applicable international agreements for the interchange of patent rights for defense purposes, participating Governments are entitled to use the invention for defense purposes without cost. NASA will grant nonexclusive, royalty-bearing licenses under its foreign patents for the manufacture of the invention in foreign countries for all other purposes. Any such royalty-bearing license to manufacture the invention under a foreign patent will include the granting of a license under all of the patents; without the payment of any additional royalties, to sell the invention in all countries in which NASA holds a patent, including the United States.

## ENFORCEMENT OF THE PATENTS

NASA intends to enforce its patent rights with respect to any unlicensed manufacture and/or sale of the invention in any country in which NASA holds a patent. NASA will, however, as appropriate, grant nonexclusive royalty-bearing licenses to unlicensed manufacturers of the invention for the sale of the invention in any country in which NASA holds a patent on the invention.

Inquiries and request for additional information concerning the licensing plan for this invention should be addressed to the Assistant General Counsel for Patent Matters, Code GP, NASA Headquarters, Washington, D.C. 20546. Upon request, NASA will provide detailed information and application forms to be used in applying for a license for this invention.

Dated: January 19, 1978.

S. NEIL HOSENBALL,  
General Counsel.

## [7510-01]

(Notice 78-3)

NASA ADVISORY COUNCIL (NAC) LIFE  
SCIENCES COMMITTEE

## Meeting

The NAC Life Sciences Committee will meet on February 15-17, 1978,

Ames Research Center (ARC), Moffett Field, Calif. 94035. The meeting will be held in Room B-39 of the Life Sciences Building Number 239. Members of the public will be admitted on a first-come first-served basis, up to the seating capacity of the room, which is about 80 persons.

The NAC Life Sciences Committee serves in an advisory capacity only. In this capacity, it is concerned with man in relation to space travel, with exobiology, and with other life forms. Its academic interests include: Physiology, behavior, clinical aerospace medicine, microbiology, radiobiology, biochemistry, plant biology nutrition and food technology, exobiology, biology of gravity and rhythms, ecology and biotechnology. The current Chairman is Dr. G. Donald Whedon. There are 16 members.

The following list sets forth the approved agenda. For further information, please contact Dr. S. P. Vinograd, area code 202-755-3723, NASA Headquarters, Washington, D.C. 20546.

FEBRUARY 15, 1978

## Time and Topic

- 0800-0820—Administrative. To inform the Committee members of views and comments of the Chairman on intervening events, actions, and anticipated requirements, approve the minutes of the last meeting, and carry out Committee business.
- 0820-1700—Committee Work. Preparation of Committee document containing its recommendations to NASA on future directions for the Life Sciences.

FEBRUARY 16, 1978

- 0800-1300—Committee Work. (Continued.)
- 1300-1330—Overview of ARC Life Sciences Programs. To brief the Committee on the Life Sciences activities at ARC. The remainder of the day and half of the following morning will consist of briefings on specific research projects at ARC.
- 1330-1400—Autogenic Training for Vestibular Symptomatology.
- 1400-1430—Neuro-hormonal Regulation of Fluid and Electrolyte Balance.
- 1430-1500—Studies of Bone Metabolism.
- 1500-1530—Data on Female Bed Rest Studies.
- 1530-1600—Flight Hardware for Animal Investigations on Shuttle.
- 1600-1730—Tour of the Facilities.

FEBRUARY 17, 1978

- 0800-0830—Animal Motion Sickness Studies.
- 0830-0900—Head-Up Displays for Aircraft.
- 0900-0930—Computer Graphic Modeling of Protein-Nucleic Acid Interaction.
- 0930-1000—Stable Isotope Organic Geochemistry.
- 1010-1100—NASA Life Sciences Overview. Briefing by the NASA Director for Life Sciences on events, progress, issues and status of the program.
- 1100-1130—Closed Ecological Life Support System (CELSS). To report the intervening progress of this effort; to discuss the final report of the summer study on this subject held at ARC the summer of 1977.
- 1130-1200—Kennedy Space Center Ecology Studies.

1200-1230—Spacelab I Biomedical Experiments.  
1330-1600—Committee Work: Continuation of preparation of the Committee document.

KENNETH R. CHAPMAN,  
Associate Administrator  
for External Relations.

JANUARY 24, 1978.

##### NATIONAL SCIENCE FOUNDATION

##### ADVISORY COUNCIL TASK GROUP NO. 2

###### Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

##### TASK GROUP NO. 2 OF THE NSF ADVISORY COUNCIL

Place: Room 338, National Science Foundation, 1800 G Street NW., Washington, D.C. 20550.

Date: February 15, 1978.

Time: 9 a.m. to 5 p.m.

Type of Meeting: Open.

Contact Person: Ms. Margaret L. Windus, Executive Secretary, NSF Advisory Council, National Science Foundation, Room 518, 1800 G Street NW., Washington, D.C. 20550, telephone 202-632-4384.

Purpose of Task Group: The purpose of the Task Group, composed of members of the NSF Advisory Council, is to provide the full Council with a mechanism to consider numerous issues of interest to the Council that have been assigned by the National Science Foundation.

Summary Minutes: May be obtained from the Committee management Coordinator, Division of Personnel and Management, National Science Foundation, Room 248, 1800 G Street NW., Washington, D.C. 20550.

Agenda: To identify and review the ways non-scientists now participate in the formation of the Nation's science policy, the present arrangements for involving the public in the development of Foundation policies, and suggest possible new approaches or improvements in NSF practices.

Dated: January 24, 1978.

M. REBECCA WINKLER,  
Acting Committee  
Management Officer.

##### SUBCOMMITTEE ON DEVELOPMENTAL BIOLOGY OF THE ADVISORY COMMITTEE FOR PHYSIOLOGY, CELLULAR AND MOLECULAR BIOLOGY

###### Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

#### NOTICES

##### SUBCOMMITTEE ON DEVELOPMENTAL BIOLOGY OF THE ADVISORY COMMITTEE FOR PHYSIOLOGY, CELLULAR AND MOLECULAR BIOLOGY

Date and time: February 12, 13, and 14, 1978—9 a.m. to 5 p.m. each day.

Place: Room 338, National Science Foundation, 1800 G Street NW., Washington, D.C. 20550.

Type of Meeting: Closed.

Contact Person: Dr. Mary Clutter, Program Director for Developmental Biology, Room 326, National Science Foundation, Washington, D.C. 20550, telephone 202-632-4314.

Purpose of Subcommittee: To provide advice and recommendations concerning support for research in developmental biology.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposal being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552(b), Government in the Sunshine Act.

Authority to Close Meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,  
Acting Committee  
Management Officer.

##### SUBCOMMITTEE ON SENSORY PHYSIOLOGY AND PERCEPTION

###### Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation

announces the following meeting:

##### SUBCOMMITTEE ON SENSORY PHYSIOLOGY AND PERCEPTION OF THE ADVISORY COMMITTEE FOR BEHAVIORAL AND NEURAL SCIENCES

Date and Time: February 13 and 14, 1978, 9 A.M. to 5 P.M. each day.

Place: Room —, National Science Foundation, 1800 G Street NW., Washington, D.C. 20550.

Type of meeting: Closed.

Contact person: Dr. Sherman L. Guth, Program Director, Sensory Physiology and Perception Program, room 320, National Science Foundation, Washington, D.C. 20550, telephone 202-634-1824.

Purpose of subcommittee: To provide advice and recommendations concerning support for research in Sensory Physiology and Perception.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552(b), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10 (d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,  
Acting Committee  
Management Officer.

#### [7590-01]

[Docket No. 50-285]

##### OMAHA PUBLIC POWER DISTRICT

##### Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 36 to Facility Operating License No. DPR-40 issued to Omaha Public Power District which revised Technical Specifications for operation of the Fort Calhoun Station, Unit No. 1, located in Washington County, Nebraska. The amendment is effective as of its date of issuance.

The amendment consists of changes to the Technical Specifications to reflect an extension of the Fort Calhoun Station Unit No. 1 exclusion area boundary.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated February 8, 1977, (2) Amendment No. 36 to License No. DPR-40, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Blair Public Library, 1665 Lincoln Street, Blair, Nebr. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C., 20555, Attention: Director, Division of Operating Reactors.

#### NOTICES

Dated at Bethesda, Md. this 20th day of January 1978.

For the Nuclear Regulatory Commission.

GEORGE LEAR,  
Chief, Operating Reactors  
Branch No. 3, Division of Operating Reactors.

[FR Doc. 78-2292 Filed 1-26-78; 8:45 am]

#### [7590-01]

[Dockets Nos. 50-266 and 50-301]

##### WISCONSIN ELECTRIC POWER CO. AND WISCONSIN MICHIGAN POWER CO.

##### Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 32 and 36 to Facility Operating Licenses Nos. DPR-24 and DPR-27 issued to Wisconsin Electric Power Co. and Wisconsin Michigan Power Co., which revised Technical Specifications for operation of the Point Beach Nuclear Plant Units Nos. 1 and 2, located in the town of Two Creeks, Manitowoc County, Wis. The amendments are effective as of the date of issuance.

These amendments consist of changes in the Technical Specifications that incorporate the Fire Protection System into the Limiting Conditions for Operation, Surveillance Requirements and Administrative Controls.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated July 28, 1977 as revised by letters dated October 5 and December 12, 1977, (2) Amendment No. 32 to License DPR-24, (3) Amendment No. 36 to License DPR-27, and (4) the Commission's related Safety Evaluation. All of these items are available for public inspection at the

Commission's Public Document Room 1717 H Street NW., Washington, D.C. and at the University of Wisconsin-Stevens Point Library, Attention: Mr. Arthur M. Fish, Stevens Point, Wis. 54481. A copy of items (2), (3), and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 23d day of January 1978.

For the Nuclear Regulatory Commission.

GEORGE LEAR,  
Chief, Operating Reactors  
Branch No. 3 Division of Operating Reactors.

##### OFFICE OF SCIENCE AND TECHNOLOGY POLICY

##### WORKING GROUP ON BASIC RESEARCH IN THE DEPARTMENT OF DEFENSE

###### Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the Office of Science and Technology Policy announces the following meeting:

##### WORKING GROUP ON BASIC RESEARCH IN THE DEPARTMENT OF DEFENSE

Date: February 14 and 15, 1978.

Time: 9 a.m. to 4 p.m.

Place: Room 3104, New Executive Office Building, 17th and Pennsylvania Avenue NW., Washington, D.C. 20500.

Type of meeting: Open.

Contact person: Dr. William P. Raney, Executive Office of the President, Office of Science and Technology Policy, Washington, D.C. 20500, telephone 202-395-5636.

Summary minutes: May be obtained from the Office of Science and Technology Policy, Washington, D.C. 20500.

Purpose of advisory committee: The Office of Science and Technology Policy is conducting a study which will lead to the formulation of policy governing the performance of basic research by or for the mission agencies. Under the guidance of the Steering Committee on Basic Research in Mission Agencies, the Working Group on Basic Research in the DOD is to examine the policies and procedures and research programs of that agency for adequacy and balance between near-term and long-term technical objectives.

Agenda: 9 a.m. to 4 p.m.—Working meeting. Editing and redrafting of working papers.

WILLIAM MONTGOMERY,  
Executive Officer.

SECURITIES AND EXCHANGE  
COMMISSION

(Rel. No. 14396; SR-MSE-77-41)

MIDWEST STOCK EXCHANGE, INC.  
Order Approving Proposed Rule Change

JANUARY 20, 1978.

On October 27, 1978, the Midwest Stock Exchange, Inc. ("MSE") 120 South LaSalle Street, Chicago, Ill. 60603, filed with the Commission, pursuant to section 19(b) of the Securities Exchange Act of 1934 (the "Act"), and Rule 19b-4 thereunder, copies of a proposed rule change which would amend Article XXXIV, Rule 3 of the MSE Rules to establish a minimum percentage-of-volume trading requirement (calculated quarterly) with respect to any registered market maker's transactions on the MSE stock floor in securities in which a registered market maker has been assigned.<sup>1</sup>

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 14158 (November 9, 1977)), and by publication in the FEDERAL REGISTER (42 FR 60032 (November 23, 1977)). All written statements with respect to the proposed rule change which were filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person were made available to the public at the Commission's Public Reference Room (File No. SR-MSE-77-41).

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges, and in particular, the requirements of section 6 and the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,  
Secretary.

(FR Doc. 78-2291 Filed 1-26-78; 8:45 am)

<sup>1</sup>Pursuant to guidelines established by the MSE's Floor Procedure Committee, a registered market maker or a specialist must quote a two-sided market in each assigned issue. As to any such quotation, one side is required to be equal to or better than the current market in that issue in the New York market.

## DEPARTMENT OF STATE

## Agency for International Development

HOUSING GUARANTY PROGRAM FOR THE  
REPUBLIC OF BOTSWANA

## Information for Investors

The Agency for International Development (AID) has authorized a guaranty of a loan in an amount not to exceed \$2,600,000 to finance housing projects in the Republic of Botswana. The Republic of Botswana (borrower) desires to receive proposals from eligible investors, as defined below, describing the terms and conditions upon which the investors will be willing to make this loan to the borrower. The full repayment of the loan will be guaranteed by AID. The AID guaranty will be backed by the full faith and credit of the United States of America and will be issued pursuant to authority in section 221 of the Foreign Assistance Act of 1961, as amended (the Act). The eligible investor and the terms of the loan must be acceptable to AID and disbursements of the loan will be subject to certain conditions required of the borrower by AID. This project is referred to as project No. 633-HG-001.

Eligible investors are invited to consult promptly with the borrower and submit proposals for an AID-guaranteed loan for the project. Those investors interested in extending a loan to the borrower should communicate with the borrower at the following address:

Botswana Embassy, 4301 Connecticut Avenue NW., Washington, D.C. 20008,

or

Permanent Secretary, Ministry of Finance and Development Planning, Private Bag 008, Gaborone, Botswana.

Copies of correspondence to one should be sent to the other.

Investors eligible to receive and AID guaranty are those specified in section 238(c) of the Act. They are: (1) U.S. citizens; (2) domestic U.S. corporations, partnerships, or associations substantially beneficially owned by U.S. citizens; (3) foreign corporations whose share capital is at least 95 percent owned by U.S. citizens; and, (4) foreign partnerships or associations wholly owned by U.S. citizens.

To be eligible for guaranty, the loan must be repayable in full no later than

the thirtieth anniversary of the first disbursement of the principal amount thereof and the interest rate may be no higher than the maximum rate established from time to time by AID.

The borrower projects a schedule of disbursements covering approximately 24 months (or other period to be negotiated) from the date of the loan agreement, the first disbursement to be approximately July or August 1978, and prospective investors should consider this in proposing a guaranteed loan to the borrower. In addition, in the event the investor will engage in the reselling of the loan to other persons, the investor must provide for the servicing of his loan, i.e., recordation and disposition of loan payments received from the borrower.

Information as to the eligibility of investors and other aspects of the AID housing guaranty program can be obtained from:

Director, Office of Housing, Agency for International Development, Room 625, SA-12, Washington, D.C. 20523, telephone 202-632-9637.

This notice is not an offer by AID or by the borrower. The borrower and not AID will select an investor and negotiate the terms of the proposed loan. Negotiations are expected to take place approximately April or May 1978.

Prospective investors are requested to submit offers to the borrower by March 15, 1978.

Dated: January 11, 1978.

PETER M. KIMM,  
Director,  
Office of Housing.

JOINT COMMITTEE ON AGRICULTURAL DEVELOPMENT  
OF THE BOARD FOR INTERNATIONAL  
FOOD AND AGRICULTURAL DEVELOPMENT

## Meeting

Pursuant to Executive Order 11769 and the provisions of section 10(a)(2), Pub. L. 92-463, Federal Advisory Committee Act, notice is hereby given of the seventh meeting of the Joint Committee on Agricultural Development of the Board for International Food and Agricultural Development on February 13-15, 1978.

The purpose of this meeting is to receive a progress report on the development of criteria for university inclusion on the roster; to receive a progress report on baseline studies; to review the status of Title XII projects in Asia, Africa, Latin America, and the Near East; and to consider other business brought before the Committee.

The meeting on February 13, 1978, will convene in Regional Work Groups (RWGs): Africa RWG at 9:30 a.m. in Room 2497, New State Department Building; Asia RWG at 10 a.m. in Room 609, Rosslyn Plaza Building, 1601 N. Kent Street, Rosslyn, Va.; Latin America RWG at 3 p.m. in Room 2248, New State Department Building; and Near East RWG at 1:30 p.m. in Room 6484, New State Department Building. The meeting on February 14 and 15, 1978, will convene from 9 a.m. to 5 p.m. at the Quality Inn, Pentagon City, 300 Army-Navy Drive, Arlington, Va. 22202. Room designation will be posted in the lobby of the Quality Inn. The meeting is open to the public. Any interested person may attend, may file written statements with the Committee before or after the meeting, or may present oral statements in accordance with procedures established by the Committee, and to the extent the time available for the meeting permits.

Dr. Fletcher E. Riggs, Deputy to the Associate Assistant Administrator, Development Support Bureau, is designated A.I.D. Advisory Committee Representative at the meeting. It is suggested that those desiring further information write to him in care of the Agency for International Development, State Department, Washington, D.C. 20523, or telephone him at 703-235-9001.

Dated: January 18, 1978.

FLETCHER E. RIGGS,  
A.I.D. Advisory Committee Representative,  
Joint Committee on Agricultural Development,  
Board for International Food and Agricultural Development.

JOINT RESEARCH COMMITTEE OF THE BOARD  
FOR INTERNATIONAL FOOD AND AGRICULTURAL  
DEVELOPMENT

## Meeting

Pursuant to Executive Order 11769 and the provisions of section 10(a), (2), Pub. L. 92-463, Federal Advisory Committee Act, notice is hereby given of the eighth meeting of the Joint Research Committee of the Board for International Food and Agricultural Development on February 13, and 14, 1978.

The purpose of this meeting is to continue the priority assessment of Collaborative Research Support Programs (CRSP's); to hear program reports on CRSP planning contracts for small ruminants, sorghum/millet, aquaculture and nutrition; and to discuss the activities of the International Center for Living Aquatic Resource Management.

The meeting will begin at 9 a.m. and will adjourn at 4:30 p.m. on February 13, 1978, and will reconvene at 9 a.m. and adjourn at noon on February 14, 1978. The meeting on both days will be held in the Arlington Room of the Quality Inn, Pentagon City, 300 Army-Navy Drive, Arlington, Va. 22202. The meeting is open to the public. Any interested person may attend, may file written statements with the Committee before or after the meeting, or may present oral statements in accordance with procedures established by the Committee, and to the extent the time available for the meeting permits.

Dr. Charles E. French, Research Coordinator, Development Support Bureau, is designated as A.I.D. Advisory Committee Representative at the meeting. It is suggested that those desiring further information write to him in care of the Agency for International Development, State Department, Washington, D.C. 20523, or telephone him at 703-235-9054.

Dated: January 18, 1978.

CHARLES E. FRENCH,  
A.I.D. Advisory Committee Representative, Joint Research Committee, Board for International Food and Agricultural Development.

SECRETARY OF STATE'S ADVISORY COMMITTEE ON PRIVATE INTERNATIONAL LAW: STUDY GROUP ON MARITIME LAW MATTERS

## Meeting

A meeting of the Study Group on Maritime Law Matters, a subgroup of the Secretary of State's Advisory Committee on Private International Law, will be held at 10:30 a.m. on Wednesday, February 15, 1978, at the Department of State. Members of the general public may attend up to the limits of the capacity of the meeting room and participate in the discussion subject to instructions of the Chairman.

The purpose of the meeting will be to consider the relationships of commodity values and commodity weights in connection with liability limit provisions in the Draft Convention on the Carriage of Goods By Sea.

Entrance to the Department of State building is controlled, and members of the general public should use the C Street entrance. Entry will be facilitated if arrangements are made in advance, and it is requested that members of the general public who plan to attend the meeting inform their name, affiliation, and address to Miss Dorothy Fagan, Office of the Legal Adviser, Department of State, prior to February 15, 1978. The telephone number is area code 202-632-8134.

Dated: January 17, 1978.

RICHARD D. KEARNEY,  
Chairman.

SHIPPING COORDINATING COMMITTEE: SUBCOMMITTEE ON SAFETY OF LIFE AT SEA

## Meeting

The working group on radiocommunications of the Subcommittee on Safety of Life at Sea (SOLAS), a component of the Shipping Coordinating Committee (SHC), will conduct an open meeting at 1:30 p.m. on Thursday, February 16, 1978, in room 8442 of the Department of Transportation, 400 Seventh Street SW., Washington, D.C.

The meeting's purpose is to prepare position documents for the Nineteenth Session of the Subcommittee on Radiocommunications of the Intergovernmental Maritime Consultative Organization (IMCO), to be held in London in the Autumn of 1978. In particular, the SOLAS Working Group will discuss the following topics:

Code of safety requirements for mobile offshore drilling units.

Operational standards for shipboard radio equipment.

Operational requirements for emergency position-indicating radio beacons and portable radio apparatus for survival craft.

Matters resulting from the World Maritime Administrative Radio Conference, 1974, and the work of the International Radio Consultative Committee.

Requests for further information on the meeting should be directed to Lt. F. N. Wilder, U.S. Coast Guard (G-OTM/74), Washington, D.C. 20590, telephone area code 202-426-1345.

The Chairman will entertain comments from the public as time permits.

RICHARD K. BANK,  
Chairman, Shipping  
Coordinating Committee.

JANUARY 18, 1978.

## [4810-22]

## DEPARTMENT OF THE TREASURY

## Customs Service

## CERTAIN FISH FROM CANADA

## Initiation of Countervailing Duty Investigation and Preliminary Determination

AGENCY: Customs Service, United States Treasury.

ACTION: Initiation of Countervailing Duty Investigation and Preliminary Determination.

SUMMARY: This notice is to advise the public that a petition has been received and an investigation has been started for the purpose of determining whether or not benefits are granted by the Government of Canada to fishermen or processors which constitute a bounty or grant within the meaning of the countervailing duty statute. A preliminary determination that certain Canadian fish is being subsidized is being issued simultaneously. A final determination must be made not later than June 10, 1978.

EFFECTIVE DATE: January 27, 1978.

FOR FURTHER INFORMATION CONTACT:

Vincent P. Kane, Operations Officer, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, 202-566-5492.

SUPPLEMENTARY INFORMATION: A petition in satisfactory form was received on June 10, 1977, alleging that payments or bestowals conferred by the Government of Canada upon production or exportation of certain fish from Canada constitute the payment or bestowal of a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303).

Fish imports covered by this investigation are classifiable under items

110.3570, 110.3575, 110.5025, 110.5030, 110.5045, 110.5050, 110.5065, 110.5520, 110.5550, 110.5565, 110.5570, 110.1585, 110.1589, 110.4710, 110.4726, 110.7033, 110.7039, 111.2200, 111.6400, 111.6800, Tariff Schedules of the United States Annotated (TSUSA).

The fish imports from Canada which are classifiable under items 110.1585, 110.1589, 110.4710, 110.4726, 110.7033, 110.7039, 111.2200, 111.6400, and 111.6811, TSUSA, are free of duty.

In the event that it becomes necessary to refer this matter to the United States International Trade Commission pursuant to section 303(a)(2), Tariff Act of 1930, as amended, (19 U.S.C. 1301(a)(2)), there is evidence on record concerning injury to, or likelihood of injury to, or prevention of the establishment of an industry in the United States with regard to these duty-free imports.

It is noted that a final affirmative countervailing duty determination and a waiver of countervailing duty were published concurrently in the FEDERAL REGISTER of April 13, 1977 (42 FR 19327), with respect to certain dutiable fish from Canada classifiable under item numbers 110.3560, 110.3565, and 110.5545, Tariff Schedules of the United States Annotated.

In view of the information developed recently in connection with the countervailing duty investigation on other Canadian fish, it is deemed appropriate at this time to issue a preliminary determination pursuant to section 303(a)(4), Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(4)), that bounties or grants are being paid or bestowed on the items subject to this investigation. Based on the information presently available, programs preliminarily determined to constitute a bounty or grant include: (1) Direct payments to fishermen and fish processors by the Federal Government under the Groundfish Temporary Assistance Bridging Program, which remains in effect for all groundfish except those items subject to waiver; (2) assistance to fishermen for the partial financing of vessel construction which program is presently funded; and (3) grants provided to the Newfoundland fishing industry by the Department of Regional Economic Assistance. The vessel construction assistance is preliminarily considered to constitute a bounty based on the *ad valorem* benefits involved derived from the previous investigation concluded April 1977, and the fact that a preponderance of Canada's fish production is exported. Regional incentive grants, while not at this stage quantified, would be considered preliminarily to constitute a bounty or grant since a preponderance of Canada's fish is exported.

A final decision in this case is required on or before June 10, 1978.

[Notice No. 577]

## ASSIGNMENT OF HEARINGS

JANUARY 24, 1978.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 133095 (Sub 171), Texas Continental Express, Inc., now assigned January 26, 1978, at New Orleans, La., is cancelled and application dismissed.

MC 83539 (Sub 469), C & H Transportation Co., Inc., now assigned February 27, 1978, (1 day), in Room 609, Federal Office Bldg., 911 Walnut Street, Kansas City, Mo.

MC 138322 (Sub 5), BHY Trucking, Inc., now assigned March 22, 1978, at Los Angeles, Calif., is cancelled and application dismissed.

MC 121664 (Sub 23), G. A. Hornady, Cecil M. Hornady, and B. C. Hornady, d.b.a. Hornady Brothers Truck Line, now assigned February 2, 1978, for prehearing conference at Washington, D.C., is postponed to February 10, 1978, for prehearing conference at the Offices of the Interstate Commerce Commission in Washington, D.C.

MC 60987 (Sub 22), Arkin Truck Line, Inc., now being assigned April 4, 1978 (1 day), at Chicago, Ill., in a hearing room to be later designated.

MC 114457 (Sub 317), Dart Transit Co., now being assigned April 5, 1978 (1 day), at Chicago, Ill., in a hearing room to be later designated.

MC 103993 (Sub 879), Morgan Drive Away, Inc., now being assigned April 6, 1978 (2 days), at Chicago, Ill., in a hearing room to be later designated.

AB 1 (Sub 41), Chicago and North Western Transportation Co., abandonment, between Klevenville and Fennimore, including Lancaster Junction to Lancaster, Monfort Junction to Cuba City, and Ipswich to Platteville, in Dane, Iowa, Lafayette, and Grant Counties, Wis., now being assigned April 10, 1978 (1 week), at Dodgeville, Wis., in a hearing room to be later designated.

## NOTICES

MC 117557 (Sub 23), Matson, Inc., now being assigned April 24, 1978 (1 week), at Chicago, Ill., in a hearing room to be later designated.

AB 43 (Sub 43), Illinois Central Gulf Railroad Co., abandonment between Herscher and Barnes in Kankakee, Ford, Livingston and McLean Counties, Ill., now being assigned April 19, 1978 (3 days), at Bloomington, Ill., in a hearing room to be later designated.

MC 143749, Garwood Wrecker Service, now assigned March 22, 1978, at Kansas City, Mo., is cancelled and application dismissed.

MC 119702 (Sub 50), Stahly Cartage Co., now assigned April 12, 1978, at Kansas City, Mo., is cancelled and reassigned for April 12, 1978 (3 days), at St. Louis, Mo., in a hearing room to be later designated.

MC 136786 (Sub 113), Robco Transportation, Inc., now being assigned May 18, 1978 (2 weeks), at Des Moines, Iowa, June 13, 1978 (1 week), at Greensboro, N.C. and June 26, 1978 (3 days), at the Offices of the Interstate Commerce Commission in Washington, D.C. in hearing rooms to be later designated.

## [7035-01]

[Finance Docket No. 28583 (Sub-No. 1):  
(Sub-No. 2)]

## BURLINGTON NORTHERN INC.

Control and Merger—St. Louis-San Francisco Railway Co.; Securities

JANUARY 23, 1978.

Burlington Northern, Inc. (BN), 176 East Fifth Street, St. Paul, MN 55101, represented by Frank S. Farrell, Vice President—Law, and St. Louis-San Francisco Railway Co. (Frisco), 906 Olive Street, St. Louis, MO 63101, represented by Donald E. Engle, Vice President and General Counsel, hereby give notice that on December 28, 1977, they filed with the Interstate Commerce Commission at Washington, D.C., a joint application under section 5(2) of the Interstate Commerce Act (Act) for an order approving and authorizing the control of Frisco by BN and the merger of the Frisco into BN. This application has been accepted and assigned Finance Docket No. 28583 (Sub-No. 1). BN filed a concurrent application under section 20(a) of the Act seeking authorization to issue securities in connection with the merger transaction. On January 14, 1978, a related application was filed seeking authority under section 5(2) of the Act for the acquisition of control by BN of Frisco Transportation Co., a wholly-owned motor carrier subsidiary of the Frisco, notice of which is published separately in this edition of the FEDERAL REGISTER under Docket No. MC-F-13500.

If approved by the Commission, the Frisco will be merged into BN and

Frisco's separate existence as a corporate entity will cease. The surviving company will be Burlington Northern, Inc., which will unify all present operations of Frisco and BN under common management. All properties of the Frisco will be under BN ownership. Under the terms of the merger agreement, in exchange for each outstanding share of Frisco common stock, BN will issue 0.95 share of BN common stock and one-half share of \$2.125 no par value preferred stock, \$25 redemption value.

Frisco owns and operates a 4,700 mile railroad system serving the following nine states: AL, AR, FL, KS, MS, MO, OK, TN, and TX. Principal routes include: Kansas City to Birmingham via Springfield, MO, and Memphis, TN; St. Louis to Dallas-Fort Worth via Springfield, MO, and Tulsa, OK; Kansas City to Tulsa via Fort Scott, KS; and St. Louis to Memphis via Cape Girardeau, MO. Other principal routes extend to Oklahoma City, Wichita, KS, Mobile, AL, and Pensacola, FL.

BN with its subsidiaries operates a 25,000 mile railroad system serving the states of CA, CO, ID, IL, IA, KS, KY, MN, MO, MT, NE, NM, ND, OR, SD, TX, WA, WI, WY, as well as the Canadian Provinces of British Columbia and Manitoba. Principal routes extend: from Chicago to Denver via Lincoln, NE; from Chicago to Seattle via the Twin Cities and Spokane; from Lincoln, NE, to Laurel, MT, via Alliance, NE; from Spokane to Portland; from Seattle to northern California via Portland and Wishram, WA; and from Denver to Houston.

The two principal points of interchange between BN and Frisco are St. Louis and Kansas City. It is proposed that present Frisco operations will be completely integrated into BN and that substantially all of the current Frisco railroad system will be operated as the Frisco Region of BN. No track construction or track abandonments are proposed in conjunction with the proposed merger.

Any person interested in filing an inconsistent application or petition for inclusion should file a notice of its intention to file same no later than March 13, 1978 (45 days after the date notice of the filing of the application is published in the FEDERAL REGISTER). Original and two copies thereof shall be filed with the Secretary, Interstate Commerce Commission, Washington, D.C. 20423. Any traffic studies and data submitted shall relate to the calendar year January 1, 1976, to December 31, 1978. Any inconsistent applications and petitions for inclusion must be filed with the Commission by April 27, 1978.

Persons interested in filing an inconsistent application or petition for inclusion are further advised that they

should prepare a list of the information not otherwise available to them that will be necessary to complete the inconsistent application or petition for inclusion in accordance with section 1111.4(b)(4) or 1111.4(b)(5) of the Railroad Consolidation Procedures, 348 ICC 771, 816-817 (1977), and other discoverable matter which may be desired. This list should be submitted to BN and Frisco by February 27, 1978. BN and Frisco are directed to respond to those persons by March 14, 1978, specifically stating what information will be voluntarily supplied and what information will not be supplied, with reasons. Fifteen copies of the lists of requested information and the responses should be filed with the Commission when served.

On March 27, 1978, an initial prehearing conference will be conducted to discuss, among other things, disputes as to the production of information. Presiding at the conference will be Administrative Law Judge Paul J. Clerman, who has been designated to conduct the evidentiary portion of these proceedings. The conference will be at the offices of the Interstate Commerce Commission in Washington, D.C., commencing at 9:30 a.m.

Any interlocutory appeals from rulings by the Administrative Law Judge will be considered by Division 1, Commissioners Brown, Gresham, and Christian. By statute, the evidentiary phase of the proceedings must be concluded by January 25, 1980. The initial decision will be waived, and the determination of the merits of the application will be made in the first instance by the entire Commission, pursuant to section 5(2)(g)(vi) of the Act, as amended.

Interested persons may participate formally in a proceeding by submitting written comments regarding the application. Such submissions shall indicate the proceedings designation (F.D. No. 28583, Sub-No. 1), and the original and two copies thereof shall be filed with the Secretary, Interstate Commerce Commission, Washington, D.C. 20423, not later than March 13, 1978 (45 days after the date notice of the filing of the application is published in the FEDERAL REGISTER). Such written comments shall include the following: the person's position, e.g., party protestant or party in support, regarding the proposed transaction; specific reasons why approval would or would not be in the public interest; and a request for oral hearing if one is desired. Additionally, interested persons who do not intend to participate formally in a proceeding but who desire to comment thereon, may file such statements and information as they may desire, subject to the filing and service requirements specified herein. Persons submitting writ-

## NOTICES

ten comments to the Commission shall, at the same time, serve copies of such written comments upon the applicants, the Secretary of Transportation, and the Attorney General.

By the Commission, Commissioner Christian not participating.

H. G. HOMME, Jr.,  
Acting Secretary.

## [7035-01]

[MC-F-13500]

## BURLINGTON NORTHERN, INC.

Control-Frisco Transportation Co.

JANUARY 23, 1978.

No. MC-F-13500 BURLINGTON NORTHERN, INC. (BN), represented by Frank S. Farrell, vice president-law, 176 East Fifth Street, St. Paul, Minn. 55101, and ST. LOUIS-SAN FRANCISCO RAILWAY CO. (FRISCO), represented by Donald E. Engle, vice president & general counsel, 906 Olive Street, St. Louis, Mo. 63101, hereby give notice that on January 14, 1978, they filed with the Interstate Commerce Commission in Washington, D.C., a joint application under section 5(2) of the Interstate Commerce Act (Act) seeking authorization for BN to acquire control of Frisco Transportation Co. (TC), a wholly-owned motor carrier subsidiary of Frisco, through the purchase of all Frisco's issued and outstanding common stock. The application has been accepted by the Commission and assigned docket number MC-F-13500. The operating rights sought to be controlled include general commodity authority (with certain exceptions) and specified commodity authorities as a common carrier over regular and irregular routes between points in MO; MO and AR; KS and MO; MO and OK; AR; TN and MS; MS; OK; TX and OK; KS; IL and MO; AR and TN; and TX. Operations over some of these authorities is restricted to service which is auxiliary to, or supplemental of, the rail service. These rights are more fully described in No. MC-89913 and sub-numbers. BN and BN Transport, Inc., BN's wholly-owned subsidiary, hold motor common carrier authority in interstate and foreign commerce to transport general commodities (with certain exceptions), and specified commodities over both regular and irregular routes. Operations extend from IL on the east to WA and OR on the west. This includes service to points in the following states: CO, ID, IL, IN, IA, KS, MN, MO, MT, ME, ND, OR, WA, WI, and WY. Operations over some of these authorities is restricted to service which is auxiliary to, or supplemental of the rail service. These rights are more fully described in No. MC-28573

and sub-numbers and No. MC-63562 and sub-numbers. Applicants state that there is no duplication of motor carrier operating rights between BN or its subsidiary, BN Transport, Inc., and TC. Both applicants do provide motor carrier service to the common points of St. Louis and Kansas City, Mo. Application has not been filed for temporary authority under section 210a(b). This application is directly related to the merger and securities issuance applications filed by BN and FRISCO pursuant to sections 5(2) and 20a of the Act. Notice of these applications is published separately in this edition of the FEDERAL REGISTER under Finance Docket Nos. 28583 (Sub-Nos. 1 & 2). The time limits established for Finance Docket No. 28583 (Sub-Nos. 1 & 2) will be applied to this motor carrier application, and the cases shall be considered together.

By the Commission, Commissioner Christian not participating.

H. G. HOMME, Jr.,  
Acting Secretary.

## [7035-01]

## ICC BEGINS MICROFILMING DOCKET FILES

JANUARY 25, 1978.

Effective February 1, 1978, all newly filed motor carrier applications for permanent operating authority and train abandonment applications will be placed on microfiche. A letter suffix "F" will be added to the docket numbers to distinguish newly filed (and therefore microfilmed) applications from existing application proceedings, which will continue to be maintained in hardcopy dockets. This will begin the Commission's program of placing and maintaining its public dockets on microfiche. The public dockets for the remaining types of Commission proceedings will be phased into the program in the future.

All correspondence, including protests and other filings, which relate to these dockets, must show the suffix "F" to assure proper handling by Commission staff. In addition, requests for copies of these dockets must specify whether hardcopy or microfiche is desired. Each microfiche, which contains up to 60 pages, will cost 10¢. The charge for hardcopy will remain 10¢ per page.

H. G. HOMME, Jr.,  
Acting Secretary.

#### [7035-01]

(Docket No. AB-9 (Sub-No. 7))

#### ST. LOUIS-SAN FRANCISCO RAILWAY CO.

##### Abandonment Between Aliceville and Reform in Pickens County, Ala., Notice of Findings

Notice is hereby given pursuant to section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by an order entered on November 29, 1977, a finding, which is administratively final, was made by the Commission, Review Board No. 5, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Oregon Short Line R. Co.—Abandonment—Goshen*, 354 I.C.C. 76 (1977); for public use as set forth in said order, and further, that the above condition shall not preclude the sale or donation of rail property and/or facilities to the Illinois Central Gulf Railroad Co. for the purposes of maintaining rail service to shippers located along the line to be abandoned, the present and future public convenience and necessity permit the abandonment by the St. Louis-San Francisco Railway Co. of its branch line extending from milepost RB-680.65 near Aliceville, Ala., to milepost RB-701.0 near Reform, Ala. A certificate of abandonment will be issued to the St. Louis-San Francisco Railway Co. based on the above-described finding of abandonment, February 27, 1978, unless within 30 days

from the date of publication, the Commission further finds that:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and

(2) It is likely that such proffered assistance would:

(a) cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) cover the acquisition cost of all or any portion of such line of railroad. If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced order.

H. G. HOMME, Jr.,  
Acting Secretary.

[8010-01]

SECURITIES AND EXCHANGE COMMISSION.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of January 30, 1978, in Room 825, 500 North Capitol Street, Washington, D.C.

Open meetings will be held on Monday, January 30, 1978, at 4 p.m. and on Thursday, February 2, 1978, at 10 a.m. Closed meetings will be held on Tuesday, January 31, 1978, at 10 a.m., and immediately following the open meeting on Thursday, February 2, 1978.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meetings. Certain

SUNSHINE ACT MEETINGS

3793

Staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meetings may be so considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A), and (10) and 17 CFR 200.402(a) (8), (9)(i), and (10).

Chairman Williams, Commissioners Loomis, Evans, Pollack, and Karmel determined to hold the aforesaid meetings in closed session.

The subject matter of the open meeting scheduled for Monday, January 30, 1978, at 4 p.m., will be: The Commission will meet with representatives of the Securities Industry Association to discuss current issues and developments of mutual concern.

The subject matter of the open meeting scheduled for Thursday, February 2, 1978, at 10 a.m., will be: 1. Issuance of a release which contains questions and interpretive responses relating to the disclosure of management remuneration.

2. Proposed transmittal of comments to the Office of Management and Budget ("OMB") expressing the views of the Commission on OMB's draft bill amending the Independent Offices Appropriations Act of 1952, which deals with fees charged by Federal agencies.

3. Proposed transmittal of comments to Congressman John M. Murphy, Chairman of the House Committee of Merchant Marine and Fisheries expressing the views of the Commission on H.R. 9819, Shipping Act Amendments of 1977, a bill intended to

remedy the problems of rebating and other such malpractices.

4. Consideration of the extent to which Commission announcements are required to be included in the FEDERAL REGISTER and of suggestions for reducing the Commission's cost of such publications.

5. Proposed rule change filed by the National Association of Securities Dealers, Inc. concerning fee and assessment schedule for fiscal year 1978.

The subject matter of the closed meeting scheduled for Tuesday, January 31, 1978, at 10 a.m., will be: Referral of files to Federal, State or Self-Regulatory authorities.

Formal orders of investigation.

Institution of injunctive actions.

Settlement of injunctive actions.

Institution of administrative proceedings.

Settlement of administrative proceedings.

Freedom of Information Act Appeal.

Regulatory matters arising from or bearing enforcement implications.

Other litigation matters.

The subject matter of the closed meeting scheduled for Thursday, February 2, 1978, immediately following the 10 a.m. open meeting, will be: Regulatory matter arising from or bearing enforcement implications.

Opinion.

Other litigation matters.

FOR FURTHER INFORMATION CONTACT:

Glynn L. Mays at 202-755-1280 or Margaret Topps at 202-376-8003.

MEDICAL PROFESSIONAL  
STANDARDS REVIEW  
ORGANIZATIONS

Designation of Alternate

[4110-35]

# DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Care Financing Administration

[42 CFR Part 471]

## DESIGNATION OF ALTERNATE PROFESSIONAL STANDARDS REVIEW ORGANIZATIONS

AGENCY: Health Care Financing Administration (HCFA), HEW.

ACTION: Proposed rule.

**SUMMARY:** This proposal sets forth criteria, and other selection factors, for the designation of alternate Professional Standards Review Organizations (PSROs) where physician-groups that qualify under section 1152 (b)(1)(A) of the Social Security Act are not available in a PSRO area. The Secretary is required to designate alternate PSROs in accordance with section 1152(b)(1)(B) of the Act. The intent is to inform organizations that may be interested in applying for designation as alternate PSROs.

**DATES:** Consideration will be given to written comments or suggestions received on or before March 28, 1978.

**ADDRESSES:** Address comments to: Acting Associate Administrator, for Health Standards and Quality, Room 16A-55, 5600 Fishers Lane, Rockville, Md. 20857. In commenting, please refer to HSQ-33-P. Comments will be available for public inspection, beginning approximately 2 weeks from today, at the address noted above, on Monday through Friday from 8:30 a.m. to 5 p.m., 301-443-3880.

**FOR FURTHER INFORMATION CONTACT:**

Hal Belodoff, Legal Analyst, Room 16A-44, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857, phone 301-443-4086.

### SUPPLEMENTARY INFORMATION:

#### STATUTORY PROVISIONS

Section 1152 of the Social Security Act requires the Secretary to designate qualified organizations as PSROs. The Act provides for two categories of qualified organizations: (1) physician-composed associations having six specific characteristics; and (2) other public, nonprofit private, or other agencies or organizations of professional competence and otherwise suitable. Physician-composed associations which qualify under section 1152 (b)(1)(A) have first priority for designation as PSROs. After January 1, 1978, the Secretary may designate an alternate PSRO which qualifies under section 1152(b)(1)(B) in any area where there is no priority organization.

## PROPOSED RULES

### PUBLIC PARTICIPATION

The views of interested organizations and the general public have been secured through: (1) an Advanced Notice of Proposed Rulemaking published in the *FEDERAL REGISTER* on April 1, 1977 (42 FR 17501); and (2) five public hearings that took place between April and June, 1977, as announced in the *FEDERAL REGISTER* on April 1, 1977 (42 FR 17525) and May 20, 1977 (42 FR 25920).

#### DISCUSSION OF RECOMMENDATIONS

The major recommendations and the Department's responses are summarized below:

#### RECOMMENDATION 1

In areas where the medical establishment has opposed the development of PSROs, physician-groups should be allowed to organize an alternate PSRO without having to acquire a substantial proportion of physicians as members.

This recommendation was accepted.

The Department believes that the law does not preclude consideration of all physician-composed organizations as alternate PSROs, but only of those groups which could qualify as a priority organization under the Act. Under this proposal, physician-groups which apply to be alternate PSROs would need to show that they cannot voluntarily satisfy section 1152(b)(1)(A) requirements because of the resistance of the medical societies in the area. The Department believes that acceptance of the PSRO program by the large medical organizations in an area was the major obstacle that Congress wished to overcome by requiring alternate PSROs to be designated after a period of time during which representative physician-composed associations would have complete priority. Congressional intent to enable competent groups to perform PSRO activities if opposition prevented priority physician-groups from qualifying was reiterated in the 1975 amendment (Section 108(b) of Pub. L. 94-182), which permits the Secretary to forego notification and polling where the medical societies have taken a formal position of opposition to the PSRO program.

#### RECOMMENDATION 2

Do not eliminate medical societies and organizations controlled by medical societies from consideration for designation as alternate PSROs.

This recommendation was not accepted.

Medical societies were clearly the organizations expected by Congress to sponsor physician-composed PSROs which would qualify under section 1152(b)(1)(A). The Secretary has formally requested State and local medical societies to sponsor PSROs in their

respective designated areas. Their failure to do so may be viewed as an indication of lack of interest in, or opposition to, the PSRO program. In addition, if medical societies were permitted to apply as alternate PSROs it might discourage them from sponsoring a priority PSRO. That would not further the intent of the legislation.

#### RECOMMENDATION 3

Allow existing physician-composed PSROs to serve as alternate PSROs in adjoining areas where there is no priority PSRO. Existing PSROs already have the experience and knowledge necessary to ensure an efficient and effective assumption of review responsibilities. Designation of such organization would be preferable to using local nonphysician alternate PSROs or any other organization located outside the unserved area.

This recommendation was accepted in part.

In order to promote local support and operation of review activities, existing PSROs will not be preferred over other groups located within the unserved area.

#### RECOMMENDATION 4

Assign a higher priority to qualified fiscal intermediaries and other health insurers. Do not consider them only as a last resort.

This recommendation was accepted.

The Department agrees that an insurer located within the State, familiar with local norms and readily available to service the PSRO area is more suitable as an alternate PSRO than an out-of-State organization. The proposal reflects this view. It is proposed to issue a new part 471 of Title 42 as set out below:

### Part 471—DESIGNATION OF ALTERNATE PROFESSIONAL STANDARDS REVIEW ORGANIZATIONS

#### Sec.

471.1 Definitions.

471.2 Statutory basis and applicability.

471.3 Conditions for designation.

471.4 Priorities for consideration of applicants.

**AUTHORITY:** Sec. 1152, 86 Stat. 1430 (42 U.S.C. 1320); Sec. 1102, 49 Stat. 647 (42 U.S.C. 1302).

#### § 471.1 Definitions.

(a) "Act" means the Social Security Act.

(b) "Alternate PSRO" means a PSRO designated under the provisions of Section 1152(b)(1)(B) of the Act.

(c) "PSRO" means a Professional Standards Review Organization.

(d) "Secretary" means the Secretary of the Department of Health, Education, and Welfare or any other official to whom the pertinent authority has been delegated.

## PROPOSED RULES

### § 471.2 Statutory basis and applicability.

(a) Section 1152(a) of the Act requires the Secretary to designate qualified organizations as PSROs. Section 1152(b) of the Act provides for two categories of qualified organizations: (1) physician-composed associations having six specific characteristics and (2) other public (including State agencies), nonprofit, private, or other agencies or organizations of professional competence and otherwise suitable. The regulations of this part set forth criteria for the designation of qualified organizations of the second type.

### § 471.3 Conditions for designation.

(a) *Absence of priority organization.* The Secretary may designate an alternate PSRO in an area if no organization which meets the requirements of sections 1152(b)(1)(A) and (2) of the Act applies for designation as a PSRO in the area.

(b) *Evaluating applications.* The Secretary will evaluate the suitability, capability, and willingness of an applicant organization to assume responsibility for review of the necessity, appropriateness, and quality of medical care and to make determinations that are binding for purposes of claims payment under the Act.

(c) *Basic conditions.* To be eligible for designation as an alternate PSRO, an organization must: (1) Have, or show that it will be able to obtain, the services of individuals with medical expertise to competently perform review activities;

(2) Demonstrate its ability to perform review within the boundaries of the designated area;

(3) Not be a medical society;

(4) Not be subject to excessive influence by a medical society in making decisions;

(5) Not reserve board of director positions for members of a medical society;

(6) Not be an organization composed exclusively of licensed doctors of medicine or osteopathy (other than an existing PSRO) except in a PSRO area in which an organization representing the largest number of doctors of medicine or osteopathy in the area has taken a formal position of opposition to, or noncooperation with, the PSRO program;

(7) Not have inherent conflicts of interest that affect its role as a reviewer of health care; and

(8) Be willing to perform PSRO activities without making a profit.

(d) *Other criteria.* The Secretary will also consider in his evaluation of applicants: (1) The degree of support the organization has from the aggregate community of health care institutions, health related organizations, and health care practitioners in the PSRO area; and

(2) The degree of support the organization has from consumers in the local PSRO area.

### § 471.4 Priorities for consideration of applicants.

(a) *Priorities for initial designation.* If more than one organization formally seeks designation as an alternate PSRO for a given area, the order of priority among those found to be qualified will be: (1) organizations physically located or headquartered in the PSRO area;

(2) existing PSROs;

(3) organizations, including fiscal intermediaries and health insurers, located outside the PSRO area but within the State in which the PSRO area is located;

(4) organizations located outside the State in which the PSRO area is located.

(b) *Additional criteria.* If the competing applicants fall in the same order of priority, the Secretary will consider additional information concerning their suitability, capability, and willingness to perform PSRO functions.

(c) *Criteria for nonrenewal of agreements with alternate PSROs.* The Secretary will not renew an agreement with an alternate PSRO if: (1) a physician-composed organization that meets the requirements of section 1152(b)(1)(A) is willing to enter into a PSRO agreement; and

(2) the Secretary anticipates that the designation of this organization will result in substantial improvement in the performance of PSRO duties.

**NOTE.**—The Health Care Financing Administration has determined that this document does not require preparation of an Economic Impact Statement, under Executive Order 11821, as amended by Executive Order 11949 and OMB Circular A-107.

Dated: November 7, 1977.

ROBERT A. DERZON,  
Administrator, Health Care  
Financing Administration.

Approved: January 13, 1978.

JOSEPH A. CALIFANO, Jr.,  
Secretary.

ETHYLENE OXIDE

Rebuttable Presumption Against  
Registration; Maximum Residue  
Limits and Daily Levels of Exposure

## PROPOSED RULES

[4110-03]

DEPARTMENT OF HEALTH,  
EDUCATION, AND WELFARE

## Food and Drug Administration

[21 CFR Parts 211 and 821]

[Docket No. 77N-0424]

ETHYLENE OXIDE, ETHYLENE CHLOROHYDRIN,  
AND ETHYLENE GLYCOLMaximum Residue Limits and Maximum Daily  
Levels of Exposure; Intent To Propose Rules

AGENCY: Food and Drug Administration.

ACTION: Notice of intent.

**SUMMARY:** The Commissioner of Food and Drugs intends to issue a proposed rule that would (1) establish maximum residue limits for ethylene oxide (ETO) and its two major reaction products, ethylene chlorohydrin (ETCH) and ethylene glycol (ETG), in drug products for human and veterinary use and medical devices and (2) establish maximum daily exposure levels for drug products for ETO and its two major reaction products.

FOR FURTHER INFORMATION  
CONTACT:

Marilyn L. Watson, Bureau of Drugs (HFD-30), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-6490.

## SUPPLEMENTARY INFORMATION:

Elsewhere in this FEDERAL REGISTER the Environmental Protection Agency (EPA) is publishing a notice of rebuttable Presumption Against Registration and Continued Registration of Pesticide Products Containing Ethylene Oxide, based on reports of muta-

genicity and reproductive effects. This is the first step in EPA's regulatory procedures that may result in a cancellation of the registration of a pesticide.

Ethylene oxide has been used for a number of years as a sterilant for certain drug products for human and veterinary use, including biological products for human use, and certain medical devices. Many of these products cannot be sterilized by other means such as heat, filtration, radiation, or liquid chemical agents without degrading or otherwise damaging them; and there are no other acceptable safe gaseous substitutes available.

The Commissioner is aware of the local and systemic toxic effects of ETO and its reaction products as well as the reports of the mutagenic effects of ETO and ETCH. Because the Commissioner believes that the current use of ETO as a sterilant for certain drug products and medical devices is necessary for the delivery of required health care, he intends to propose maximum residue limits for certain drug products and medical devices and maximum daily levels of exposure to ETO, ETCH, and ETG from drug products for humans and animals. Such action will be directed to permitting the continued essential use of ETO as a sterilant.

The agency intends to publish in the FEDERAL REGISTER in the near future a proposal establishing these maximum residue limits and maximum daily levels of exposure.

Dated: January 24, 1978.

JOSEPH P. HILE,

Associate Commissioner for  
Compliance.

[FR Doc. 78-2368 Filed 1-26-78; 8:45 am]

## NOTICES

[6560-01]

ENVIRONMENTAL PROTECTION  
AGENCY

[OPP-30000/22; FRL 845-5]

## PESTICIDE PROGRAMS

Notice of Rebuttable Presumption Against Reg-  
istration and Continued Registration of Pes-  
ticide Products Containing Ethylene Oxide

The Deputy Assistant Administrator, Office of Pesticide Programs, Environmental Protection Agency (EPA), has determined that a rebuttable presumption exists against registration and continued registration of all pesticide products containing ethylene oxide (EtO).<sup>1</sup>

## I. REGULATORY PROVISIONS

**A. General.** Title 40, Part 162.11, of the Code of Federal Regulations for the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (86 Stat. 973, 89 Stat. 751, 7 U.S.C. 136 et seq.), provides that a rebuttable presumption against registration shall arise if the Agency determines that a pesticide meets or exceeds any of the risk criteria relating to acute and chronic toxic effects set forth in Section 162.11(a)(3). If it is determined that such a rebuttable presumption has arisen, the regulations require that the registrant be notified by certified mail and afforded an opportunity to submit evidence in rebuttal of the presumption. In addition, the Agency has determined that the public should also be given notice of the bases for the presumption to provide an opportunity for comment and to solicit additional information relevant to the presumption.

A notice of rebuttable presumption against registration is issued when the evidence related to risk meets the criteria set forth in section 162.11(a)(3). It is emphasized that a notice of rebuttable presumption against registration and continued registration of a pesticide is not a notice of intent to cancel the registration of a pesticide, and may or may not lead to cancellation. The notice of intent to cancel is issued only if, after careful consideration of both the risks and benefits of a pesticide, it is determined that the pesticide may generally cause unreasonable adverse effects to man or the environment.

Accordingly, all registrants and applicants for registration are invited pursuant to 40 CFR 162.11(a)(4) to submit evidence in rebuttal of the pre-

<sup>1</sup>A position document containing background information and other material pertinent to the issuance of this notice has been prepared by the Agency Working Group on EtO and is also published with this notice.

sumptions listed in Part II of this notice. Registrants and other interested parties may submit for consideration data on benefits which they believe would justify registration or continued registration. In addition, any registrant may petition the Agency to voluntarily cancel a current registration pursuant to Section 6(a)(1) of FIFRA.

**B. Rebuttal Criteria.** Section 162.11(a)(4) provides that a registrant may rebut the presumption by sustaining the burden of proving:

(1) In the case of a pesticide presumed against pursuant to the chronic toxicity criteria, "that when considered with proposed restrictions on use and widespread and commonly recognized practices of use, the pesticide will not concentrate, persist or accrue to levels in man or the environment likely to result in any significant chronic adverse effects" (40 CFR 162.11(a)(4)(ii)); or

(2) That "the determination by the Agency that the pesticide meets or exceeds any of the criteria for risk was in error" (40 CFR 162.11(a)(4)(iii)).

**C. Benefits Information.** In addition to submitting evidence to rebut the presumption of risk, section 162.11(a)(5)(iii) provides that a registrant "may submit evidence as to whether the economic, social and environmental benefits of the use of the pesticide subject to the presumption outweigh the risk of use." If the risk presumptions are not rebutted, the benefit evidence submitted by the registrant, applicants, and other interested persons will be considered by the Administrator in determining the appropriate regulatory action. Specifically, section 162.11(a)(5)(iii) provides that if the "benefits appear to outweigh the risks," the Administrator may issue a notice of intent to hold a hearing pursuant to section 6(b)(2) of

<sup>1</sup>Registrants or other interested persons who desire to submit benefit information should consider submitting information on the following subjects, along with any other relevant information they desire to submit:

1. Identification of the major uses of the pesticide, including estimated quantities used by crop or other application.
2. Identification of the minor uses of the pesticide, including estimated quantities used by category.
3. Identification of registered alternative products for the uses set forth in (1) and (2) above, including an estimate of their availability.
4. Determination of the change in costs to the user of providing equivalent pesticide treatment with any available substitute products.
5. Assessment of regulation impact upon users from using available substitute pesticides or from using no other pesticides.
6. If the impacts upon either user costs or effectiveness are significant, a qualitative assessment of the regulation's impact on health care or storage of food products and consequence to consumers.

FIFRA rather than a notice of intent to cancel or deny registration pursuant to section 3(c)(6) of FIFRA. Alternatively, if the "benefits do not appear to outweigh the risks, the Administrator shall issue a notice pursuant to section 3(c)(6) or section 6(b)(1) of the Act, as appropriate." Moreover, if at any time the Administrator determines that a pesticide poses an "imminent hazard" to humans or the environment, a notice of suspension may be issued pursuant to section 6(c) of the Act.

Stated below are the section 162.11(a)(3) risk criteria which the Agency has found to have been met or exceeded by registrations and applications for registration of pesticide products containing EtO. The Agency's basis for concluding that these risk criteria have been met or exceeded is set out in "Ethylene Oxide: Position Document 1," which follows. Copies of attachments to the Position Document which are not published with this notice are available for public inspection in the Office of Special Pesticide Reviews. Information protected from disclosure pursuant to FIFRA Section 10 cannot be provided. Specific inquiries concerning the Position Document, as well as requests for access to these files, should be directed to Project Manager, Mr. J. B. Boyd, Office of Special Pesticide Reviews (WH-566), EPA, Room 447, East Tower, 401 M Street SW., Washington, D.C. 20460, 202-755-5632.

## II. PRESUMPTIONS

**A. Mutagenicity.** 40 CFR Section 162.11(a)(3)(ii)(A) states that "[a] rebuttable presumption shall arise if a pesticide's ingredient(s), metabolite(s), or degradation product(s) . . . induces mutagenic effects, as determined by multitest evidence." Section 162.3(y) defines mutagenic as "the property of a substance or mixture of substances to induce changes in the genetic complement of either somatic or germinal tissue in subsequent generations." Section 162.3(1) defines degradation product as "a substance resulting from the transformation of a pesticide by physiochemical, or biochemical means."

On the basis of scientific studies and information summarized in the Position Document, the Agency has concluded that this risk index has been exceeded by all registrations and applications for registration of pesticide products containing EtO, and that a rebuttable presumption against new or continued registration of such products has therefore arisen.

**B. Other Chronic or Delayed Toxic Effects.** 40 CFR Section 162.11(a)(3)(ii)(B) provides that a rebuttable presumption shall arise if a pesticide "[p]roduces any other chronic or delayed toxic effect in test animals at any dosage up to a level, as deter-

undertaken: a teratology study, a mutagenicity study, and a 3-year study for carcinogenicity that would include a limited study of reproductive effects. The Commissioner of Food and Drugs requested that the Associate Commissioner for Science study this recommendation.

In August 1976 the office assigned to review the recommendation suggested that no further studies be initiated at that time by FDA because preliminary tests were underway for five of the six recommended studies at the Carnegie-Mellon Institute of Research. In addition, the National Cancer Institute (NCI) had scheduled carcinogenicity bioassays on EtO and ECH (29).

We have confirmed that on April 27, 1977, the Carnegie-Mellon Institute of Research began a 2-year EtO inhalation study on rats. The protocol indicates that the animals will be examined for oncogenic and cytogenetic effects. To our knowledge, however, neither the teratology nor the reproductive effects study was completed. NCI still has both EtO and ECH tentatively scheduled for bioassays.

In April 1977 an HEW Subcommittee issued the "Report of the Subcommittee on the Benefits and Risks from the Use of Ethylene Oxide for Sterilization" (24). The conclusions were as follows:

The Subcommittee has concluded that ethylene oxide is an extremely useful chemical which, unfortunately, possesses mutagenic properties. There is little evidence that it is also carcinogenic to experimental animals, although adequate testing has yet to be conducted. Based on the documented mutagenicity of this compound, it is imperative that unnecessary and improper use of ethylene oxide for hospital sterilization purposes be prohibited, and that where ethylene oxide can be replaced by another practicable sterilization process, this should be done, providing the alternate process does not possess similar or more serious toxicologic properties. Where the use of ethylene oxide is to be continued, improved techniques of exhausting the gas from the sterilizer, the aerator, and the sterilized items need to be implemented. Gas sterilization should be supervised and monitored so as to prevent all unnecessary exposure to personnel. It is felt that this can be accomplished through improved exhaust, ventilation, and other engineering control techniques. Personnel should be trained in the safe operation of the process. Provided these control measures are instituted (and enforced), the use of ethylene oxide for specific health care applications should carry minimal risk to the health of hospital personnel. The benefits resulting from the use of ethylene oxide are the reduction in the prevalence of coincident infections in patients requiring health care.

On September 30, 1977, the Agency received the "Special Occupational Hazard Review and Control Recommendations for the Use of Ethylene Oxide as a Sterilant in Medical Facilities" (28) that was prepared by HEW's National Institute for Occupational Safety and Health (NIOSH). In the preface of this review, it is stated that this type of review is "prepared in such a way as to assist in the formulation of regulations." In the summary and conclusions section of the review, it is stated that, "The adequacy of the current U.S. EtO standard (i.e. the time-weighted average of 50 ppm EtO for a workday), which was based on the

data available at the time of promulgation, has not been addressed in this report." The report did recommend that "... exposure to EtO be controlled so that workers are not exposed to a concentration greater than 135 mg/cu m (75 ppm) determined during a 15-minute sampling period ..." and that measures be taken to minimize the mutagenic health risk. The report also states that there are plans to develop a criteria document during the 1980 fiscal year which will fully examine the adequacy of the current 50 ppm U.S. EtO standard.

### III. SUMMARY OF SCIENTIFIC EVIDENCE IN SUPPORT OF REBUTTABLE PRESUMPTION

#### A. Mutagenic Effects

40 CFR Section 162.11 (a)(3)(II)(A) states that "a rebuttable presumption shall arise if a pesticide's ingredient(s), metabolite(s), or degradation product(s) ... induces mutagenic effects, as determined by multitest evidence." Section 162.3 (y) defines mutagenic as "the property of a substance or mixture of substances to induce changes in the genetic complement of either somatic or germinal tissue in subsequent generations." Section 162.3 (1) defines degradation product as "a substance resulting from the transformation of a pesticide by physicochemical, or biochemical means."

Evidence in both prokaryotic (e.g. bacterial) and eukaryotic (e.g. animal and higher plant) systems indicates that EtO is a general point (gene) mutagen. This means that EtO can interact with DNA of various species to produce mutations in both reproductive and other body cells. There is also evidence that EtO can induce chromosomal mutations in somatic cells of humans and other mammals. In addition, ECH, an EtO degradation product, has been shown to be a point (gene) mutagen in bacterial systems. Human exposure to a mutagen has serious implications. The possible adverse effects to people, especially those of reproductive age, are: spontaneous abortions, stillbirths, birth defects in their children, and diseases in the adult life of subsequent generations. Any of these effects could result from exposure of the male and/or female parent to a mutagen. In addition, those exposed can be adversely affected by mutations of the somatic cells.

The Ethylene Oxide Working Group has concluded that EtO and ECH meet this risk criterion and are capable of inducing chromosomal mutations in animals.

1. *Ethylene oxide*.—(a) *Point (gene) mutations*.—i. *Microorganism studies*. Embree (22) placed EtO-impregnated Tygon tubing on *Salmonella typhimurium* test strains TA 1535, TA 1537, and TA 1538 on agar plates without microsomal activation. The EtO slowly leached into the plates causing a statistically significant ( $p < 0.05$ ) number of histidine revertants (reversion to the wild type at the histidine locus) in strain TA 1535. This indicated that mutation by base-pair substitution had occurred. Tests with strains TA 1537 and TA 1538 were negative. This suggests that EtO does not induce frame-shift mutations.

Rannug et al. (69) dissolved EtO in ethanol and applied the solution to *S. typhimurium* strain TA 1535 on agar plates without microsomal activation. The concentrations tested were 0.86, 4.77, 9.55, 47.7, and 95.5 mM EtO. A highly significant dose-response relationship for the induction of mutations was observed. These data confirm EtO's ability to induce mutation by base-pair substitution.

In an addendum to Rannug's paper (69), Hussain and Osterman-Golkar (37) reported the genetic risk (potency) of EtO. Using the dose-response curve of the frequency of mutation in *Escherichia coli*, the authors estimated this risk of EtO to be two mutants per  $10^6$  survivors per mM x hour.

A Stanford Research Institute study (46) established that there is a dose-response relationship for mutations in *S. typhimurium* strains TA 1535 and TA 100 exposed to atmospheres with varying concentrations of EtO ranging from 0.01 to 0.1%. These treatments were administered in 9-liter desiccators. There were negative results in strains TA 1537, TA 1538, and TA 98. This study confirmed that EtO induces mutations by base-pair substitution. A rat liver microsomal activation system (induced with Arochlor) was used and did not affect the mutagenic activity. This indicates that EtO is a direct-acting point (gene) mutagen in microbial systems. Microsomal activation provides information on the effect which mammalian metabolism can have on the genetic activity of a compound. The possible effects are the conversion of a promutagen to a mutagen and the conversion of a direct-acting mutagen to a nonmutagen.

Kolmark and Westergaard (49) tested a 0.025 M EtO aqueous solution on an adenine-requiring strain of *Neurospora crassa* (W.40) in a plate test. The observed frequency of reverse mutations (reversion to the wild type at the adenine locus) increased with the duration of exposure.

Kolmark and Kilbey (48) observed an increased incidence of reverse mutations in the macroconidial strain [K3/17 ad-3A (38701)] of *N. crassa* which were exposed to 1.5 to 150 mM EtO in culture media. The increase in the frequency of mutation was a function of dose and length of exposure. Kilbey and Kolmark (47) observed the same effects in a similar study.

ii. *Plant studies*. Studies of barley, wheat, and rice that were treated with EtO provided convincing evidence that such treatment results in heritable, viable mutants among the segregating generations (17, 19, 32, 40, 41, 53, 73).

iii. *Invertebrate studies*. Bird (8), Nakao and Auerbach (63), and Watson (88) injected *Drosophila melanogaster* males with aqueous solutions of EtO. Following these single doses of EtO at 55 to 175 mM, the males were mated with untreated females. The resulting progeny were examined for recessive lethal mutations on the X-chromosome (Muller-5 test). The increased incidence of these mutations showed a dose-response relationship.

b. *Chromosomal effects*.—i. *Cytogenetic studies*. In an in vivo cytogenetic study, Embree (22) exposed six male Long-Evans rats to 250 ppm EtO in a flow-through chamber for 7 hours per day on 3 consecutive days. Treated rats were sacrificed 24 hours after the last exposure. Several types of chromosomal aberrations were observed in the bone marrow. Incidences of chromatid gaps, isochromatid gaps, chromatid breaks, isochromatid breaks, rearrangements and exchanges, dicentric, rings, cells with more than one type of aberration per metaphase plate, and abnormal chromosome counts were significantly higher ( $p < 0.05$ ) in the exposed animals than they were in the controls.

In a similar experiment Embree (22) exposed groups of five male Long-Evans rats to 10, 25, 50, 250, or 1,000 ppm EtO in air. An additional group of five was exposed to

50 ppm. Treatment involved a single 4-hour exposure. The animals were bled 24 hours after treatment. The incidence of micronuclei in polychromatic erythrocytes from bone marrow of treated rats was higher than it was in the controls. This increase was significant for the two 50 ppm groups ( $p < 0.0025$ ) and for the 250 and 1000 ppm groups ( $p < 0.05$ ). A dose-response relationship was demonstrated.

Strekalova (80) administered a single oral dose of 9 mg/kg of EtO in water to two groups of six male rats. The animals were sacrificed after either 24 or 48 hours and bone marrow from the femur was examined for chromosomal rearrangements. The treated rats from both the 24- and 48-hour groups evidenced a higher incidence of chromosomal and chromatid bridges and fragments than did the controls. This increased incidence was significant after 24 hours ( $p < 0.001$ ) and after 48 hours ( $p < 0.002$ ).

Strekalova et al. (81) continuously exposed a group of 24 male white rats to air containing EtO at  $1.98 \pm 0.33$  ppm for 66 days. The animals were then maintained in uncontaminated air for 4 days before sacrifice. Spinal cord cells were examined and showed an increased incidence of chromosomal rearrangements in the treated rats at both exposure levels as compared to the controls. The statistical significance was not given and the rearrangements were not discussed.

Fomenko and Strekalova (26) observed the bone marrow cells of mongrel albino rats which were exposed to EtO by inhalation. Groups of six animals were continuously subjected to 0.55-1.65 ppm or 33 ppm EtO for 2, 4, 8, or 30 days. There was evidence of an increase in chromosomal aberrations that was dose and time dependent. As presented, the results do not allow statistical evaluation. The Office of Special Pesticide Reviews sent a memorandum to the Office of International Activities concerning this translation (11).

ii. *Dominant-lethal assays*. Embree (22) exposed 15 male Long-Evans rats to air containing 1000 ppm EtO for 4 hours. After a 24-hour recovery period, each treated male was placed with two virgin females which were replaced each week for 10 weeks. In matings from weeks 1, 2, 3, and 5, the mutagenic index (dead implants/total implants) of the EtO-treated males was significantly higher than that of controls ( $p < 0.05$ ).

Strekalova et al. (81) observed male white rats that were continuously exposed to EtO for 66 days. Twenty-four and 14 animals were maintained at levels of  $1.98 \pm 0.33$  ppm and at  $61.5 \pm 11.1$  ppm in air, respectively. Immediately following exposure the animals were allowed to mate with untreated females for 4 days. Mortality of the embryos resulting from mating of males exposed at the higher level was elevated at the  $p < 0.001$  level of significance, while the lower level of exposure also increased mortality at the  $p < 0.05$  level of significance.

iii. *Human mutagenic episode*. Ehrenberg (13) studied the lymphocytic effects in seven workers who were transiently exposed to a high concentration of EtO for 2 hours after an industrial accident involving an EtO spill. Since two of the seven workers were hospitalized with lung damage, Ehrenberg (66) estimated the level of exposure to be equivalent to 2 hours of continuous exposure to 1500 ppm. Eighteen months after-

\*Assuming totally independent events.

wards, peripheral blood lymphocytes were examined for chromosomal aberrations, including chromosomal translocations, gaps, breaks, and aneuploidy. When compared with 10 control subjects with no history of EtO exposure, the incidence of these aberrations was elevated ( $p < 0.05$ ).

2. *Ethylene chlorohydrin*.—(a) *Point (gene) mutations*.—i. *Microorganism studies*. Embree (22) placed a small amount of ECH on agar plates with *S. typhimurium* and tested it in the manner previously described. Only the TA 1535 strain, which had an increased incidence of reverse mutations, was significantly affected ( $p < 0.05$ ).

Malaville et al. (56) obtained positive results when they tested ECH at 0.4, 4, and 40  $\mu$ M/ml on strain TA 1530 in plate tests both with and without microsomal (mouse liver) activation. Metabolic activation enhanced the activity of ECH. There was a positive dose-response relationship. Positive results in this strain of bacteria show that ECH was inducing base-pair substitution mutations.

Voogd et al. (86) observed a significant ( $p < 0.05$ ) increase in the frequency of mutation in *Klebsiella pneumoniae* which were exposed to ECH in culture media lacking microsomal activation. This test organism is ordinarily dependent on an exogenous source of proline and uracil for growth. These mutants were apparently autotrophic revertants. Results indicate a dose-response correlation.

McCann et al. (58) observed reverse mutations at the histidine locus in *S. typhimurium* strain TA 100, and a weak response with TA 1535 by plate tests both with and without microsomal activation. The incidence of these ECH-induced revertants in TA 100 was enhanced by metabolic activation. The frequency of mutation increased with the dose in strain TA 100.

Rosenkranz et al. (71, 72) obtained a positive response with *S. typhimurium* strains TA 1530 and TA 1535 after treatment with ECH. This indicated a base-pair substitution mechanism for the mutagenic action of ECH. A dose-response correlation was demonstrated in strain TA 1530. *E. coli* (pol A1<sup>-</sup>) deficient in DNA polymerase also demonstrated a higher degree of inhibition when exposed to ECH than did the pol A<sup>+</sup> strain from which they were derived. This indicates that ECH is capable of interacting with DNA.

Rannug et al. (69) observed a significant ( $0.001 < p < 0.01$ ) increase of *S. typhimurium* strain TA 1535 mutants in a plate test with 1.0 M ECH. Chloroacetaldehyde, a possible metabolite of ECH, was shown to significantly ( $p < 0.001$ ) increase these mutations at 0.5 and 1.5 mM.

Hussain and Osterman-Golkar (37) calculated the genetic risk of chloroacetaldehyde from a dose-response curve of its induction of mutations in *E. coli*. This risk was defined as 30 mutants per  $10^6$  survivors per mM x hour.

Elmore et al. (23) reported that chloroacetaldehyde and ECH were mutagenic in a reversion (point mutation) test with *S. typhimurium* strains TA 1535 and TA 100 and in a DNA repair test with *Bacillus subtilis* DNA repair-deficient strains. This indicates a base-pair substitution mode of action. Dose-response curves were generated for these direct-acting mutagens. The effects were highly significant for chloroacetaldehyde.

ii. *Animal cell study*. Huberman et al. (36) detected no induction of 8-azaguanine and ouabain-resistant mutants among Chinese

hamster V79 cells which were exposed to ECH. However, a potential ECH metabolite, chloroacetaldehyde, showed positive results.

b. *Chromosomal effects*. In a cytogenetic study, Semenova et al. (75) placed albino rats in flowthrough inhalation chambers and exposed them to  $0.38 \pm 0.073$  ppm or  $3.2 \pm 0.097$  ppm for a period of 4 hours per day for as long as 120 days. Serial sacrifice and examination of bone marrow cells indicated a progressive, statistically significant increase ( $p < 0.05$ ) in chromosomal aberrations from the first through sixtieth day. The same effect was observed on the 120th day but it was less significant ( $p = 0.01$ ). Following the full regimen of exposure and a 2-week recovery period, there was still an effect ( $p = 0.1$ ).

3. *Ethylene glycol*. In a point (gene) mutation study, Embree (22) tested a small amount of EG on *S. typhimurium* strains TA 1535, TA 1537, and TA 1538 on agar plates without microsomal activation and found no revertants.

#### B. Reproductive Effects of Ethylene Oxide

40 CFR 162.11 (a)(3)(II)(B) provides that a rebuttable presumption shall arise if a pesticide "produces any other chronic or delayed toxic effect in test animals at any dosage up to a level, as determined by the Administrator, which is substantially higher than that to which humans can reasonably be anticipated to be exposed, taking into account ample margins of safety." Studies conducted with guinea pigs and rats indicate that EtO can adversely affect the male reproductive organs.

A study (20) in which male mice were exposed to air contaminated with radio-labeled EtO demonstrated residual radioactivity in the testes. In addition, male rats exposed to EtO in the air demonstrated affected germ cells as evidenced in each of two dominant lethal assays (22,81).

Hollingsworth et al. (33) observed atrophic effects on the testes of eight male guinea pigs which were exposed by inhalation to 357 ppm EtO in 123 seven-hour doses during a 176-day study. All animals survived, but appreciable degeneration of the testicular tubules and replacement fibrosis was noted. Hollingsworth also exposed the same number of guinea pigs to 204 ppm EtO in the same manner and observed a slight decrease in the weight of the testes. However, no histopathological effect was noted. In another test, 20 male rats which were exposed to 204 ppm EtO for 122 to 157 seven-hour periods during 176 to 226 days were noted to have small testes and slight degeneration of tubules. There was no evidence that withdrawal from exposure would allow restoration of the testicular structure. The authors also reported that there was no testicular histopathology or gross effect on guinea pigs or rats that were exposed to 113 ppm EtO in air. The exposure regimen consisted of 122 to 157 seven-hour periods during 176 to 226 days. No measure of fertility was taken in any of these tests.

In view of these findings, the Working Group has used 113 ppm as the no-observable-effect level (NEL) in assessing the margin of safety for humans.

In the only available epidemiological study mentioning the effects of EtO on the genital system, Joyner (45) examined 37 workers with an average of 10.7 years of continuous occupational exposure to 5 to 10 ppm EtO in the air. There were no statistically greater incidences of such genital disorders as benign prostatic hypertrophy,

acute prostatitis, spermatoceles, or seminomas of the testicle. However, no measure of reproductive capacity was taken.

There appear to be two populations at risk with respect to this potential adverse effect: 1) men who use this pesticide in the operation of EtO sterilization equipment on a routine basis and/or spend most of their time in the immediate area of the operation of this equipment, and 2) men who use EtO as a fumigant on a routine basis and/or often enter storage chambers shortly after such fumigation.

The most applicable level of inhalation exposure which is available for sterilization uses is commonly referred to as "a time-weighted average" (TWA). The most accurate indication of exposure to the EtO sterilization user is a TWA taken by continuously monitoring the breathing zone of the user throughout a typical work day and averaging the results. The Working Group is aware that, in practice, EtO sterilization equipment and conditions are many and varied. However, the Working Group has only four TWA's on which to base its exposure estimate. Three of the TWA's were provided by the U.S. Army's Environmental Hygiene Agency (27) and represented the "worst case" for individuals operating the machines tested. These TWA's, 16, 8, and 5 ppm, were well below the 50 ppm standard set by the Occupational Safety and Health Administration and currently in force for the workplace. The fourth TWA was supplied to EPA by a pesticide registrant (78). The breathing zone was continuously sampled to reflect actual use conditions. The TWA for this sterilization equipment was shown to be 0.16 ppm. The average of the four TWA's is approximately 7.3 ppm.

Assuming 7.3 ppm to be an approximate indication of the amount of EtO to which men using EtO sterilization equipment are continuously exposed, the Working Group compared this level to the NEL in male rats and guinea pigs (113 ppm).

In order to express these exposure levels as absorbed dose levels, compare these doses, and estimate the margin of safety, the working Group made certain assumptions: 1) rodents and man receive this dose of EtO primarily by inhalation; 2) the efficiency of uptake of the EtO by this route is the same in man as it is in rodents; and 3) the dose is proportional to the respired volume of EtO-contaminated air.

Once the relationship between exposure levels and absorbed dose levels is empirically established for a laboratory rodent, this relationship can be extrapolated to other laboratory rodents and humans. A series of experiments published by Ehrenberg et al. (20) provides the empirical data to determine the dose-exposure relationship for mice. In these experiments the EtO exposure level and duration of exposure varied. There were a total of seven values of exposure (ppm x hour) and absorbed dose during exposure ( $\mu$  mole/kg). These data were plotted and the slope was used to estimate the dose per unit of exposure times the duration of exposure in mice. The Working Group estimated that exposure to 1 ppm for a period of 1 hour gives mice an absorbed dose of 2.8  $\mu$  mole/kg. Although part of this dose may have been absorbed dermally, the Working Group assumed that most of the dose was absorbed by inhalation.

Using average body weights and respiratory rates (4), the Working Group estimated average respiratory intake to be as follows:

Humans (68.5 kg males) doing light work: 25.0 liter/hour/kg.  
Guinea pigs (466 g): 20.6 liter/hour/kg.  
Rats (113 g): 38.4 liter/hour/kg.  
Mice (20 g): 72.1 liter/hour/kg.

The Working Group then calculated the average daily doses based on the proportion of respired air of guinea pigs, rats, and men to the respired air of mice. The average daily doses administered to the guinea pigs and rats in the Hollingsworth study at the NEL (113 ppm) were estimated to be 28.2 and 52.6 mg/kg, respectively, whereas the daily dose to men doing light work while breathing air containing 7.3 ppm EtO was estimated to be 2.5 mg/kg. The difference between these estimated NEL doses in guinea pigs and rats and the estimated dose for men does not appear to provide an adequate margin of safety.

The Working Group is not aware of any data which quantify exposure to users of EtO fumigants. Labels of EtO fumigation products typically provide that fumigation be done only by experienced operators and that gas masks be worn prior to entering an area that is known to contain EtO vapors. However, the labels indicate that safe entry following fumigation does not require a gas mask unless there is a noticeable odor.

In the opinion of the Working Group, the warning based on noticeable odor is not sufficient to ensure that exposure to potentially hazardous levels of EtO will not occur. Based on published data (39), the median concentration of EtO which people can detect by smell is 700 ppm; the 95% confidence interval is 317 to 1540 ppm. The presence of other odorous ingredients in these pesticide products complicates precise utilization of these data. Sexton's review of medical and toxicological literature on EtO (76) also bears on this issue. He stated that, "When highly diluted with air ethylene oxide is only slightly disagreeable and is readily respirable. Prolonged exposure of this type is associated with early olfactory fatigue, and exposure may be prolonged to the point of considerable total absorption of ethylene oxide without warning."

Therefore, entry (e.g., loading and unloading) into the fumigation chambers and vaults between actual fumigation treatments may result in significant inhalation exposure to male fumigators. Although the Working Group is unable to quantify the amount of exposure, it is reasonable to anticipate that such exposure is too high in relation to the no-effect levels in rats and guinea pigs. Accordingly, a rebuttable presumption against registration has arisen against all pesticide products containing EtO.

The Working Group has also determined that dietary intake of stored food products (i.e., spices, copra, and black walnut meats) which have been fumigated with EtO does not appear to result in exposure to levels of EtO that might affect the gonads. An estimate of EtO ingestion that was based on actual EtO residue data was recently completed (60). Based on this analysis, the Working Group estimated that a 65-kg man would ingest approximately 0.0003 mg/kg/day. The Working Group concluded that there is an adequate margin of safety between the amount of EtO that might be ingested in stored food products and the estimated doses for which the Working Group

has calculated that there will be no effect (28.2 and 52.6 mg/kg/day in guinea pigs and rats, respectively).

#### IV. OTHER POSSIBLE CHRONIC OR DELAYED ADVERSE EFFECTS

EtO and its two principal degradation products, ECH and EG, have been identified in several studies as the cause of a number of other chronic effects. The available information, however, is insufficient to support a rebuttable presumption against EtO. The Working Group is aware that studies currently underway address some of these effects. However, the Working Group is seeking any and all information which might be available to aid the Agency in further assessments of these effects.

#### A. Oncogenic Effects

The Working Group referred all available data concerning oncogenicity to the Agency's Carcinogen Assessment Group (CAG) for review. A summary of the findings and conclusions from their report (2) is given below.

1. *Ethylene oxide*. There are few published oncogenic studies on EtO, although a 2-year study is now being conducted. The available experiments are reviewed below.

(a) *Human epidemiology study*. In a study of 37 operators at a plant producing EtO, Joyner (45) found no increased incidence of tumors in operators exposed to 5 to 10 ppm EtO. Three other operators who were exposed to EtO declined to participate in the study. All subjects were males who were 29 to 56 years old. The mean period of exposure for the group was 40 hours a week for 10.7 years. Operators were exposed to EtO for the following lengths of time: less than 5 years, 3; 5-10 years, 11; 10-15 years, 21; and more than 15 years, 2. This exposure estimate was based on current measurements and the assumption that the exposure had remained essentially the same since the plant process and equipment had been unchanged for 10 years.

Subjects were compared to a control group of 41 drawn from operators who worked in other production units at the plant and participated in the periodic physical exam program. Control group members had been employed at the plant for an average of 11.7 years. Controls were matched by age only. No attempt was made to analyze the exposure of the control group to other chemicals produced at the plant. There were no clinical signs of toxic effects in this group.

A complete history and physical examination was performed on each member of the study and control group. There was special emphasis on signs suggesting hepatic or renal toxicity. Laboratory tests including chest X-rays, ECG's, hemoglobin tests, and white and red blood counts were done. Medical records for each person were evaluated for complaints in the preceding 10 years and physicians' diagnoses in the previous 7 years. However, no attempt was made to control for possible biases introduced by variations in medical care or physician diagnoses.

Table 1 summarizes tumors found in the EtO operators and the control group during the 8-year period discussed in the study. Four operators who were exposed to EtO and six control group members had tumors. The health of the operators exposed to EtO was no worse than that of the controls.

TABLE 1.—Incidence of neoplasms among operators in an EtO plant, 1955-62<sup>1</sup>

Neoplasm	Number of operators with neoplasms <sup>2</sup>	
	Operators exposed to EtO	Control operators
Adenocarcinoma (bladder).....	1	0
Basal cell carcinoma (skin).....	0	2
Seminoma (testicle).....	0	1
Lipoma.....	1	0
Other benign neoplasms.....	2	3
Totals.....	4	6

<sup>1</sup>Data from Joyner (45).

<sup>2</sup>There were 37 operators who were exposed to EtO and 41 operators in the control group.

It should be noted that the study was designed to evaluate the overall health effects of EtO exposure; tumor incidences were only one aspect of that evaluation. The study group included only operators currently working in the plant. This introduces a possible bias in determining tumor incidence. Because exposed operators who had left the plant were not included, there is no way of knowing whether they developed tumors. Joyner reported that the records of eight former employees were reviewed but does not explain how the eight were selected. Clearly, such a sample can not be considered representative of the exposed population. Indeed, the sample could have systematically omitted those who, because of serious adverse effects from EtO exposure, left the plant.

(b) *Mouse Study*. Van Duuren et al. (84) used 8-week-old female Swiss-Milleron mice to study the effects of dermal exposure to EtO. The authors painted the clipped dorsal skin of 30 mice with approximately 100 mg of a 10 percent solution of EtO in acetone three times a week during their lifetime. Sixty mice were treated with acetone alone and 60 were untreated. Thirty positive controls were painted with a 2 percent solution of dibenz (a,h) anthracene (DBA) in acetone.

No tumors or skin irritation were noted on gross examination of the EtO-treated group. The median lifespan was 493 days. It is possible that the EtO could have boiled off the skin of the treated animals and thus would not have remained in contact with the skin to produce an effect.

Carcinomas were detected and confirmed microscopically on 90 percent (27 of 30) of the DBA-treated group, and were absent from control groups that were untreated or treated with acetone.

(c) *Rat Study*. Walpole et al. (87) tested various alkylating compounds on an unspecified strain of rat. A maximum total dose of 1 g/kg of EtO in arachis oil was administered subcutaneously to 12 rats for 94 days. The dosing schedule was not reported, nor were the age and sex of the animals. The rats were observed for their lifetime, and none of the 12 rats treated with EtO developed tumors.

In the same test, 8 of 12 rats infected with propane-1,2-epoxide developed sarcomas on the site of infection. These positive controls received a maximum total dose of 150 g/kg over 325 days and were observed for life.

2. *Ethylene Chlorohydrin*. (a) *Mouse Studies*. Homburger (34) conducted two studies of the oncogenic effects of ECH on mice.

In one study an injection site transfer was designed to shorten the latency period be-

tween the injection of the carcinogen and tumor development.

One hundred 7-week-old C57BL/6 male mice were subcutaneously injected in the groin with 1.2 mg ECH (the maximum tolerated dose) in 0.1 ml tricaprylin. The number and schedule of doses were not reported.

Five weeks after the injections, the injection sites were excised, pooled, and minced in 6 ml Ringer's solution. The tissue was divided into 25 equal portions, and each was injected into a mouse of the same age and strain as the primary host.

The same methodology was followed with positive and negative controls, which were treated with dibenzpyrene (25 mg) and tricaprylin (0.1 mg), respectively.

Eighteen weeks after the transfer of injection sites, all animals were sacrificed and gross autopsies were performed. No tumors were detected in the ECH-treated group (24 of 25 survived) or in any of the other five test groups. Tumors were induced in 96 percent of the positive controls within 17 weeks of the site transfer.

In another study, groups of 50 CF1 female mice and 50 A/He female mice were used to study the potential of ECH to induce lung adenomas.

One group of each strain of mice received a single intravenous injection of 1.2 mg ECH. Groups of 50 A/He and 50 CF1 mice were used as controls. Negative controls received 0.2 cc Ringer's solution. Positive controls received 0.05, 0.1, or 0.5 mg dibenzpyrene.

Another test group of 20 CF1 female mice received seven monthly injections of 1.2 mg ECH. Negative controls received a total of 1.4 ml Ringer's solution. No positive controls were used.

Mortality was low. Mice were sacrificed after 28 weeks. Their lungs were inflated with formaldehyde and inspected under a

dissecting microscope for tumors visible on the lung surfaces. Histological sections of some tumors were taken.

The tumor incidence in the two studies is shown in Table 2. There was no significant increase in tumors in the ECH-treated group compared to the controls.

1.4 ml Ringer's solution.....	2/18	11.1		

(b) *Rat Studies*. Mason et al. (57) used 344 four- to six-week-old Fisher rats to test ECH and EG. For each compound, 200 animals were divided into groups of 80, 60, 40, and 20 that contained equal numbers of females and males. Mason subcutaneously injected these animals with ECH in saline twice weekly for 52 weeks. Dose levels of ECH administered were 10.0, 3.0, 1.0, and 0.3 mg/kg, respectively. The maximum tolerated ECH dose determined earlier in the study was 30 mg/kg. There were negative and vehicle (0.25 ml saline) control groups containing 60 rats of each sex.

Mortality in the ECH-treated group was 2 percent at 12 months and 7.5 percent at 18 months; this was comparable to control mortality. All animals were sacrificed at 12 or 18 months, as planned, and complete autopsies were performed. No retardation in weight gain occurred during the study. Tumors were grouped by injection site and other sites including pituitary (adenoma), adrenal, blood (leukemia), mammary glands, and uterus. Except for total tumors, frequencies were not tabulated by dose level, but only by sex for the pooled treated group. Tumor incidence for all sites is shown in Table 3.

TABLE 3.—Tumor incidence in ECH-treated Fisher rats<sup>1</sup>

Compound/milligram	Dose, per kilogram	Tumor-bearing animals			
		Male		Female	
		Number	Percent	Number	Percent
ECH.....	10.0	1/40	3	7/40	18
	3.0	1/30	3	9/30	30
	1.0	1/20	5	4/20	20
	0.3	0/10	0	1/10	10
Negative control.....	0	5/60	8	9/60	15
Vehicle control (0.25 ml saline).....	0	3/60	5	9/60	15

<sup>1</sup>Data from Mason et al. (57).

<sup>2</sup>It was stated in the methods section and other places in the paper that there were 50 males and 50 females in each of the 2 control groups. However, this table and some others gave the number as 60 per sex for each control group. Percentages expressed in this table are based on groups of 60 rats.

Pituitary tumors occurred in 7 of 100 ECH-treated females (all dose levels) compared to 2 of 120 female controls ( $p=0.049$ ). This strain of rats frequently has a high incidence of pituitary tumors in untreated controls. Therefore, the slight increase noted in this study may not be related to the treatment. No significant increase in tumors occurred at other sites or at all sites combined. No increase in pituitary tumors was seen in males.

The positive controls were divided into four groups of 20 females and 20 males. The first two groups received single subcutaneous injections of 10 and 3.3 mg/kg nickel sulfide, respectively. The other two groups received the same doses of nickel sulfide by a single intramuscular injection in the thigh. Mortality was high: 75 percent at 12 months and 90 percent at 18 months. Tumor incidences among the animals in the positive control groups were not given.

Ambrose (5) administered ECH in the diet of 35 young weanling rats in concentrations ranging from 0.01 to 0.24 percent. One group of five rats that were fed only the regular diet served as controls. Treatment continued for 220 to 403 days. Autopsies and histopathological studies were conducted. No tumors were noted.

3. *Ethylene glycol*.—a. *Mouse Studies*. The two Homburger oncogenicity studies (34) which were described above also tested for the oncogenicity of EG.

In the injection site transfer study, the methodology and controls were the same as described above under ECH.

Each mouse was administered 26 mg EG. Fifteen of 26 EG-treated mice survived. (Ten mice in one cage were found dead 8 weeks after the sites were transferred. The carcasses were too autolyzed for study.) No tumors were reported in the EG-treated group.

In the single and repeated intravenous injection studies, each mouse was administered 26 mg EG per injection. The methodology and control groups were the same as in the ECH intravenous study. Tumor increases are shown in table 4. There was no significant increase in tumor induction in the EG-treated group as compared to the controls.

TABLE 4.—Lung tumors in female mice administered EG<sup>1</sup>

1.4 ml Ringer's solution.....	2/18	11.1		

<sup>1</sup>Data from Homburger (34).

Berenblum and Haran (7) painted 4- to 5-month-old female inbred Swiss mice with EG. Two groups of 20 mice each received single applications of EG and 70 applications of croton oil or paraffin as a secondary treatment. The other two groups of 20 mice received 12 applications of EG before being painted 70 times with croton oil or paraffin. There was a 4-week interval between the primary and secondary treatment. The dosing schedule for the two treatments was not stated. Fifteen mice that were painted with EG 12 times received no secondary treatment. The applications were made on about 1 square centimeter of skin. The animals were observed for at least 43 weeks. The 15 mice that were not treated with a promoter all survived and had no papillomas. Survival for the four groups receiving secondary treatment ranged from 90 to 100 percent. No papillomas developed in the mice treated with EG only and one developed in each of the two groups treated with EG and croton oil. None of the mice were administered croton oil alone.

Deringer (16) painted the clipped interscapular area of 2.5- to 3.5-month-old male and female mice with EG twice a week for their lifetime. The dosage was not reported. Half of the 68 mice treated did not have hair. The controls were not treated; 100 had hair and 86 did not. The median survival time for both the treated and control groups was 22 months. There was no increase in tumor induction in the EG-painted group as compared to the controls.

Reyniers et al. (70) observed tumor induction and toxic effects in a colony of inbred germ-free albino mice that were placed on corn cob bedding treated with EtO. It was not a controlled experiment. The treated bedding was introduced on December 15, 1961, and removed 150 days later on May 15, 1962. When the bedding was introduced, the colony consisted of 112 adult female, 79 adult male, and 10 suckling mice. The oldest animals of the colony were 605 days old, and four females were pregnant. No tumors were observed among an unspecified number of mice of different ages which were killed or died in 1961. The animals were free of polyoma viruses. However, following maintenance on EtO-treated corn cob bedding and gross or microscopic examination, 88 percent of the surviving females from 300 to 900 days old were found to have tumors (table 5). The tumors were of a wide variety of types including sarcomas, carcinomas, and lymphomas. They appeared from 153 to 194 days after exposure. The high rate of mortality among the male mice early in the exposure period precluded assessment of tumor formations.

According to the authors, "the only change in colony maintenance was the accidental introduction of corn cob bedding treated with EtO." Because other investigators had previously associated toxic effects with EG residues from bedding treated with EtO, the authors tested for and found EG in the EtO-treated bedding. However, they apparently did not attempt to determine whether other toxic compounds (e.g., EtO and ECH) were also present. Therefore, the data are not sufficient to identify the agent(s) responsible for tumor induction.

TABLE 5.—Tumor incidence in females before and after exposure to ground corn cob bedding treated with ethylene oxide<sup>1</sup>

Age, days	100-200	200-300	300-400	400-500	500-600	600-700	700-800	800-900	Total mice

<sup>1</sup>Data from Reyniers et al. (70).

Mason et al. (57) and described above were also used to test EG. The same methodology and control groups were used. Four dose groups received injections of 1,000, 300, 100, or 30 mg EG/kg. Mortality was 2 percent

after 12 months and 5 percent after 18 months. The tumor incidence for all sites combined is shown in table 6. The incidence of tumors in the mice treated with EG was not higher than that of the controls.

Vehicle control (0.25 saline).....		3/60	5	9/60	15

<sup>1</sup>Data from Mason et al. (57).

4. *Conclusions*. CAG has concluded that the information available is insufficient to judge the safety of EtO in regard to oncogenicity. Although most of the tests for oncogenicity have thus far been negative, further study of the possible oncogenicity of EtO is warranted for at least two reasons. First, CAG has concluded that EtO and its degradation product ECH are mutagens. There is a strong correlation between oncogenicity and mutagenicity. Secondly, chemicals which are structurally related to EtO have been reported to be oncogenic (2).

Following review of essentially the same data, the International Agency for Research on Cancer (38) similarly concluded: "Although no carcinogenic effect was observed, the data do not allow an evaluation."

The Ethylene Oxide Working Group concurs with CAG's conclusions and adds the following observations.

a. *Lymphatic leukemia*. Brewer et al. (13) presented data from Ehrenberg and Hallstrom that were described above. The occurrence of one case of lymphatic leukemia among the group of 31 occupationally exposed people compared with none in the control group of 26 may have occurred by chance. However, the working Group requests epidemiological data on this and other types of cancer incidence among people occupationally exposed to EtO.

b. *Positive Ames test*. EtO belongs to the class of compounds termed alkylating agents. Alkylating agents which have been shown to be positive mutagens by the Ames test are frequently carcinogens in mammals.

Recent data from the Stanford Research Institute (46) demonstrate that EtO was positive in the Ames test and had a positive dose-response relationship. This data has led the Working Group to suspect that EtO may also be an oncogen.

As previously noted, a carcinogen bioassay of EtO is underway. In addition, the New York University Medical Center is completing a long-term carcinogenicity study which includes ECH.

b. *Teratogenicity and fetotoxicity*.—1. *Ethylene chlorohydrin*.—a. *Avian study*. In 1974, Verrett (85) tested ECH for teratogenic and fetotoxic effects on chicken embryos by injecting the compound into the egg via the air cell. When the ECH was administered at 50, 25, 12.5, or 5 mg/kg following 96 hours of incubation, the incidence of teratogenicity and fetotoxicity collectively was significant at the  $p<0.05$  level for each of these doses compared to vehicle controls. There was a clear dose-response relationship.

b. *Mammalian study*. The positive result in chicken embryos prompted a study in mammals which was recently completed by Courtney (15). ECH did not produce fetal malformations in CD-1 mice whether administered in drinking water (10, 25, 50, 100, or 200 mg/kg/day) or by inhalation (50 or 100 mg/kg/day). The 100 mg/kg/day was the maximum tolerated dose for administration by intubation. The Working Group regards the results in mice to be a more reliable test of this possible effect. Therefore, there is no indication that ECH poses

human risk as to teratogenicity and fetotoxicity.

2. *Ethylene oxide*. The Working Group is not aware of any study on the teratogenicity or fetotoxicity of EtO. Because a large number of EtO sterilization equipment operators are likely to be women of childbearing age, the Working Group believes that teratogenicity and fetotoxicity testing in mammals should be conducted.

C. *Neurotoxic effects*. The following studies suggest that EtO may cause adverse effects on the nervous system. However, more information is needed in order to assess the histopathology of the nervous system of animals exposed to EtO. It is extremely important that the Agency receive all data concerning possible neuropathy among users of EtO.

1. *Ethylene oxide*. Joyner (45) examined 37 workers who had been occupationally exposed to 5-10 ppm EtO for an average of 10.7 years. There were no statistically significant increased incidences of the several nervous system diseases observed in the exposed group compared to the control group.

Hollingsworth et al. (33) studied the effects of EtO on various species by exposing the animals to EtO-contaminated air for 7 hours a day, 5 days a week. Rats, rabbits, and a monkey exposed to 357 ppm (0.64 mg/liter) EtO for up to 85 days developed impairment of sensory and motor functions of the lumbar and sacral region and paralysis and muscular atrophy of the hind limbs. Each of two pairs of monkeys exposed to 357 ppm for 60 days and 140 days, respectively, also exhibited these impairments. In addition, their reflexes were either poor or absent and their sensation of pain in their hind quarters was greatly reduced. All these effects developed late in the exposure regimen and were reversible. The normal cremasteric reflex was elicited, and the test for the extensor reflex of the soles of the hind feet was negative. These signs are consistent with the existence of a peripheral neuropathy. No micropathology was evident. Guinea pigs exposed to 357 ppm EtO for 176 days did not appear to develop neurological impairment.

Two monkeys exposed to 204 ppm EtO for 176-226 days displayed neurological signs qualitatively similar to those just described with the exception that a positive Babinski's sign was elicited. This suggests that there was a disorder of the pyramidal tract in addition to a peripheral neuropathy. At the same level of exposure, rabbits developed slight to extreme paralysis of the rear legs. No impairment of the nervous system was observed in rats and guinea pigs exposed to 204 ppm EtO in the air. None of the species tested exhibited neurological abnormalities at 113 ppm or 49 ppm.

Similar effects have been observed in humans following misuse of EtO. During a less than 1-year period in 1975-76, there were three EtO sterilizer users hospitalized with neuropathy of the lower limbs. Clinical observations and followup indicated that these effects were reversible (42).

2. *Ethylene Chlorohydrin*. Kovyazin (50) reported that mongrel male rats exposed to 10±0.4 mg/m<sup>3</sup> ECH for 4 months developed signs indicating damage to the central nervous system (CNS). "Vegetative" and "microorganic disorders" of the CNS were observed in workers (18.9 percent of 113) who had 2 to 7 years of exposure to 4 to 10 mg/m<sup>3</sup> ECH.

#### D. Sensitivity and Hypersensitivity

EtO sterilization residues, collectively, may be a serious problem to hypersensitive people (see anaphylactic reaction reported by Poothullil et al. (67) and described below). Because of the nature of this specific exposure, the Working Group is referring this finding to FDA.

Three of the eight people tested showed sensitivity (77) with almost the same latency period. Data pertaining to ECH and EG that are presented in this part indicate that these degradation products do not independently elicit this delayed toxic effect.

1. *Ethylene Oxide*. Woodard et al. (90) administered EtO dermally (0.5 ml of 1 percent) or intracutaneously (0.5 ml of 0.1 percent) to separate groups of 10 male guinea pigs three times a week for 3 weeks. Results were negative.

Sexton et al. (77) exposed the forearms of eight human subjects to aqueous solutions of EtO. Following a varying regimen of topical dermal exposure to between 1 and 100 percent EtO for between 18 seconds and 60 minutes, three cases of sensitivity were observed (two after 19 days and one after 20 days). This was evidenced by pruritus and erythema with slight edema.

Thiess (82) applied 1 percent EtO to the skin of 30 production plant workers who had an average of 10.4 years of occupational exposure. There was no evidence of sensitization.

Royce et al. (74) observed that occupational dermatitis was caused by EtO. The Working Group requests information as to the frequency of this condition among users of EtO.

2. *Ethylene Chlorohydrin*. Lawrence et al. (54) intradermally injected groups of five Hartley strain guinea pigs (0.1 ml of a 10 percent ECH solution or 0.1 ml of a 5 percent ECH solution) with Freund's complete adjuvant. After 1 week, a 10 percent ECH solution was applied topically. After an additional 2 weeks, ECH was applied topically and an occluding bandage was attached for 1 day. Results were negative.

Woodard et al. (90) administered ECH dermally (0.5 ml of a 1 percent solution) or intracutaneously (0.5 ml of a 0.1 percent solution) to separate groups of 10 male guinea pigs three times a week for 3 weeks. Results were negative.

3. *Ethylene Glycol*. Woodard et al. (90) also administered EG as described above and obtained negative results.

4. *EtO Sterilization Residues*. Poothullil et al. (67) reported an anaphylactic reaction in a patient which they attributed to EtO residues from a kidney machine sterilized with EtO. The Working Group is referring this information to FDA.

#### E. Reproductive Effects of Ethylene Glycol

The information summarized in this part suggests a possible link between exposure to EG and decreased fertility in mice. However, the levels administered were either extremely high or lacked quantification. The Working Group noted the dramatic change in fertility of the mouse colony as well as the lack of experimental design in Reyniers' study.

Elis et al. (21) administered EG orally (0.4 or 0.1 percent of the parenteral LD<sub>50</sub>) to mice for 18 days. When compared to negative controls, both groups showed a marked decrease in the number of newborns per exposed female.

Reyniers et al. (70) observed inbred germ-free albino mice that were accidentally ex-

posed to EtO-treated corn cob bedding. They noted that the colony failed to reproduce despite increased matings. This trend was established prior to the incidence of a high level of mortality among males which developed approximately 4.5 months from the beginning of maintenance on the treated bedding. The population included 112 females and 79 males with a demonstrated history of successful matings.

Blood (10) administered 0.2 and 0.5 percent EG in diets of two male and one female rhesus monkeys, respectively, for 3 years. There were no histopathologic effects in the testes or ovaries.

#### F. Hematological Effects

Available data indicate that EtO, ECH, and EG may cause certain effects in blood.

1. *Ethylene Oxide*. Ehrenberg and Hallstrom (13) examined 31 people occupationally exposed to 1 ppm EtO in air (67) for an average of 15 years. Compared with a control group of 26, the lymphocyte counts were significantly elevated at the 0.05 > p > 0.001 level. There were also three cases of anisocytosis and one case of lymphatic leukemia in the exposed group and none in the controls. This latter effect is more fully discussed in the section on oncogenicity.

Short-term EtO exposure to rats via intraperitoneal injection or inhalation (13) showed the opposite effect: significantly decreased lymphocyte counts. This result followed administration of 50 mg EtO per kg of body weight in a single dose and 3 hours of exposure to 850 mg EtO per cubic meter of air, respectively.

Hollingsworth et al. (33) observed lymphocytosis in humans after excessive acute exposure to EtO vapor.

Joyner (45) reported a considerable elevation in white blood cell counts in people exposed to EtO for an average of 10.7 years. After assuming that there is a standard deviation of 1,800 white blood cells per cubic millimeter or a coefficient of variation of 30 percent, Ehrenberg (20) described Joyner's averages as highly significant. However, Union Carbide has now submitted the raw data which indicate the mean values were in arithmetic error and that there was no effect (43).

2. *Ethylene Chlorohydrin*. Woodard (90) observed an increased leukocyte count in rats after they were subcutaneously injected with 3 to 27 mg ECH/kg for 30 days.

Lawrence et al. (54) observed a significant increase in rat lymphocytes after the animals were intraperitoneally injected with 12.8 mg ECH/kg three times a week for 3 months.

Oser et al. (65) administered 30, 45, or 67.5 mg ECH/kg body weight/day to weanling albino rats (FDR strain) for 42 and 90 days. Total and differential leukocyte counts were not affected in any group. This blood parameter was also unaffected in pure-bred beagle dogs maintained for 90 days on 600, 900, or 1,350 ppm ECH in the diet. In addition, monkeys (*Macaca mulatta*) administered 30, 45, or 62.5 mg ECH per kg body weight per day showed considerable hematological variation that was within the normal range.

\*These observations are listed under EG because it was present in the bedding material. The levels at which EG was present were not indicated and the bedding was not analyzed for EtO or ECH.

3. *Ethylene Glycol*. Allen (3) reported hemorrhagic diathesis in several strains of male mice after they were maintained for 6 months on pine shavings sterilized with EtO. Reyniers et al. (70) also noted hemorrhaging in male mice maintained on EtO-treated corn cob bedding.

Kozlenchikov (51) reported leukocytosis in all 48 observed humans who ingested large quantities of EG in a short period of time.

Woodard (90) reported an elevated leukocyte count in rats and increased hematopoiesis in dogs that were subcutaneously injected with from 50 to 450 mg EG/kg for 30 days.

Moriarty et al. (61) noted highly elevated white blood cell counts in humans that had accidentally ingested EG.

#### APPENDIX A.—SPECIFIC CLASSES OF ITEMS STERILIZED WITH ET O WITHIN HOSPITALS OR HEALTH CARE FACILITIES

Anesthesia equipment (masks, bags, tubing, and breathing circuits).

Camera, photographic equipment, lenses, and lamps.

Catheters.

Diagnostic equipment (X-ray cassettes, blood pressure cuffs, and stethoscopes).

Fiberscope (including broncho-, duodeno-, gastrointestinal-, and laparoscopes).

Implantable prosthetic devices.

Laboratory equipment (microscope, endotracheal tube, elastic bandage, hemodialysis coil, venoclysis set, thermometers, PVC oxygen tents, incubators, resuscitation equipment, foam and floatation pads, sigmoidoscope specula, epidural cannula, tracheostomy tube, gun rubbermouth prop and dental dam, various syringes including ear).

Respiratory therapy equipment (nebulizer bacteria filters, respirator tubing, spirometer, mask, heart-lung oxygenator machines, humidifier, electronic nebulizer).

Surgical equipment (skin scribe pen, nerve locator/stimulator, mercury-filled equipment, electronic defibrillator equipment, cautery and electrosurgical equipment, cryoextractor, air instrument hand pieces and accessories, air supply hose, eye knives).

Surgical supplies (examination glove and finger cots, oral adhesive bandage, gelfoam, endospiral tube, tracheostomy tube, nasal airway tube, tape, sutures (catgut, silk, cotton, and nylon) ampules, vials, and stoppers/caps/closures).

Telescopic instruments (broncho- and cystoscopes, electrotomes, and endo-, ophthalmic-, and proctoscopes).

Transducers (pressure, blood flow, and associated cable).

Tubing (natural rubber, polyethylene, polyvinylchloride, latex rubber).

Miscellaneous (dilators, electric cords, hair clippers, pumps, motors, and items from isolation rooms, such as books, toys, blankets, furniture, phones, and TV sets).

Source: Department of Health, Education, and Welfare.

#### APPENDIX B.—SECTION 24(c) REGISTRATIONS OF PRODUCTS CONTAINING ETHYLENE OXIDE

(1) NJ-770003 (EPA SLN No.); registered to: New Jersey Department of Agriculture; treatment: bee equipment/bee diseases; issued: March 21, 1977; product: Carboxide (10 percent Ethylene Oxide); EPA Reg. No. 10330-6.

(2) WV-770004 (EPA SLN No.); registered to: West Virginia Department of Agriculture; treatment: bee equipment/foulbrood disease; issued: July 13, 1977; product: Oxidcarb (No EPA Reg. No.—new product).

(3) VA-760014 (EPA SLN No.); registered to: Virginia Department of Agriculture and Commerce; treatment: For control of *Bacillus* larvae or other pests of honeybees; issued: December 10, 1976; product: Bee Gas Sterilant Mix (No EPA Reg. No.—new product).

## ATLANTIC BILLFISHES AND SHARKS

## Preliminary Fishery Management Plan

In accordance with the Fishery Conservation and Management Act of 1976 ("the Act"), the Secretary of Commerce has been notified by the Secretary of State that Cuba has submitted an application to fish for sharks with longline gear within the fishery conservation zone (FCZ) off the Atlantic Coast. The Secretary has determined that the fishery management plans for Atlantic billfishes and sharks now being prepared by several Regional Fishery Management Councils, pursuant to Title III of the Act, will not be ready for implementation during 1978 and, therefore, has prepared the Preliminary Fishery Management Plan (PMP) Atlantic Billfishes and Sharks in accordance with section 201(g) of the Act.

A notice of availability of the final environmental impact statement on the proposed implementation of the PMP was published in the FEDERAL REGISTER on November 4, 1977 (42 FR 57716). The PMP has been approved under appropriate delegations of authority from the Secretary of Commerce to the Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration.

The PMP contains conservation and management measures applicable to foreign fishing for billfishes and sharks in the FCZ in the Atlantic, the Gulf of Mexico, and the Caribbean, and, when implemented, shall remain in effect until superseded by an approved and implemented fishery management plan(s).

Proposed implementing regulations to govern foreign fishing for billfishes and sharks under this PMP were published in the FEDERAL REGISTER on January 24, 1978, for public comment. All comments received by February 20, 1978, will be considered in preparing final regulations. Copies of the PMP, final environmental impact statement, and proposed regulations are available for public inspection at the following locations:

Environmental Science Information Center Library, Page Building 2, Room 193, 3300 Whitehaven Street NW., Washington, D.C. 20235.

## I. INTRODUCTION

This document presents a preliminary fishery management plan for Atlantic billfishes and sharks describing the possible effects on human environment of implementing the management plan. The preliminary management plan has been prepared under authority of the Fishery Conservation and Management Act of 1976 (FCMA) and a Final Environmental Impact Statement has been prepared in accordance with the National Environmental Policy Act of 1969 (NEPA).

NEPA sets forth the strategy of the Congress to achieve coordination of Federal activities and environmental consideration. NEPA's basic purpose is to ensure that Federal Officials weigh and give appropriate consideration to environmental values in policy formulation, decisionmaking, and administrative actions, in addition to technical and economic considerations. Section 102(2)(C) of NEPA requires preparation of a detailed environmental impact statement in the case of major Federal actions that may significantly affect the quality of the human environment.

The Fishery Conservation and Management Act of 1976 (P.L. 94-265) provides for the conservation and management of fishery resources of the United States by establishing a fishery conservation zone of 200 nautical miles, within which the United States has exclusive management authority over all fishery resources except highly migratory species of tunas. The Act calls for the preparation and implementation of fishery management plans, through which the objectives of a National Fishery Management Program may be accomplished.

Although the Act exempts tunas from the expansion of U.S. jurisdiction over fisheries resources, the Act does define "fishing" to include any "activity which can reasonably be expected to result in the catching, taking, or harvesting of fish" (Sec. 3(10)). Since billfish and sharks fall within the definition of "fish" (Sec. 3(6)), and the Act does not provide an exemption for incidental take, billfish and sharks taken incidental

to the catch of tuna by foreign vessels can be regulated within the FCZ.

The fishery management plans provide the basis for regulating harvest, predicated on scientific information and involving the needs of the States, the commercial fishing industry, recreational groups, consumers, environmental organizations, and other interested parties. In essence, the allowable catch of any fishery resource will be based on the optimum yield from that resource.

Foreign nations will be allowed to take only that portion of the optimum yield which cannot be harvested by U.S. vessels. The Act further outlines a specific application, licensing, permitting, and enforcement procedure regarding the participation of foreign nations in any U.S. fishery.

## II. DESCRIPTION OF THE PROPOSED ACTION

## A. FISHERY MANAGEMENT UNDER EXTENDED JURISDICTION

The Fishery Conservation and Management Act provides that the Secretary of Commerce must prepare preliminary fishery management plans when applications are received from foreign nations for permission to fish in the new fishery conservation zone, provided that no fishery management plan will be prepared by a regional fishery management council prior to March 1, 1977. This document is such a preliminary fishery management plan.

A preliminary management plan describes the fishery, provides a preliminary estimate of the optimum yield, the U.S. capacity, and the total allowable level of foreign fishing (if any). In addition, the preliminary plan contains permit requirements for foreign fishing vessels, as well as data reporting procedures that must be met during fishing activities.

Preliminary management plans become effective March 1, 1977 or thereafter, and remain in effect until superseded by approved Regional Fishery Management Council plans or Secretarial plans. Regulations implementing preliminary management plans may be promulgated by the Secretary.

A foreign nation begins entry into a U.S. fishery through the signing of a Governing International Fishery Agreement prior to making formal application for fishing rights. This agreement acknowledges the exclusive fishery management authority of the United States and forms a binding commitment on that nation to comply with the terms and conditions specified under the Act.

The Secretary of State, in cooperation with the Secretary of Commerce, determines that allocation of the total allowable surplus the applicant will receive.

## B. ENVIRONMENTAL SETTING

## 1. Geophysical Setting

Fishing for billfishes and sharks in the Gulf of Mexico and Atlantic Ocean is mostly in oceanic waters varying in depth from 100 meters to well over 1,000. Bottom topography plays a relatively unimportant role since the fishery is essentially a surface fishery. However, canyons, seamounts, and other major geographical configurations are distinctive features in the area where the fishery is most intense.

## 2. Biological Systems

The open ocean pelagic environment is inhabited by predators such as tunas, bill-

fishes and sharks. Other important sport fish, however, are found in association with tunas, billfishes, and sharks. These include dolphin-fish (*Coryphaena hippurus*), wahoo (*Acanthocybium solanderi*), king mackerel (*Scomberomorus cavalla*) and great barracuda (*Sphyrna barracuda*). The principal species taken by the Atlantic pelagic longline fishery are listed on page 4. Except possibly for some mid-water fishes or some of the squids, no other resource presently of equal commercial importance exists in the same area or at the same seasons as these pelagic fishes. Marine mammals are rarely associated with billfishes.

## LIST OF PRINCIPAL SPECIES TAKEN BY THE ATLANTIC PELAGIC LONGLINE FISHERY

## TUNAS

Yellowfin tuna, *Thunnus albacares*.  
Albacore, *Thunnus alalunga*.  
Bluefin tuna, *Thunnus thynnus*.  
Bigeye tuna, *Thunnus obesus*.  
Skipjack tuna, *Euthynnus pelamis*.  
Blackfin tuna, *Thunnus atlanticus*.

## BILLFISHES

Sailfish, *Istiophorus platypterus*.  
Blue marlin, *Makaira nigricans*.  
White marlin, *Tetrapturus albidus*.  
Longbill spearfish, *Tetrapturus pfluegeri*.  
Swordfish, *Xiphias gladius*.

## SHARKS

Longfin mako, *Isurus paucus*.  
Blue shark, *Prionace glauca*.  
Shortfin mako shark, *Isurus oxyrinchus*.  
Night shark, *Hypoprion signatus*.  
Oceanic white tip shark, *Carcharhinus longimanus*.  
Scalloped hammerhead shark, *Sphyrna lewini*.  
Silky shark, *Carcharhinus falciformis*.  
Thresher shark, *Alopias vulpinus*.  
Tiger shark, *Galeocerdo cuvieri*.  
Bignose shark, *Carcharhinus altimus*.  
Porbeagle shark, *Lamna nasus*.  
Spinner shark, *Carcharhinus maculipinnis*.  
Bigeye thresher shark, *Alopias superciliosus*.  
Great hammerhead shark, *Sphyrna mokarran*.  
Smooth hammerhead shark, *Sphyrna zygaena*.  
Galapagos shark, *Carcharhinus galapagensis*.

## OTHERS

Dolphin, *Coryphaena hippurus*.  
King mackerel, *Scomberomorus cavalla*.  
Wahoo, *Acanthocybium solanderi*.  
Great barracuda, *Sphyrna barracuda*.

## 3. Social and Economic Setting

Although a variety of species are caught by the pelagic foreign longline fishery, tunas and billfishes are of primary importance to the United States, and sharks are of increasing importance. The recommendations of this plan are made primarily with respect to management requirements for billfishes and sharks, but the recommendations are consistent with the requirements for other fishes associated with tunas, bill-

Any non-tuna species (e.g., dolphin, wahoo, etc.) not listed as being covered by this plan or other plans are prohibited species under Section 611.13 of the Foreign Fishing Regulations published in the FEDERAL REGISTER November 28, 1977, Volume 42, No. 228.

## NOTICES

fishes and sharks. The management requirements of tuna are not addressed in the plan, since highly migratory species are excluded from U.S. management authority by the Fishery Conservation and Management Act.

Billfishes and sharks are among the most sought after targets of the deep-sea angler. Consequently, a great deal of attention is focused on these fishes by anglers and conservation groups. Although billfishes (with the exception of swordfish) are not commonly utilized for food along the Atlantic and Gulf coasts, they are desirable as food in the Caribbean and frequently command a high price. Billfishes and sharks are also a significant and valuable by-catch of the tuna longline fishery. Tuna longline fisheries in the Fishery Conservation Zone (FCZ) of the United States are carried out primarily by Japan. South Korea and Taiwan also have tuna longline fleets in the Atlantic, but presently fish mainly in the equatorial and south temperate oceans.

The U.S. swordfish fishery, although relatively small, is a valuable fishery in terms of price-per-unit-catch. One of the restraining factors on the domestic swordfish fishery is the present Food and Drug Administration (FDA) restriction on the interstate sale of swordfish containing more than 0.5 parts per million mercury. There is some evidence, however, that despite these restrictions, a considerable amount of swordfish is transported from southern landing areas to metropolitan markets in the northeastern United States where it commands a high price. Many of these landings are unreported and there are few accurate data on landings of swordfish in Canada or the United States. Undoubtedly, any easing or removal of present FDA restrictions would result in a dramatic expansion of the fishery and possible rapid declines in catch-per-unit-effort, average individual size, and economic return (Caddy, 1976). Swordfish are the target of the Canadian longline fishery off the New England coast of the United States.

Sportfishing for sharks is increasing rapidly in popularity. Shark fishing does not require a large initial investment and sharks are readily available along most coastal areas of the United States. Fishing for sharks is particularly popular off the eastern United States where organized shark fishing tournaments and shark fishing clubs are numerous.

## 4. Relevant Problems and Issues

Both foreign and domestic fishermen utilize billfishes and sharks in the Fishery Conservation Zone, but the stocks of these species also extend outside the zone. In addition, there is a history of conflict between foreign and domestic fishermen who occupy the same fishing grounds.

Other problems include the prevention of overfishing of the total stocks and the establishment of an optimum yield for the FCZ. One of the major problems in the billfish fishery is lack of information on the status of stocks. The Japanese catch and effort data (Table 1, Figures 1, 2, 3, 4) suggest changes in the abundance of billfish stocks, yet the adequacy of these data for determining the significance of these changes is in question because for the most part, the billfish catch is incidental to the directed fishery for tunas. The management recommendations in this plan are designed to minimize conflict between domestic and foreign users, encourage development of an international management regime, and maintain availability of billfishes and

maintain availability of billfishes and sharks to the expanding U.S. fisheries.

#### C. THE PRELIMINARY FISHERY MANAGEMENT PLAN

##### 1. Preliminary Description of Fishery

a. Areas and stocks involved: The fishery for billfishes and sharks in the Atlantic Ocean and adjacent seas\* is conducted primarily by those nations that maintain longline fleets. The foreign longline fishery operates throughout the entire range of all of the Atlantic billfishes. Wise and Davis (1973) show the distribution of billfishes in the area of the Japanese longline fishery.

Within the FCZ the main concentration of longline fishing effort is in the northern Gulf of Mexico in the spring and summer and off northeastern United States in summer and early fall as determined from published Japanese fishing records. Foreign longliners also fish within the FCZ off Puerto Rico but their effort and the catch of billfishes are minimal.

There is a small but growing longline fishery for swordfish by Canada and the United States off the New England coast in the summer. Fishing by U.S. vessels extends into the Gulf of Mexico and off the east coast of Florida during the winter months. Since 1975, Florida fishermen, including some of the ones displaced from the U.S. fishery for spiny lobsters in the Bahamas, have fished for swordfish off Florida. Both commercial and recreational fishermen are involved in this fishery. There is increasing interest and activity in fishing for swordfish in the Gulf of Mexico and along the South Atlantic coast of the U.S. The swordfish fishery is a night fishery and the catch of other billfishes is minimal.

Off the Gulf and Atlantic coasts of the United States there is a directed domestic sport fishery for billfishes operating within 200 miles of the coast. In the 1950's sport fishing for billfishes was concentrated in only a few areas along the Atlantic coast. Sport fishing in the Gulf of Mexico, for example, was almost nonexistent. In recent years, however, newer and faster fishing boats have provided more opportunities to fish for billfishes in areas where previously no fishing took place. Now, sport fishing for billfishes takes place from every state along the Atlantic and Gulf coasts south of Massachusetts as well as from Puerto Rico and the U.S. Virgin Islands (Austin, et al., 1976). Anglers from the United States also fish extensively in foreign waters with their own vessels as well as in chartered vessels of the host nation.

The sailfish is primarily a coastal species, while the spearfish and the two marlins are more oceanic in their habitat. The swordfish ranges throughout both areas but is probably found in greater concentrations relatively near land masses. In the western Atlantic there are apparently two stocks of blue marlin; one in the South Atlantic and one in the North Atlantic (Mather, Jones, and Beardsley, 1972). The stocks of white marlin also appear to be separate in the North and South Atlantic based on longline catch records and tag returns. Tag return data also suggest that there may be two or more stocks in the North Atlantic; one summering off the mid-Atlantic coast of the

\*Unless otherwise noted, the term Atlantic includes the Caribbean Sea and Gulf of Mexico.

United States and the other in the Gulf of Mexico. Both of these groups apparently spend the winter off Venezuela (Mather et al., 1972). Tag returns from sailfish show mostly localized movements and relatively few long distance migrations. It is likely that separate stocks are present in the western halves of the North and South Atlantic although further partitioning with existing data is impossible. Nothing is known about the stock structure of the longbill spearfish. There is some evidence, although inconclusive, that separate races or sub-stocks of swordfish occur in the western North Atlantic. Beckett (1974) stated that although average size and catch rates in individual 1°-square areas dropped markedly after several seasons' fishing, expansion of fishing into adjacent unfished areas subsequently yielded larger fish and higher catch rates. In addition, slight differences in morphometric measurements have been detected, especially between fish from Georges and Grand Banks (Caddy, 1976).

Pelagic sharks have been taken for many years by sports fishermen from Maine to Texas. In this area, at least 20 species which exceed 100 pounds when fully grown are taken by anglers (J. Casey, NMFS, pers. comm.). Gentle (Masters Thesis, Univ. of Miami, 1977) lists sharks as one of the sport fishes of primary interest to fishermen on charterboats in Dade County, Florida. There is also a growing interest in recreational fishing for sharks throughout their range. Blue, mako, porbeagle, blacktip, silky, and dusky sharks are among the species most highly prized by recreational fishermen.

Meaningful stock assessment for shark populations in the area of concern is difficult for a variety of reasons. (1) There has never been a directed fishery on sharks sizeable enough to produce landings which might reflect the potential sustainable yield—most shark catches have been made incidental to other fisheries. (2) Many, probably most, of the sharks taken as incidental catches in U.S. fisheries have been discarded. In the era when shark livers were valued as vitamin sources (1938-50) livers were extracted at sea and the carcasses discarded. (3) Sharks taken in directed fisheries for use in manufacturing shark skin leather represented only small marginal operations at Salerno, Key West, and Marco, Florida, and in a few other areas.

b. Statistical history of exploitation: Prior to the entry of Japanese longline vessels into the Atlantic in 1956, the only fisheries for billfishes in the western Atlantic, other than sport fishing and some swordfish harpooning, were small subsistence fisheries throughout the Caribbean and off South America. Even sport fishing was limited to a few charterboats and a relatively small number of private vessels. In 1956 the Japanese first began longlining in the Atlantic and rapidly expanded their efforts; in 1965 they set almost 100 million hooks and caught almost 300,000 billfishes. The Japanese effort diminished considerably in the late 1960's and early 1970's. The entry of Cuba, South Korea, Taiwan, and Venezuela into the fishery more than made up for the decrease in Japanese effort (Kikawa and Honma, 1975). Table 1 shows the total catch of billfishes and the fishing effort in the entire Atlantic Ocean by the Japanese fleet from 1956 through 1974. The category sailfish includes the spearfishes since the Japanese do not discriminate between the two or more species. However, there is some evi-

dence that most of the catch consists of spearfishes because the sailfish is mainly a coastal species and for the most part stays out of the range of high-seas longline operations. This is substantiated by a lack of tag returns of sailfish from commercial longliners. Table 2, taken from Kikawa and Honma (1975), shows the longline catch of billfishes (excluding swordfish) by countries other than Japan; fishing effort is not available for these vessels. However, vessels of South Korea and Taiwan did not fish within the U.S. Fishery Conservation Zone. Foreign (Japanese, South Korea, and Taiwanese) vessels take about 6% of their total billfish catch within the FCZ (Tables 1,2,12). It was necessary to estimate this figure, since the catches are reported by 5°-squares which do not conform exactly to the boundaries of the FCZ.

The swordfish fishery was initially a U.S. and Canadian harpoon fishery operating primarily off New England and the maritime provinces of Canada. Catches ranged between 725-2,800 metric tons up until 1963 when the longline method was introduced and landings went to almost 10,000 tons (Table 3). Landings began to decline steadily to a low of about 32 tons in 1971, a level prompted by the increasing concern and enforcement of the ban of swordfish containing mercury levels greater than 0.5 parts per million. However, catches have begun to increase since then.

Although it was not possible to estimate the foreign catches of sharks within the FCZ, there have been significant U.S. recreational catches of sharks documented for the FCZ since 1965 (Deuel and Clark, 1968; Deuel, 1973).

(c) Significance of the historic domestic fishery: The development of the U.S. sport fishery for billfishes and sharks in the Atlantic is well documented in various books and popular articles. The first billfish taken on rod and reel sport fishing gear was caught off Miami, Florida, some time around 1900. Since then the development of fishing gear, boats, techniques, and the expansion of both the number of anglers (See II C e (1), page 13) and the fishing grounds have been rapid. These activities have economic significance for local communities on the Atlantic Coast.

Fishing for billfishes is considered by most fishermen to be the ultimate test in saltwater sport fishing and therefore has developed a charisma and aura of grandeur about it that has been further enhanced by the writings of Hemingway, Zane Grey, and others. Partly because of this, the capture of billfishes by other than anglers for purposes other than the pure excitement of catching a billfish is viewed with disfavor by the sport fishing community. Competition for the available fish is increasing within the sport fishery itself and unsuccessful fishing days are often blamed on overfishing by foreign longline fleets.

d. Types and numbers of vessels employed: (1) Domestic.

In the U.S. sport fishery, billfishes and sharks are caught from a variety of vessels. Generally, vessels are from 20 to 60 feet long and the method of power ranges from outboard engines to large diesels. Marlin fishing, as opposed to sailfish fishing, usually requires a larger vessel with an inboard diesel engine because of the distance that has to be traveled to reach suitable fishing grounds. In many areas off the east and Gulf coasts of the United States, productive marlin waters may be as much as 60-75

miles from shore, and sea conditions are frequently too rough for small vessels. Sailfish and sharks, however, are frequently caught within sight of land and are therefore well within range of small outboard powered vessels. Off the southeast Florida coast from Key West to Stuart, for example, large numbers of sailfish and some white marlin, blue marlin, and swordfish are caught each year by fishermen in outboard-powered vessels 16-25 feet long.

A 1968 survey of recreational fishermen from Massachusetts to Texas estimated that 2,468 vessels fished for billfishes from 50 ports (Austin et al., 1976). That survey indicated a large and growing recreational interest in billfishes and estimates were projected to 1975 and 1980. A September, 1976 poll of southeastern state conservation agencies estimated over 130,000 private and over 1,000 charter vessels capable of fishing for billfishes (Table 4). Ridgely (1975) estimated that in the Gulf and Atlantic regions, a total of 801,000 privately-owned recreational vessels fished in salt water. Although these several estimates provide a wide range of values, all indicate that the number of domestic recreational fishermen exploiting the billfish resource is large and the potential for capturing these billfishes is substantial.

The U.S. commercial fishery for swordfish is conducted by longline and harpoon vessels. U.S. longliners are generally much smaller than foreign longliners and set from 200-1,000 hooks per set as opposed to around 2,000 hooks by Japanese vessels. There are no accurate estimates available of the number of U.S. vessels participating in this fishery, but the number is probably between 50 and 100; about 50 "New England" and not more than 50 "Florida" vessels (J. Casey, NMFS, pers. comm.).

(2) Foreign. The number of foreign pelagic longline vessels operating in the Atlantic varies from year to year; however, it is likely that the number is between 100 and 300. The maximum number of foreign longline vessels that have been observed fishing in the FCZ of the United States varied from 1 to 13 in the Gulf of Mexico and from 3 to 15 in the South Atlantic coast for the years 1973-75 (Table 5). In 1977, however, almost 40 Japanese vessels were observed fishing in the Gulf of Mexico FCZ (Charles Fuss, NMFS, pers. comm.). Table 6 from Caddy (1976) gives the size and number of Canadian vessels landing swordfish in 1968-70.

e. Types and numbers of fishing gear employed: (1) Domestic.

Almost all sharks and billfishes, other than swordfish, are caught on rod and reel. Swordfish are caught by harpoons and longlines (commercial fishermen) and by rod and reel (sport fishermen). Since most billfishes and sharks are caught on rod and reel, the number of anglers is a minimum estimate of the amount of fishing gear employed.

In 1970 an estimated 63,000 persons fished for billfishes and caught about 235,000 of these fishes. Many of these fish were released alive. Additionally, an estimated 268,000 persons fished for sharks (including dogfish) and caught about 1,363,000 sharks (Deuel, 1973). Therefore, recreational fisheries for billfishes and sharks have substantial economic impact on U.S. coastal communities.

The number of billfish anglers has increased since 1970. Since 1971 the National Marine Fisheries Service has conducted daily dock sampling along the Gulf of Mexico in conjunction with tournament

sampling throughout the Gulf, western North Atlantic, and Caribbean Sea. The results of these surveys are shown in Table 7. North Carolina State officials estimated that between 1970 and 1975 the number of vessels participating in billfish tournaments in Morehead City increased from 34 to 117 (North Carolina Wildlife Resources Commission, Division of Marine Fisheries, pers. comm.). In Puerto Rico the number of vessels participating in marlin tournaments increased from 14 in 1954 to 70 in 1975 (Donald Erdman, Department of Agriculture, Commonwealth of Puerto Rico, pers. comm.). Although exact figures are not available, Alabama, Florida, South Carolina and Texas have reported steady increases in the rate of recreational vessel acquisitions, many of a size and type suitable for billfishing. For example, in South Carolina the rate of vessel acquisitions increased 30% in the last 2 years, from a base of 5,500 vessels, whereas Florida registers almost half a million vessels annually.

(2) Foreign. Pelagic longline is the primary gear used by foreign tuna vessels with the FCZ. A typical piece of gear fished by a single vessel may stretch for 60-70 miles and fish as many as 2,000 hooks. The gear is set and hauled approximately once every 24 hours. Since the Japanese began fishing in the Atlantic in 1956, they have published records of the numbers of hooks fished and the number of each species caught by 5° square of latitude and longitude. The number of hooks fished by the Japanese in the Atlantic increased rapidly to a peak of 97.5 million in 1965 but since then has fluctuated around 40 million. With the entry of South Korea and Taiwan into the fishery in the late 1960's and a subsequent rapid buildup of their effort, the total number of hooks fished in the entire Atlantic by all participants at present is probably between 150 and 200 million. Within the FCA, the number of hooks fished by Japanese longline vessels has averaged 3.9 million (1970-74) and ranged from 1.4 million (1970) to 7.2 million (1971) in this 5-year period. At present, longline vessels of South Korea and Taiwan do not fish in the FCZ.

f. Historical impact of foreign fishing on domestic fishery: (1) Competition for available stocks.

The U.S. sport fishery for billfishes is seasonal, particularly for the marlins. Both the white and blue marlin stocks in the western North Atlantic make extensive seasonal migrations (Mather et al., 1972) and are available to U.S. fishermen off their shores for only part of the year. The longline fishery, however, is highly mobile and moves seasonally to follow the major concentrations of tunas. Sport fishermen frequently state that when longliners have been fishing in a particular area, sport fishing for billfishes is poor for some time afterwards.

(2) Gear conflicts. There are numerous areas along the Atlantic and Gulf coasts of the United States where U.S. sport fishermen come into direct contact with Japanese longliners. Some of these are in the Gulf of Mexico off Port Aransas, Texas, and the Mississippi Delta; off Cape Hatteras, North Carolina; and off New Jersey and Maryland. U.S. fishermen have reportedly destroyed longline gear, although there is no record of U.S. sport fishing gear being damaged by foreign fishermen (NMFS Enforcement Agent Reports, 1976, St. Petersburg). Conflicts between foreign commercial and U.S. sport fishermen reached a peak in the late 1960's and prompted private negotiations

between representatives of the Japanese fishing industry and the U.S. sport fishing industry. These negotiations resulted in an informal understanding between the two parties that Japanese vessels would restrict their fishing to areas other than those where U.S. sport fishermen fished for billfishes, and to discourage the destruction of Japanese longline gear.

(3) Nontarget species mortalities. Billfishes and sharks are non-target species in the pelagic longline fishery; they are target species in the U.S. sport fishery. Swordfish are target species in the domestic harpoon and longline fisheries, the Canadian longline fishery and the U.S. sport fishery. Mather et al., (1972) estimated that the annual mortality rate for white marlin was 27%, based on tag return data, and de Sylva (1957) indicated that sailfish have a high natural mortality rate based on his analysis of length frequency data. There are no data on the mortality rates of any of the species of sharks. Dolphin-fish, wahoo, and king mackerel are non-target species in the U.S. fishery for billfishes but comprise an important and often desirable portion of the catch. These species are also taken as incidental catch in the pelagic longline fishery, but amounts are unknown.

(4) Economic interactions. Work has been done on the economics of various coastal communities and also on the impact of fishing in some of these communities (Daniel, 1974; Marr., 1974). However, this information generally has not been applied to shark and billfish fisheries. The data that are available (Gentle, MS) indicate that the economic impact is significant.

g. History of Regulation of foreign fisheries:

The longline fishery, except for exclusion from the 12-mile zone was not regulated before 1975. In 1975 and 1976 the Japanese fishery operated under bluefin tuna regulations, promulgated by the International Commission for the Conservation of Atlantic Tunas (ICCAT). These regulations did not greatly affect the overall longline fishing effort and thus had little or no effect on the catch of billfishes.

h. History of cooperative research, conservation, and data exchange:

In recent years the only official exchange of billfish data between foreign and U.S. scientists took place at the Hawaiian International Billfish Symposium in 1972 and at annual meetings of the International Commission for the Conservation of Atlantic Tunas (ICCAT). The Billfish Symposium drew together most of the scientists in the world who had worked or were working on billfishes. Most of the discussions dealt with billfish biology and there was very little information on status of stocks.

Each year the Standing Committee on Research and Statistics of ICCAT meets to discuss recent research and management problems for Atlantic tunas and billfishes. Both the U.S. and Japan have expressed concern over the declining catch rates for white and blue marlins. Unofficially, foreign and U.S. scientists routinely confer with each other over research activities and frequently exchange data.

Sharks have not received extensive attention as a fishery resource. The Anglo-American Caribbean Commission and the United Nations Fishery Development Program in the western North Atlantic have published reports and expedited data exchange on pelagic sharks. There has been a cooperative exchange of information on sharks between

the United States and Canada for many years. Currently 19 countries, including South Korea, Japan, Taiwan, Cuba, France, Mexico, Germany, Italy, Canada, and Venezuela, are cooperating with U.S. scientists in tagging and in recovery of tags to trace migrations of sharks.

#### 2. Status of the Fishery Stocks

a. Distribution of exploited stocks: Wise and Davis (1973) showed the distribution of blue marlin in the Atlantic between 40° N. and 20° S. latitude based on catch records of the Japanese longline fleet. The major concentrations were in the western Atlantic. Mather et al. (1972) stated that the populations of blue marlin in the North and South Atlantic were probably distinct and hypothesized a July-September spawning season for the South Atlantic group.

The white marlin stocks also appear to be separate in the North and South Atlantic (Mather et al., 1972), although Wise and Davis (1973) demonstrated that considerable mixing probably takes place in January-March along the northern coast of South America based on the distribution of catches of the Japanese longline fleet. As with blue marlin, the major concentrations of white marlin occur in the western part of the Atlantic.

Mather et al. (1972) suggested an even further breakdown of the North Atlantic group of white marlin. Tag returns indicate that most of the white marlin in the western North Atlantic winter off the coast of Venezuela. In summer, one group migrates to the mid-Atlantic Bight off New Jersey and Maryland, while another group migrates to the northern Gulf of Mexico. A third group spends the summer off Venezuela. In the fall, the Gulf and mid-Atlantic groups begin their migration back to the wintering grounds off Venezuela.

The distribution of sailfish is difficult to determine from catch records of the longline fisheries since the Japanese include spearfish and sailfish in one category. The major concentrations of sailfish in the western North Atlantic, as determined from the sport fishery, occur off the southeastern coast of Florida, throughout much of the Caribbean, particularly off eastern Puerto Rico and Cozumel, Mexico; and in the northern and western Gulf of Mexico.

Wise and Davis (1973) found that the distribution of swordfish taken by the Japanese longline fishery does not vary significantly with season or locality. They advised caution in generalizing these findings, since swordfish apparently are night feeders and their findings were based only on longline gear fished during daylight hours.

There is little information about the distribution of pelagic sharks. Tag returns from a few species, however, indicate extensive migrations occur.

b. Abundance of exploited stock: For analysis purposes the area north of the equator and west of 40° W. longitude is considered to encompass the entire range of stocks of billfish and sharks under consideration. This area is referred to as either the western North Atlantic or Northwest Atlantic. Catch rates of blue marlin, white marlin, and sailfish/spearfish, based on the Japanese longline data, are shown in Figures 1, 2, and 3. The Index Area referred to in the figures is an area in the Caribbean bounded by 50° W. longitude, 20° N. latitude, Central and South America. It is a center of abundance for marlins and sailfish for which an extended and continuous time series of data is

available, and in which sufficient effort has been expended to adequately sample the year to year abundance of the stocks. The Index Area was used as the basis for generating a catch per unit effort (CPUE) index to be used in stock analysis. A detailed account of the analysis is presented in Otto, Zuboy, and Sakagawa (1977). It is apparent from the figures that measures of relative abundance of marlins and sailfish are to some degree area dependent. Also, the long term trend in the western North Atlantic (the assumed stock area) has been cyclical, i.e., a marked decrease in catch rates over time is not evident. The extreme spike in the curve for blue marlin is at least partially explained by examining catch rate in weight rather than numbers (Figure 4). It appears that for a few years in the early 1980's the catch was composed largely of small fish, but a great number of them. This demonstrates why the surplus production (Schaefer) model should be applied using weight (biomass) rather than numbers. The earlier analysis of billfish stocks used numbers of fish; the current analysis estimates maximum sustainable yield (MSY) in weight.

The status of billfish and shark stocks in the Western North Atlantic Ocean was investigated using a statistical base consisting of data from U.S. recreational fisheries surveys, published ICCAT and FAO statistics, and annual reports of effort and catch statistics in the Japanese tuna longline fishery (1956-1974). The last source was extensively analysed. Indexes of abundance using a time-area strata from the Japanese data were used to calculate "relative effort" following Gulland (1974). Total catch and relative effort were then used to calculate maximum sustainable yield (MSY) by application of the Schaefer model. MSYs were calculated under several assumptions for each species. The following estimates were selected as being most reasonable for management purposes:

	Metric tons	Number of fish
Blue marlin	4,000	40,000 to 50,000
White marlin	1,900	67,000 to 78,000
Sailfish/spearfish	900	48,000
Swordfish	5,900	
Sharks	41,000	

The estimates were based on biomass and are therefore, given in metric tons. However an estimate in numbers of fish is included for reference. Graphs of the yield curves are shown in Figures 6-10. The stocks appear to be at or near full exploitation in all cases. The "low recreational" catch values were used in the MSY calculations for marlins and sailfish because they gave a better fit to the model (Tables 9, 10, 11; Otto, Zuboy and Sakagawa, 1977). The MSY estimates for sharks and swordfish should be considered to be little more than proforma, as the data for these species are less reliable than the marlin and sailfish data.

c. Current fishing status: The amount of foreign (Japanese) longline fishing effort in the FCZ has fluctuated widely the past 20 years; the number of hooks set in 1974 was about 2.6 million and the catch of billfishes was about 10,800. The latest data available on the harvest of billfishes in the FCZ by the Japanese longline fishery are given in Table 12. Shown are fishing effort in num-

bers of hooks set, the numbers of vessel-days, and the numbers of billfishes caught within approximately 200 miles of the Atlantic, Gulf, and Caribbean coasts of the United States. Vessel-days were calculated by dividing the total number of hooks by 2,000. This number is the approximate number of hooks set by a single vessel in a 24-hour period. Also shown in Table 12 is the average effort and catch over a 5-year period. Figure 5 shows the approximate 200-mile zone and 5° square of latitude and longitude used to report catch data.

The U.S. commercial fishery for billfishes is directed mainly at swordfish. Landings peaked in 1964 at 1,387 metric tons, declined to a low of 32 metric tons in 1971 due to the FDA regulations, then rose to 578 metric tons in 1974.

Recreational catches of billfishes are difficult to ascertain with any degree of accuracy however, one recent estimate (1970) placed the total at 235,000 fish (Deuel, 1973). Domestic catches and capacity are presented in Section II C 3(b) and in Tables 9, 10, 11, and 13.

#### 3. Optimality

The development of a preliminary U.S. policy on foreign billfish and shark fishing within the U.S. 200-mile zone should consider the following critical issues:

(1) Sound and effective biological management must treat billfish and shark stocks throughout their ranges. Management policy should be established through international agreements between the U.S. and other harvesting nations.

(2) A number of socio-economic criteria can be identified for evaluating the impact of foreign billfish and shark fishing on domestic, recreational and commercial fisheries. An objective of this plan is to maximize the social and economic benefits to the recreational and commercial domestic fisheries. For billfish (excluding swordfish), the needs of the domestic recreational fishery are met by maximizing the quality of the angling experience such as the greatest number of fish hooked, and by maintaining a high availability of fish.

(3) Pub. L. 94-265 does not give the United States authority to manage the harvest of tunas, and the policy of the United States is that tuna fishery management should be conducted through international agreements. However, Pub. L. 94-265 clearly establishes U.S. authority to regulate foreign catches of billfishes and sharks.

An international agreement on billfish and shark management should be vigorously pursued. The action described in this plan, to manage billfish and shark stocks within the FCZ, indicates U.S. concern over the status of these stocks and our intention to do what we can to protect them and the interests of U.S. fishermen until such international agreement can be established. The economic value of billfish and sharks to the recreational fishing industry off the U.S. Atlantic and Gulf coasts is considerable. A survey of the recreational billfish and tuna fishery along the East and Gulf coasts of the U.S. in 1968 by the University of Miami examined fishing efforts and expenditures by only those fishermen who fished for billfishes and tuna (Austin et al., 1976). Extrapolations were made to 1975 and 1980 by Austin (1976) and are based on a conservative annual rate of increase in recreational fishing effort of 1.8 percent (U.S. Bureau of Outdoor Recreation, 1970). These data are believed to be minimum estimates as they

do not include, for example, a large, highly mobile fleet of trailerable vessels that are launched at a great many facilities along the eastern seaboard of the United States. Moreover, the value of this recreation must be much larger than out-of-pocket expenditures. It was estimated in 1968 that 222,545 angler days were spent in fishing for billfish. This had increased to 259,780 days by 1975 and it projected to reach 278,751 by 1980.

a. Optimum yield: The optimum yields for these fisheries are based on the percentage of the maximum sustainable yields determined above (Section II c.2.b.) for the Western North Atlantic which can be taken within the FCZ. The optimum yields consider objectives for management of the resources within the FCZ and foreign fishing which will occur outside the FCZ. The area within the FCZ is approximately 15 percent of the total area for which the MSY's for the involved stocks were calculated.

The 1978 U.S. domestic capacities for the shark and billfish stocks, based on catch rates, are given in Table 13. It is important to note that U.S. recreational fisheries for billfishes and sharks are rapidly expanding, probably at a higher rate than the 1.8 percent mentioned above. Unpublished NMFS data (Deuel, pers. comm.) indicate that marine recreational fishermen nationwide may have numbered 20 million in 1975, over twice the number reported for 1970. Estimates in 1977 by six Southeastern States show an average annual increase of 25 percent has occurred in the number of registered vessels capable of fishing for billfish in the last five years (Table 4). These increases suggest that the domestic fishermen are capable of taking increased numbers of sharks and billfish. Therefore, in determining current U.S. capacity (estimate of capability and intent to catch in 1978), the higher figures from the 1974 ranges specified in Tables 9, 10, and 11 were used to give the best estimate of U.S. capacity for 1978.

The OY's for blue marlin, white marlin, and sailfish/spearfish were determined by calculating the percent of total catch of these species from the western North Atlantic that occurred within the FCZ and taking that percent of MSY as OY for the FCZ. This assumes that OY for the western North Atlantic would be equal to MSY; a reasonable assumption since the stocks are not being over fished but are at or near full exploitation. Total catch and catch within the FCZ were calculated by averaging domestic and foreign catches for the period 1964 through 1974.

For sharks and swordfish, a different rationale was used. Sharks and swordfish are more densely concentrated over the continental shelves within the FCZ than in the open ocean outside the FCZ and generally have more localized distributions. Intensive fishing in the FCZ could result in harvesting a large portion of the MSY for the entire western North Atlantic and could detrimentally impact shark and swordfish stocks. Therefore, the OY's were modified downward from the MSY's to compensate for these factors on the basis of the percentage of the western North Atlantic contained in the U.S. FCZ. Since the FCZ is 15 percent of the total western North Atlantic, the OY's were set at 15 percent of the MSY. The OY's for billfishes and sharks were designed to prevent overfishing and maintain the MSY, recognizing the level of fishing both within and without the FCZ in 1978.

b. Total allowable level of foreign fishing. Since the domestic capacity is equal to the OY for all billfish species, there is no sur-

plus available for foreign fishing. The TALFF for sharks is the difference between OY and the U.S. capacity, or 1,150 m.t. When this TALFF is reached, no surplus is declared for all shark species and a no retention policy exists.

#### 4. Conservation and Management Measures Applicable to Foreign Fisheries

a. Data to be reported by foreign fishery: (1) Units for measuring and reporting catch. While fishing within the FCZ, each foreign fishing vessel will be required to maintain a daily fishing log that records: name and identification number of vessel; name of captain; date; midday fishing location (within 0.1° latitude and longitude); number of hooks set; number of each species of billfish (must separate sailfish and spearfish) and total number and estimated aggregate weight of sharks caught.

(2) Time requirement for reporting. A report listing catch and effort with gear capable of taking billfishes and sharks by time and area strata will be forwarded to the proper authority at least monthly.

b. Zones and/or periods of limited foreign fishing: (1) Vessel limitations: None; (2) Gear limitations: None; (3) Area limitations: None.

c. Catch limitations: The catch limitations are as follows: (1) To prohibit the retention of all billfishes caught within the FCZ. In addition, all billfishes taken shall not be removed from the water and shall be released in such a manner as to ensure maximum probability of survival, (2) when the aggregate catch of sharks by foreign vessels reaches the TALFF as set out in Table 13, the same non-retention provisions which apply to billfishes shall apply to sharks.

d. Other limitations, conditions, and requirements for foreign vessels catching billfishes and sharks: (1) Each foreign vessel fishing in the Fishery Conservation Zone must have a valid permit issued by the Secretary of Commerce.

(2) Each vessel entering the FCZ to engage in fishing must check in by radio or port call with U.S. regulatory authorities, and check out upon leaving the area.

(3) U.S. observers shall have boarding privileges and the full right to observe, sample all catches, tag fish, and inspect both fishing operations and cargo at any time without prior announcement on all foreign vessels fishing within the FCZ.

(4) Any billfishes or sharks (or parts thereof) observed aboard a foreign vessel fishing within the FCZ will be presumed to have been caught within the FCZ, unless such vessel has made arrangements with the appropriate U.S. enforcement authority prior to entering the FCZ to ensure that the billfish or sharks on board are identified as having been taken outside 200 miles.

(5) No foreign fishing vessel shall intentionally discard gear that could cause an environmental or navigational hazard.

e. Coastal State fishery conservation and management measures recommended for in-

1. The term fishing is defined in Sec. 3(10) of the FCMA as (A) the catching, taking or harvesting of fish; (B) the attempted catching, taking, or harvesting of fish; (C) any other activity which can reasonably be expected to result in the catching, taking, or harvesting of fish; or (D) any operations at sea in support of, or in preparation for any activity described in subparagraphs (A) through (C). Such terms do not include any scientific research activity which is conducted by a scientific research vessel.

corporation into this plan: None.

f. Other measures:

(1) It is recommended that an effective cooperative billfish and shark tagging program be established with foreign nations conducting fishing operations within the FCZ and the National Marine Fisheries Service.

(2) It is recommended that an international plan for regulation of billfishes and sharks be developed and implemented under the auspices of an international organization such as ICCAT.

g. Relationship of conservation and management measures to conservation needs:

As previously emphasized, a limited scientific base now exists with which stock analysis can be made for billfishes and pelagic sharks. Most stocks of billfishes appear to range well outside the U.S. FCZ and are subject to exploitation by foreign longline fisheries. At present, there is no international program to manage and conserve these stocks.

In view of these facts, the measures developed in this plan are designed both to regulate the catching, taking, or harvesting of billfishes and sharks by foreign vessels within the FCZ and to prohibit the retention of any billfishes and, when the TALFF has been reached, sharks so caught.

The NMFS considered excluding three species of sharks (blue, mako, and porbeagle) because of the possibility of overfishing these species and their importance to the U.S. recreational fishery. A decision was made not to exclude these species from the TALFF since status of the stocks data are limited and we did not want to place an undue burden on foreign fishermen. Generally, blue and porbeagle sharks are not taken south of Cape Hatteras. The first few months of foreign fishing is south of Cape Hatteras, diminishing the possibility of these species being taken before the TALFF is reached.

h. Relationships of conservation and management measures to national standards:

The recommended management measures proposed in this plan are fully consistent with the national standards for fishery conservation and management as outlined in Pub. L. 94-265 (Title III, sec. 301): in that (1) they attempt to prevent overfishing, (2) they are based on the best scientific information available, (3) the stocks are managed in the FCZ with attention to their occurrence throughout their ranges, (4) they do not apply to U.S. citizens and thus do not discriminate between residents of different states, (5) they promote more efficient use of the stocks by domestic fishermen, (6) they allow for variations among, and contingencies in, fisheries, fishery resources, and catches, and (7) they are designed to minimize management costs.

1. Approximate costs of conservation and management measures:

It is estimated that 4 man-years will be required by NMFS to adequately monitor foreign activities concerned with this plan and enforce fishing regulations off the U.S. Gulf and Atlantic coasts. An additional man-year will be required for Puerto Rico and the Virgin Islands. Salary and support costs for enforcement and management agents are estimated by NMFS for enforcement and does not include other NMFS costs associated with management, such as scientific research and data handling, cost to other Federal or State agencies such as patrol vessel operating expenses, or cost of observers, which will be borne by the foreign government.

WHITE MARLIN CPUE

Figure 2. Numeric catch rates of white marlin from various areas by the Japanese longline fishery. See Figure 1 for explanation of areas.

BLUE MARLIN CPUE

FIGURE 1. Numeric catch rates of blue marlin from various areas by the Japanese longline fishery. Fishery Conservation Zones are approximately 400 nautical miles North Atlantic is that area north of the equator and west of 40°W longitude. The Index area is that area of the Atlantic west of 50°W longitude and south of 20°N latitude.

SAILFISH/SPEARFISH CPUE

FIGURE 3. Numeric catch rates of sailfish/spearfish from various areas by the Japanese longline fishery. See Figure 1 for explanation of areas.

FIGURE 4. Index catch rates (metric tons) of marlins and sailfish/spearfish by the Japanese longline fishery.

- 2/ Whole Atlantic catch in weight according to ICCAT apportioned to the Western North Atlantic according to the proportion of sailfish, by number, taken within the area. Japanese do not separate sailfish and spearfish in their statistics; spearfish landings are considered minor.
- 3/ Whole Atlantic catch of billfish in weight apportioned to species assuming that the species composition of the Taiwanese billfish catch by weight is identical to that of Japan. Apportionment to western North Atlantic is according to the proportion, by number, of sailfish taken in the area by Taiwan.
- 4/ The difference between total billfish reported to ICCAT and blue marlin reported to FAO was assumed to be 50 percent white marlin and 50 percent sailfish.
- 5/ Estimates from Otto, Zubov, and Sakagawa (1977) - unpublished report.

Table 12. Effort in number of hooks, number of vessel days, and catch in number of fish by the Japanese longline fishery, 1961-1974, in the Gulf of Mexico, the western North Atlantic, and off Puerto Rico and the Virgin Islands within 200 miles of the U.S. coast. (BM = blue marlin, WM = white marlin, SM = swordfish, SF = sailfish/spearfish.) Harbors squares included are 0434, 0792, 0813, 0814, 0823, 0804, 0824, 1162, 1163, 1164, 1171, 1512, and 1521.

FRIDAY, JANUARY 27, 1978  
PART V

DEPARTMENT OF  
LABOR  
Employment Standards  
Administration

MINIMUM WAGES  
FOR FEDERAL AND  
FEDERALLY ASSISTED  
CONSTRUCTION

General Wage  
Determination Decisions

[4510-27]

## DEPARTMENT OF LABOR

## Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND  
FEDERALLY ASSISTED CONSTRUCTION

## General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138), and of Secretary of Labor's Orders 12-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued

## NOTICES

subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

## MODIFICATIONS AND SUPERSEDES DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and supersedeas decisions to general wage determination decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and supersedeas decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C.

20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original general wage determination decision.

## MODIFICATIONS TO GENERAL WAGE DETERMINATION DECISIONS

The numbers of the decisions being modified and their dates of publication in the FEDERAL REGISTER are listed with each State.

Hawaii: HI77-5087 Sept. 23, 1977.  
Idaho: ID77-5088 Oct. 7, 1977.  
Louisiana: LA77-4220 Sept. 23, 1977.  
LA78-4001 Jan. 6, 1978.  
Nevada: NV77-5077 Sept. 23, 1977.  
New Jersey: NJ77-3093 July. 8, 1977.  
Oregon: OR77-5078 Sept. 23, 1977.  
South Dakota: SD77-5079; SD77-5086 do.  
Texas: TX77-4245; TX77-4252; TX77-4256; TX77-4258; TX77-4261; TX77-4265; TX78-4005 Jan. 20, 1978.

## SUPERSEDES DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

The numbers of the decisions being superseded and their dates of publication in the FEDERAL REGISTER are listed with each State. Supersedeas decision numbers are in parentheses following the numbers of the decisions being superseded.

California: CA77-5092(CA78-5004); Sept. 30, 1977.  
CA77-5093(CA77-5005);  
CA77-5094(CA77-5006);  
CA77-5095(CA78-5007).  
Maryland: MD76-3152(MD78-3000) Apr. 2, 1978.  
Wyoming: WY77-5071(WY78-5008) July 1, 1977.

## CANCELLATION OF GENERAL WAGE DETERMINATION DECISIONS

General wage determination decision No. NY77-3116, pertaining to Chemung County, N.Y., is canceled. Agencies with building, heavy, and highway construction projects pending in this location should utilize the project determination procedure by submitting Form SF-308. See regulations Part 1 (29 CFR), section 1.5. Contracts for which bids have been opened shall not be affected by this notice, and consistent with 29 CFR 1.7(b)(2), the incorporation of Decision No. NY77-3116 in contract specifications the opening of bids for which is within ten (10) days of this notice need not be affected.

Signed at Washington, D.C., this 20th day of January 1978.

RAY J. DOLAN,  
Assistant Administrator,  
Wage and Hour Division.

**LABORERS.**

Group 1: Boring Machine Reamer (outsides); Cleaning and Handling of Panels Forms; Concrete Screeding for rough strike-off; Concrete, water curing; Demolition Laborer, the cleaning of brick and lumber; Dry Packing of concrete, plugging, filling of Shee-Bolt Holes; Wire Matcher, Lumber, Brush Loaders, Pilers and Debris Handlers; Pligman, Gas, oil and/or water pipe-line laborer; Laborer, general or construction; Laborer, general cleanup; Laborer, landscaping; Laborer, jetting; Laborer, temporary water and air lines; Material Hosenan (walls, slabs, floors and decks); Rigging and Signaling; Scales; Slip Pans Raisers; Slurry Seal Crows (mixer operator, applicator operator, queuegee man, shuttle man, top man); Stripper, asphalt, concrete or other paved surfaces; Tarmen and Mortar Man; Tool Crib or Tool House Laborer; Traffic Delimiting Device Applicator; Window Cleaner; Wire Mesh Pulling—all concrete pouring operations

**Group 2:** Asphalt Shovelers; Cement Dumper (on 1 yard or larger mixer and handling bulk concrete); Cesspool Digger and Installer; Chucktender; Chute Man, pouring concrete; the handling of the chute from ready-mix trucks, such as walls, slabs, decks, floors, foundations, footings, curbs, gutters and sidewalks; Concrete Curer—Impervious Membrane and Form Oiler; Cutting torch operator; Concrete Pump; Grader; Highways and street paving, airport, runways and similar type; Fine Grader; highways and street paving, pipeline wrapper—pot tender; Pile Driver; Road Breaker; Roadheader (small)—Asphalt Laborer, packing rod steel and wet packed concrete; Road Scanner (small) milder; Sandblaster (pot tender); Septic Tank Digger and Installer (license); Tank Scaler and Cleaner; Tree Climber, faller, chain saw operator; Pittsburgh Chipper and similar type Brush Sheeder; Underground laborer, including Caisson Bellows

## NOTICES

## LABORERS (Cont'd)

## POWER EQUIPMENT OPERATORS (Cont'd)

**Group 3:** Asphalt Baker, Lubman, Ironer and Asphalt Spreader Boxes (all types); Gruggmobile Man Concrete core cutter, grinder or sand; Concrete Cutting Machine, Concrete Cutter, cutting, scoring old or new concrete; Drilling Jackhammer, 2-1/2 ft. drill bit or longer; Del Tak-it Machinery Gas, oil and/or Water Pipeline Wraps—6" pipe and over by any method, inside and out/Hydro Seeder and similar type; Impacting, multi-plate, wet/dry, Potmen and Men (applying asphalt, lay-sold, dropping, spreading) Handling of such materials for ("applying" means applying, dropping, pushing, handling of such materials for pipe wrapping and waterproofing) Concreters/Pumpers, Jet, electric tools, Vibrating Machines, Pavement Breakers, Air Blasting Machines, and similar mechanical tools not apparently classified herein; Pipe-layers, Backup Man, coating, grouting making of joints, sealing, caulking, diaphragm, including rubber gasket joints, pointing and any and all other services; Road Slinger; Rotary Scarifier or Multiple Head Concrete Chipping Sofficer; Steel Header-board Man and Guideline Setter; Tampers, Barko, Wacker and similar type; Trenching Machine, hand propelled

**Group 4:** Cribber, Shorer, Lagging, Sheeting and Trench Bracing, hand-guided Lagging Hammer; Read Rock Slinger; Laser Beam; Overseize Concrete Vibrator Operator, 70 lbs. and over; pipelayer, including water, sewage, solid, gas or air; Prefabricated Manhole Installer; Sandblaster (nozzleman); water blasting; Welding in connection with laborers' work

**Group 5: Blasters Powderman**—all work of loading holes, placing and blasting of all powder and explosives of whatever type, regardless of method used for such loading and placing; Driller; All power drills, excluding jackhammer, whether core, diamond, wagon, track, multiple unit, and any and all types of mechanical drills

## POWER EQUIPMENT OPERATORS

Group 1: Breakman; Compressor (less than 600 C.F.M.); Engineer Oilier; Generator; Heavy Duty Repairman; Helper; Pump; Signaller; Switchman

Group 2: Compressor (600 C.F.M. or larger); Concrete Mixer, skip type, shovel; Fireman; Hydrostatic Pump; Oilier Crusher (asphalt or concrete); Painter; Plant Operator; Generator, Pump or Compressor; Muckey Beltrone; Soils Field Technician; Tar Pot Fireman; Temporary Heating Plant; Trenching Machine Oilier; Truck Crane Oilier

POWER EQUIPMENT OPERATORS (Cont'd)

Group 7: Crane, over 25 ton up to and including 100 tons m.t.c. (long boom pay applicable); Derrick Barge (long boom pay applicable); Dual Drum Mixer; Heavy Duty Repairman-welder Combination; Hoist, Stiff-legs, Guy Derrick or similar type, up to and including 100 tons (long boom pay applicable); Monorail Locomotive (diesel), gas or electric; Motor Patrol-blade Operator (single engine); Multiple Engine Tractor (Euclid and similar type, except quad 9 Cat); Rubber-tired Earth Moving Equipment (multiple engine, Euclid, Caterpillar and similar) (over 25 yds. end up to 50 yds. struck); Shovel, Backhoe, Dragline, Clamshell (over 5 cu. yds. m.t.c.) (long boom pay applicable); Tower Crane Repairman; Tractor Loader (crawler and wheel type over 64 yds.); Welder-certified; Woods Mixer and similar; Pugmill Equipment

Group 8: Auto Grader; Automatic Slip Form; Crane-over 100 tons (long boom pay applicable); Hoist-stiff Legs, Guy Derrick or similar types (capable of hoisting 100 tons or more) (long boom pay applicable); Mass Excavator - less than 750 cu. yds.; Mechanical Finishing Machine; Mobile Form Traveler; Motor Patrol, multi-engine; Pipe Mobile Machine; Rubber-tired earth moving equipment (multiple engine, Euclid, Caterpillar and similar type over 50 cu. yds. struck); Rubber tired self-loading Scraper (paddle wheel-auger type self-loading-2 or more units); Rubber-tired Scraper - pushing one another w/o Push Cat. Push-pull (500 per hour additional to base rate); Tandem Equipment (2 units only); Tandem Tractor (quad 9 or similar type); Tunnel Mole Boring Machine

Group 9: Canal Liner; Canal Trimmer; Helicopter Pilot; Highline Cableway; Remote Controlled Earth Moving Equipment (\$1.00 p/h additional to base rate); Wheel Excavator (over 750 cu. yd.)

TRUCK DRIVERS

NOTICES

TRUCK DRIVERS

Group 1: Warehouseman and Teamster

Group 2: Driver or vehicle or combinations of vehicles of 2 axes (including all vehicles less than six tons); Traffic Control Pilot Car, excluding moving heavy equipment permit load

Group 3: Truck mounted Power Broom

Group 4: Drivers of vehicles or combination of vehicles of 3 axes

Group 5: Boomman; Cement Distributor; Fuel Truck; Road Oil Spreader Truck; Water Truck; 2 axle

Group 6: Dump, of less than 16 yards

Group 7: Transit-mix, under 3 yards; Dumpcrete, less than 64 yards

Group 8: Truck Repairman Helper

Group 9: Water Truck, 3 or more axes

Group 10: PB and similar type truck when performing within the Teamsters' jurisdiction; Pipeline and utility working Truck including Winch, but limited to truck applicable to Pipeline and Utility work, where a composite crew is used; Slurry Driver; Truck Greaser and Titeman (50¢ per hour additional for Titeman)

Group 11: Transit-mix, 3 yards or more; Dumpcrete, 64 yards and over

Group 12: Driver of vehicle or combination of vehicles of 4 or more axes

Group 13: Dump, 16 yards but less than 25 yards

Group 14: A-Frame or Swedish Crane, or similar type of equipment driver; Fork Lift Driver; Ross Carrier, highway

Group 15: All-off-highway Equipment within Teamsters jurisdiction (off highway combination of vehicles or equipment with multiple power sources, \$1.00 per hour additional; Dump, 25 yards or more; Truck Repairman

Group 16: Truck Repairman Welder

SUPERSEDES DECISION

**POWER EQUIPMENT OPERATORS**

Group 1: Brakeman; Compressor (less than 600 C.R.M.); Engineer Oilier; Generator; Heavy Duty Repairman; Helper; Pump; Signalman; Switchman

Group 2: Compressor (600 C.R.M. or larger); Concrete Mixer, skip type, Conveyor; Fireman; Hydrostatic Pump; Oilier Crusher (asphalt or concrete plant); Plant Operator; Generator, Pump or Compressor; Rotary Drill Helper (oilfield); Skiploader - wheel type up to 3/4 yd. w/o attachments; Solla Field Technician; Tar Pot Fireman; Temporary Heating Plant; Trenching Machine Oilier; Truck Crane Oilier

Group 3: A-Frame or Winch Truck; Elevator Operator (inside); Equipment Greaser (truck); Ford Ferguson (with dragtype attachments); Helicopter Radioman (ground); Power Concrete Curing Machine; Power Concrete Saw; Power driven Jumbo Form Setter; Ross Carrier (job site); Stationary Pipe Wrapping and Cleaning Machine

Group 4: Asphalt Plant; Pileman; Boring Machine; Boxman or Mixerman (asphalt or concrete); Chip Spreading Machine; Concrete Pump (small portable); Bridge-type Unloader and Turntable; Dinky Locomotive or Motorman (up to and including 10 tons); Equipment Greaser (greaser truck); Helicopter Hoist; High-line Cableway Signman; Hydra-hammer-aero Stomper; Power Sweeper; Roller (compacting); Screed (asphalt or concrete); Trenching Machine (up to 8 ft.)

POWER EQUIPMENT OPERATORS (Cont'd)

Group 5: Asphalt Plant Engineer; Backhoe (up to and including 3/4 yd.); Batch Plant; Bit Sharpener; Concrete Joint Machine (canal and similar type); Concrete Planer; Deck Engine; Derrickman (oilfield type); Drilling Machine Operator (including water wells; Forklift (under 5-ton capacity); Hydrographic Seder Machine (straw, pulp or seed); Machine Tool Operator; Magnolia Internal Pull Slab Vibrator; Mechanic Bar, Curb or Gutter (concrete or asphalt); Mechanical Finisher (concrete-slab); Johnson, Blower (asphalt or concrete); Rubber-tired Earth Moving Equipment (single or multiple engine, including 25 yds. truck); Self-propelled Tar Paving Machine; Self-Pore Pump (open-driven hydraulic lifting device for concrete forms); Skidloader (crawler and wheel type over 3/4 yd. and up to and including 1 1/4 yds.); Stinger Crane (Austin-Western or similar type); Tractor-Bulldozer, 1 1/4 yds.);

Group 6: Asphalt or Concrete Spreading (tamping or finishing); Asphalt Paving Machine (Barber Greene or similar type); Bridge Crane Operator; Cast-in-place Pipe Laying Machine; Combination Mixer and Compressor (quite work); Compactor, self-propelled; Concrete Mixer -paving; Concrete Mixer - paving; Concrete Pump (truck mounted); Crane Operator up to and including 25 ton capacity) (Long-boom pay applicable); Crushing Plant; Drill Doctor; Elevating Grader; Forklift (over 5 tons); Grade Checker; Grader-all; Grouting Machine; Heading Shield; Heavy Duty Repair-man; Hoist Operator (Chicago Boom and similar type); Holman Belt Loader and similar type; LeTourneau Blob Compactor or similar type; Lift Mobile; Lift Slab Machine (Vagthor and similar types); Loader (Athey, Euclid, Sierra and similar type); Material Hoist; Mucking Machine (Hackley-tired, rial or track type); Pneumatic Concrete Placing Machine (Hackley-tired, rial or track type); Pneumatic Heading Shield (tunnel); Pumpcrete Gun; Rotary Drill (excluding caisson type); Rubber-tired Earth Moving Equipment (single engine-Caterpillar, Euclid, Athey Wagon, and similar types with any and all attachments over 25 yds. and up to and including 50 cu. yds. truck); Rubber-tired Earth Moving Equipment (multiple single unit) (self-loading-paddle wheel type-over 1 1/4 yds., up to and including 6 1/2 yds.); Surface Heaters and Planer; Trenching Machine (over 6 ft. depth capacity); Tower Crane; Tractor Compressor Drill Combination; Tractor (any type larger than D-5-100 flywheel h.p. and over, or similar); Bulldozer, Tamer, Scraper and Push Tractor, single engine); Tractor Machine Tunnel Locomotive (over 30 tons); Shovel, Backhoe, Dragline, Clamshell (over 3/4 yd. and up to 5 cu. yds. m.r.c.) (Long Boom pay applicable); Self-propelled Curb and Gutter Machine

Group 7: Crane, over 25 ton up to and including 100 tons m.r.c. (long boom pay applicable); Derrick Barge (long boom pay applicable); Dual Drum Mixer; Hydraulic Repair Machine; Combination Hoist, Stiff-legs, Guy Derrick or similar type (including 100 tons (long boom pay applicable); Concrete Rail Locomotive (diesel, gas or electric); Motor Patrol-plate Operator (single engine); Multiple Engine, Tractor (Euclid and similar type over 50 yds. truck); Rubber-tired Earth Moving Equipment (single engine-over 50 yds. truck); Rubber-tired Earth Moving Equipment (multiple engine-Euclid, Caterpillar and similar) (over 25 yds. and up to 50 cu. yds. truck); Shovel, Backhoe, Drag-line, Clamshell (over 5 cu. yds. m.r.c.) (Long boom pay applicable); Tower Crane Repairman; Tractor Loader (crawler and wheel type over 6 1/2 yds.); Welder-certified; Woods Mixer and similar Pugmill Equipment

POWER EQUIPMENT OPERATORS (Cont'd)

Group 8: Auto Grader; Automatic Slip Form; Crane-over 100 tons (long boom pay applicable); Hoist-stiff Legs, Guy Derrick or similar types (capable of hoisting 100 tons or more) (Long boom pay applicable); Masa Excavator - less than 750 cu. yds.; Mechanical Finishing Machine; Mobile Form Traveler; Motor Patrol, multi-engine); Pipe Mobile Machine; Rubber-tired earth moving equipment (multiple engine, Euclid, Caterpillar and similar type over 50 cu. yds. truck); Rubber tired self-loading Scraper (paddle wheel-auger type self-loading-2 or more units); Rubber-tired Scraper - pushing one another w/o Push Cat; Pulpall (500 per hour additional to base rate); Tunnel Boring Machine (w/o a only); Tunnel Tractor (quad 9 or similar type); Tunnel Note Boring Machine

Group 9: Canal Liner; Canal Trimmer; Helicopter Pilot; Highline Cableway; Remote Controlled Earth Moving Equipment (\$1.00 p/h additional to base rate); Wheel Excavator (over 750 cu. yds.)

## POWER EQUIPMENT OPERATORS

## POWER EQUIPMENT OPERATORS

Group 1: Brakeman; Compressor (less than 600 C.R.M.); Engineer  
Oiler; Generator; Heavy Duty Repairman; Helper; Pump; Signalman;  
Switchman

Group 2: Compressor (600 C.Y.M. or larger); Concrete Mixer, skip  
type, conveyor; Fireman; Hydrostatic Pump; Oiler; Crusher (asphalt  
or concrete plant); Plant Operator; Generator, Pump or Compressor;  
3/4 yd. Drill Helper (oilfield); Skiploader - wheel type up to  
30/4 yd. w/o attachments; Soils Field Technician; Tar Pot Fireman;  
Temporary Heating Plant; Trenching Machine Oiler; Truck Crane  
Oiler

Group 3: A-Frame or Winch Truck; Elevator Operator (inside); Equip-  
ment Greaser (rack); Ford Permacore (with drayage attachments);  
Helicopter Radioman (ground); Power Concrete Pumping Truck; Road  
Power Concrete Saw; Power driver Jumbo Torsion Spring Road Carrier  
(job site); Stationary Pipe Wrapping and Cleaning Machine

Group 4: Asphalt Plant Fireman; Boring Machine; Bomman or Mixerman  
(asphalt or concrete); Chip Spreading Machine; Concrete Pump  
(small portable); Bridge type Unloader and Turntable; Dinky  
Locomotive or Motorman (up to and including 10 tons); Equip-  
ment Greaser (greaser truck); Helicopter Helist; Highline  
Cableway Signalman; Hydra-hammer-aero Stomper; Power Sweeper;  
Roller (compacting); Screed (asphalt or concrete); Trenching  
Machine (up to 6 ft.)

Group 5: Asphalt Plant Engineer; Backhoe (up to and including  
3/4 yd.); Batch Plant; Bit Sharpeners; Concrete Joint Machine  
(canal and similar type); Concrete Planer; Deck Engine; Derrick-  
can (oilfield type); Drilling Machine Operator (including water  
wells); Forklift (under 5-ton capacity); Hydrographic Seder  
Machine (straw, pulp or seed); Machine Pool Operator; Maginnis  
Internal Full Size Vibrator; Mechanic Bore, Gurb or Gutter  
Concrete or asphalt); Mechanical Finisher (concrete-Clary,  
or similar); Pavement Breaker (truck mounted);  
Road Oil Mixing Machine; Roller (asphalt or finish); Rubber-  
tired Earth Moving Equipment (single engine, up to and including  
25 yds. struck); Self-propelled Tamping Machine; Slip  
Form Pump (power-driven hydraulic lifting device for concrete  
form); Skiploader (crawler and wheel type); Stinger Crane (Austin-  
up to and including 14 yds.); Tractor-bulldozer, Trencher, Scraper  
or similar type); Tractor-bulldozer, Trencher, Scraper (single  
engine, up to 100 h.p.; flywheel) and similar types, up to and  
including D-5 and similar type); Tugger Motor 1 dray, Tunnel  
Locomotive (over 10 and up to and including 10 tons); Welder-  
General

## NOTICES

POWER EQUIPMENT OPERATORS (Cont'd)

Group 6: Asphalt or Concrete Spreading (tamping or finishing);  
Asphalt Paving Machine (barber greens or similar type); Bridge  
Machine Operator; Cast-in-place Pipe Laying Machine; Combination  
Mixer-Compactor; Concrete Pump (tremie); Concrete Pump (boom)  
Operator up to and including 25 ton capacity; Long-boom pay  
applicator; Grouting Plant; Drill Doctor; Blasting Grader;  
Rocklift (over 5 tons); Grade Checker; Grade-all; Grouting  
Machine; Heading Shield; Heavy Duty Repairman; Bolt Operator  
(Chicago Room and similar type); Bolman Bolt Loader and similar  
type; Latourneau slob Compactor or similar type; Lift Mobile;  
Euclid, Sierra and similar type; Material Moist; Mucking Machine  
(1/4 yd. rubber tired, rail or track type); Pneumatic Concrete  
Placing Machine (Hackley-Presswell or similar type); Pneumatic  
Heading Shield (tunnel); Pumpcrete Gun; Rotary Drill (excluding  
caisson type); Rubber-tired Earth Moving Equipment (single engine-  
Caterpillar, Euclid, Athey Wagon, and similar types with any  
and all attachments over 25 yds. and up to and including 50  
cu. yds. struck); Rubber-tired Earth Moving Equipment (multiple  
engine, up to and including 25 yds. struck); Rubber-tired  
Scraper (self-loading-paddle wheel type-John Deere, 1040 and  
similar single unit); Skidloader (crawler and wheel type-over  
1 1/4 yds. up to and including 64 yds.); Surface Heaters and  
Planer; Trenching Machine (over 6 ft. depth capacity); Tower  
Crane; Tractor Compactor Drill Combination; Tractor (any type  
larger than D-5-100 Flywheel h.p. and over, or similar) Bull-  
dozer, grader, scraper and push tractor single engine; Tractor  
(boom attachment); Traveling Pipe Wrapping, Cleaning and Bending  
Machine; Tunnel Locomotive (over 3/4 yd. and up to 5 cu. yds. m.r.c.);  
Dragline, Crawler (over 3/4 yd. and up to 5 cu. yds. m.r.c.);  
(Long Boom pay applicable); Self-propelled Curb and Gutter  
Machine

POWER EQUIPMENT OPERATORS (Cont'd)

Group 7: Crane, over 25 ton up to and including 100 tons m.r.c.  
(Long boom pay applicable); Derrick Barge (long boom pay appli-  
cable); Dual Drum Mixer; Heavy Duty Repairman-welder Combination;  
Moist, Stiff-legs, Guy Derrick or similar type, up to and including  
100 tons (long boom pay applicable); Monorail Locomotive (diesel),  
gas or electric; Motor Patrol-blade Operator (single engine);  
Multiple Engine Tractor (Euclid and similar type, except quad  
9 Cat); Rubber-tired Earth Moving Equipment (single engine, over  
30 yds. struck); Rubber-tired Earth Moving Equipment (multiple  
engine, Euclid, Caterpillar and similar) (over 25 yds. and up  
to 50 cu. yds. struck); Shovel, Backhoe, Dragline, Crawler  
over 5 cu. yds. m.r.c.; (Long boom pay applicable); Tower Crane  
Repairman; Tractor Loader (crawler and wheel type over 64 yds.);  
Welder-certified; Woods Miter and similar Pughall Equipment  
Group 8: Auto Grader; Automatic Slip Form Crane-over 100 tons  
(Long boom pay applicable); Rubber-tired legs, Guy Derrick or  
similar type (capable of hoisting 100 tons); Less than 750 cu. yds.  
boom pay applicable); Mass Excavator - less than 750 cu. yds.;  
Mechanical Finishing Machine; Mobile Posa Traveler; Motor Patrol,  
multi-engine; Pipe Mobile Machine; Rubber-tired earth moving  
equipment (multiple engine, Euclid, Caterpillar and similar  
type over 50 cu. yds. struck); Rubber-tired self-loading Scraper  
(paddle wheel-auger type self-loading-2 or more units); Rubber-  
tired Scraper - pushing one another w/o Push Cat. Push-pull  
(500 per hour additional to base rate); Tandem Equipment (2  
units only); Tandem Tractor (quad 9 or similar type); Tunnel  
Mole Boring Machine  
Group 9: Canal Liner; Canal Trimmer; Helicopter Pilot; Highline  
Cableway; Remote Controlled Earth Moving Equipment (31.00 p/h  
additional to base rate); Wheel Excavator (over 750 cu. yd.)

POWER EQUIPMENT OPERATORS

Group 1: Auger Machine Operator (post holes, etc.); Batch Bin Weighman; Scissorman or Hopperman; Beginner Operator; Brake-man and Helper; Crusher Oiler; Oiler; Utility; Scaled Operator; Tractor Operator (farm, crawler or wheel type, 60 HSP (draw-bar) or less with or without use of power attachments, except for use of back hoe or bucket)

Group 2: Broom Operators, self-propelled; Cableway Signalman (bellboy); Concrete Saw (self-propelled); Fireman; Power Loader, belt and bucket type

Group 3: Air Compressor over 315 cu. ft. capacity; Chip Spreader Operator; Form Grader Operator; Joint Machine Operator; Longitudinal Float Operator; Mixer Operator Concrete (under one yard); Helper (welder or heavy duty); Roller Operators, self-propelled (pneumatic, rubber tired, sheep foot, vibratory or combination type); Tire Repairman

Group 4: Pump Operator (all others)

Group 5: Conveyor Belt Operator; Fork Lift and Lumber Staker; Screening Plant Operator

Group 6: A-Frame Truck; Tractor Operators (farm, crawler or wheel type, over 60 HSP (drawbar) without use of power attachments

Group 7: Oiler, Lead Utility

Group 8: Gunnite and Grout Machine Operator; Mulching Machine Operator; Oil Distributor

Group 9: Front End Loader (up to and including 1 1/2 cu. yds.); Pavement Breakers, Hydro-tamper and similar type machines; Pumps, well points

Group 10: Moist Operator (one drum)

POWER EQUIPMENT OPERATORS (Cont'd)

Group 11: Haulage Motorman and Industrial type Motorman; Motor Patrol Operator (all others); Pump Operator (in tunnels, shafts, raises); Hydro type Cranes (up to 15 tons)

Group 12: Air Compressor, two or more machines or tunnels, shafts, raises of plant Operator; Asphalt plant Operator; Bituminous Lay-down Machine Operator; Concrete Machine Operator; Concrete Batch Plant; Concrete Finish Machine Operator; Concrete Spread and Paver Span Saw (Hunt process or similar); Concrete Spreader and Paver Operator; Curbsaw Operator; Drilling Machine, Integrated (Core, Rotary, Caisson, Diamond); Elevating Grader; Front End Loader (over 1 1/2 cu. yds.); Jumbo Form Operator; Mixer Operator, base course pug mill type; Mixer Bituminous Operator (travel plant); Mixer Operator Concrete (over one yard); Motor Patrol Operator (finish); Mucking Machine Operator (all types); Pneumatic Guns; Pumpcrete Operator; Roller Operator, (tandem steel wheel, three axle or three wheel); Scraper Equipment (all types); Shovels, Draglines, Cranes, Piledrivers, all truck mounted cranes, (manufacturer's rating) up to 3 1/2 yards, all attachments; Hydro type Cranes, (15 ton and over); Shuttle Car Operator; Subgrade Machine Operator (power); Tractor Operator, all with use of power attachments and including Puckot, Doser, Tournadoser, etc. (The use power attachment shall not include disk, pulling or rollers, and similar unskilled actions); Trenching Machine Operator; Wash Plant Operator

Group 13: Welder, Machine Doctor

Group 14: Hoist Operator (two or more drums of shafts or raises); Repairman; Mechanic; Machine Doctor, Welders and Helper; Heavy Duty Mechanic, Machine Doctor

Group 15: Cableway Operators; Mixer Drum Cranes, (Whirley, Gantry, Stiffleg, Overhead travelling)

Group 16: Shovels, Draglines, Cranes, Piledrivers, all truck mounted Cranes (manufacturer's rating) 3 1/2 yards to 7 cu. yds., all attachments; Wheel Excavator Operator

Group 17: Shovels, Draglines, Cranes, Piledrivers, all truck mounted Cranes, (manufacturer's rating) 7 cu. yds. and over, all attachments

NOTICES

TRUCK DRIVERS

Pick-up Truck Drivers (when used for hauling)

Dump Truck Drivers (water level capacity load)

Over 7 cu. yds. and less than 10 cu. yds.

Over 10 cu. yds. to and including 13 cu. yds.

Over 13 cu. yds. to and including 20 cu. yds.

Over 20 cu. yds. to and including 25 cu. yds.

Over 25 cu. yds. to and including 30 cu. yds.

Over 30 cu. yds. to and including 35 cu. yds.

Over 35 cu. yds. to and including 40 cu. yds.

Over 40 cu. yds. to and including 45 cu. yds.

Over 45 cu. yds. (to be negotiated prior to use)

Show Plow Truck Drivers (the cu. yd. rate of the truck driver classification):

off the Coasts of the United States

NOTICES

[4710-01]

DEPARTMENT OF STATE

[Public Notice 588]

FISHERY CONSERVATION AND MANAGEMENT ACT OF 1976

Applications for Permits to Fish off the Coasts of the United States

The Fishery Conservation and Management Act of 1976 (Pub. L. 94-265) (the "Act") provides that no fishing shall be conducted by foreign fishing vessels in the Fishery Conservation Zone of the United States after Febru-

ary 28, 1977, except in accordance with a valid and applicable permit issued pursuant to Section 204 of the Act.

The Act also requires that all applications for such permits be published in the FEDERAL REGISTER.

Applications for fishing during 1978 have been received from the Governments of Spain and the Union of Soviet Socialist Republics, and are published herewith.

Dated: January 18, 1978.

DONALD J. YELLMAN,  
Acting Director,  
Office of Fisheries Affairs.

FISHING VESSEL IDENTIFICATION FORM (FISH)

No. SP-78-0052

1. Name of Vessel KANTOXIDE Visual Ident. E.G.Z.J.  
 2. Type of Vessel Side trawler 3. H.P. (Call Sign) 48  
 4. Length 48 5. Gross Tonnage 483 6. Net Tonnage 200 7. Speed (knots) 12  
 8. Owner's Name and Address MANUAGA, S.A. Dársena de Equidazu, 1, 2 y 3  
ONDARROA (Vizcaya)  
 9. Types of Processing Equipment Flash freezer

10. Fisheries for which Permit is Requested:

Fishery Plans	Target Species	Gear To Be Used	Catching	Processing	Other Support
SOU		Bottom trawl	X	X	

11. Are Fishing Activities Requested in Support of Vessels of a Different Flag:  
☒ No ☐ Yes (If yes, attach supplemental sheet showing flag of other vessels, fishery, species, quantities, dates, locations and specific activities requested.)

FISHING VESSEL IDENTIFICATION FORM (FISH)

No. SP-78-0079

1. Name of Vessel PERALIA Visual Ident. E.F.K.M.  
 2. Type of Vessel Side trawler 3. H.P. (Call Sign) 44  
 4. Length 218 5. Gross Tonnage 481 6. Net Tonnage 218 7. Speed (knots) 10  
 8. Owner's Name and Address MANUEL GESTOSO COSTAS, - Tomás A. Alonso, 294  
VIGO  
 9. Types of Processing Equipment Flash freezer

10. Fisheries for which Permit is Requested:

Fishery Plans	Target Species	Gear To Be Used	Catching	Processing	Other Support

11. Continued

SUPPORT OF APPROXIMATELY 3 OR 4 U.S. FLAG FISHING VESSELS FISHING FOR MARINE RESOURCES CO. OF SEATTLE.

Fishery - WOC  
 Species - Target species - Pacific Hake  
 Quantities - (Total amount for Tikhvin and Sulak combined) - approximately 10,000 MT to be processed for Marine Resources Co. from catches they will purchase from U.S. fishing vessels.  
 Dates - May through October  
 Location - Various locations within the USFCZ off Washington, Oregon and California.

DEPARTMENT OF  
 THE INTERIOR  
 Geological Survey

OUTER CONTINENTAL  
 SHELF

Oil and Gas Sulphur Operations;  
 Oil and Gas Information Program

[4310-31]

## Title 30—Mineral Resources

CHAPTER II—GEOLOGICAL SURVEY,  
DEPARTMENT OF THE INTERIOR

## PART 250—OIL AND GAS AND SULPHUR OPERATIONS IN THE OUTER CONTINENTAL SHELF

AGENCY: U.S. Geological Survey, Interior.

ACTION: Final rule.

**SUMMARY:** These regulations revise and more clearly define existing procedures (30 CFR 250.34) for the submission by oil and gas lessees on the Outer Continental Shelf (OCS) of plans for exploration and development/production activities on the OCS. The regulations also significantly expand the information which States affected by OCS development will receive, and provide commenting procedures for affected States and local governments. Finally, the regulations delineate procedures for determining whether or not an Environmental Impact Statement will be required for exploration and development/production plans.

## FOR FURTHER INFORMATION CONTACT:

Russell G. Wayland, Acting Chief, Conservation Division, U.S. Geological Survey, National Center (Mail Stop 620), Reston, Va. 22090, 703-860-7524.

**AUTHORS:** Hope Babcock, Office of the Assistant Secretary, Energy and Minerals, U.S. Department of the Interior; Charles Hardee, Office of the Solicitor, U.S. Department of the Interior; Gerald Rhodes, U.S. Geological Survey, U.S. Department of the Interior.

**EFFECTIVE DATE:** January 27, 1978. See Supplementary Information below.

## SUPPLEMENTARY INFORMATION:

In accordance with the provisions of the Administrative Procedures Act (5 U.S.C. 553(d)), the Secretary of the Interior has determined that it is in the public interest for these regulations to become final on publication. This determination is based on the need to have the regulations effective at the time of the next sale of OCS oil and gas leases. The North Atlantic OCS Lease Sale (Sale No. 42) is scheduled to be held on January 31, 1978.

## I. EXPLANATORY STATEMENT

These regulations were initially published as proposed regulations on September 27, 1977 (42 FR 49478). Fifty-nine comments from individuals, private interest groups, industry, State and local governments, and other Fed-

## RULES AND REGULATIONS

eral agencies were received. The U.S. Geological Survey would like to thank all those who commented. The comments have helped greatly in the drafting of final regulations.

## II. DISCUSSION OF MAJOR COMMENTS

## AUTHORITY OF THE SECRETARY OF THE INTERIOR TO PROMULGATE THESE REGULATIONS

A number of commenters objected to the promulgation of these regulations in this form on the ground that there is no existing statutory basis for them.

The Outer Continental Shelf Lands Act of 1953 (OCS Lands Act) requires the Secretary of the Interior to:

Administer the provisions of (the) Act relating to the leasing of the Outer Continental Shelf, (and to) prescribe such rules and regulations as may be necessary to carry out such provisions. The Secretary may at any time prescribe and amend such rules and regulations as he determines to be necessary and proper in order to provide for the prevention of waste and conservation of the natural resources of the Outer Continental Shelf. . . . 43 U.S.C. 1334(a)(1) (emphasis added).

These statutory provisions have been construed broadly to give the Secretary authority to prescribe regulations for protection of the environment. See *Union Oil Co., v. Morton*, 512 F. 2d 743 (9th Cir. 1975); *Gulf Oil Corp. v. Morton*, 493 F. 2d 141 (9th Cir. 1973).

Also, the National Environmental Policy Act of 1969 requires that:

... To the fullest extent possible ... the policies, regulations, and public laws of the United States shall be interpreted and administered in accordance with the policies set forth in this Chapter ...

Clearly, the OCS Lands Act, as supplemented by the National Environmental Policy Act, gives the Secretary extensive authority to supervise and oversee all operations on OCS areas leased for oil and gas development. This necessarily includes the authority to obtain all available information on the resources of the OCS, and environmental information regarding the affected OCS area and all areas impacted by OCS development, whether on the OCS or not. In addition, the Secretary's authority to prevent waste clearly includes authority to order additional exploratory surveys where those surveys are necessary to the preparation and evaluation of a comprehensive proposal for exploration or development and production.

In the administration of any large Federal program, such as the OCS oil and gas program, it is necessary to address environmental impacts as they affect the entire ecological system, to the extent this is possible under existing technology. Because jurisdictional boundaries often impede this type of overview, an effective information ex-

change and coordination mechanism between jurisdictions is essential. The requirements contained in these regulations for the submission of information to the States are intended to meet this need.

The Outer Continental Shelf Lands Act provides specific authority for the creation of a coordination mechanism between the Department of the Interior and States affected by OCS development:

In the enforcement of conservation laws, rules, and regulations, the Secretary is authorized to cooperate with the conservation agencies of the adjacent States. 43 U.S.C. 1334(a)(1).

Thus there is ample authority under existing law for the promulgation of these regulations.

## REDUNDANCY OF REQUIREMENTS

Several commenters noted what they believed to be redundant information reporting requirements between these regulations and similar regulations and proposals being considered by other Federal agencies and offices within the Department of the Interior.

In the promulgation of these regulations an effort has been made to coordinate the requirements of the various pending proposals to avoid unnecessary duplication. The Department has for example, worked closely with the Office of Coastal Zone Management (OCZM), National Oceanic and Atmospheric Administration, to assure that these regulations will not duplicate or conflict with the requirements of OCZM's pending regulations, Proposed 15 CFR Part 930, 42 FR 43586, August 29, 1977, implementing the Federal consistency provisions of the Coastal Zone Management Act of 1972 (CZMA), as amended (16 U.S.C. § 1456).

Section 250.34-3 of these regulations appears to duplicate the requirements of the Appendices to OCZM's Consistency Regulations (42 FR 43609). The two agencies have agreed that in the final draft of the Consistency Regulations, the Appendices will be deleted.

Also, the consistency-related requirements of §§ 250.34-1 (c), (d), (e) and 250.34-34-2 (d), (e), (f) of these regulations appear to duplicate certain requirements of the OCZM Consistency Regulations. This is not the case. These provisions are intended merely to fulfill and reference the parallel requirements of the OCZM regulations.

It must be recognized, however, that OCZM is the agency with responsibility for implementation of the entire CZMA, including the consistency provisions. If questions arise regarding compliance with the consistency requirements, they should be addressed to OCZM.

The Department recognizes that there will be some redundancy be-

tween these regulations and other Federal Agency proposals. In most cases we have reviewed, however, the scope and purpose of other agency proposals varies so greatly from the scope and purpose of these regulations that it would be difficult or impossible to coordinate the proposals. The Department will continue to comment on the proposals of other agencies and offices in an effort to avoid duplication.

## INCONSISTENCY WITH OCS ORDERS, NOTICES TO LESSEES, AND LEASE STIPULATIONS

A number of commenters noted apparent inconsistencies and redundancies between these regulations and other OCS directives. Where the requirements of this section duplicate the requirements of OCS Orders, Notices to Lessees or Lease Stipulations, an attempt is being made to cross-reference the various directives with these regulations. Where no cross-reference is made, for example in proposed Lease Stipulation No. 4 for the North Atlantic Lease Sale (Notice of Sale No. 42, 42 FR 65285 (December 30, 1977)), it may be assumed that the information required to be provided to affected States under these regulations will generally fulfill similar requirements elsewhere.

Where there are inconsistencies between these regulations and OCS Orders and Notices to Lessees, the provisions of the regulations will govern. OCS Orders and Notices to Lessees are vehicles for implementing OCS regulations and therefore may not modify the regulations. The provisions of current OCS Orders and Notices to Lessees which are consistent with these regulations will continue in effect until modified or superseded.

Because the promulgation of these regulations obviates the need for a new OCS Order No. 15, the proposal to issue Order No. 15 (41 FR 204 (October 20, 1976)) is recinded with final publication of these regulations.

## WITHHOLDING CONFIDENTIAL INFORMATION FROM DISCLOSURE

A great many comments were addressed to the issue of whether or not confidential data and information received by Geological Survey from OCS lessees should be made available to affected States. Industry commenters objected to any release of information considered to be confidential under the disclosure exemptions of the Freedom of Information Act (FOIA) (5 U.S.C. 552) and the Department's implementing regulations (43 CFR Part 2, 30 CFR Parts 250 and 251). State and local government commenters, on the other hand, argued that it is necessary for State planning purposes that the States be supplied with virtually all data and information received by Geological Survey, regardless of

## RULES AND REGULATIONS

the confidentiality of such information.

This issue has been directly addressed by the Department in the establishment of an "Outer Continental Shelf Oil and Gas Information Program," Proposed 30 CFR Part 252, 42 FR 53956 (September 26, 1977), which is being published as final regulations elsewhere in today's FEDERAL REGISTER. The provisions of those regulations are the result of a balancing of the public interest in obtaining information about its resources with the public interest in maintaining an active and competitive oil and gas industry. To that end, a procedure is established for the preparation of a Summary Report, specifically designed to assist affected States in planning for near-shore and onshore impacts from OCS activities, which will be derived from confidential data and information available to the Geological Survey. The Department believes that this is a fair accommodation of the competing interests involved. Anyone desiring a fuller discussion of these matters should refer to the 30 CFR Part 252 regulations and the preamble discussion published with them.

## APPLICABILITY TO EXISTING LEASES AND PENDING OCS PLANS

Several commenters questioned whether these regulations would be applicable to existing leases and OCS exploration and development/production plans submitted for approval prior to the effective date of the regulations. As regulations promulgated under the conservation authority of the Secretary of the Interior, these regulations are applicable to existing leases. As to OCS plans, the regulations will apply to those plans submitted after the effective date, and not to plans submitted prior to that date which are pending approval.

## III. SECTION-BY-SECTION DISCUSSION

An "Authority" statement was inserted to specify the various statutory bases for the regulations. The basic authority is the Outer Continental Shelf Lands Act. The National Environmental Policy Act is cited as authority for the section of the regulations dealing with Environmental Impact Statements (§ 250.34-4). The Coastal Zone Management Act (CZMA) is cited because of references to that Act made within the regulations and also because the regulations undertake to define a phrase contained in the CZMA. Section 307 of the CZMA (16 U.S.C. 1456) generally requires that activities "described in detail" in OCS exploration and development production plans be consistent with State coastal zone management programs approved under the Act. These regulations define what is to be described in detail in OCS plans.

An explanatory "note" has been added to make clear that definitions contained in 30 CFR §§ 250.2 and 252.2 will apply to these regulations.

It should also be noted that each of the four new subheadings of 250.34 (250.34-1, 250.34-2, 250.34-3, and 250.34-4) is considered to be a separate section.

## SECTION 250.34-1 EXPLORATION PLAN

**250.34-1(a).** The basic requirement that no exploration activities commence until an exploration plan has been approved has been modified to allow "preliminary activities" to go forward prior to the submission and approval of a plan. Preliminary activities are defined as geological, geophysical, and other surveys which (1) Are necessary to develop a comprehensive exploration plan, (2) do not result in any physical penetration of the seabed of greater than three hundred (300) feet of fifty (50) feet of consolidated formations, and (3) do not result in any significant adverse impact on the natural resources of the OCS.

This very limited exception to the activities which must be approved by Geological Survey is necessary in order that lessees be able to gather sufficient information to prepare an initial exploration plan. Without some specific knowledge of the area's geology, it would be difficult or impossible to prepare a comprehensive exploration plan, including locations for proposed wells, for the area. This system conforms with past practice and has been shown to not result in any appreciable adverse environmental impacts.

In addition, the word "approximate" has been inserted before "location of each proposed exploratory well" in § 250.34-1(a)(4) to allow some flexibility in final placement of wells. Although an exploration plan may propose locations for several wells, the exact location of later wells depends to some extent on the results of earlier wells.

A sentence has been added to the end of section 250.34-1(a) to require the lessee to indicate which portions of a proposed exploration plan he believes to be exempt from disclosure under the Freedom of Information Act (FOIA) (5 U.S.C. § 552) and implementing regulations (43 CFR Part 2). This is intended to lessen the burden on the Supervisor, who must determine which information is exempt from disclosure before transmitting copies of the plan to affected States (section 250.34-1(c)). This procedure should also help in the avoidance of errors by the Supervisor in deleting confidential information. It is hoped that lessees will segregate information believed to be confidential from the rest of the information contained in the plan so that the Supervisor can expedite his responsibilities in this regard.

Finally, paragraph (2) of the proposed regulations has been deleted. That paragraph would have required lessees to submit a general statement of intentions and expectations regarding development and production activities that would follow a discovery of oil and/or gas. Under the Outer Continental Shelf Lands Act, a lessee who makes a discovery of oil or gas, or both, on the OCS must proceed diligently to produce that oil or gas. In addition, lessees generally would not be able to state specifically how they will proceed to production until they find out the extent and quality of a discovery. Therefore, such a statement would be unnecessary and impracticable at this stage.

250.34-1(b). A new subsection has been inserted to clarify the procedure for submission and receipt of exploration plans and accompanying Environmental Reports (Exploration) required by § 250.34-3(a). (The succeeding subsections have been redesignated accordingly.) This new subsection clarifies the requirement that the plan and the Environmental Report be submitted concurrently, as one package in effect. Also the subsection calls for a determination by the Supervisor that the information in the plan and report is complete before he deems the package to be "received" for any purpose, including the running of applicable time periods for State review.

Finally, since the determination of completeness of the Environmental Report (Exploration) affects the State interest in obtaining near-shore and onshore information, the Supervisor is required to consult with each affected State in order to assure that each State has input in that determination. A similar provision appeared as section 250.34-3(b)(3) in the proposed regulations.

250.34-1(c). Minor changes only.

250.34-1(d). This subsection has been reorganized and clarified in several respects. It has been made clear that the general commenting procedures of paragraph (1) are available to all affected States, including States with approved coastal zone management programs. The Supervisor is now required to respond in writing to all timely written comments received from affected States. Also, in response to comments, a time period of 30 days for State review and comment has been added. Finally, the reference to the consistency requirements of the CZMA has been redrafted to conform to wording suggested by the Office of Coastal Zone Management.

250.34-1(e). Minor changes only.

250.34-1(f). Redrafted for clarity.

250.34-1(h). Redrafted for clarity.

250.34-1(h). A new subsection has been inserted to make clear that the responsibility of lessees to take appropriate measures to meet emergency

situations is not limited by these new regulations. Where the Supervisor approves or directs departures from an exploration plan in an emergency situation, he must advise affected States of the action taken.

250.34-1(i). The revised subsection of the proposed regulations was modified to allow minor revisions in exploration plans without full State comment and review. A revision that could cause significant changes in the impacts described in the applicable Environmental Report (Exploration) will require State review and revision of the Environmental Report.

#### SECTION 250.34-2 DEVELOPMENT AND PRODUCTION PLAN

Most changes made in this section conform to changes discussed above which were made in § 250.34-1. For an explanation of these changes, please refer to the appropriate discussion above.

250.34-2(a). Paragraph (5) of the proposed § 250.34-2(a) has been deleted. That paragraph would have required a lessee to submit a description of all new offshore facilities and operations proposed by the lessee or known by him (whether or not owned or operated by the lessee) to be directly related to the proposed development or production activities. That paragraph would have largely duplicated similar requirements contained in the section relating to the Environmental Report (Development/Production) § 250.34-3(b).

250.34-2(b). See discussion under 250.34-1(b) above.

250.34-2(c). No change.

250.34-2(d). Minor changes only.

250.34-2(e). See discussion under 250.34-1(d) above.

250.34-2(f). Minor changes only.

250.34-2(g). Redrafted for clarity.

250.34-2(h). See discussion under 250.34-1(h) above.

250.34-2(i). See discussion under 250.34-1(i) above.

#### SECTION 250.34-3 ENVIRONMENTAL REPORTS; INFORMATION TO BE PROVIDED TO AFFECTED STATES

Only minor changes have been made in this section. The introductory statements in subsections (a) and (b) were redrafted to make clear that the Environmental Report (Exploration) is not intended to be as detailed or comprehensive as the Environmental Report (Development/Production). Other changes were made to conform to changes in §§ 250.34-1 and 250.34-2.

#### SECTION 250.34-4 COMPLIANCE WITH THE NATIONAL ENVIRONMENTAL POLICY ACT

This section has been substantially reorganized to reflect the requirements of the National Environmental Policy Act (NEPA).

250.34-4(a). This subsection defines the steps the Supervisor must take in deciding whether an Environmental Impact Statement (EIS) should be prepared for an exploration or development and production plan. He must first prepare an environmental "assessment." The assessment must be prepared in accordance with applicable guidelines and policies. This assessment requirement actually does no more than restate existing Geological Survey practice. Paragraph (1) does, however, focus the assessment somewhat by incorporating the four specific considerations listed.

If after completing an assessment the Supervisor believes that an EIS is warranted, paragraph (2) requires him to review previous EIS's and determine whether the impacts which would be addressed in the new EIS have already been adequately considered in a previous EIS. In this regard he will consider the two specific issues listed.

Finally, the Director shall review the Supervisor's assessment of whether or not to prepare an EIS, and may reverse the Supervisor's determination.

250.34-4(b). Where it has been determined that an EIS will be prepared for a development and production plan under subsection (a), it must be decided whether the EIS will cover an individual plan or a number of plans. Subsection (b) requires that the EIS cover two or more proposed plans if the stated criteria have been met. It is intended that an EIS will be prepared for more than one plan where it is necessary to assess the cumulative impacts of a number of proposed plans.

Since it is possible that an individual development and production plan will trigger the criteria of this subsection, and that no other plans will be pending at that time, a sentence has been added to reflect the Supervisor's authority to order preliminary descriptions of development and production plans from other lessees in the area.

250.34-4(c). This subsection has been modified from the proposed regulations to conform with existing law regarding limitations on agency action during preparation of an EIS.

#### IV. ENVIRONMENTAL AND INFLATION IMPACT STATEMENTS

NOTE.—The Department of the Interior has determined that promulgation of these regulations will not have a significant impact on the environment and therefore will not require preparation of an Environmental Impact Statement. The Department has also determined that this document does not require preparation of an Inflation Impact Statement under Executive Order 11621 and OMB Circular A-107.

Dated: January 24, 1978.

JOAN M. DAVENPORT,  
Assistant Secretary  
of the Interior.

30 CFR 250.34 is modified to read:

Sec.  
250.34 Exploration, development, and production plans.  
250.34-1 Exploration plan.  
250.34-2 Development and production plan.  
250.34-3 Environmental reports; information to be provided to affected States.  
250.34-4 Compliance with the National Environmental Policy Act.

AUTHORITY: Outer Continental Shelf Lands Act of 1953, as amended (43 U.S.C. 1331 et seq.); National Environmental Policy Act of 1969 (42 U.S.C. 4332); Coastal Zone Management Act of 1972, as amended (16 U.S.C. 1456).

NOTE.—Terms used in this section are defined in 30 CFR 250.2 and 252.2.

§ 250.34 Exploration, development, and production plans.

§ 250.34-1 Exploration plan.

(a) No exploration activities, except for preliminary activities, may be commenced on any leased area until a proposed exploration plan covering that area has been submitted to and approved by the Supervisor. Preliminary activities are geological, geophysical, and other surveys which are necessary to develop a comprehensive exploration plan but which do not result in any physical penetration of the seabed of greater than three hundred (300) feet or fifty (50) feet of consolidated formations or in any significant adverse impact on the natural resources of the Outer Continental Shelf (OCS). An exploration plan may apply to one or more leases held by an individual lessee, or may be submitted by a group of lessees acting jointly through a unit operator pursuant to an approved unit agreement. A proposed exploration plan shall identify and describe (in the detail required by the regulations in this Part, OCS Orders, and Notices to Lessees) all exploration activities to be undertaken on the area covered by the plan for the time period specified in the plan. An exploration plan shall include:

(1) The proposed type and sequence of exploration activities to be undertaken together with a tentative timetable for performance;

(2) A description of the drilling vessels, platforms, or other offshore structures to be used indicating the important features thereof with special attention to safety features and pollution-prevention and control features;

(3) Types of geophysical equipment to be utilized;

(4) Approximate location of each proposed exploratory well, including surface and projected bottom hole location of each directionally drilled well;

(5) Current structure maps and, as appropriate, schematic cross sections showing expected depth of marker formations; and

(6) Such other relevant data and information as the Supervisor may require.

The lessee shall indicate which portions of the proposed exploration plan he believes to be exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552) and implementing regulations (43 CFR Part 2).

(b)(1) A proposed exploration plan and its accompanying Environmental Report (Exploration) shall be submitted at the same time and shall not be deemed received by the Supervisor until he has determined that they are complete and contain the information required by subsections 250.34-1(a) and 250.34-3(a) of this Part.

(2) Prior to making the determination under paragraph (1), the Supervisor shall provide each affected State with an advance copy of the Environmental Report (Exploration). If any affected State believes the Environmental Report (Exploration) does not satisfy the requirements of § 250.34(a), the State must make its objections known to the Supervisor within 10 days. The Supervisor shall attempt to resolve the State's objections through whatever means are available, including meeting informally with representatives of the lessee and affected State. If the differences cannot be resolved in this manner, the supervisor shall determine whether the report complies with the requirements of § 250.34-3(a) and shall notify the lessee and the affected State of the determination.

(c) The lessee shall submit to the Supervisor a sufficient number of copies of each proposed exploration plan to permit the Supervisor to transmit copies of the plan to the Governor and the coastal zone management agency of each affected State and to the United States Office of Coastal Zone Management. Within ten (10) days after his determination of receipt of the proposed plan under subsection (b)(1) of this section, the Supervisor shall transmit a copy of the plan, except for those portions he determines to be exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552) and implementing regulations (43 CFR Part 2), to the Governor and coastal zone management agency of each affected State and to the United States Office of Coastal Zone Management. The Supervisor shall also make copies of the plan available to the public, except for those portions he has determined to

be exempt, in accordance with the Freedom of Information Act.

(d)(1)(i) In his evaluation of a proposed exploration plan the Supervisor shall consider comments received from the Governors of affected States, whether or not such States have coastal zone management programs approved pursuant to section 306 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. 1455). The Supervisor shall respond in writing to all timely submitted written comments and give his reasons for the action taken. The Supervisor may consult directly with affected States regarding matters contained in the comments.

(ii) The Supervisor shall not grant or deny approval for a proposed exploration plan until written comments have been received from each affected State, or until 30 days after each affected State receives a copy of the proposed plan and its accompanying Environmental Report, whichever occurs first.

(2) Notwithstanding the provisions of paragraph (1) of this subsection, the Supervisor shall not approve any activity described in detail in an exploration plan and affecting any land or water use in the coastal zone of a State with a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. 1455), unless such State or its designated agency concurs or is conclusively presumed to concur with the consistency certification accompanying such plan pursuant to subsection 307(c)(3)(B) of such Act (16 U.S.C. 1456(c)(3)(B)), or the Secretary of Commerce makes the finding authorized by subsection 307(c)(3)(B) of such Act.

(e) The lessee may not drill any well until he receives the Supervisor's approval of an application for permit to drill filed in accordance with the requirements of sections § 250.41(a) and § 250.91(a). The Supervisor shall not approve any permit which does not conform to the applicable approved exploration plan. The Supervisor shall transmit a copy of the lessee's application for permit to drill, except for those portions he determines to be exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552) and implementing regulations (43 CFR Part 2), to each affected State, unless he is informed by such State that it does not wish to receive a copy of the application. Since a permit to drill must conform with an approved exploration plan, the permit application is not subject to separate State consistency review under the Coastal Zone Management Act.

(f) The Supervisor shall periodically review each approved plan. The frequency and extent of his review shall be based upon the significance of any

changes in available information and in other onshore or offshore conditions affecting or impacted by exploration pursuant to such plan. If the review indicates that the plan should be revised to meet the requirements of this Part, the Supervisor shall require such revision pursuant to subsection (l) of this section.

(g) The Supervisor may authorize or direct the lessee to conduct such geological, geophysical, or other surveys as the Supervisor determines to be necessary for the evaluation of activities to be carried out under a proposed exploration plan or being carried out under an approved plan. The lessee shall provide the Supervisor, upon his request, with copies of any data obtained as a result of such surveys.

(h) Nothing in this section shall be viewed as limiting the lessee's responsibility to take appropriate measures to meet emergency situations. In such situations, the Supervisor may approve or require departures from an approved exploration plan. When such departures are authorized or directed, the Supervisor shall, as soon as practicable, advise the Governors of affected States of the action taken.

(i) Proposals to revise a proposed or approved exploration plan, whether initiated by the lessee or ordered by the Supervisor, shall be submitted to the Supervisor for approval in the same manner as, and with the same information required for, a new plan of exploration. When the Supervisor determines that a proposed revision could result in a significant change in the impacts identified and assessed in the Environmental Report (Exploration) submitted in accordance with subsection 250.34-3(a), the revision shall be subject to the procedures of subsections (b), (c), and (d) of this section, and the lessee shall submit appropriate revisions to the Environmental Report (Exploration) in accordance with § 250.34-3(a).

#### § 250.34-2 Development and production plan.

(a) No development or production activities may be commenced on any leased area until a proposed plan of development and production covering that area has been submitted to and approved by the Supervisor. A development and production plan may apply to one or more leases held by an individual lessee or may be submitted by a group of lessees acting jointly through a unit operator pursuant to an approved unit agreement. A proposed plan of development and production shall identify and describe (in the detail required by the regulations in this Part, applicable OCS Orders, and Notices to Lessees) all development and production activities to be undertaken on the area covered by the plan for the time period specified in

the plan. A development and production plan shall include:

(1) A description of the specific work to be performed together with a proposed schedule for development and production;

(2) A description of drilling vessels, platforms, or other offshore structures to be used showing the location, design, and important features thereof, including features pertaining to safety and to pollution prevention and control;

(3) The location of each well, including surface and projected bottom hole locations for each directionally drilled well;

(4) Current interpretations of all available geological and geophysical data, including structure maps and schematic cross sections of productive formations;

(5) A description of the environmental safeguards to be implemented in the course of development and production operations under the plan together with a discussion of how such safeguards are to be implemented;

(6) all safety standards to be met and the safety features to be utilized in order to meet those standards; and

(7) such other relevant data and information as the Supervisor may require.

The lessee shall indicate which portions of the proposed development and production plan he believes to be exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552) and implementing regulations (43 CFR Part 2).

(b) (1) A proposed development and production plan and the accompanying Environmental Report (Development/Production) shall be submitted at the same time, and shall not be deemed received by the Supervisor until he determines that they are complete and contain the information required by subsections 250.34-2(a) and 250.34-3(b).

(2) Prior to making the determination under paragraph (1), the Supervisor shall provide each affected State with an advance copy of the Environmental Report (Development/Production). If any affected State believes the Environmental Report (Development/Production) does not satisfy the requirements of § 250.34-3(b), the State must make its objections known to the Supervisor within 10 days. The Supervisor shall attempt to resolve the State's objections through whatever means are available, including meeting informally with representatives of the lessee and affected State. If the differences cannot be resolved in this manner, the Supervisor shall determine whether the report complies with the requirements of § 250.34-3(b) and shall notify the lessee and the affected State of the determination.

(c) The Supervisor may require the lessees of tracts on which oil or gas, or

both, have been discovered in paying quantities and which are adjacent to or nearby the area covered in a proposed plan of development and production, to submit a preliminary description of their plans for development and production on the adjacent or nearby areas.

(d) The lessee shall submit to the Supervisor a sufficient number of copies of each proposed plan of development and production to permit the Supervisor to transmit copies of the plan to the Governor and coastal zone management agency of each affected State and to the United States Office of Coastal Zone Management. Within ten (10) days after his determination of receipt of the proposed plan under subsection (b)(1) of this section, the Supervisor shall transmit a copy of the plan, except for those portions he determines to be exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552) and implementing regulations (43 CFR Part 2), to the Governor and coastal zone management agency of each affected State and to the United States Office of Coastal Zone Management. The Supervisor shall also make copies of the plan available to the public, except for those portions he has determined to be exempt, in accordance with the Freedom of Information Act.

(e)(1) (i) In his evaluation of a proposed plan of development and production, the Supervisor shall consider comments received from the Governors of affected States, whether or not such States have coastal zone management programs approved pursuant to section 306 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. 1455). The Supervisor shall respond in writing to all timely submitted written comments giving his reasons for the action taken. The Supervisor may consult directly with affected States regarding matters contained in the comments.

(ii) The Supervisor shall not grant or deny approval for a proposed plan of development and production until written comments have been received from each affected State, or until 60 days after each affected State receives a copy of the proposed plan and its accompanying Environmental Report, whichever occurs first.

(2) Notwithstanding the provision of paragraph (1) of this subsection, the Supervisor shall not approve any activity described in detail in a development and production plan and affecting any land or water use in the coastal zone of a State with a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. 1455), unless such State or its designated agency concurs or is conclusively presumed to concur with the consistency certification accompa-

nying such plan pursuant to subsection 307(c)(3)(B) of such Act (16 U.S.C. 1456(c)(3)(B)), or the Secretary of Commerce makes the finding authorized by subsection 307(c)(3)(B) of such Act.

(f) The lessee may not drill any well until he receives the Supervisor's approval of an application for permit to drill filed in accordance with the requirements of sections 250.41(a) and 250.91(a) of this Part. The Supervisor shall not approve any permit which does not conform with the applicable approved plan of development and production. The Supervisor shall transmit a copy of the lessee's application for permit to drill, except for those portions he determines to be exempt from disclosure under the Freedom of Information Act (43 U.S.C. 552) and implementing regulations (43 CFR Part 2), to each affected State, unless he is informed by such State that it does not wish to receive a copy of the application. Since a permit to drill must conform to an approved plan of development and production, the permit application is not subject to separate State consistency review under the Coastal Zone Management Act.

(g) The Supervisor shall periodically review each approved development and production plan. The frequency and extent of his review shall be based upon the significance of any changes in available information and in other onshore or offshore conditions affecting or impacted by development or production pursuant to such plan. If the review indicates that the plan should be revised to meet the requirements of this Part, the Supervisor shall require such revision pursuant to subsection (j) of this section.

(h) The Supervisor may authorize or direct the lessee to conduct such geological, geophysical, or other surveys as the Supervisor determines to be necessary for the evaluation of activities to be carried out under a proposed development and production plan or being carried out under an approved plan. The lessee shall provide the Supervisor, upon his request, with copies of any data obtained as a result of such surveys.

(i) Nothing in this section shall be viewed as limiting the lessee's responsibility to take appropriate measures to meet emergency situations. In such situations, the Supervisor may approve or require departures from an approved development and production plan. When such departures are authorized or directed, the Supervisor shall, as soon as practicable, advise the Governors of affected States of the action taken.

(j) Proposals to revise a proposed or approved development and production plan, whether initiated by the lessee or ordered by the Supervisor, shall be

submitted to the Supervisor for approval in the same manner as, and with the same information required for, a new development and production plan. When the Supervisor determines that a proposed revision could result in a significant change in the impacts identified and assessed in the Environmental Report (Development/Production) submitted in accordance with subsection 250.34-3(b), the revision shall be subject to the procedures of subsections (b), (d), and (e) of this section, and the lessee shall submit appropriate revisions to the Environmental Report (Development/Production) in accordance with § 250.34-3(b).

#### § 250.34-3 Environmental reports; information to be provided to affected states.

(a) Environmental Report (Exploration). At the same time the lessee submits a proposed exploration plan to the Supervisor, he shall submit an Environmental Report (Exploration). The report may be in summary form, need not be as detailed as the report required by subsection (b) of this section, and should reference information contained in the most recent Environmental Impact Statement prepared for the area. The Environmental Report (Exploration) shall include information available at the time of plan submission to the extent that such information is accurate, current, and applicable to the geographic area covered by the proposed exploration plan.

(1) The Environmental Report (Exploration) shall contain, but need not be limited to, the following information:

(i) a description of the affected ocean area, including a general description of water depth, currents, water quality, submarine geology, weather patterns, and ambient air quality;

(ii) a description of environmentally sensitive or potentially hazardous areas which might be affected by the proposed exploration activities and a description of the alternatives considered and the actions to be taken to preserve or protect such areas. Such areas shall include, but are not limited to, those of cultural, biological (e.g., fisheries), archeological, or geological (e.g., seismic) significance, and areas of particular concern designated by affected States pursuant to the Coastal Zone Management Act;

(iii) a description of procedures, personnel, and equipment that are to be used for preventing, reporting, and cleaning up spills of oil or waste materials which might occur during the proposed exploration activities, including information on response time, capacity, and location of equipment;

(iv) the location, size, and number of onshore support and storage facilities, their land requirements and related

rights-of-way and easements, which could result from or be required by approval of the proposed exploration plan, including where possible a timetable regarding the acquisition of lands and the construction or expansion of any facilities;

(v) an estimate of the number of persons expected to be employed in support of offshore, onshore, and transportation activities, including where possible the approximate number of new employees and families likely to move into the affected coastal area;

(vi) a description of the most likely travel routes for boat and aircraft traffic between offshore and onshore facilities, an estimate of the frequency such routes will be traversed, on a monthly basis, and the probable onshore location of terminals;

(vii) a description of the quantity and composition of solid and liquid wastes and gaseous pollutants likely to be generated by offshore, onshore, and transport operations and a description of treatment and disposal alternatives considered and actions to be taken to limited pollution effects;

(viii) an estimate of any significant demand for major supplies, equipment, goods, services, water, aggregate, energy, or other resources within coastal areas of affected States necessary for carrying out the proposed plan;

(ix) an assessment of the impact on the offshore and onshore environments expected to occur as a result of implementation of the proposed exploration plan, expressed in terms of magnitude and duration, with special emphasis upon the identification and evaluation of unavoidable and irreversible impacts on the environment;

(x) copies of all consistency certifications provided to affected States with approved coastal zone management programs; and

(xi) the name, address, and telephone number of an individual employee of the lessee to whom inquiries by the State agency may be made.

(2) The lessee shall submit a sufficient number of copies of each Environmental Report (Exploration) to permit the Supervisor to transmit a copy to the Governor and coastal zone management agency of each affected State and to the United States Office of Coastal Zone Management. The Supervisor shall transmit such copies at the same time he transmits copies of the applicable exploration plan. The Supervisor shall also make copies of the Environmental Report (Exploration) available to the public in accordance with the Freedom of Information Act.

(b) Environmental Report (Development/Production). At the same time the lessee submits a proposed development and production plan to the Supervisor, he shall submit an Environ-

mental Report (Development/Production). The report shall include all activities proposed for immediate implementation and those contemplated for future implementation and shall identify all environmental and safety features required by law together with such additional measures as the lessee proposes to employ. The report shall be as detailed as necessary to enable identification and evaluation of the significant environmental consequences of the proposed activities and shall include all information available to the lessee at the time of submission.

(1) The Environmental Report (Development/Production) shall contain, but need not be limited to, the following information:

(i) Location. The location, to the maximum extent practicable, and the description and size of any offshore and land-based operation to be conducted or contracted for as a result of the proposed lease or unit activity. This shall include:

(A) the acreage required within a State for facilities (such as staging areas for pipe coating and pipeline installation, platform fabrication and installation, and refineries), storage, rights-of-way and easements;

(B) the means proposed for transportation of oil and gas to shore, the routes to be followed by each mode of transportation and the estimated quantities of oil or gas, or both, to be moved along such routes;

(C) an estimate of the frequency of boat and aircraft departures and arrivals, the onshore location of terminals, and the normal routes for each mode of transportation; and

(D) quantities, types, and plans for disposal of solid and liquid wastes and gaseous pollutants which may be generated by offshore, onshore, and transport operations, and, regarding any wastes which may require onshore disposal, the means of transportation to be used to bring the wastes to shore, and the location of onshore waste disposal or treatment facilities.

(ii) Resource requirements. The requirements for land, labor, material, and energy for the items identified above including:

(A) the approximate number, timing, and duration of employment of persons who will be engaged in onshore development and transportation activities and offshore development and production activities, the approximate number of local personnel who will be employed for or in support of the development activities (classified by the major skills or crafts that will be required from local sources and estimated number of each such skill needed), and the approximate total number of persons who will be employed during the onshore construction activity and during all activities related to offshore development and production;

(B) the approximate number of people and families to be added to the population of local near-shore areas as a result of the planned development;

(C) an estimate of significant quantities of energy and resources to be used or consumed, including electricity, water, oil and gas, diesel fuel, aggregate, or other supplies, which may be purchased within an affected State; and

(D) the types of contractors or vendors which will be needed, although not specifically identified, and which may place a demand on local goods and services.

(iii) Time frame. A schedule setting forth specific development and production activities. To the maximum extent possible, individual activities are to be projected on a year-to-year basis. The schedule shall include:

(A) Sequence in which events are expected to be accomplished;

(B) Best estimate of time required to complete specific activities;

(C) Month and year that specific actions are most likely to occur onshore and offshore; and

(D) Month and year that other pertinent activities associated with development of onshore and offshore activities are likely to be accomplished.

(iv) Physical environment. A description of the leases to be developed. This portion of the report shall include data and information obtained or developed by the lessee together with other pertinent data and information available to the lessee from other sources. The lessee should cross-reference information on the physical environment in the most recent Environmental Impact Statement and should summarize pertinent information contained in other published accredited reports. The report shall clearly identify the source of all data and information contained therein. The data and information to be included in the lessee's report on the physical environment shall include where appropriate:

(A) Archeologic/cultural resource surveys of the lease or unit area;

(B) Seafloor configuration, stability, foundation characteristics, sedimentation, and erosion potential at the site of structural components described in the plan;

(C) Aquatic biota, including a description of fishery and marine mammal significance and utilization of the lease or unit area;

(D) Ocean currents described as to prevailing direction, seasonal variations and variations at different depths in the lease or unit area;

(E) Meteorologic conditions, including storm frequency and magnitude, wind direction and velocity, and ambient air quality, and listing, where possible, the means, extremes, and averages of each;

(F) Predevelopment water column quality (ambient) and temperature data for incremental depths for the area encompassed by the plan;

(G) Seismic risk and conditions (geophysical high-resolution surveys of sites, routes, and corridors);

(H) Amounts and types of ecologic disruption expected by construction of all planned facilities; and

(I) Volume and nature of emissions to be discharged into the atmosphere and the ocean. Specific components (e.g., NO, SO, hydrocarbons, etc.) are to be listed.

(v) Assessment of impacts. An assessment of the impact on the environment expected to occur as a result of implementation of the proposed plan. This section of the report shall identify specific and cumulative impacts that may occur both onshore and offshore. Such impacts shall be quantified to the fullest extent possible and shall be accumulated for all activities for each of the major elements of the environment (i.e., air, water, biota, etc.). In every case, impacts shall be expressed in terms of magnitude and duration. The report shall place special emphasis upon the identification and evaluation of unavoidable and irreversible impacts on the environment.

(vi) Contingency plans and equipment. A description of the contingency plans that are in effect for the area to be developed together with a discussion of the pollution-prevention and cleanup equipment that is or will be maintained on the drill site and in the area pursuant to a Regional Contingency Plan.

(vii) Alternatives to the plan. A discussion of alternatives to the activities proposed that were considered during the development of the proposed plan; for example, a comparison of development and production operations using a bottom-supported platform which extends above the surface of the ocean with a similar degree of oil and gas development using seafloor completion and production techniques. Any significant differences in the environmental impacts of the use of alternative technologies shall be identified and discussed.

(viii) Environmental monitoring systems. A description of existing monitoring systems that are currently measuring impacts of activities upon the environment in the lease area together with those additional systems that may be needed to provide accurate recording and reporting of cumulative impacts on the environment.

(ix) Consistency with applicable coastal zone management programs. Copies of all consistency certification provided to affected States with approved coastal zone management programs.

(x) Contact. The name, address, and telephone number of an individual em-

ployee of the lessee to whom inquiries by affected States may be directed.

(2) The lessee shall submit a sufficient number of copies of each Environmental Report (Development/Production) to permit the Supervisor to transmit a copy to the Governor and coastal zone management agency of each affected State and to the United States Office of Coastal Zone Management. The Supervisor shall transmit such copies at the same time he transmits copies of the applicable development and production plan. The Supervisor shall also make copies of the Environmental Report (Development/Production) available to the public in accordance with the Freedom of Information Act.

#### §250.34-4 Compliance with the National Environmental Policy Act (NEPA).

(a)(1) Prior to approval of a proposed exploration or development and production plan, or approval of significant revisions to approved exploration or development and production plans under subsections 250.34-1(i) or 250.34-2(j), the Supervisor shall prepare an Environmental Assessment, in accordance with applicable policies and guidelines, to determine whether the proposed activities constitute a major Federal action significantly affecting the quality of the human environment requiring preparation of an Environmental Impact Statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)). In his assessment the Supervisor may utilize information contained in the lessee's Environmental Report.

(i) In his assessment of whether an Environmental Impact Statement is required, the Supervisor shall give particular attention to:

(A) Location of major structures in areas of high seismic risk or seismicity;

(B) Location of major structures within or near the boundary of a marine sanctuary, wildlife refuge or other areas of high ecological sensitivity.

(C) Location of bottom-founded structures in areas of potentially hazardous natural bottom conditions; and

(D) Use of new and/or unusual technology.

(ii) An Environmental Impact Statement shall not be prepared when the Supervisor determines that the impacts of activities described in the Proposed plan or revision have been adequately considered in a previous Environmental Impact Statement. In this regard, the Supervisor shall give particular attention to:

(A) Whether implementation of the activities described in the plan or revision would require construction of new onshore processing, storage, treatment, or transportation facilities which could have significant adverse

impacts upon the human, marine or coastal environments that have not been adequately considered in a previous Environmental Impact Statement; and

(B) The likelihood of adverse impacts on the human, marine or coastal environments that differ significantly in magnitude, duration, or nature from the impacts considered in a previous Environmental Impact Statement.

(iii) The Supervisor's assessment of whether or not to prepare an Environmental Impact Statement shall be reviewed by the Director and the Director may reverse the Supervisor's determination. The Supervisor shall transmit copies of the final Environmental Assessment to the affected States.

(b) Where it has been determined that an Environmental Impact Statement will be prepared, the Director shall decide whether the Statement will cover the activities described in a single proposed development and production plan or in a number of such plans covering an area of the OCS where there is a likelihood of significant development.

(1) The Environmental Impact Statement shall cover the activities described in two or more proposed development and production plans when:

(i) No additional lease sale Environmental Impact Statement evaluating the cumulative impacts of development and production for the area is being prepared or is planned for preparation within the next two (2) years.

(ii) At least one exploratory well has been completed in at least sixty-six percent (66%) of the significant geologic structures known to exist at the time of the lease sale or sales applicable to the area; and

(iii) The total potential production of oil and gas from the area exceeds or is expected to exceed existing and planned onshore processing, storage, treatment, and transportation facilities.

(2) If an Environmental Impact Statement is to be prepared for more than one plan, and only one plan is pending for approval, the lessees of tracts on which oil or gas, or both, have been discovered in paying quantities, and which are adjacent to or nearby the area covered by the pending plan, may be required to submit preliminary descriptions of their development and production plans pursuant to subsection 250.34-2(c) of this Part.

(3) If it is decided to prepare an Environmental Impact Statement for a proposed development and production plan or plans, the Supervisor shall not approve any activity described in such plan or plans prior to completion of the review process, if that activity would:

(i) Have a significant adverse environmental impact, or

(ii) Foreclose prematurely the subsequent adoption of alternatives to the proposed plan or plans which might have less environmental impact.

#### [4310-31]

##### PART 252—OUTER CONTINENTAL SHELF (OCS) OIL AND GAS INFORMATION PROGRAM

AGENCY: U.S. Geological Survey, Interior.

ACTION: Final rule.

SUMMARY: This Part supplements the procedures contained in Parts 250 and 251 of this Chapter for the submission of oil and gas data and information resulting from exploration, development and production operations on the Outer Continental Shelf (OCS) to the Director, U.S. Geological Survey. In addition, this Part establishes procedures for the Director to make available summary reports of this data and information to the Governors of affected States and upon request to interested local government executives, consistent with the exemptions of the Freedom of Information Act.

These regulations are intended to aid in the implementation of President Carter's directive of May 23, 1977, to:

Develop regulations, operating orders, and lease provisions specifying the information required from industry about offshore and onshore impacts of prospective OCS development.

EFFECTIVE DATE: January 27, 1978. See Supplementary Information below.

#### FOR FURTHER INFORMATION CONTACT:

Russell G. Wayland, Acting Chief, Conservation Division, U.S. Geological Survey, National Center (Mail Stop 620), Reston, Va. 22092, 703-860-7524.

Authors: Hope Babcock, Office of the Assistant Secretary—Energy and Minerals, U.S. Department of the Interior; Charles Hardee, Office of the Solicitor, U.S. Department of the Interior; Gerald Rhodes, U.S. Geological Survey, U.S. Department of the Interior.

#### SUPPLEMENTARY INFORMATION:

In accordance with the provisions of the Administrative Procedure Act (5 U.S.C. 553(d)) the Secretary of the Interior has determined that it is in the public interest for these regulations to become final on publication. This determination is based on the need to have the regulations effective at the time of the next sale of OCS oil and gas leases. The North Atlantic OCS Lease Sale (Sale No. 42) is scheduled to take place on January 31, 1978.

## I. EXPLANATORY STATEMENT

These regulations were initially published as proposed regulations on September 26, 1977 (42 FR 48893). Fifty-four comments from private interest groups, industry, State and local governments, and other Federal agencies were received. The U.S. Geological Survey would like to thank all those parties who commented. The comments have been a great help in the drafting of final regulations.

## II. DISCUSSION OF MAJOR COMMENTS

## AUTHORITY OF THE SECRETARY OF THE INTERIOR TO PROMULGATE THESE REGULATIONS

A number of commenters objected to the promulgation of these regulations in any form on the ground that there is no existing statutory basis for them. The Outer Continental Shelf Lands Act of 1953 requires the Secretary of the Interior to:

Administer the provisions of [the] Act relating to the leasing of the Outer Continental Shelf, [and to] prescribe such rules and regulations as may be necessary to carry out such provisions. The Secretary may at any time prescribe and amend such rules and regulations as he determines to be necessary and proper in order to provide for the prevention of waste and conservation of the natural resources of the Outer Continental Shelf \* \* \* 43 U.S.C. 1334(a)(1) (emphasis added).

These statutory provisions have been construed broadly to give the Secretary authority to prescribe regulations for protection of the environment. See *Union Oil Co. v. Morton*, 512 F. 2d 743 (9th Cir. 1975); *Gulf Oil Corp. v. Morton*, 493 F. 2d 141 (9th Cir. 1973).

In addition, the National Environmental Policy Act of 1969 requires that:

to the fullest extent possible \* \* \* the policies, regulations, and public laws of the United States shall be interpreted and administered in accordance with the policies set forth in this Chapter \* \* \* (42 U.S.C. 4332).

In the administration of any large Federal program, such as the OCS oil and gas program, it is necessary to address environmental impacts as they affect the entire ecological system, to the extent this is possible under existing technology. Because jurisdictional boundaries often impede this type of overview, an effective information exchange and coordination mechanism between jurisdictions is essential.

The Outer Continental Shelf Lands Act provides specific authority for the creation of a coordination mechanism between the Department of the Interior and States affected by OCS development:

In the enforcement of conservation laws, rules, and regulations the Secretary is authorized to cooperate with the conservation

agencies of the adjacent States \* \* \* (43 U.S.C. 1334(a)(1)).

Thus there is ample authority under existing law for the promulgation of these regulations.

## EXTENT OF INFORMATION TO BE PROVIDED TO AFFECTED STATES

Most of the comments addressed the issue of how much information could or should be provided to affected States. Industry commenters, who will be supplying much of the specific data and information on which the Summary Report to the States will be based, objected to any release of information considered to be confidential under the disclosure exemptions of the Freedom of Information Act (FOIA) (5 U.S.C. 552) and the Department's implementing regulations (43 CFR Part 2, 30 CFR Parts 250 and 251).

State and local government commenters, on the other hand, argued that it is necessary for State planning purposes that the States be supplied with virtually all data and information received by Geological Survey, regardless of the confidentiality of such information.

Protection of the confidentiality of OCS geological and geophysical information has been a longstanding policy of the Department of the Interior. Because of this, virtually every OCS regulation which raises disclosure questions makes reference to the rather specific exemption contained in the FOIA and Departmental regulations. The OCS "Operating" Regulations, 30 CFR 250.34(b), and the Geological and Geophysical Exploration Regulations, 30 CFR 251.14, are examples.

In the early days of the Carter Administration, this Department committed itself to timely coordination of the OCS Program with States which could be affected by OCS development. The past has demonstrated the problems of unplanned onshore and near-shore impacts from offshore development, and the Department believes that these problems can be substantially reduced through cooperative State/Federal planning in OCS matters.

On the other hand, the general public has an interest in maintaining competition within the OCS oil and gas industry. To a great extent, competition within the industry depends upon knowledge of the specific location and extent of oil and gas reserves. Each company obtains this information through analysis of data provided by geological and geophysical surveys. Thus the maintenance of competition is related to the extent to which confidentiality of this information can be protected.

Clearly, what is needed in this situation is a balancing of the competing interests. Section 252.4 of these regulations establishes a new procedure for

the preparation of a Summary Report in a manner which will protect the confidentiality of specific data and information. The Summary Report will be specifically designed to assist States in planning for near-shore and on-shore impacts of OCS development. Because of the difficulty in defining State information needs, a requirement has been imposed that the Director of the Geological Survey consult with affected States to determine the most appropriate scope and content of the Summary Report. This is intended to be a cooperative process among the Geological Survey, OCS lessees, and affected States, and should remain flexible to changing information needs, within the limitations of the exemption for confidential information.

The Department believes that the Summary Report will aid in balancing the public's interest in obtaining information about its resources with the public's interest in maintaining an active and competitive oil and gas industry. If experience demonstrates that further adjustments in the system are needed, the Department will consider taking additional steps to meet those needs.

On the issue of the extent of information to be provided to affected States, a number of commenters noted the differences in Geological Survey's proposed regulations, and those proposed by the Bureau of Land Management (BLM) on the same general topic. Proposed 43 CFR 3301.8(d), 42 FR 48898 (September 26, 1977). The proposed BLM regulations appeared to allow greater disclosure than do the Geological Survey regulations. It should be pointed out that BLM does not receive geological and geophysical data and information as does the Geological Survey. However, in order to have consistent Departmental policies and to conform with Departmental regulations implementing the Freedom of Information Act, the BLM final regulations (§ 3301.8(d)) have been revised.

## APPLICABILITY TO EXISTING LEASES AND PERMITS

A number of commenters questioned whether these regulations would be applicable to existing leases and permits. As regulations promulgated under the conservation authority of the Secretary of the Interior, these regulations are applicable to existing leases. The regulations will not be applicable, however, to geological and geophysical permits (30 CFR Part 251) approved prior to the effective date of the regulations.

## III. SECTION-BY-SECTION DISCUSSION

## SECTION 252.1 PURPOSE

This section has been clarified to more accurately delineate the purpose of the regulations.

## SECTION 252.2 DEFINITIONS

This section has been clarified as to form.

## SECTION 252.3 OIL AND GAS DATA AND INFORMATION TO BE PROVIDED

A sentence has been added to this section to make clear that the existing procedures of Parts 250 and 251 of this Chapter for submission of data and information to the Supervisor will apply to submissions under this section. This is in response to several comments asking whether the compensation requirements of Parts 250 and 251 were being modified. These regulations are not intended to modify existing compensation procedures.

If any question arises regarding what types of data and information the Supervisor may obtain, however, this section will govern over Parts 250 and 251.

## SECTION 252.4 SUMMARY REPORT TO AFFECTED STATES

Most of the changes made in this section are explained under the "Discussion of Major Comments" ("Extent of Information to be Provided to Affected States") above.

Subsection (c) has been deleted because it appears to establish a new standard for the withholding of confidential information based on a determination of whether disclosure would "unduly damage" the competitive position of the person submitting the data and information. The regulations now rely solely on the standards for disclosure established by the FOIA, and implementing regulations, as referenced in § 252.6.

## SECTION 252.5 LEASE SALE PLANNING INFORMATION TO BE MADE AVAILABLE TO AFFECTED STATES

A sentence was added to this section to clarify that once an index of lease sale information has been provided to affected States and local governments, the Director shall make available the information listed on the index where such information is subject to the control of the Geological Survey. Generally, information listed which is not subject to the control of the Geological Survey may be obtained from other Federal agencies, such as the Bureau of Land Management.

The section was also changed to clarify the requirement that some specific tract nomination information not be disclosed and that the FOIA standards of confidentiality will apply throughout.

## SECTION 252.6 FREEDOM OF INFORMATION ACT REQUIREMENTS

This section was changed to make clear that the Freedom of Information Act requirements for disclosure and allowances for exemption from disclosure will apply throughout the regulations.

sure will apply throughout the regulations. This means that all nonexempted information will be available to any party who requests it in accordance with the FOIA and that exempted information will not be made available.

## IV. ENVIRONMENTAL AND INFLATION IMPACT STATEMENTS

NOTE.—The Department of the Interior has determined that promulgation of these regulations will have no significant impact on the environment and, therefore, will not require preparation of an Environmental Impact Statement. The Department has also determined that this document does not require preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: January 24, 1978.

JOAN M. DAVENPORT,  
Assistant Secretary  
of the Interior.

The new Part 252 that is being added to Title 30 of the Code of Federal Regulations reads as follows:

## PART 252—OUTER CONTINENTAL SHELF (OCS) OIL AND GAS INFORMATION PROGRAM

Sec.  
252.1 Purpose.  
252.2 Definitions.  
252.3 Oil and gas data and information to be provided.  
252.4 Summary report to affected States.  
252.5 Lease sale information to be made available to affected States.  
252.6 Freedom of Information Act requirements.

AUTHORITY: Outer Continental Shelf Lands Act of 1953, as amended, (43 U.S.C. 1331); Freedom of Information Act (5 U.S.C. 552).

## § 252.1 Purpose.

The purpose of this Part is to supplement the procedures contained in Parts 250 and 251 of this Chapter for the submission of oil and gas data and information resulting from exploration, development, and production operations on the Outer Continental Shelf (OCS) to the Director, U.S. Geological Survey. In addition, this Part establishes procedures for the Director to make available certain information to the Governors of affected States and upon request to interested local Government executives, in accordance with the provisions of the Freedom of Information Act.

## § 252.2 Definitions.

(a) "Act" refers to the Outer Continental Shelf Lands Act of 1953, as amended, 43 U.S.C. 1331, et seq.

(b) "Affected State" means, with respect to any program, plan, lease sale or other activity, proposed or approved pursuant to the provisions of the Outer Continental Shelf Lands Act, any State:

(1) the laws of which are, pursuant to section 4(a)(2) of the Outer Continental Shelf Lands Act, laws of the

United States for the portion of the Outer Continental Shelf on which such activity is, or is proposed to be, conducted;

(2) which is, or is proposed to be, directly connected by transportation facilities to any artificial island or structure referred to in section 4(a)(1) of the Outer Continental Shelf Lands Act;

(3) which is receiving, or in accordance with the proposed activity will receive, oil for processing, refining or transshipment, which oil was extracted from the OCS and transported by means of a vessel or by a combination of means, including vessels;

(4) which is designated by the Secretary of the Interior as a State in which there is a substantial probability of significant impact on or damage to the coastal, marine, or human environment, or a State in which there will be significant changes in social, governmental, or economic infrastructure, resulting from the exploration, development, and production of oil and gas anywhere on the Outer Continental Shelf; or

(5) in which the Secretary of the Interior finds that because of such activity there is, or will be, a significant risk of serious damage, due to factors such as prevailing winds and currents, to the marine and coastal environment in the event of any oil spill, blowout, or release of oil or gas from vessels, pipelines, or other transportation facilities.

(c) "Analyzed geological information" is data which have been subjected to some analytical process such as identification of lithologic and fossil content, core analysis, laboratory analysis of physical and chemical properties, logs or charts of electrical, radioactive, sonic, and other well logs, and descriptions of hydrocarbon shows or hazardous conditions.

(d) "Data" includes facts and statistics or samples which have not been analyzed or processed.

(e) "Development" means those activities which take place following discovery of oil or natural gas in paying quantities. Said activities include geophysical activity, drilling, platform construction and other associated activities designed to establish a means for extraction of the discovered resources.

(f) "Director" refers to the Director of the United States Geological Survey, or his authorized representative.

(g) "Exploration" means those activities performed as part of the process of searching for oil or natural gas. Such activities include (1) geophysical surveys where magnetic, gravity, seismic, or other systems are used to detect or imply the presence of such resources; and (2) any drilling, whether on or off known geological struc-

# RULES AND REGULATIONS

tures, including the drilling of a well in which a discovery of oil or natural gas in paying quantities is made, and the drilling of any additional delineation wells after such discovery is made when such wells are needed to delineate reservoirs or are needed to enable the lessee to determine whether to proceed with development and production activities.

(h) "Governor" means the Governor of a State or the person or entity designated by, or pursuant to, State law to exercise the powers granted to such Governor relevant to the Outer Continental Shelf Lands Act or the Coastal Zone Management Act of 1972 as amended (16 U.S.C. 1456).

(i) "Information," when used without a qualifying adjective, includes analyzed geological information, interpreted geophysical information, and interpreted geological information.

(j) "Interpreted geological information" means knowledge, often depicted in the form of maps and cross sections, developed by determining the geological significance of geological data and analyzed geological information.

(k) "Interpreted geophysical information" means knowledge, often depicted in the form of maps and cross sections, developed by determining the geological significance of geophysical data and processed geophysical information.

(l) "Lease" means the contract or agreement under which the leasehold rights are held by the lessee, or the land covered by the contract or agreement, whichever is required by the context.

(m) "Lessee" means the party authorized by a lease, or an approved assignment thereof, to explore for or to develop and produce leased deposits in accordance with the regulations in Part 250 of this Chapter, including all parties holding such authority by or through him.

(n) "Outer Continental Shelf" includes all submerged lands which lie seaward and outside of the area of lands beneath navigable waters as defined in the Submerged Lands Act (43 U.S.C. 1301 and 1302) of which the subsoil and seabed appertain to the United States and are subject to its jurisdiction and control.

(o) "Permittee" means the party authorized by a permit issued pursuant to Part 251 at this Chapter.

(p) "Processed geophysical information" is data which have been subjected to a change in form so as to facilitate interpretation. Processing operations may include, but are not limited to, applying corrections for known perturbing causes, rearranging or filtering data, and combining or transferring data elements.

(q) "Production" means those activities which take place after successful completion of any means for the re-

moval of resources, including such removal, field operations, transportation of oil or natural gas, operation monitoring, maintenance, and work-over drilling.

## § 252.3 Oil and gas data and information to be provided.

Any person engaging in the activities of exploration for, or development and production of, oil and gas on the Outer Continental Shelf (OCS) shall make available to the Oil and Gas Supervisor, U.S. Geological Survey, for his inspection and review, all data and information obtained or developed as a result of such activities, including geological and geophysical data, analyzed geological information, processed geophysical information, and interpreted geological and geophysical information. Copies of such specific data and information and any interpretation of such data and information shall be provided to the Supervisor upon his request. Any person submitting interpreted geological and geophysical data or information, where such data or information have been submitted in good faith, shall not be held responsible for any consequence of the use of or reliance upon such interpretations. Submission of data and information under this section shall be governed by the applicable requirements of 30 CFR Part 250 (for lessees) and 30 CFR Part 251 (for permittees), except if any question arises regarding the scope of data and information which the Supervisor may obtain, this section will govern.

## § 252.4 Summary Report to affected States

(a) The Director, after analysis, interpretation, and compilation of oil and gas data and information developed by the U.S. Geological Survey and of oil and gas data and information furnished by lessees, permittees, or other government agencies, shall make available to affected States and, upon request, to the executive of any local government whose jurisdiction covers an area impacted by OCS activities, a Summary Report of data and information designed to assist them in planning for the near-shore and on-shore impacts of potential OCS oil and gas development and production. The Director shall consult with affected States and other interested parties to define the nature, scope, content and timing of the Summary Report. The Summary Report shall not contain data or information which the Director determines is exempt from disclosure in accordance with § 252.6 of this Part. The Summary Report shall include:

(1) estimates of oil and gas reserves together with projected rates and volumes of oil and gas to be produced from leased areas and estimates of the oil and gas resources that may be

found within areas which the Secretary plans to offer for lease;

(2) approximate projections of the magnitude and timing of development, if and when oil or gas, or both, is discovered;

(3) methods of transportation to be used, including pipelines and approximate location of routes to be followed; and

(4) general location and nature of near-shore and onshore facilities.

(b) When significant changes in the information contained in a Summary Report occur, the Director shall prepare and distribute the new information to each affected State, and, upon request, to the executive of any local government whose jurisdiction covers an area impacted by OCS activities.

## § 252.5 Lease sale information to be made available to affected States.

The Director shall make available on a regular basis to each affected State and, upon request, to the executive of any local government whose jurisdiction covers an area impacted by OCS activities, a copy of an index which lists, to the best of his knowledge, all relevant, actual or proposed programs, plans, reports, Environmental Impact Statements, and other lease sale information. Upon request, the Director shall make available to such affected States and local governments copies of any lease sale information listed in the index and which is subject to the control of the U.S. Geological Survey. The Director shall not make available any lease sale information which identifies any particular tract with the name or names of any party or parties participating in the tract nomination process. The Director shall not make available any lease sale information which he determines is exempt from disclosure in accordance with § 252.6 of this Part.

## § 252.6 Freedom of Information Act Requirements.

The Director shall make available data and information in accordance with the requirements of the Freedom of Information Act (5 U.S.C. 552) and of the regulations contained in 43 CFR Part 2 (Records and Testimony), 30 CFR Part 250 (Oil and Gas and Sulphur Operations in the Outer Continental Shelf) and 30 CFR Part 251 (Geological and Geophysical Explorations of the Outer Continental Shelf). No data or information determined by the Director to be exempt from public disclosure under such Act and regulations shall be made available to the public or provided to any affected State or to the executive of any local government.

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

[Circular No. 2430]

SUBCHAPTER C—MINERALS MANAGEMENT (3000)

PART 3300—OUTER CONTINENTAL SHELF LEASING

Subpart 3301—Leasing Areas

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking will govern the timing and the type of environmental studies to be undertaken, by the Bureau of Land Management as needed for the assessment and management of environmental impacts on the marine and coastal environments of the Outer Continental Shelf as a result of oil and gas leasing.

DATE: January 27, 1978.

ADDRESS: Director (210), Bureau of Land Management, 1800 C Street NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION, CONTACT:

Robert C. Bruce, 202-343-8735, or Frank Monastero, 202-343-7744.

SUPPLEMENTAL INFORMATION: Proposed rulemaking on this subject was published on pages 35863 and 35864 of the FEDERAL REGISTER of July 12, 1977. Public comments were invited through August 11, 1977. Written comments were received from 22 sources, with 10 coming from State or local governments, 8 from industry, 3 from private organizations or individuals and 1 from a Federal agency. In addition, a meeting was held with the Office of Management and Budget, at their request, January 17, 1978. Two telephone contacts on the proposed rulemaking were received. All of the comments were given careful consideration. The major comments are summarized below.

While most of the comments were directed to specific sections of the proposed rulemaking, some general comments were received. Most of the general comments indicated approval of the proposed rulemaking and the formalization of our ongoing studies program. However, some commenters felt that the existing program as embodied in the proposed rulemaking was not sufficiently detailed. Others questioned whether the studies program adequately covers the requirement for environmental information on the Outer Continental Shelf (OCS). The Department believes that the studies program presently being used does provide the information needed by the

decisionmakers who must make decisions on the OCS. At the same time, the program and the information it provides are constantly being monitored and changed as needed. The studies program is believed to be adequate and will go forward.

Several comments were directed specifically to § 3301.7(a) of the proposed rulemaking. One set of comments focused on the requirement that the National Oceanic and Atmospheric Administration (NOAA) be used to the greatest extent possible in the studies. One suggestion was that more reliance be placed on contracts with private organizations, while another was that the States be allowed greater involvement in the studies process. Another suggestion was to rely on NOAA to the extent desirable. The association of the Department of the Interior through the Bureau of Land Management with NOAA in this studies program has been most satisfactory. NOAA's service will continue to be used to the greatest extent practical in the future. However, this does not preclude using other sources as needed to be consistent with the Economy Act (31 U.S.C. 686) and OMB Circular A-76.

A second area of comment on § 3301.7(a) dealt with the use of the term "interested parties." Many felt that the language of the proposed rulemaking was not specific enough. Nearly every one of those commenting on this subject wanted the term expanded to include the specific interest group he represented. The language of the section dealing with interested parties is believed to be sufficiently flexible to allow consultation with any appropriate party. If a change were made, a major problem would be who should or should not be specifically included in the definition.

Some commenters discussed use of the word "nearshore" in § 3301.7(a) and urged that the term be specifically defined in the final rulemaking. Generally, the aim of the comments was to expand the term to include onshore facilities and secondary impacts resulting from OCS leasing. The question of the areas that should be covered by the program has been a matter of debate since shortly after the initiation of the studies program. The rulemaking as written is sufficiently broad to allow BLM to work with State and local governmental jurisdictions to identify studies that are needed to make decisions about the impacts that will flow from OCS leasing. It must also be kept in mind that the BLM studies will be done in conjunction with the activities of other Federal agencies that have responsibilities for coastal area protection. The language of § 3301.7(a) has therefore not been amended to further define the term "nearshore."

A few commenters wanted § 3301.7(a) to require studies, whether needed or not, especially in those areas where off-shore development has already taken place. Other commenters suggested that no studies be done in areas where substantial development has already occurred. We amended the section to provide that studies would not be required in those areas where substantial development has taken place. However, this section as amended, is believed to be flexible enough to require some studies in areas already under lease if it is determined studies are needed to furnish information for assessment. In carrying out this rulemaking, the Bureau will conduct studies in all areas, with the possible exception of Louisiana-Texas OCS, an area where substantial development has occurred, to obtain the information needed to adequately ascertain the impact of oil and gas development on the OCS and its environment. The type of information and degree of study will vary depending on the region, the extent of development and the use to be made of the studies' information.

Those commenting on § 3301.7(b) felt that the objective of the study program was not clearly stated and that more specificity was needed. Several felt that the aim of the program was not adequately stated, nor were the uses to be made of information derived from the study properly enumerated. In accordance with these comments, § 3301.7(b) has been amended to provide a better description of the aim of the studies and the use that will be made of the information obtained. The new language makes it clear that the studies will examine off-shore, nearshore, and onshore impacts, as necessary. Results will be used in the decisionmaking process to prepare lease schedules, select tracts, ensure that appropriate mitigation measures are taken, to prepare environmental statements, and to meet other Bureau requirements for input to post-leasing decisions.

Those commenting on § 3301.7(c) identified several areas of concern. Most of the comments focused on the time for initiation of studies. All of those commenting on the time for initiating studies recommended that the period be lengthened, with most recommending that the studies be started at least 1 year prior to a lease sale. This change was not adopted; it was not felt to be needed. The 6-month period provided for in the rulemaking is a minimum period and the studies can begin at any point prior to the sale. The goal is to start the studies 18 months prior to a lease sale. The rulemaking gives the needed flexibility.

Other comments on § 3301.7(c) were aimed at setting firm requirements for the completion of all studies prior to

certain decision points. One group of comments, those made by the State and local governments and certain interest groups, wanted to be sure that needed information was in hand for consideration prior to a decision point. On the other hand, those commenting on behalf of the oil industry wanted it clear that permits would not be delayed for long periods of time while studies were continued. As the conflict in the comments makes clear, it is nearly impossible to set time requirements for the studies that will be satisfactory to everyone. The studies program is designed to be one more tool for use by the Federal Government in the gathering of information it needs to make decisions on leasing on the OCS. Each situation is different and the type of information needed will vary with each leasing situation. Further, it must be recognized that studies are not only a part of a specific lease decision but are also used in making decisions on broader management functions which relate to several leases and cover the whole OCS program.

The existing studies program calls for the preparation of studies plans for each area of the OCS in cooperation with interested parties. These studies plans are then circulated among interested parties for review and comment, with needed revisions being made prior to the initiation of the studies program. The existing program gives needed flexibility to work with interested parties and take into account the needs that will vary from area to area. These needs then will be identified by those reviewing the studies plans as well as from the Bureau of Land Management's review of each situation.

A large number of comments were addressed to § 3301.7(d) with special emphasis on the feeling that the proviso made the section virtually meaningless. We have restudied the section and agree that it is contradictory and contributes nothing to the rulemaking. We have, therefore, deleted the section. The section was inserted to describe our effort to have generally complete studies for each OCS area prior to a decision being made on development or production plans. However, emergency situations do arise and language was included to cover them. We will continue under our present operation of having either completed studies or studies sufficiently complete to give the decisionmaker adequate information upon which to base his decision prior to approving any development or production plan.

Finally, comments on § 3301.7(e) requested the inclusion of language calling for specific use of the findings obtained from a monitoring program. This suggestion was adopted. Language has been added to § 3301.7(e)

setting specific uses for the findings obtained from the monitoring program.

Editorial and language changes needed to clarify the rulemaking has been made.

The principal authors of this rulemaking are Frank Monastero, Chris Oynes, and Robert C. Bruce, members of the Bureau of Land Management's OCS Task Force.

In accordance with the provisions of the Administrative Procedures Act (5 U.S.C. § 553(d)) the Secretary of the Interior has determined that it is in the public interest for these regulations to become final upon publication. This determination is based on the need to have the regulations effective at the time of the next sale of OCS oil and gas leases. The North Atlantic OCS lease sale (Sale No. 42) is scheduled to take place on January 31, 1978.

Under the authority of section 5 of the Outer Continental Shelf Lands Act (43 U.S.C. 1334), Subpart 3301, Park 3300, Group 3300, Subchapter C, Chapter II, Title 43 of the Code of Federal Regulations is hereby amended by adding a new § 3301.7 as set forth below.

GUY R. MARTIN,  
Assistant Secretary  
of the Interior.

JANUARY 24, 1978.

§ 3301.7 Environmental studies.

(a) The Director shall, except in areas where there has been substantial development, conduct a study of any area or region included in any lease sale in order to establish information needed for prediction, assessment and management of impacts on the human, marine and coastal environments of the Outer Continental Shelf and the nearshore area which may be affected by oil and gas activities in such area or region. Such study shall be planned and carried out in cooperation with the affected coastal States and interested parties and, to the extent possible, shall not duplicate studies done under other laws. To the maximum extent practicable, the Director shall enter into appropriate agreements with the National Oceanic and Atmospheric Administration for the performance of the studies required by this regulation. Cooperative agreements with affected States may be entered into for the purpose of carrying out the studies required in this section.

(b) Any study of an area or region shall be designed to: (1) Provide information on the status of the environment upon which predictions of the impacts of Outer Continental Shelf oil and gas development for leasing decisionmaking may be based, (2) provide information on the ways and extent that Outer Continental Shelf develop-

ment can potentially impact the human, marine, biological, and coastal areas, (3) ensure that information already available or being collected under the program is in a form that can be used in the decisionmaking process associated with a specific leasing action or with the longer term Outer Continental Shelf minerals management responsibilities, and (4) provide a basis for future monitoring of Outer Continental Shelf operations.

(c) Data collection or other study program activity in connection with the study required by paragraph (a) of this section shall be commenced no later than 6 months after the effective date of this regulation with respect to all sales held either before or to be held within one year of its effective date. For all subsequent sales, the data collection or other study program activity shall be commenced no later than 6 months prior to a lease sale. The Director may utilize information collected in any study prior to the effective date of this section in conducting any such study.

(d) After the leasing and developing of any area or region, the Director shall conduct such additional studies to establish additional information as he deems necessary and shall continue to monitor the human, marine, and coastal environments of such area or region in a manner designed to provide information which can be used for comparison with the results of studies conducted prior to Outer Continental Shelf oil and gas development. This will be done to identify any significant changes in the quality and productivity of such environments, to establish trends in the areas studied, and to design experiments identifying the causes of such changes. Findings from such studies will be used to recommend modifications in practices which are employed to mitigate the effects of Outer Continental Shelf activities and to enhance the data/information base for impact prediction resulting from a single future sale action or cumulative actions.

[FR Doc. 78-2439 Filed 1-25-78; 12:19 am]

[4310-84]

[Circular No. 2431]

PART 3300—OUTER CONTINENTAL SHELF LEASING

Subpart 3301—Leasing Areas

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking adds a new § 3301.8 to Subpart 3301 setting up the procedure for the release of specified information with respect to any program, plan, lease, sale or other activity proposed, conducted

or approved relating to the Outer Continental Shelf (OCS) to States and local governments affected by such activity. This information is needed so that the affected governments can determine the impact of OCS development and can plan accordingly.

DATE: January 27, 1978.

ADDRESS: Director (210), Bureau of Land Management, 1800 C Street NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION, CONTACT:

Robert C. Bruce, 202-343-8735, or William J. Quinn, 202-343-8457.

**SUPPLEMENTARY INFORMATION:** Proposed rulemaking on this subject was published on page 48898 of the *FEDERAL REGISTER* of September 26, 1977. Public comments were invited through October 26, 1977, but a 15 day extension allowed the submission of comments until November 10, 1977. Written comments were received from 42 sources, with 32 comments coming from industry, seven from State and local government, and three from historical and environmental groups. The comments were given careful consideration during the decisionmaking process. The major comments are summarized below.

This final rulemaking specifies the types and kinds of information that the Bureau of Land Management (BLM) will make available to State and local governments affected by OCS activities and the conditions under which such information will be provided. This information is needed so the affected governments can determine the impact the OCS program will have and plan accordingly.

A good many of the comments appeared to be based on a misunderstanding of the roles of BLM and the U.S. Geological Survey (USGS) have in information access, availability and type. Since BLM is the leasing agency, its information is primarily related to the environmental impact and conduct of the sale. The functions of the USGS include supervision of the exploration, development and production activities on a lease. In this capacity, it has geologic, geophysical and other data on the oil and gas potential of an area. Thus, USGS, not BLM, is the agency in control of geologic and geophysical data and interpretation.

Another general comment made was that the rulemaking was in excess of the statutory authority granted the Secretary of the Interior under the Outer Continental Shelf Lands Act (43 U.S.C. 1334). The Act gives the Secretary broad authority in dealing with the resources of the OCS. This rulemaking, while not dealing directly with OCS leasing, does deal with problems that are directly attributable to leasing activity on the OCS. Thus, the

issuance of this rulemaking clearly falls within the authority granted by the Act.

Comments were made that the definition of the term "affected State" as used in § 3301.8(a) is vague and overly broad. Particular emphasis was placed on the point that § 3301.8(a)(3) allows a land-locked state to qualify as an affected state. Those commenting felt that the definition should be limited so that only those states adjacent to an OCS development and those where major additional facilities for said development will be located, can qualify to receive information. While it is clear that some states, particularly those adjacent to OCS development and those where major facilities are located, are more clearly impacted, this is not an adequate test of which states should have access to OCS information. Many states, those inland as well, may have major oil and gas facilities that are impacted by OCS development. Further, a broad definition is necessary because of the unpredictability of where oil spills or other environmental problems resulting from OCS development may impact. It must be remembered that this information is being furnished to the states to enable them to plan effectively. In addition, the use of the term "significant" in reference to impacts or risks of damage has the effect of restricting the number of affected states.

Commenters suggested the inclusion of historical and cultural resources among the resources covered by § 3301.8(a)(4). Historical and cultural resources are included in the phrase "coastal, marine or human" now contained in § 3301.8(a)(4). This suggestion was not adopted.

Comments on § 3301.8(b) suggested that the language be expanded to allow the release of information to affected local governments. Local governments impacted by OCS developments do have need of information so that they can make plans to deal with the impacts of OCS development. This section has been amended to provide for the release of information to impacted local governments that request it.

Commenters asked that § 3301.8(b) be amended to clearly state that an "index" would not contain any confidential or proprietary information. There was no intention that such information be included in an index. The language suggested in one of the comments has been adopted to clarify this point.

The largest number of comments on the proposed rulemaking were directed at the question of authority to release information and the types of information that could be released. Some of the comments alleged that the release of information provided for in the proposed rulemaking ex-

ceeded the authority granted under the provisions of the Freedom of Information Act (5 U.S.C. 552) (FOIA). Other comments suggested that the rulemaking provisions dealing with the release of information violated the protection afforded by the 5th amendment of the Constitution. The FOIA has been implemented by Department of the Interior regulations and those regulations are in keeping with the general interpretation given the FOIA. A comparison of the Departmental regulations and the provisions of the proposed rulemaking led to the conclusion that this rulemaking had perhaps gone a little further than the guidelines set down by the Departmental regulations. Having reached that conclusion, § 3301.8(d) has been rewritten to reflect the Departmental regulations. As rewritten, the provision reflects most of the comments raised on this matter.

Some of the comments contended that the cross reference section that makes reference to 30 CFR 252 could be interpreted as allowing the release of geologic and geophysical data, thereby jeopardizing a firm's competitive position. This interpretation was not intended. The change made to § 3301.8(d) should remove any doubt about this matter, but in case it does not, it should be remembered that geologic and geophysical data and interpretations are under the sole custody of the USGS and their release is subject to the regulations in 30 CFR 252. Therefore, the cross reference provision is needed. It thus appears that the contention concerning the 5th amendment is without merit.

Comments raised the point that § 3301.8(c) authorizes the release of "specific industry interest information" on tracts nominated for sale. Some of those commenting felt that this wording is ambiguous and could jeopardize a firm's competitive position. The section has been rewritten to state that "related indications of interest (i.e. high and low) on tracts nominated" are available for release. This follows current Departmental practice. No competitive impact has been observed as a result of this procedure.

Commenters raised the question of whether the protection afforded by § 3301.8(c) to tract nominators by not linking their names to tracts nominated is cancelled by the language in § 3301.8(d). This same point was raised by some commenters who wanted to know if the confidentiality of nominators is absolute or whether information relating to nominators can be released if a determination is made that it will not compromise the competitive position of any party, as the language now implies. The protection of nominators is absolute and the rulemaking has been revised to make it clear the names of nominators will not be released.

A comment suggested that the States have no need to know which tracts are nominated, even in aggregate, unless they are selected for leasing. The question was raised as to the impact a tract that is not leased could have on a State. If the States are to have an opportunity for meaningful input into the tract selection process, they must have aggregate nomination information. The release of the greatest amount of information at the earliest possible time on tracts will be helpful to them. It is current Departmental practice to release relative indications of interest in tracts, i.e., high and low.

One suggestion made by the comments on the matter of release of information was that strict criminal penalties should be provided for disclosure of privileged or confidential information by the States. The Secretary of the Interior has no authority to impose criminal sanctions for the release of information. In addition, the rulemaking establishes, particularly in the new § 3301.8(d), safeguards to prevent release of sensitive information. The propriety of the allegation that the States cannot maintain confidentiality is questionable when no proof has been offered to support the allegation.

Some of the comments called for a public hearing on the rulemaking so that the ramifications of the rulemaking could be thoroughly aired. The time allowed for public comment on the rulemaking gave all interested parties adequate time to review the rulemaking and make their comments. No clear public purpose would be served by delaying the rulemaking and holding a public hearing. The wide range of comments received is a clear indication that the rulemaking has been carefully and critically examined.

Among the comments was the suggestion that an economic impact statement should be required on this rulemaking. The economic impact of the rulemaking is negligible at best and clearly outside of the requirements set forth in Executive Order 11821 and OMB Circular No. A-107. The earlier determination that an economic impact analysis is not needed is still correct.

Editorial and language changes needed to clarify the rulemaking have been made.

The principal authors of this rulemaking are William J. Quinn, Chris Oynes, and Robert C. Bruce of the

Bureau of Land Management's OCS Task Force.

In accordance with the provisions of the Administrative Procedures Act (5 U.S.C. § 553(d)) the Secretary of the Interior has determined that it is in the public interest for these regulations to become final upon publication. This determination is based on the need to have the regulations effective at the time of the next sale of OCS oil and gas leases. The North Atlantic OCS lease sale (Sale No. 42) is scheduled to take place on January 31, 1978.

Under the authority of section 5 of the Outer Continental Shelf Lands Act (43 U.S.C. 1334), Subpart 3301, Part 3300, Group 3300, Subchapter C, Chapter II, Title 43 of the Code of Federal Regulations is hereby amended by adding a new § 3301.8 as set forth below.

GUY R. MARTIN,  
Assistant Secretary of  
the Interior.

JANUARY 24, 1978.

Subpart 3301—Leasing Areas

§ 3301.8 Oil and gas information.

(a) For the purposes of this section, an affected State with respect to any program, plan, lease, sale, or other activity proposed, conducted or approved pursuant to the Act, is any State:

(1) The laws of which are declared, pursuant to section 4(a)(2) of the Act, to be the law of the United States for the portion of the Outer Continental Shelf on which such activity is, or is proposed to be conducted;

(2) Which is, or is proposed to be, directly connected by transportation facilities to any artificial island or structure referred to in section 4(a)(1) of the Act;

(3) Which is receiving, or in accordance with the proposed activity, will receive, oil for processing, refining, or transshipment which was extracted from the Outer Continental Shelf and transported by means of vessels or by a combination of means including vessels;

(4) Which is designated by the Secretary as a State in which there is a substantial probability of significant impact on or damage to the coastal, marine, or human environment, or a State in which there will be significant changes in social, governmental or economic conditions resulting from the exploration, development and produc-

tion of oil and gas anywhere on the Outer Continental Shelf; or

(5) In which the Secretary finds that because of such activity there is, or will be, a significant risk of serious damage, due to factors such as prevailing winds and currents, to the marine and coastal environment in the event of any oilspill, blowout, or release of oil or gas from vessels, pipelines or other transshipment facilities.

(b) The Director shall transmit on a regular basis to any affected State and, upon request, to the executive of any local government whose jurisdiction is included in an area impacted by Outer Continental Shelf activities, a copy of an index which lists, to the best of his knowledge, all relevant actual or proposed Departmental programs, plans, reports, environmental statements, lease sale information, and any other similar type of relevant information. Confidential or proprietary information shall not be included in the index.

(c) The Director shall transmit to any affected State and, upon request, to the executive of any local government whose jurisdiction is included in an area impacted by Outer Continental Shelf activities, a copy of any comment or negative nomination timely filed in response to a Call for Nominations and Comments for a proposed sale and shall also provide relative indications of interest (i.e. high and low) on tracts nominated for sale, except that no particular tract shall be identified with the name or names of any particular party so that it will not compromise the competitive position of any party or parties participating in the nominations.

(d) The Director shall make available data and information in accordance with the requirements of the Freedom of Information Act (5 U.S.C. 552) and of the regulations contained in 43 CFR Part 2 (Records and Testimony). No data or information determined to be exempt from public disclosure under such Act and regulations shall be made available for public disclosure or provided to any affected state or to the executive of any local government.

**would you  
like to know**

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "Cumulative List of CFR Sections Affected," the "Federal Register Index," or both.

Cumulative List of CFR Sections Affected  
**\$10.00**  
per year

The "Cumulative List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index **\$8.00**  
per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the "Cumulative List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:  
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

There is enclosed \$\_\_\_\_\_ for \_\_\_\_\_ subscription(s) to the publications checked below:

	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

FEDERAL REGISTER, VOL. 43, NO. 20—MONDAY, JANUARY 30, 1978

# list of cfr parts affected in this issue

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, follows beginning with the second issue of the month. A Cumulative List of CFR Sections Affected is published separately at the end of each month. The guide lists the parts and sections affected by documents published since the revision date of each title.

## rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

## Title 5—Administrative Personnel

## CHAPTER I—CIVIL SERVICE COMMISSION

## PART 213—EXCEPTED SERVICE

## Department of the Treasury

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment: (1) Revokes the Schedule C exception for the position of Adviser to the Secretary (Counselor to the Chairman, Economic Policy Board), Office of the Secretary; and (2) excepts from the competitive service under Schedule C one position of Assistant Secretary (Enforcement and Operations), Office of the Under Secretary, Office of the Secretary because the position is confidential in nature.

EFFECTIVE DATE: January 30, 1978.

## FOR FURTHER INFORMATION:

On Position Authority Contact: Sallie E. West, Civil Service Commission, 202-632-3782.

On Position Content Contact: Henry DeSeguirant, Department of the Treasury, 202-566-2707.

Accordingly, 5 CFR 213.3305(a)(59) is revoked and (78) is added as set out below:

## § 213.3305 Department of the Treasury.

(a) *Office of the Secretary.* . . .  
(59) [Revoked]

(78) Assistant Secretary (Enforcement and Operations), Office of the Under Secretary.

(5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954-1958 Comp., p. 218.)

For the U.S. Civil Service Commission.

JAMES C. SPRY  
Executive Assistant  
to the Commissioners.

## Title 7—Agriculture

## CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Navel Orange Reg. 427]

## PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

## Size Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes a minimum size requirement of 2.20 inches in diameter for fresh California-Arizona navel oranges shipped to market from District 2 during the period February 3 to July 13, 1978. This requirement is designed to promote orderly marketing in the interest of producers and consumers.

EFFECTIVE DATE: February 3, 1978.  
FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: On December 28, 1977, notice was published in the FEDERAL REGISTER (42 FR 64703) inviting written comments not later than January 16, 1978, on a proposed minimum size requirement of 2.20 inches for shipments of California-Arizona navel oranges from District 2, under Marketing Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California. None were received. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

Shipment of this season's navel orange crop is now in progress, and ample supplies of navel oranges meeting this size requirement are available to satisfy the demand in fresh domestic markets. Navel oranges which do not meet this size requirement may be shipped to fresh export markets, left on trees to attain further growth, or utilized in processing. The regulation reflects the Department's appraisal of the need for regulation based on the current and prospective crop and market conditions, and it would tend

to promote orderly marketing in the interest of producers and consumers.

After consideration of all relevant matter presented, including the proposal in the notice, the recommendation of the committee, and other available information, it is hereby found that the regulation, as hereafter provided, will tend to effectuate the declared policy of the act.

It is further found that it is impracticable and contrary to the public interest to engage in further public rule-making and good cause exists for not postponing the effective date of this regulation until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) as: (1) Shipment of navel oranges from District 2 is now in progress; (2) currently domestic shipments of fresh District 2 California-Arizona navel oranges are required to be at least 2.20 inches in diameter under Navel Orange Regulation 419 (42 FR 63379; 43 FR 753), and this requirement expires February 2, 1978; (3) notice of this proposed minimum size requirement was published in the FEDERAL REGISTER, and no comments were filed during the 19 days provided; and (4) handlers subject to this regulation will have adequate time to make any necessary preparations prior to the effective time.

## § 907.727 Navel Orange Regulation 427.

(a) During the period February 3, 1978, through July 13, 1978, no handler shall handle any navel oranges grown in District 2 which are of a size smaller than 2.20 inches in diameter, which shall be the largest measurement at a right angle to a straight line running from the stem to the blossom end of the fruit: *Provided*, That not to exceed 5 percent, by count, of the navel oranges contained in any type of container may measure smaller than 2.20 inches in diameter.

(b) As used in this section, "handle", "handler", and "District 2", mean the same as defined in the marketing order.

(Secs. 1-19, 48 Stat. 31 as amended; (7 U.S.C. 601-674).)

Dated: January 25, 1978.

CHARLES R. BRADER,  
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 78-2444 Filed 1-27-78; 8:45 am]

[3410-02]

**PART 915—AVOCADOS GROWN IN SOUTH FLORIDA****Amendment of Budget of Expenses**

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

**SUMMARY:** This regulation authorizes an increase of \$20,450 in expenses for the 1977-78 fiscal period, to be used to fund a market development and promotion project for avocados by the Avocado Administrative Committee, which locally administers the Federal Marketing order covering fresh avocados. The funds will be transferred from committee reserve, and no assessments will be collected from avocado handlers.

**DATES:** Effective April 1, 1977, through March 31, 1978.

**FOR FURTHER INFORMATION CONTACT:**

Charles R. Brader, 202-447-6393.

**SUPPLEMENTARY INFORMATION:** On January 5, 1978, a notice was published in the *FEDERAL REGISTER* (43 FR 974) inviting written comments not later than January 23, 1978, on proposed amendment of budget of expenses, under Marketing Order No. 915, as amended (7 CFR Part 915), regulating the handling of avocados grown in South Florida. None was received. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

After consideration of all relevant matters presented, including the proposal in the notice, it is found that § 915.216 (42 FR 35142; 63636) should be and hereby is amended to read as follows:

§ 915.216 Expenses and carryover of unexpended funds.

(a) Expenses that are reasonable and likely to be incurred by the Avocado Administrative Committee during fiscal year April 1, 1977, through March 31, 1978, will amount to \$88,210.

It is further found that good cause exists for not postponing the effective date until 30 days after publication in the *FEDERAL REGISTER* (5 U.S.C. 553), because of insufficient time between the date when information became available upon which the amendment is based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the amendment at an open meeting. Immediate increase in the previously approved ex-

**RULES AND REGULATIONS**

penses is necessary in order for the committee to meet obligations incurred in accordance with the provisions of the marketing order during 1977-78.

(Secs. 1-19, 48 Stat. 31, as amended; (7 U.S.C. 601-674).)

Dated: January 25, 1978.

CHARLES R. BRADER,  
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

(FR Doc. 78-2446 Filed 1-27-78; 8:45 am)

[6210-01]

**Title 12—Banks and Banking****CHAPTER II—FEDERAL RESERVE SYSTEM****SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM**

(Reg Z; FC-0139 through FC-0142)

**PART 226—TRUTH IN LENDING****Official Staff Interpretations**

AGENCY: Board of Governors of the Federal Reserve System.

**ACTION:** Official staff interpretation(s).

**SUMMARY:** The Board is publishing the following official staff interpretations of Regulation Z, issued by a duly authorized official of the Division of Consumer Affairs.

**EFFECTIVE DATE:** January 31, 1978.

**FOR FURTHER INFORMATION CONTACT:**

Anne Geary, Chief Staff Attorney, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-3946.

**SUPPLEMENTARY INFORMATION:** (1) Identifying details have been deleted to the extent required to prevent a clearly unwarranted invasion of personal privacy. The Board maintains and makes available for public inspection and copying a current index providing identifying information for the public subject to certain limitations stated in 12 CFR Part 261.6.

(2) Official staff interpretations may be reconsidered upon request of interested parties and in accordance with 12 CFR Part 226.1(d)(2). Every request for reconsideration should clearly identify the number of the official staff interpretation in question, and should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. (3) 15 U.S.C. 1640(f).

§ 226.4(i) Preemption of State laws regarding usury, credit cost disclosure and permissible credit charges granted by the Act for "qualified" cash discounts applies to nonconsumer credit card transactions.

§ 171 Preemption of State laws regarding usury, credit cost disclosure and permissi-

ble credit charges granted by the Act for "qualified" cash discounts applies to non-consumer credit card transactions.

DECEMBER 5, 1977.

This is in response to your letter of . . . in which you inquire about the scope of the preemption from State law that is provided by § 171(c) of the Truth in Lending Act to encourage and facilitate the offering of cash discounts in accordance with § 167(b) of the Act. Your question, specifically, is whether the preemptive effect of § 171(c) extends to transactions which have been otherwise excluded from the scope of Federal Truth in Lending law by § 104(1) of the Act (e.g., transactions involving the extension of business credit or credit to a governmental agency).

The circumstances prompting your request are as follows: Your company operates a substantial number of retail outlets throughout the country and is studying the feasibility of offering discounts to customers who pay by cash, check, or similar means. As a part of that study you have discovered several State laws which, in your opinion, would characterize such a discount as a cost of credit for usury and disclosure purposes in business, as well as in consumer credit transactions. You further explain that, as a practical matter, it is often impossible to distinguish at the point of sale whether a particular purchase, paid for by use of a credit card, involves an extension of business or consumer credit. As a result you believe that if the preemptive provisions of § 171(c) were only to apply to consumer credit transactions, sellers in a number of States, particularly some of the large commercial States, will be reluctant to offer cash discounts.

Section 226.4(i)(5) of Regulation Z, which essentially mirrors the language of § 171(c) of the Act, reads as follows:

"(5) *Notwithstanding any other provisions of this Part*, any discount which, pursuant to paragraph (1) (§ 226.4(i)(1)) is not a finance charge for purposes of this Part shall not be considered a finance charge or other charge for credit under the laws of any State relating to:

(i) Usury; or  
(ii) Disclosure of information in connection with credit extensions; or  
(iii) The types, amounts, or rates of charges or the element or elements of charges permissible in connection with the extension or use of credit." (Emphasis added.)

Staff believes that Congress's purpose in adopting § 171(c) was to facilitate the implementation of discount programs pursuant to § 167(b) of the Act. Staff believes it would be inconsistent with that purpose to read the preemptive provisions of § 171(c) to apply only to State laws regarding consumer credit and not to State laws regarding business credit. To interpret this section so as not to preempt State laws regarding business credit would result in requiring a merchant who wished to implement such a program to ascertain which credit transactions are for business purposes and which are for consumer purposes. In light of the fact that many credit cards are used for both business and consumer transactions, such a requirement, if read into the Act and regulation, would be a particular difficulty for credit card transactions. Consequently, in staff's view, § 171(c) of the Act and § 226.4(i) (5) of Regulation Z preempt the types of State laws listed therein with respect to business transactions.

Staff believes that its opinion is supported by the statutory and regulatory language. Section 171(c) begins by stating, "Notwithstanding any other provisions of this title . . ." As previously noted, this language is mirrored in the underlined portion of § 226.4(i) (5) reproduced above. Staff believes that this language can be read to indicate that the general exemption from coverage of business credit contained in § 104(1) of the Act and § 226.3(a) of the regulation does not apply with regard to matters that § 171(c) and § 226.4(i) (5) govern. Therefore, in staff's opinion, the preemptive effect of § 171(c) of the Act and § 226.4(i) (5) of the regulation operate with respect to State laws, of the types listed therein, that pertain to business credit.

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d) (3) and limited in its scope to the facts and issues discussed above. I trust that this is responsive to your inquiry.

Sincerely,

JERAULD C. KLUCKMAN,  
Associate Director.

§ 226.4(i) With regard to gasoline service stations, if credit card price for gasoline is clearly disclosed on the pump, that price shall be considered the "regular price," and other signs and posters located in the service area and visible from the road may be considered advertisements. With regard to gasoline service stations, the disclosure of the availability of cash discounts required at public entrances is satisfied by any sign located so that it is clearly visible to all customers entering the service area.

DECEMBER 5, 1977.

This is in response to your letter of . . . in which you requested an official staff interpretation of § 226.4(i) of Regulation Z. Your client, a national retail gasoline dealer, is considering various alternative methods of enabling its branded dealers to offer customers a discount if they pay for gasoline purchases with cash rather than by use of a credit card. It is contemplated that this discount will not apply to purchases of other types of goods or services generally available at the service stations.

Section 226.4(i) specifies varying price and other disclosure requirements and limitations with regard to notification of the availability of discounts for cash, advertising, and price tagging/posting when discounts for cash are offered. Because of the unique nature of gasoline service stations vis a vis the normal enclosed store-type retail establishments, some questions have arisen as to the permissible disclosures on signs of varying types which may be displayed at gasoline service stations.

Along with your letter, you have submitted prototype designs of five signs which you have asked staff to review for content as well as proposed placement at a service station. Staff feels that to review the signs which you have submitted and approve their use in an official staff interpretation would be tantamount to approving a disclosure form, and the staff generally refrains from issuing official staff interpretations for such purposes. However, the staff does feel that, due to the unique nature of gasoline service stations, some general comments with respect to compliance with § 226.4(i) may be helpful in answering the questions you raised.

First, with regard to the advertising and price tagging/posting provisions of § 226.4(i), staff recognizes that, because of the "open air" nature of gasoline service

**RULES AND REGULATIONS**

stations, there may be some question as to what constitutes a tagged or posted price and what constitutes an advertisement. Pole and free standing signs which are visible from the road may be intended as advertisements to attract customers, but also might be viewed as disclosing the "posted price." If they are viewed as disclosing the "posted price," this would cause the price differential to be classified as a prohibited surcharge. However, staff feels that when the credit card price for gasoline is clearly disclosed on the pump itself, that price shall be considered the "regular price." In such a situation, other signs and posters located in the service area and visible from the road can be considered advertisements and, as such, may state the cash price without also disclosing the credit card price. Of course, there must be some indication on such signs and posters that the stated price is not available to credit card purchasers as required by § 226.4(i)(1)(ii).

With regard to the § 226.4(i)(1)(ii) requirement that establishments offering discounts for cash disclose the availability of such discounts at or near each public entrance and at all locations where a purchase may be made, staff feels that the public entrance portion of that requirement will be satisfied by a sign/poster/etc. located anywhere on the premises so long as it is clearly visible to any customer entering the service station area. The latter portion of that provision clearly requires similar notifications at all locations where a purchase may be made.

This is an official staff interpretation of Regulation Z issued in accordance with § 226.1(d)(3) of the regulation, and limited in scope to the facts and issues discussed herein. I trust that it provides sufficient guidance to determine whether your proposed disclosures are in compliance with the regulation.

Sincerely,

JERAULD C. KLUCKMAN,  
Associate Director.

§ 226.7(a) "Other charges" include charges that are automatically imposed upon default by the customer.

DECEMBER 5, 1977.

This is in response to your letter of . . . in which you inquired about the scope of the phrase "other charges" which appears in § 226.7(a)(6) of Regulation Z. Specifically, you ask whether a bank which "desires to have its [credit] cardholders contractually agree to pay all costs including attorneys' fees incurred by it in legal proceedings to collect the cardholder's indebtedness in the event of delinquency by the cardholder" would be imposing an "other charge" so as to necessitate making the disclosures described in § 226.7(a)(6).

Public Information Letters 331, 386, and 797 (copies of which are enclosed) state that charges imposed in the event of delinquency or late payment are "other charges" under § 226.7(a)(6). Staff believes that charges imposed in the event of default similarly are "other charges" so as to require the disclosures set forth in that section. The question you raised, however, is whether the various costs which may be incurred by your client in legal proceedings to collect an overdue debt owed by a cardholder, and which the cardholder is contractually obligated to pay, are charges imposed in the event of default.

It is staff's opinion that if the imposition of these costs is automatic upon default (for example, if they become immediately due and collectible by virtue of default), they

constitute "other charges" to be disclosed pursuant to § 226.7(a)(6). If, however, the imposition of the charges is not automatic but, rather, is conditioned upon employment of the services of an attorney to effect collection or expenditure of other amounts in conjunction with collection efforts, then they are not the type of charges intended to be disclosed pursuant to § 226.7(a)(6).

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d)(3), and limited in scope to the facts and issues herein. I trust it is responsive to your inquiry.

Sincerely,

JERAULD C. KLUCKMAN,  
Associate Director.

§ 226.4(a) Charge imposed for customer's exceeding his or her credit card credit limit may be considered a default charge (to be disclosed as an "other charge" under § 226.7(a)(6)), rather than a finance charge under § 226.4(a).

§ 226.4(c) Charge imposed for customer's exceeding his or her credit card credit limit may be considered a default charge (to be disclosed as an "other charge" under § 226.7(a)(6)), rather than a finance charge under § 226.4(a).

§ 226.7(a) Charge imposed for customer's exceeding his or her credit card credit limit may be considered a default charge (to be disclosed as an "other charge" under § 226.7(a)(6)), rather than a finance charge under § 226.4(a).

JANUARY 9, 1978.

This responds to your . . . letter and your . . . letter (amending your letter of . . . ) in which you request an official staff interpretation of § 226.4(c) of Regulation Z. You state that your client, a bank, issues credit cards and, in doing so, sets a credit limit for its customers. You indicate that the bank's Customer Agreement provides that exceeding an established credit limit by 10 per cent is an "Event of Default" and provides further that such an event is neither desired nor anticipated. You indicate that your client does not knowingly allow a customer to exceed his or her credit limit by 10 or more per cent. Rather, such may occur, for example, when a customer makes small purchases for which authorization is not needed.

You also state that the customer will be sent a notice within a week of exceeding the credit limit by 10 or more per cent indicating that no further purchases are to be made until the balance is once again below the credit limit and requesting immediate payment of the amount in excess of the customer's credit limit. You also state that if the customer's balance remains in excess (by 10 or more per cent) of his or her credit limit at the end of each monthly billing cycle, there will appear on the customer's billing statement the following notice:

You are over your credit limit by \$——. Do not use your card until your "New Balance" is once again below your credit limit.

You state further that your client may also request that the customer return his or her credit card, depending upon the amount of the balance and the amount by which the customer has exceeded the credit limit. Moreover, you indicate that the authorization center will be instructed that no further authorizations are to be made until the customer's account is below 110 per cent of the customer's credit limit.

## RULES AND REGULATIONS

You indicate that the entire amount over 110 per cent of the limit may not be included in the "minimum payment due" appearing on the monthly billing statement. However, the "minimum payment due," since it is calculated on the new balance including the amount in excess of 10 per cent of the customer's credit limit, will reflect at least a portion of the excess amount. If the customer continues to make the "minimum payment due" and no further charges are made, the bank will not institute any collection activity, other than suspending further privileges and possibly requiring that the customer return the credit card(s) to the bank until the customer's account is once again below the credit limit.

You indicate that your client proposes to charge a customer an "over-the-limit" charge of \$5.00 for each monthly billing cycle at the end of which the balance is over 110 per cent of the credit limit. You question whether the charge is a finance charge as defined in § 226.4(a), or whether it is a default charge, as provided in § 226.4(c), to be disclosed pursuant to § 226.7(a)(6).

Section 226.4(c) provides that "[a] late payment, delinquency, default or other such charge is not a finance charge if imposed for actual unanticipated late payment, delinquency, default, or other such occurrence." It has long been staff's position with regard to late payment charges (and staff would apply this same criteria to a default or delinquency charge) that:

The continuing status of a late payment charge is dependent upon the actions taken by the creditor in connection with the customer's account following the imposition of a late payment charge. If the creditor imposes a late payment charge periodically, but continues to allow the delinquent customer to use his credit plan without informing him that the account is considered in default and that continued delinquency will result in his credit privileges being cancelled, such late payment charges would properly be interpreted as additional finance charges. (See Public Information Letter 797, a copy of which is enclosed for your convenient reference.)

Staff regards the charge which your client intends to impose as being within the purview of § 226.4(c) and thereby excludable from the finance charge determination. Your client's collection procedures, such as, the suspension of credit privileges, which may include the return of the credit card to your client, and the inclusion within the minimum payment due of a proportionate part of the amount over the customer's credit limit, appear to support categorization of the above-described charge as a default charge rather than as a finance charge.

Staff would caution you, however, that its conclusion is based on the assumption that your client's credit program does not facilitate such customer activity. Practices which appear to do so could indicate that the creditor anticipated such customer activity, that the customer's activity is considered a routine part of the creditor's plan and, therefore, that the \$5.00 charge is an additional finance charge.

This is an official staff interpretation of Regulation Z, issued in accordance with § 228.1(d)(3) of the regulation. It is limited to the issue of whether the charge your client intends to impose comes within the purview of § 226.4(c). Nothing in this interpretation is to be construed as a comment

on or an approval of any aspect of the above-described credit program other than the § 226.4(c) issue. If you have questions in the future, please feel free to contact the Federal Reserve Bank of New York or this office.

I note that you may represent creditors subject to the laws of the State of Connecticut. Since Connecticut has been granted an exemption under the applicable portions of the Truth in Lending Act, you may wish to contact the office of Mr. David H. Nelditz, Bank Commissioner of the State of Connecticut, for his views.

Sincerely,

NATHANIEL E. BUTLER,  
Associate Director.

Board of Governors of the Federal Reserve System, January 24, 1978.

THEODORE E. ALLISON,  
Secretary of the Board.

## AIRWORTHINESS REVIEW PROGRAM

## Amendment No. 6: Flight Amendments

## Correction

In FR Doc. 78-1034 appearing at page 2302 in the issue for Monday, January 16, 1978, make the following corrections:

(1) On page 2303, in the middle column, in the second full paragraph, between the third and fourth lines, insert: "be possible to show that the effect of".

(2) On page 2309, in the middle column, in the first full paragraph, the 34th line should read: "quies that VMC<sub>c</sub> must be determined to".

(3) On page 2323, in the third column, in amendatory paragraph 55, in the fifth line, the reference to "§ 25.1595" should read "§ 25.1585".

(4) On page 2325, in the third column, in § 27.1545(b)(1)(ii), insert a period after "(power on)".

(5) On page 2327, in the third column, in § 29.1545(b)(1)(ii), delete the semicolon after "VNE".

## PART 47—AIRCRAFT REGISTRATION

## PART 91—GENERAL OPERATING AND FLIGHT RULES

## Aircraft Registration Eligibility Identification and Activity

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The purpose of these amendments is to delete the requirement in the Federal Aviation Regulations that each holder of a certificate of aircraft registration file an annual report on the current eligibility of the aircraft for registration, and to discontinue the request for voluntary annual reports providing other information about the aircraft and its activity. The FAA has determined that there is no current need for these annual reports. These amendments are intended to relieve the public of this burden.

EFFECTIVE DATE: January 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Virginia Swimmer, Technical Section, FAA Aircraft Registry, Aeronautical Center, P.O. Box 25082, Oklahoma City, Okla. 73125, telephone 405-686-2284.

SUPPLEMENTARY INFORMATION: Section 47.44 of the Federal Aviation Regulations (14 CFR 47.44) presently requires the holder of a Certificate of Aircraft Registration to submit a report by April 1 of each year, providing information pertinent to the aircraft's continuing eligibility for registration. The report, made on Part 1 of AC Form 8050-73 (Aircraft Registration Eligibility Identification, and Activity Report), must state: (1) The name and address of the owner, (2) whether he is a United States citizen (if not a governmental unit); (3) the aircraft's make, model, and registration and serial number; and (4) whether the aircraft has been registered under the laws of a foreign country.

Section 91.53 (14 CFR 91.53) presently provides for the voluntary submission of Part 2 of AC Form 8050-73. Part 2 requests (but does not require) that the certificate holder submit the

following information: (1) The name and address of the principal operator of the aircraft (if not the owner); (2) the make and model of the aircraft's engines; (3) the communications and navigational aids capability of the aircraft's equipment; (4) the airport where the aircraft is based; and (5) the activity of the aircraft for the previous calendar year (as shown by hours flown and purpose of flight).

Sections 47.44 and 91.53 were adopted in 1970, as Amendments Nos. 47-10 and 91-72 (published in the FEDERAL REGISTER on February 5, 1970; 35 FR 2578). The purpose of § 47.44 was to provide for updating and revising the aircraft register, so that it would reflect, to the extent possible, only those aircraft eligible for registration. The FAA has received these reports annually from 1970 through 1977. As a result, approximately 32,000 obsolete aircraft records have been removed from the aircraft register, and the register is now reasonably current.

Moreover, the FAA has determined that the aircraft register can now be kept current, for the most part, with the use of information that is submitted to the FAA in the ordinary course of business. This information includes: notices of the sale, export, destruction, theft, and cannibalization of aircraft; notices of change of address and of the death of aircraft owners; and requests for change of registration number.

With respect to those aircraft for which no information is received within a reasonable period of time, it may be necessary to require some holders of Certificates of Aircraft Registration to file a report similar to that required by § 47.44. Such a reporting system would be considerably less of a burden on the public and on the FAA than the present one. The FAA may initiate rulemaking in the near future to propose such a requirement.

The purpose of § 91.53 was to collect statistical information useful in long-range aviation planning and in forecasting FAA workload. In addition, the name and address of the principal operator, if other than the owner, was requested to assist in distributing airworthiness directives.

However, voluntary compliance with § 91.53 has not proven to be an effective means of collecting information on aircraft activity. After study of the matter, the FAA has determined that statistical sampling methods will be more effective. Moreover, because information as to the operator of the aircraft is collected on a voluntary basis and only once a year, § 91.53 has not been a satisfactory means of maintaining a mailing list for Airworthiness Directives. For these reasons the FAA has determined it should no longer re-

## RULES AND REGULATIONS

quest the voluntary submission Part 2 of AC Form 8050-73, and will consider other means of maintaining a suitable mailing list for Airworthiness Directives.

Revoking §§ 47.44 and 91.53 will relieve any burden that may be imposed by these annual reports, and will not result in any other burden on the public. It will also eliminate agency costs incurred for computer use, mail distribution, report processing, and legal enforcement.

In the past the FAA has mailed a partially preprinted AC Form 8050-73 to each holder of a Certificate of Aircraft Registration in January each year, for submission by April 1. These forms will not be sent out in January of 1978. To delay revoking §§ 47.44 and 91.53 could cause confusion among certificate holders as to their reporting responsibility for 1978. For this reason, the FAA has determined that notice and public procedure hereon would be impractical and contrary to the public interest and that good cause exists for making this amendment effective on less than 30 days notice.

Although these amendments are being adopted without prior notice and public procedure, interested persons may wish to comment on the revoking of these reporting procedures. Accordingly, they are invited to submit such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or amendment number, and be submitted in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue SW., Washington, D.C. 20591.

## DRAFTING INFORMATION

The principal authors of this document are Virginia Swimmer, Technical Section, FAA Aircraft Registry, and Joseph M. Dorsey, Office of the Chief Counsel.

## ADOPTION OF THE AMENDMENT

Accordingly, Parts 47 and 91 of the Federal Aviation Regulations (14 CFR Parts 47 and 91) are amended, effective January 30, 1978, by revoking and reserving §§ 47.44 and 91.53 as follows:

§ 47.44 [Reserved]

§ 91.53 [Reserved]

(Secs. 313(a), 501, 601(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1401, 1421(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document

does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on January 25, 1978.

LANGHORNE BOND,  
Administrator.

(FR Doc. 78-2570 Filed 1-27-78; 8:45 am)

## [4910-13]

(Airspace Docket No. 77-SW-68)

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

## Alteration of Control Zone: Tyler, Tex.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment changes the effective hours of operation of the Tyler, Tex. (Pounds Field Airport), control zone to coincide with the hours of operation of Tyler, Airport Traffic Control Tower (ATCT) which are reduced from continuous to 0700 to 2300 local time daily. This reduces the availability of special weather observations accordingly and necessitates the change in the control zone hours of operation to conform to the air traffic control tower hours of operation.

EFFECTIVE DATE: March 23, 1978.

FOR FURTHER INFORMATION CONTACT:

David Gonzalez, Airspace and Procedures Branch (ASW-536), Air Traffic Division (ASW-536), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101, telephone 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION: In Subpart F, 71.171 (42 FR 355) of FAR Part 71, the Tyler, Tex., control zone is designated as continuous (through the omission of any reference to specific dates and times of operation). This conforms with the airport traffic control tower hours of operation. Special weather observations are provided on a 24-hour basis which is one of the requirements for a continuous control zone operation.

A traffic survey was completed on March 31, 1977, which indicated insufficient activity to retain the continuous control tower operation. On March 23, 1978, the airport traffic control tower hours of operation will be reduced to 0700 to 2300 local time daily. This will necessitate a similar reduction in the control zone hours of operation.

## RULES AND REGULATIONS

The aforementioned action will reduce the constraints and, in effect, the impact on the user imposed by the control zone operation. Consequently, we have elected to omit circularization of the change for comment.

## DRAFTING INFORMATION

The principal authors of this document are David Gonzalez, Airspace and Procedures Branch, and Robert C. Nelson, Office of the Regional Counsel.

## ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart F of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 355) is amended, effective 0901 G.m.t., March 23, 1978 as follows.

In Subpart F, 71.171 (42 FR 355), the Tyler, Tex., control zone is amended by adding the following sentence:

This control zone is effective during the specific dates and times established in advance by a notice to airmen. The effective date and time will thereafter be continuously published in the Airman's Information Manual.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Fort Worth, Tex., on January 17, 1978.

HENRY L. NEWMAN,  
Director, Southwest Region.

(FR Doc. 78-2466 Filed 1-27-78; 8:45 am)

## [4910-13]

[Airspace Docket No. 78-WE-2]

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Temporary Control Zone,  
Daggett, Calif.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule establishes a temporary control zone for the Barstow-Daggett Airport, Daggett, Calif. This action will provide controlled airspace for aircraft/helicopters making instrument approaches to the Barstow-Daggett Airport during the "Brave Shield XVII" joint military exercise.

EFFECTIVE DATE: April 1, 1978.

ADDRESS: Federal Aviation Administration, Air Traffic Division, Chief, Airspace and Procedures Branch,

AWE-530, 15000 Aviation Boulevard,  
Lawndale, Calif. 90261.

## FOR FURTHER INFORMATION CONTACT:

Thomas W. Binczak, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, Calif. 90261, telephone 213-536-6182.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart F of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to designate a temporary control zone for the Barstow-Daggett Airport, Daggett, Calif., during the April 1, 1978 through April 23, 1978 time period.

A temporary control tower will be furnished by the Department of the Army with air traffic control services provided by U.S. Army air traffic controller personnel.

Approximately 150 rotary-wing aircraft will be temporarily based at the Barstow-Daggett Airport.

Under the circumstances presented, the FAA concludes that the rule is temporary in nature and does not significantly impose any additional burden on any person but adds to air safety. Therefore, I find notice and public procedure under 5 U.S.C. 553(b) is unnecessary.

## DRAFTING INFORMATION

The principal authors of this document are Thomas W. Binczak, Air Traffic Division and DeWitte T. Lawson, Jr., Office of the Regional Counsel.

## ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart F of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective April 1, 1978 through April 23, 1978, as follows:

1. Amend § 71.171 of Part 71, Federal Aviation Regulations to read:

DAGGETT, CALIF.

Within a five mile radius of Barstow-Daggett Airport (latitude 34°51'20" North; longitude 116°47'10" West).

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)), sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Los Angeles, Calif., on January 18, 1978.

ROBERT H. STANTON,  
Director, Western Region.

(FR Doc. 78-2467 Filed 1-27-78; 8:45 am)

## [6320-01]

## CHAPTER II—CIVIL AERONAUTICS BOARD

SUBCHAPTER A—ECONOMIC REGULATIONS  
(Reg. ER-1044, Amdt. 41)PART 221—CONSTRUCTION, PUBLICATION,  
FILING AND POSTING OF TARIFFS OF AIR  
CARRIERS AND FOREIGN AIR CARRIERS

## Tariff Filing Deadline

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This amendment conforms our regulation with the statutory requirement that foreign indirect freight carriers file tariffs at least 45 days before the date they are to become effective.

DATES: Effective: February 21, 1978.  
Adopted: January 24, 1978.

## FOR FURTHER INFORMATION CONTACT:

Richard Juhnke, Associate General Counsel, Rates and Agreements, 1825 Connecticut Avenue NW., Washington, D.C. 20428, 202-673-5436.

SUPPLEMENTARY INFORMATION: ER-1038, amendment 40, to Part 221 (43 FR 1322, January 9, 1978) provided in part that indirect domestic freight carriers file tariffs with the Board at least 45 days from the date on which the tariff would become effective. Pub. L. 65-162 requires that this tariff filing deadline apply to both foreign and domestic indirect freight carriers. The prior amendment inadvertently left foreign carriers outside of the new deadline, and this amendment is designed to include such carriers, thereby conforming the Board's economic regulations with the statutory requirement. This editorial amendment is issued by the undersigned pursuant to delegation of authority from the Board to the General Counsel, in 14 CFR 385.19. Procedures for review of this amendment are set forth in Subpart C of Part 385 (14 CFR 385.50 through 385.54).

Accordingly, paragraph (a)(2) of § 221.160 is amended to read as follows:

## § 221.160 Required notice.

(a) Statutory notice required. . . .

(2) For tariffs pertaining to air transportation of property, at least 60 days if filed by an air carrier or foreign air carrier directly engaged in the operation of aircraft, or at least 45 days if filed by an air carrier or foreign air carrier not directly engaged in the operation of aircraft.

(Secs. 204 and 403 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 758, as amended (49 U.S.C. 1324, 1373).)

By the Civil Aeronautics Board.

PHILIP J. BAKES,  
General Counsel.

(FR Doc. 78-2489 Filed 1-27-78; 8:45 am)

## [3510-07]

Title 15—Commerce and Foreign Trade

CHAPTER 1—BUREAU OF THE CENSUS,  
DEPARTMENT OF COMMERCEPART 50—SPECIAL SERVICES AND STUDIES BY  
THE BUREAU OF THE CENSUSFee Structure for Statistics for City Blocks in  
the 1980 Census of Population and Housing

AGENCY: Bureau of the Census, Department of Commerce.

ACTION: Final rule.

SUMMARY: As part of the 1980 decennial Census of Population and Housing, the Census Bureau is planning to tabulate and publish block data for each urbanized area in the United States and for each incorporated place over 10,000 inhabitants. State and local government authorities will be able to contract with the Bureau of the Census to produce block data for areas not included in the regular block statistics program. This notice contains information on fees and other requirements to be met by requesting authorities in undertaking contracts for block statistics.

## FOR FURTHER INFORMATION CONTACT:

Arthur F. Young, Chief, Housing Division, Bureau of the Census, Washington, D.C. 20233, 301-763-2863.

EFFECTIVE DATE: January 30, 1978.

SUPPLEMENTARY INFORMATION: In accordance with the rulemaking provisions of administrative procedure 5 U.S.C. 553, it has been found that notice and hearing on this schedule of fees and postponement of the effective date thereof is impracticable and unnecessary for the reason that such procedure, because of the nature of the rules, serves no useful purpose.

In accordance with the provisions of title 13, United States Code, section 8, authorizing the Department of Commerce to make special statistical surveys and studies, and to perform other specified services upon the payment of the cost thereof, the following fee structure is hereby established. No transcript of any record will be furnished under authority of this act which would disclose data on individual housing units or violate existing or future acts requiring that information furnished be held confidential.

15 CFR 50.40 is revised as follows:

## RULES AND REGULATIONS

§ 50.40 Fee structure for statistics for city blocks in the 1980 Census of Population and Housing.

(a) As part of the regular program of the 1980 census, the Census Bureau will publish printed reports containing certain summary population and housing statistics for each city block, drawn from the subjects which are being covered on a 100-percent basis. For these subjects, a substantial amount of additional data by block will be available on computer tape.

(b) The 1980 block data under the regular program will be prepared for:

(1) Each urbanized area in the United States. An urbanized area is delineated by the Census Bureau in each standard metropolitan statistical area and generally consists of a city or group of contiguous cities with a 1970 population of 50,000 or more, together with adjacent densely populated land (i.e., land having a population density of at least 1,000 persons per square mile).

(2) And, outside urbanized areas, for each incorporated place (such as a city or village) that was reported as having 10,000 or more inhabitants in—(i) The 1970 census, or (ii) The 1973, 1975, or 1976 official population estimates published by the Bureau, or (iii) A special census conducted by the Bureau on or before December 31, 1977.

(c) Outside the above-mentioned urbanized areas and places, State and local government authorities will be able to contract with the Bureau of the Census to produce block data for their areas. In undertaking this contract, the requesting authority will be required to pay a fee, supply certain maps, and meet certain time deadlines as follows:

(1) Fee: (i) Population size:

	Fee per area
Under 2,500 .....	\$500
2,500 to 4,999 .....	600
5,000 to 9,999 .....	700

(ii) The final fee will be based upon the 1980 census population counts. A refund or additional charge will be made if the contracting area is in a different population size group as a result of the census.

(iii) The cost for an area with a population of 10,000 or more will be determined on an individual basis.

(iv) Multiple area contracts may be negotiated at a savings.

(v) The fee is based on estimated 1980 costs. If the 1980 cost exceeds the estimated cost, an additional fee may be requested from the contracting area. If actual costs are less than the estimated cost, a refund may be made.

(vi) Any incorporated place which contracts for block statistics and which reaches a population of 10,000 or more in the 1980 census will have

the fee completely refunded, as the place will then be considered to be part of the regular block statistics program.

(vii) If the area submits maps which are not adequate for the Bureau's purposes (see Maps, below) and therefore have to be redrafted by the Bureau, a surcharge of \$300 per map sheet requiring revision will be applied to the fee for the particular area.

(2) Maps: (i) In order for the Bureau to provide data on a block-by-block basis, it must have a map which clearly delineates each block. The contracting government authority must supply such maps. A copy of the specifications for preparing the block maps will be provided upon request and, in any event, will accompany the copy of the contract which is sent to the government authority for signature.

(ii) The maps must be furnished to the Census Bureau within 30 calendar days after the government authority signs the contract.

(iii) The Bureau will review the maps and, if revision is necessary, return them within 30 calendar days to the government authority.

(iv) Within 30 calendar days thereafter, the revised maps must be transmitted to the Bureau and, if they are still inadequate and must therefore be redrafted by the Bureau, the above-mentioned surcharge of \$300 per map sheet requiring revision will be imposed.

(3) Timing: (i) The contract must be signed, and a downpayment of \$250 per area made, by April 1, 1978. A check or money order should be made payable to "Commerce-Census."

(ii) If an area decides to withdraw after signing a contract and making a downpayment, the cost of work performed to date will be deducted from the refund.

(iii) The balance of the fee must be mailed to the Bureau by January 1, 1980.

(d) In consideration of the fees paid and maps supplied, the Bureau will:

(1) Identify the individual blocks in its records and tabulations.

(2) Make available the block data for the particular area in the same manner as for areas in the regular block statistics program (i.e., both in terms of printed reports and computer summary tapes). Two copies of the printed report (including the printed maps) which contain the block statistics for the particular area will be furnished to the contracting government authority.

(e) Requests for participation in the contract block statistics program or for further information should be addressed to the Director, Bureau of the Census, Washington, D.C. 20233.

Dated: January 24, 1978.

MANUEL D. PLOTKIN,  
Director, Bureau of the Census.

## Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS  
SERVICE, DEPARTMENT OF THE TREASURY  
(T.D. 78-34)

## PART 159—LIQUIDATION OF DUTIES

Waiver of Countervailing Duties—Non-Rubber  
Footwear and Handbags From Uruguay

AGENCY: Department of the Treasury, Customs Service.

ACTION: Waiver of countervailing duties.

**SUMMARY:** This notice is to inform the public that a determination has been made to waive countervailing duties that would otherwise be required by section 303 of the Tariff Act of 1930 on imports of non-rubber footwear and handbags from Uruguay. The waiver is being issued based on actions by the Government of Uruguay to phase out the effective export subsidy on these items. The waiver will expire on January 4, 1979, unless revoked earlier.

**EFFECTIVE DATE:** January 30, 1978.  
**FOR FURTHER INFORMATION CONTACT:**

Richard B. Self, Office of Tariff Affairs, U.S. Treasury Department, 15th and Pennsylvania Avenue NW., Washington, D.C. 202-566-8585.

**SUPPLEMENTARY INFORMATION:** In T.D.'s 78- and 78- , published concurrently with this determination it has been determined that bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (19 U.S.C. 1303), are being paid or bestowed directly or indirectly upon the manufacture, production, or exportation of non-rubber footwear and handbags from Uruguay.

Section 303(d) of the Tariff Act of 1930, as amended by the Trade Act of 1974 (Pub. L. 93-618, January 3, 1975), authorizes the Secretary of the Treasury to waive the imposition of countervailing duties during the four-year period beginning on the date of enactment of the Trade Act of 1974 if he determines that:

(1) Adequate steps have been taken to reduce substantially or eliminate during such period the adverse effect of a bounty or grant which he has determined is being paid or bestowed with respect to any article or merchandise;

(2) There is a reasonable prospect that under section 102 of the Trade Act of 1974, successful trade agreements will be entered into with foreign countries or instrumentalities providing for the reduction or elimination of barriers to or other distortions of international trade; and

## RULES AND REGULATIONS

(3) The imposition of the additional duty under this section with respect to such article or merchandise would be likely to seriously jeopardize the satisfactory completion of such negotiations.

Based upon analysis of all the relevant factors and after consultations with interested agencies and parties with direct interest in this proceeding, I have concluded that steps have been taken to reduce substantially the adverse effects of the bounty or grant. Specifically the Government of Uruguay is committed toward the total removal of the net bounty derived from the tax rebate certificate program (reintegro) (or any equivalent or comparable benefit) on all leather products, except tanned leather as such, to all export markets between January 1, 1978 and January 1, 1979. Such elimination will be staged according to the following schedule: 50-percent reduction by January 1, 1978 (such reduction took place December 28, 1977); 50-percent reduction of the remaining balance on or before July 1, 1978; and total elimination of any remaining subsidy on or before January 1, 1979.

The waiver is conditions further that the Government of Uruguay will proceed with its previously stated decision to eliminate the reintegro (or equivalent) for all exports from Uruguay on or before January 1, 1983.

The issuance of this waiver of countervailing duties would not inhibit in any way the right of the U.S. Government to take appropriate actions in the event that future imports of non-rubber footwear and handbags from Uruguay were having a disruptive effect on U.S. industry.

After consulting with appropriate agencies, including the Department of State, the Department of Labor, the Department of Commerce, and the Office of the Special Representative for Trade Negotiations, I have further concluded: (1) That there is a reasonable prospect that, under section 102 of the Trade Act of 1974, successful trade agreements will be entered into with foreign countries or instrumentalities providing for the reduction or elimination of barriers to or other distortions of international trade; and (2) That the imposition of countervailing duties on non-rubber footwear and handbags from Uruguay would be likely to seriously jeopardize the satisfactory completion of such negotiations.

Accordingly, pursuant to section 303(d) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(d)), I hereby waive the imposition of countervailing duties as well as the suspension of liquidation ordered in T.D.'s 78- and 78- , on non-rubber footwear and handbags from Uruguay.

This determination may be revoked, in whole or in part, at any time and

shall be revoked whenever the basis supporting such determination no longer exists. Unless sooner revoked or made subject to a resolution of disapproval adopted by either House of the Congress of the United States pursuant to section 303(e) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(e)), this waiver of countervailing duties will, in any event, by statute cease to have force and effect on January 4, 1979.

On or after the date of publication in the FEDERAL REGISTER of a notice revoking this determination in whole or in part, the day after the date of adoption by either House of Congress of a resolution disapproving this "Waiver of Countervailing Duties", or January 4, 1979, whichever occurs first, countervailing duties will be assessable on non-rubber footwear and handbags imported directly or indirectly from Uruguay in accordance with T.D.'s 78- and 78- , published concurrently with this determination.

## § 159.47 [Amended].

The table in § 159.47(f) of the Customs Regulations (19 CFR 159.47(f)) is amended by inserting after the last entry from Uruguay under the commodity headings "Non-rubber footwear" and "Handbags" the number of this Treasury Decision in the column heading "Treasury Decision", and the words "Imposition of countervailing duties waived" in the column headed "Action".

(R.S. 251, secs. 303, as amended, 624; 46 Stat. 687, 759, 88 Stat. 2051, 2052; 19 U.S.C. 66, 1303, as amended, 1624.)

ROBERT H. MUNDHEIM,  
General Counsel of the Treasury.

JANUARY 24, 1978.

## PART 159—LIQUIDATION OF DUTIES

Countervailing Duties—Leather Handbags  
From Uruguay

AGENCY: United States Customs Service, Treasury Department.

ACTION: Final countervailing duty determination.

**SUMMARY:** This notice is to advise the public that an investigation has resulted in a determination that the Government of Uruguay has provided benefits considered to be bounties or grants within the meaning of the countervailing duty law to manufacturers who export leather handbags to the United States. However, countervailing duties are being waived, based upon the criteria established by the Trade Act of 1974, including the ac-

tions taken and to be taken by the Government of Uruguay to reduce significantly the bounty or grant.

**EFFECTIVE DATE:** January 30, 1978.  
**FOR FURTHER INFORMATION CONTACT:**

Vincent P. Kane, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, telephone 202-566-5492.

**SUPPLEMENTARY INFORMATION:** On December 7, 1977, a "Preliminary Countervailing Duty Determination" was published in the FEDERAL REGISTER (42 FR 61908).

The notice stated that it had been determined preliminarily that benefits had been received by the Uruguayan manufacturers/exporters of leather handbags which may constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (19 U.S.C. 1303) (referred to in this notice as "the Act"). The benefits preliminarily determined to be bounties or grants were:

(1) Income tax exemptions on certain export related income;  
(2) Preferential financing for export; and

(3) The granting of tax certificates, known as "reintegros," upon exportation of the goods.

The rebate of value added taxes upon export of goods and the rebate of import duties paid on raw materials used in the production of leather handbags for export were determined not to constitute a bounty or grant within the meaning of the Act.

The handbags subject to this determination are classified under item number 706.0820 of the tariff schedules of the United States as leather handbags, other than reptile. The term "handbags" as used in the petition covers "pocketbooks, purses, shoulder bags, clutch bags, and all similar articles by whatever name known, customarily carried by women or girls, but not including luggage or flatgoods."

Programs found not to have been utilized by the leather handbag industry include government sponsored export insurance, a tax holiday for new industries and benefits for locating within certain free ports and zones. These are, therefore, not addressed by this Determination.

The Tentative Determination also indicated that it was the Treasury's intention to waive countervailing duties based on steps by the Uruguayan government to reduce significantly and relatively quickly the effective bounty or grant that was found to exist. However, before a Final Determination was to be made, consideration would be given to any relevant data, views, or arguments submitted in writing within 15 days from the date of publication of the Preliminary Determination.

## RULES AND REGULATIONS

3905

Based on additional information received and considered, it is hereby determined that the payment granted to the tanners upon the export of the finished handbags does constitute a bounty or grant within the meaning of the Act. Based on the information available, however, the tanners subsidy serves only to make tannery prices for hides in Uruguay equal to hides sold in neighboring countries which are readily available to handbag manufacturers in Uruguay. The net amount of this bounty is, therefore, zero, since the cost of producing handbags, absent the subsidy, would not be increased if handbag producers merely shifted their sources of supply to neighboring countries.

In addition, the net effect of the principal export subsidy found is offset by certain fiscal charges which are indirect taxes directly related to the exported leather handbags. These taxes are not rebated upon export; however, they could be rebated without being considered a "bounty" or "grant" under the Act as consistently interpreted by the Treasury Department. Thus, these unreputed taxes act to reduce the effective export benefit. Such indirect taxes include: (1) Export taxes charged on the value of the handbags exported, plus a tax on the value of the export rebate certificate;

(2) Value added taxes that are charged in manufacturing the exported handbags, (the Government of Uruguay generally rebates 75 percent of the value added taxes paid); (3) Taxes on agricultural transactions which in this case involve a 4 percent tax on the value of hides purchased by tanners; and (4) Import taxes and other special taxes which are assessed on the non-leather items of the handbag.

Finally, the effective export benefit is reduced through a regular devaluation of the peso to the dollar since the certificate tendering the benefit is not received before 90 days after application has been made for it.

After consideration of all the information received, it is hereby determined that the subject leather handbags from Uruguay receive bounties or grants within the meaning of the Act. The bounties or grants are in the form of the payments referred to in the Preliminary Determination, taking into account the offsets described in this Notice.

Accordingly, notice is hereby given that dutiable leather handbags, imported directly or indirectly from Uruguay, entered, or withdrawn from warehouse, for consumption on or after January 30, 1978, will be subject to payment of countervailing duties equal to the net amount of any bounty or grant determined or estimated to have been paid or bestowed.

In accordance with section 303 of the Act, until further notice the net

amount of such bounties or grants has been estimated and declared to be 17.4 percent of the f.o.b. price for export to the United States of leather handbags from Uruguay.

Effective January 30, 1978, and until further notice, upon the entry for consumption or withdrawal from warehouse for consumption of such dutiable leather handbags imported directly or indirectly from Uruguay, which benefit from these bounties or grants, there shall be collected, in addition to any other duties estimated or determined to be due, countervailing duties in the amount ascertained in accordance with the above declaration. To the extent that it can be established to the satisfaction of the Commissioner of Customs that imports of leather handbags from Uruguay are subject to a bounty or grant smaller than the amount which otherwise would be applicable under the above declaration, the smaller amount so established shall be assessed and collected.

Any merchandise subject to the terms of this order shall be deemed to have benefited from a bounty or grant if such bounty or grant has been or will be credited or bestowed, directly or indirectly, upon the manufacture, production, or exportation.

Notwithstanding the above, a "Notice of Waiver of Countervailing Duties" is being published concurrently with this order which covers leather handbags from Uruguay subject to this investigation in accordance with section 303(d) of the Act. At such time as the waiver ceases to be effective, in whole or in part, a notice will be published setting forth the deposit of estimated countervailing duties which will be required at the time of entry, or withdrawal from warehouse, for consumption of each product then subject to the payment of countervailing duties.

## § 159.47 [Amended]

The table in § 159.47(f) of the Customs Regulations (19 CFR 159.47(f)) is amended by inserting under the column headed "Country", the name "Uruguay" and by inserting the words "leather handbags", in the column headed "Commodity," the number of this treasury Decision in the column headed "Treasury Decision," and the words "Bounty Declared-Rate" in column headed "Action."

(R.S. 251, as amended, secs. 303, as amended, 624, 46 Stat. 687, 759; 19 U.S.C. 66, 1303, 1624.)

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190 Revision 14, July 1, 1977, the provisions of Treasury Department Order No. 165, Revised November 2, 1954 and section 159.47(d) of the Customs Regulations (19 CFR 159.47(d)), insofar as they pertain to

the issuance of a countervailing duty order by the Commissioner of Customs, are hereby waived.

ROBERT H. MUNDHEIM,  
General Counsel of the Treasury.  
JANUARY 24, 1978.

## PART 159—LIQUIDATION OF DUTIES

## Countervailing Duties—Nonrubber Footwear From Uruguay

AGENCY: U.S. Customs Service, Treasury Department.

ACTION: Preliminary and final countervailing duty determination.

SUMMARY: This notice is to advise the public that an investigation has resulted in a determination that the Government of Uruguay has provided benefits considered to be bounties or grants within the meaning of the countervailing duty law to manufacturers who export non-rubber footwear to the United States. However, countervailing duties are being waived, based upon the criteria established by the Trade Act of 1974, including actions taken and to be taken by the Government of Uruguay to reduce significantly the bounty or grant.

EFFECTIVE DATE: January 30, 1978.

## FOR FURTHER INFORMATION CONTACT:

Vincent P. Kane, Operations Officer, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, telephone 202-566-5492.

SUPPLEMENTARY INFORMATION: On September 1, 1977, a notice of "Receipt of Countervailing Duty Petition and Initiation of Investigation" was published in the FEDERAL REGISTER (42 FR 45977). The notice stated that a petition had been received alleging that the payments or bestowals conferred by the Government of Uruguay upon the manufacture, production, or exportation of nonrubber footwear constitute the payment or bestowal of a bounty or grant, directly or indirectly, within the meaning of section 303 of the Tariff Act of 1930, as amended (19 U.S.C. 1303) (referred to in this notice as "the Act").

On December 7, 1977, the Treasury indicated its intention to waive countervailing duties against nonrubber footwear imports from Uruguay based on certain steps the Government of Uruguay planned to take to reduce significantly and relatively quickly the effective bounty or grant that was found to exist (42 FR 61908). Interested parties were given a period of 15 days in which to submit written views on this proposed action.

The nonrubber footwear specified in the petition is classified under items 700.05 through 700.85 inclusive of the Tariff Schedules of the United States Annotated (TSUSA), except items 700.28, 700.51, 700.52, 700.53, 700.54 and 700.60.

On the basis of an investigation conducted pursuant to § 159.47(c) of the Customs regulations (19 CFR 159.47(c)), it has been determined that benefits have been received by Uruguayan manufacturers/exporters of nonrubber footwear which constitute payment or bestowal of a bounty or grant within the meaning of the Act. These benefits have been conferred under the following programs:

- (1) The granting of tax certificates, known as "reintegros," to manufacturers of nonrubber footwear, upon the exportation of the goods;
- (2) Income tax exemptions on certain export-related income; and
- (3) Preferential financing for exports.

The rebate of value-added taxes upon export of goods and the rebate of import duties paid on raw materials used in the production of nonrubber footwear for export have been determined not to constitute bounties or grants within the meaning of the Act.

Programs found not to have been utilized by the nonrubber footwear industry include government-sponsored export insurance, a tax holiday for new industries, and benefits for locating within certain free ports and zones. These are, therefore, not addressed by this determination.

The payment granted to the tanners upon the export of nonrubber footwear does constitute a bounty or grant within the meaning of the Act. Based on the information available, however, the tanners' subsidy serves only to make tannery prices for hides in Uruguay equal to hides sold in neighboring countries, which are readily available to nonrubber footwear manufacturers in Uruguay. The net amount of this bounty, therefore, is zero, since the cost of producing nonrubber footwear absent the subsidy would not be increased if nonrubber footwear producers merely shifted their sources of supply to neighboring countries.

In addition, the net effect of the principal export subsidy found is offset by certain fiscal charges which are indirect taxes directly related to the exported footwear. These taxes are not rebated upon export; however, they could be rebated without being considered a "bounty" or "grant" under the Act as consistently interpreted by the Treasury Department. Thus, these unrebated taxes act to reduce the effective export benefit. Such indirect taxes include:

- (1) Export taxes charged on the value of the nonrubber footwear exported, plus a tax on the value of the export rebate certificates;

(2) Value-added taxes that are charged in manufacturing the exported nonrubber footwear (the Government of Uruguay generally rebates 75 percent of the value-added taxes paid);

(3) Taxes on agricultural transactions which in this case involve a 4-percent tax on the value of hides purchased by tanners; and

(4) Import taxes and other special taxes which are assessed in the non-leather items of the footwear.

Finally, the effective export benefit is reduced due to a regular devaluation of the peso to the dollar since the certificate tendering the benefit is not received before 90 days after application has been made for it.

After consideration of all the information received, it is hereby determined that the subject nonrubber footwear from Uruguay receive bounties or grants within the meaning of the Act. The bounties or grants are in the form of the payments referred to in this notice, taking into account the offsets described.

This notice combines the preliminary and final countervailing duty determinations required under section 303 of the Act.

Accordingly, notice is hereby given that dutiable nonrubber footwear, imported directly or indirectly from Uruguay, entered, or withdrawn from warehouse, for consumption on or after January 30, 1978, will be subject to payment of countervailing duties equal to the net amount of any bounty or grant determined or estimated to have been paid or bestowed.

In accordance with section 303 of the Act, until further notice the net amount of such bounties or grants has been estimated and declared to be 23 percent of the f.o.b. price for export to the United States of nonrubber footwear from Uruguay.

Effective on or after the date of publication of this notice in the FEDERAL REGISTER and until further notice, upon the entry for consumption or withdrawal from warehouse for consumption of such dutiable nonrubber footwear imported directly or indirectly from Uruguay, which benefit from these bounties or grants, there shall be collected, in addition to any other duties estimated or determined to be due, countervailing duties in the amount ascertained in accordance with the above declaration. To the extent that it can be established to the satisfaction of the Commissioner of Customs that imports of non-rubber footwear from Uruguay are subject to a bounty or grant smaller than the amount which otherwise would be applicable under the above declaration, the smaller amount so established shall be assessed and collected.

Any merchandise subject to the terms of this order shall be deemed to have benefited from a bounty or grant

if such bounty or grant has been or will be credited or bestowed, directly or indirectly, upon the manufacture, production, or exportation.

Notwithstanding the above, a "Notice of Waiver of Countervailing Duties" is being published concurrently with this order which covers non-rubber footwear from Uruguay subject to this investigation in accordance with section 303(d) of the Act. At such time as the waiver ceases to be effective, in whole or in part, a notice will be published setting forth the deposit of estimated countervailing duties which will be required at the time of entry, or withdrawal from warehouse, for consumption of each product then subject to the payment of countervailing duties.

## § 159.47 [Amended]

The table in § 159.47(f) of the Customs regulations (19 CFR 159.47(f)) is amended by inserting under the column headed "Country," the name "Uruguay," and inserting the words "Nonrubber footwear" in the column headed "Commodity," the number of this Treasury decision in the column headed "Treasury Decision," and the words "bounty-declared rate" in the column headed "Action."

(R.S. 251, as amended secs. 303, as amended, 624, 46 Stat. 687, 759 19 U.S.C. 66, 1303, 1624.)

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190, Revision 14, July 1, 1977, the provisions of Treasury Department Order No. 165, revised November 2, 1954, and § 159.47(d) of the Customs regulations (19 CFR 159.47(d)), insofar as they pertain to the issuance of a countervailing duty order by the Commissioner of Customs, are hereby waived.

ROBERT H. MUNDHEIM,  
General Counsel of the Treasury.

JANUARY 24, 1978.

## [4110-07]

## Title 20—Employees' Benefits

## CHAPTER III—SOCIAL SECURITY ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[Reg. No. 11]

## PART 401—DISCLOSURE OF OFFICIAL RECORDS AND INFORMATION

## Aid to Families With Dependent Children Programs

AGENCY: Social Security Administration, HEW.

ACTION: Interim regulation.

SUMMARY: The Social Security Administration (SSA) is changing its reg-

ulation on disclosure of official records and information (Regulation No. 1). The changes are required by Pub. L. 95-216 which amended the Social Security Act and the Federal Unemployment Tax Act. This new law requires SSA and State unemployment compensation agencies to give earnings information to State and local government agencies and officials for administering programs of Aid to Families with Dependent Children (AFDC), established by title IV-A of the Social Security Act. This law also requires the Secretary of Health, Education, and Welfare (HEW) to decide by regulation what earnings information the State or local agencies and officials need, and what safeguards should be observed to make sure the information disclosed is used only for proper AFDC purposes. Because of time constraints, this change in the regulation deals only with disclosures by SSA, not by unemployment compensation agencies, the latter will be added after discussions with the Department of Labor.

EFFECTIVE DATE: The amendments are effective January 30, 1978.

## FOR FURTHER INFORMATION CONTACT:

Mr. John Renner, Legal Assistant, Office of Policy and Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, Md. 21235, telephone 301-594-7336.

SUPPLEMENTARY INFORMATION: SSA's regulation dealing with disclosure of personal information is 20 CFR Part 401, or Regulation No. 1. The version of Regulation No. 1 now in effect is an interim regulation, containing only general guidelines for deciding when personal information may be disclosed. (A more detailed revision is being prepared.) Since the new law, Pub. L. 95-216, requires the Secretary of HEW to decide specifically what information the State or local agencies and officials need and what safeguards there should be to protect the information, the current interim regulation is being expanded. The general rules now in effect will become Subpart A of Regulation No. 1, and a new Subpart-B will be added to contain just the rules required by the new law.

The new law became effective as soon as it was enacted (December 20, 1977), and so the new regulation is also needed immediately. For this reason the Secretary finds that there is good cause for dispensing with prior notice and a delayed effective date. Therefore, as authorized by the Administrative Procedure Act, 5 U.S.C. 553(b)(3), these regulation changes go into effect immediately.

The new law covers disclosures not only by SSA but also by State unemployment compensation agencies covered under section 3304(a) of the Fed-

eral Unemployment Tax Act (26 U.S.C. 3304(a)). However, since discussions will be necessary with the Department of Labor as to how this regulation will affect the unemployment compensation agencies, the present revision provides only for disclosures by SSA. Provision for disclosures by unemployment compensation agencies will be added at the earliest practical date.

Disclosures under this new subpart are not in conflict with the Privacy Act (5 U.S.C. 552a). Wage information requested by State or local agencies or officials for purposes of administering AFDC programs is not exempt from the Freedom of Information Act (FOIA, 5 U.S.C. 552). Since the wage information will be disclosed after a written request, the FOIA requires the disclosures. Section 552a(b)(2) of the Privacy Act (5 U.S.C. 552a(b)(2)) permits disclosure when required by the FOIA.

(Secs. 1102, 1106(a), Social Security Act (42 U.S.C. 1302, 1306(a)); sec. 411, Social Security Act (42 U.S.C. 611), as added by Pub. L. 95-216 (91 Stat. 1561).)

(Catalog of Federal Domestic Assistance Programs No. 13.800-13.807, Social Security Programs.)

NOTE.—SSA has decided that this document does not need an Economic Impact Statement under Executive Order 11949 and OMB Circular A107.

Dated: January 11, 1978.

DON WORTMAN,  
Acting Commissioner  
of Social Security.

Approved: January 24, 1978.

JOSEPH A. CALIFANO, JR.,  
Secretary of Health,  
Education, and Welfare.

Part 401 of Title 20 of the Code of Federal Regulations is revised as follows:

1. The heading "Subpart A—General" is added before § 401.1, to read as follows:

## Subpart A—General

## § 401.1 Purpose and scope.

## §§ 401.1 and 401.2 [Amended]

2. The word "part" is changed to "subpart" each place that it occurs in Subpart A, §§ 401.1 and 401.2.

3. A new Subpart B is added following § 401.3, to read as follows:

## Subpart B—Disclosures of Wage Information for Programs of Aid to Families with Dependent Children

Sec.

401.101 Purpose and scope.

401.102 Definitions.

401.103 When information may be disclosed.

401.104 Information which is necessary.

401.105 Protection of confidentiality.

**AUTHORITY:** Secs. 1102, 1106(a), Social Security Act (42 U.S.C. 1302, 1306(a); sec. 411, Social Security Act (42 U.S.C. 611), as amended by Pub. L. 95-216 (91 Stat. 1581).

**Subpart B—Disclosures of Wage Information for Programs of Aid to Families With Dependent Children**

**§ 401.101 Purpose and scope.**

(a) This subpart sets out the rules covering disclosure of wage information by the Social Security Administration (SSA), and received by an agency or official of a State or local government for purposes of determining an individual's eligibility for aid or services, or the amount of such aid or services, under a program of Aid to Families with Dependent Children (AFDC) under title IV-A of the Social Security Act. This subpart also sets out how the agency or official may use this information.

(b) This subpart implements §§ 402(a)(9), 411, and 1106(a) of the Social Security Act. Releases of wage information which are not provided for in this subpart are restricted by section 6103 of the Internal Revenue Code, as well as section 1106(a) of the Social Security Act and regulations implementing each of these statutory provisions.

**§ 401.102 Definitions.**

(a) "Wage information." "Wage information" includes:

(1) Information about both "wages" and "self-employment income" as those terms are defined in title II of the Social Security Act; and

(2) The name, address, and employer identification number of an employer reporting wages for social security purposes.

(b) "Wage reporting period." "Wage reporting period" means the period for which earnings are required to be reported for social security tax purposes.

(c) "Aid to Families with Dependent Children" or "AFDC." "AFDC" means a program of aid or services under title IV-A of the Social Security Act.

(d) "Client." "Client" means someone who receives or has applied for aid or services under an AFDC program, or someone considered to be a member of that person's family for AFDC purposes.

**§ 401.103 When information may be disclosed.**

SSA may release wage information to an agency or official of a State or local government only if the agency or official:

(a) Needs the information for purposes of determining an individual's eligibility for aid or services, or the amount of such aid or services, as it relates to the administration of the AFDC program (for example, deciding a client's initial or continuing eligibility or pursuing an investigation or

prosecution of alleged or suspected fraud or similar abuse of the AFDC program);

(b) Requests the information in writing, certifying that the information is to be used only for the purpose described in paragraph (a) of this section.

(c) Makes any reimbursement requested by SSA for the costs of furnishing the information; and

(d) Agrees to comply with the provisions of § 401.105.

**§ 401.104 Information which is necessary.**

The following wage information is considered necessary for purposes of deciding whether someone is eligible for AFDC aid or services, or the amount of the aid or services:

(a) Wage information relative to any AFDC client for the most recent available wage reporting period; and

(b) Wage information for specified earlier reporting periods regarding a specified client, when the requesting agency or official certifies that the information is needed for that period.

**§ 401.105 Protection of confidentiality.**

Agencies and officials receiving wage information under this subpart shall observe the following measures to protect the confidentiality of the information against inappropriate or illegal access or disclosure.

(a) The agency or official may redisclose the information only as follows:

(1) Any wage information may be given to the individual who is the subject of the information.

(2) A client may be given wage information about other clients in the same family, if the information is needed in connection with an AFDC claim.

(3) Wage information about a client or someone else in the client's family may be given to an attorney or other person representing the client, if the information is needed in connection with an AFDC claim.

(4) Wage information may be given to another State or local agency or official who needs the information for a purpose described in § 401.103(a).

(5) Any wage information may be released without restriction if the information has become public in a court proceeding.

(b) The information shall not be given to employees or officials who do not need the information in connection with determining an individual's eligibility for aid or services, or the amount of such aid or services as it relates to the administration of the AFDC program.

(c) The agency or official shall not use the information for any purpose other than determining an individual's eligibility for aid or services, or the amount of such aid or services as it relates to the administration of the AFDC program.

(d) The information shall be stored in a place physically secure from access by unauthorized persons.

(e) Information in electronic format, such as magnetic tapes or discs, shall be stored and processed in such a way that unauthorized persons cannot retrieve the information by means of computer, remote terminal, or other means.

(f) The agency or official shall instruct all personnel who will have access to the information as to the confidential nature of the information, the requirements of this subpart, and the criminal and civil sanctions against illegal use or disclosure of wage information covered by this subpart contained in Federal statutes (such as section 1106(a) of the Social Security Act and section 7217 of the Internal Revenue Code), and any relevant State statutes.

(g) The agency or official shall permit SSA to make on-site inspections to ensure that the requirements of Federal statutes and regulations are being met.

**Title 38—Pensions, Bonuses, and Veterans' Relief**

**CHAPTER I—VETERANS ADMINISTRATION**

**Part 21—Vocational Rehabilitation and Education**

**Subpart D—Administration of Educational Benefits; 38 U.S.C. Chapters 34, 35, and 36**

**PROMPT REFUNDS**

**AGENCY:** Veterans Administration.

**ACTION:** Final regulation.

**SUMMARY:** This amendment is intended to provide a definition of "prompt refund" to correct a problem arising from unreasonable delay by some schools in making refunds. It is hoped that the schools will be more expeditious and uniform in their refunds. An error is also corrected which has erroneously told the schools to refund the portion of the tuition earned and to keep the portion not earned. This rule is correctly stated in all places except one where this erroneous phrasing is longstanding.

**EFFECTIVE DATE:** January 23, 1978.

**FOR FURTHER INFORMATION CONTACT:**

June C. Schaeffer, Assistant Director for Policy and Program Administration, Education and Rehabilitation Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue NW., Washington, D.C., 20420, 202-389-2092.

**SUPPLEMENTARY INFORMATION:** On page 54954 of the FEDERAL REGISTER.

TER of October 12, 1977, there was published a notice of proposed regulatory development to amend Part 21 relative to defining the prompt refund schools offering nonaccredited courses are required to give their students. Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulations. Three comments were received.

One person commenting objects to implementation of the proposed change to § 21.4255 on the grounds that the Veterans Administration has no authority to define "prompt refund."

The requirement that a school offering nonaccredited courses provide a pro rata refund to a student who withdraws or discontinues his or her training is a requirement of the law (38 U.S.C. 1776(c)(13)). The Administrator has authority to make all rules and regulations necessary or appropriate to carry out the laws administered by the Veterans Administration (38 U.S.C. 210(c)). Many problems can result if schools unreasonably delay making a refund.

Consequently, the authority granted the Administrator in 38 U.S.C. 210(c) is sufficient authority to allow the term "prompt refund" to be defined by regulation.

Another person commenting suggests that prompt refunds are necessary only when a student withdraws entirely from a school. He suggests that if a student enrolls in several unit subjects, withdraws from some, but not all of them, the school should not have to give a refund to the student until after the term is over.

The pro rata refund policy of a school offering nonaccredited courses should apply to both a partial and a complete withdrawal from training. It is not clear what purposes would be served by not promptly refunding tuition fees to those who partially withdraw from a school. This suggestion is rejected.

A third person used this opportunity to oppose a provision of the regulations which was not proposed to be amended and which has long been in effect.

The proposed change to § 21.4255 is deemed proper and is hereby adopted.

**Approved:** January 23, 1978.

**By direction of the Administrator.**

RUFUS H. WILSON,  
Deputy Administrator.

In § 21.4255, paragraphs (d) and (e) are revised and paragraph (f) is added so that the revised and added material reads as follows:

**§ 21.4255 Refund policy: nonaccredited courses.**

A refund policy will meet the requirements of § 21.4254(c)(13), if it

provides that the amount charged for tuition, fees, and other charges for a portion of the course does not exceed the approximate pro rata portion of the total charges for tuition, fees, and other charges that the length of the completed portion of the course bears to the total length when the school makes provision for refund within the following limitations:

(d) *Books, supplies, and equipment.* Where the veteran or eligible person purchases his or her books, supplies, and equipment from a bookstore or other source, and the cost of such items is separate and independent from the charge made by the school for tuition and fees, he or she may retain or dispose of such items at his or her own discretion. Where the school furnishes the books, supplies, and equipment, with the cost thereof included in the total charge payable to the school for the course, and the veteran or eligible person withdraws or is discontinued prior to the completion of the course, refund will be made in full for the amount of the charge for the unissued books, supplies, and equipment. Issued items may be disposed of at the discretion of the veteran or eligible person.

(e) *Tuition and other charges.* Where the school either has or adopts an established policy for the refund of the unused portion of tuition, fees, and other charges subject to proration, which is more favorable to the veteran or eligible person than the approximate pro rata basis as provided in this section, such established policy will be applicable. Otherwise, the school may charge a sum which does not vary more than 10 percent from the exact pro rata portion of such tuition, fees, and other charges that the length of the completed portion of the course bears to its total length. The exact proration will be determined on the ratio of the number of days of instruction completed by the student to the total number of instructional days in the course.

(f) *Prompt refund.* In the event that the veteran, spouse, surviving spouse or child fails to enter the course or withdraws or is discontinued therefrom at any time prior to completion of the course, the unused portion of the tuition, fees and other charges paid by the individual shall be refunded promptly. Any institution which fails to forward any refund due within 40 days after such a change in status, shall be deemed, prima facie, to have failed to make a prompt refund, as required by this section.

**[4110-02]**

**PART 190—BASIC EDUCATIONAL OPPORTUNITY GRANT PROGRAM**

**Family Contribution Schedule**

**AGENCY:** Office of Education, HEW.

**ACTION:** Final regulation.

**SUMMARY:** This final rule amends current regulations dealing with the Family Contribution Schedules for the Basic Educational Opportunity Grant Program for the 1978-79 academic year. The amendments (a) revise the

criteria for determining which parent's annual adjusted family income shall be considered in computing eligibility for a student whose parents are divorced or separated, (b) allow an applicant to file a supplemental Form in the instance of a loss of unemployment benefits, (c) provide that a revision in previously reported asset amounts may be submitted if the applicant or the applicant's family has suffered a loss of or damage to assets resulting from a natural disaster in an area which has been declared a national disaster area by the President of the United States, (d) increase the personal asset reserve amount to \$17,000 and the farm and business asset reserve amount to \$50,000 and (e) increase the amount of the family size offsets to reflect inflation during 1977, as measured by the 1977 Consumer Price Index.

**EFFECTIVE DATE:** Pursuant to section 431(d) of the General Education Provision Act, as amended (20 U.S.C. 1232(d)) these regulations have been transmitted to the Congress concurrently with the publication of this document in the FEDERAL REGISTER. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions therein concerning Congressional action and adjournment. However, the regulation shall be effective only with regard to Basic Educational Opportunity Grants made for the period of July 1, 1978 through June 30, 1979.

#### FOR FURTHER INFORMATION CONTACT:

Bill Moran, 202-245-1744.

**SUPPLEMENTARY INFORMATION:** Notice of proposed rulemaking was published in the FEDERAL REGISTER on July 12, 1977 (42 FR 35948), to amend Subparts C and D of Part 190 of Title 45 of the Code of Federal Regulations. Interested persons were given the opportunity to submit comments, suggestions, or objections regarding the proposed rule.

Of the ten written responses received from the public, all agreed with the proposed changes in the 1978-79 Family Contribution Schedules. In addition, three of the comments received concerned the treatment of the independent student in the Basic Grant need analysis computations. These comments are discussed below.

The Commissioner's recommendation to revise the criteria for determining which parent's annual adjusted family income shall be considered in computing Basic Grant eligibility for a student whose parents are divorced or separated did not receive any negative comments and most commenters indicated that they felt the recommendation substantively improved program

equity. As noted in the notice of proposed rulemaking, this revision was proposed as part of the efforts to develop common data elements for the Basic Grant application and the applications of the major need analysis services. The final regulation, therefore, requires income information from the parent who has custody of the student or, in cases in which the term "custody" is no longer applicable, the parent with whom the student resided for the greater portion of the twelve month period preceding the date of application. If the applicant resided with neither parent during that period, the income of the parent who is providing the greater portion of the applicant's support shall be considered.

The proposed revision to include the loss of unemployment benefits as a permissible condition for filing a Supplemental Form brought widespread approval from the commenters. Two commenters suggested that this concept be extended to include the automatic loss of social security educational benefits at age twenty-two. One commenter indicated that this could be accomplished by allowing the applicant to file a Supplemental Form when such benefits terminated, while the other urged that an automatic exclusion of such income, keyed to the student's birthdate, take place during the processing of the application (with reasonable assumptions about the continuation of benefits through the end of an academic year). The suggestion was not adopted at this time. Since, beginning with the 1978-79 academic year, Basic Grant eligibility may be computed from information submitted on the forms of other need analysis services which are using common data elements, the suggestion will be subject to further study and discussion with these organizations before a decision will be reached by the Commissioner.

A number of commenters responding to the notice of proposed rulemaking on the 1978-79 Family Contribution Schedules suggested changes concerning the treatment of the "independent student." One commenter recommended that the family size offset for the single independent student be raised to half the amount of the family size offset for an independent student with one dependent. Another suggested that special criteria should be developed in the Family Contribution Schedules to determine the eligibility of a dependent spouse. Currently, the dependent spouse is considered as an independent student. Also, several commenters suggested that the Family Contribution Schedules should provide an asset reserve specifically for the home equity of independent students with dependents.

To respond fully to these suggestions as well as to other concerns which have been expressed by members of Congress, the financial aid community, and the general public, the Commissioner is undertaking an extensive study of independent students, their differentiating characteristics, and any special difficulties or problems they may encounter in financing their postsecondary education. The suggested changes noted above have not been adopted for the 1978-79 Family Contribution Schedules. However, they will be given careful consideration during the overall review of the treatment of the independent student.

In the course of this study of independent students, the Office of Education will be in continuing consultation with the financial aid community and the various committees of the Congress. It is the Commissioner's belief, that through the gathering and analysis of data on the independent student, together with the views of the Congress and the financial aid community, a reasonable, effective and judicious treatment of the independent student will result. The Commissioner expects to present to the Congress recommendations based upon this study in the Spring of 1978.

The proposed revision in the definition of an "independent student" which was published as a notice of proposed rulemaking simultaneously with the publication of the proposed 1978-79 Family Contribution Schedules will not be implemented for 1978-79. Because of the broad diversity of opinions which were received on the proposed changes, the Office of Education is undertaking an extensive and detailed study of independent students, their differentiating characteristics and any special difficulties or problems they may encounter during their educational experience. The Commissioner has decided to include the criteria for determining self-supporting status, the family size offset for single independent students, the status of home equity for independent students with dependents, and the expected contribution towards educational costs from an adult spouse as some of the items to be studied in the comprehensive study of the independent student.

The proposed change in the regulations allowing revisions in previously reported asset amounts to be submitted if the applicant or the applicant's family has suffered a loss of or damage to assets resulting from a natural disaster in an area which has been declared a national disaster area by the President of the United States received unanimous approval from the commenters. One commenter suggested that the filing of corrections to reflect asset losses from natural disasters be permitted in all cases rather than being limited to those losses re-

sulting from natural disasters in an area which has been declared a national disaster area by the President. This recommendation was not incorporated into the final regulation, however, because, as the notice of proposed rulemaking discussed, if a student's family should suffer a loss of assets because of an individual disaster after the Basic Grant application has been submitted, the financial aid officer at the student's institution may take this loss into account in determining eligibility for aid under the campus-based programs (National Direct Student Loan, College Work-Study and Supplemental Educational Opportunity Grant).

If that loss of assets has been of such magnitude that the family can no longer be expected to contribute the amount which had originally been expected, the financial aid officer has the discretion under the regulations governing each of the campus-based programs to reduce the expected family contribution to a level which reflects the family's current financial circumstances and to increase the awards from the three campus-based programs accordingly. The purpose of this change for the Basic Grant Program is to reflect losses of assets when those losses are so widespread among students and their families in a particular area that the campus-based program would be taxed to such an extent that the additional need could not be met.

As stated in the notice of proposed rulemaking, the six percent figure for the rise in the cost of living was used as an estimate to determine the family size offsets with the expectation that it would need to be adjusted. In actuality, the Consumer Price Index rose 6.5 percent, and the family size offsets have been altered to reflect that figure.

In addition to the changes submitted in the notice of proposed rulemaking, the final regulations also contain modifications not included under the proposed rulemaking procedure. After the publication of the notice of proposed rulemaking with regard to the Family Contribution Schedules, several public comments were received from the Congress and interested organizations urging an increase in the asset reserves currently in effect for the personal and farm and business categories. The arguments in favor of asset reserve increases are based on the following reasons. By increasing the asset reserve allowances to a level more in keeping with the average asset holdings of the various population groups, greater equity in the program can be achieved. Secondly, the increase in the asset reserve allowance would help to relieve the increased burden of middle income Americans who have experienced most severely the influence of rapid inflation on their personal and other assets.

In response to these recommendations, the final regulations have been amended. The personal asset reserve allowance is increased from \$12,500 to \$17,000 and the farm and business asset reserve allowance is increased from \$25,000 to \$50,000. In view of equity considerations, the Commissioner believes that these increases are both reasonable and necessary.

In view of the pressing need to incorporate the provisions dealing with the treatment of the personal asset reserve and the farm and business asset reserve allowances as part of the application process for 1978-79 academic year, and since the proposed change will only have a positive effect upon Basic Grant applicants, it has been determined in accordance with 5 U.S.C. 553(b) that to resort to proposed rulemaking procedures with respect to this provision would be impractical, unnecessary and contrary to public interest.

In light of the foregoing, Part 190 of Title 45 of the Code of Federal Regulations is amended by the revision of Subpart C and D as set forth below.

**NOTE.**—The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Statement under Executive Order 11821 and OMB Circular A-107.

(Catalogue of Federal Domestic Assistance Number 13.539, Basic Educational Opportunity Grant Program.)

Dated: December 20, 1977.

ERNEST L. BOYER,  
U.S. Commissioner of Education.

Approved: January 24, 1978.

JOSEPH A. CALIFANO, Jr.,  
Secretary of Health,  
Education, and Welfare.

Part 190 of Chapter I of Title 45 of the Code of Federal Regulations is amended as follows:

#### PART 190—BASIC EDUCATIONAL OPPORTUNITY GRANT PROGRAM

1. In § 190.32a, paragraphs (c), (e) and (f) is amended to read as follows:

§ 190.32a Annual adjusted family income.

(c) For a student whose parents are divorced or separated, only the income as described in paragraph (a) of this section of the parent who has custody of the applicant shall be considered in determining the annual adjusted family income. If custody was not awarded, if neither parent now has custody, or if the parents have equal custody, only the income of the parent with whom the applicant resided for the greater portion of the twelve-month period preceding the date of the application shall be considered. If the applicant did not reside with either parent during the twelve-month period preceding the date of applica-

tion, the income of the parent who is providing the greater portion of the student's support shall be considered.

(e) If a parent whose income is taken into account under paragraph (c) of this section has remarried, the income of that parent's spouse shall also be considered in determining the annual adjusted family income of the student if the student:

(1) Has received or will receive financial assistance of more than \$600 per year from that parent's spouse in the calendar year(s) in which aid is received or the calendar year prior to the academic year for which aid is requested, or

(2) Has lived or will live for more than 6 weeks in the home of that parent's spouse during the calendar year(s) in which aid is received or the calendar year prior to the academic year for which aid is requested.

(f) If a parent whose income is taken into account under paragraph (a) of this section was a widow or widower and that parent has remarried, the income of that parent's spouse shall also be considered in determining the annual adjusted family income of the student if the student:

(1) Has received or will receive financial assistance of more than \$600 per year from that parent's spouse in the calendar year(s) in which aid is received or the calendar year prior to the academic year for which aid is requested, or

(2) Has lived or will live for more than 6 weeks in the home of that parent's spouse during the calendar year in which aid is received or the calendar year prior to the academic year for which aid is requested.

2. In § 190.33, subparagraph (b)(1) is amended to read as follows:

§ 190.33 The expected family contribution for dependent students from dependent students from effective income.

(b) \* \* \*

(1) Family size offset. A family size offset is the amount specified in the following table. Family members include the student, the student's parents and the student's parent's dependents. If the parents are divorced or separated, family members include the student and any parent whose income is taken into account for the purpose of computing the annual adjusted family income and that parent's dependents. If the parents are divorced and the parent whose income is taken into account for the purpose of computing the annual adjusted family income has remarried, or if the parent was a widow or widower who has remarried, family members shall also in-

clude any dependents of that spouse if the new spouse's income is taken into account in determining the annual adjusted family income.

Family size offsets

Family members:	Amount
2.....	\$4,100
3.....	4,950
4.....	6,300
5.....	7,400
6.....	8,400
7.....	9,300
8.....	10,300
9.....	11,250
10.....	12,200
11.....	13,100
12.....	14,050
13.....	15,000

Plus \$950 for each additional family member over 13.

3. In § 190.35, subparagraph (a)(2) is amended to read as follows:

§ 190.35 Computation of standard expected contribution from parent's assets.

(a) \* \* \*

(2)(i) If the net assets determined in paragraph (a)(1) of this section do not include farm or business assets, deduct an asset reserve of \$17,000 from the net assets. (ii) If the net assets determined in paragraph (a)(1) of this section include farm assets or business assets, deduct an asset reserve of \$50,000 from the net assets. However, in this case an asset reserve of not more than \$17,000 may be deducted from non-farm and/or non-business assets owned by the parents.

4. In § 190.39, subparagraph (a)(5) and paragraph (c) are added to read as follows:

§ 190.39 Extraordinary circumstances affecting the expected family contribution determination for dependent students.

(a) \* \* \*

(5) A parent whose income was included in the calculation of expected family contribution as determined in § 190.33 has experienced a loss of unemployment benefits in the base year or the tax year subsequent to the base year.

(c) An applicant may submit a revised application to reflect changes in asset amounts reported on the previously submitted application if the applicant or the applicant's family has suffered a loss of or damage to assets resulting from a natural disaster in an area which has been declared a national disaster area by the President of the United States.

5. In § 190.43, subparagraph (b)(1) is amended to read as follows:

§ 190.43 The expected family contribution for independent students from annual adjusted family income.

(b) \* \* \*

(1) Family size offset. A family size offset is the amount specified in the following table. Family members include the student and his dependents. If the student is divorced or separated, family size shall include any person whose income is taken into account for the purpose of computing the annual adjusted family income and his or her dependents.

Family size offsets

Family members:	Amount
2.....	\$4,100
3.....	4,950
4.....	6,300
5.....	7,400
6.....	8,400
7.....	9,300
8.....	10,300
9.....	11,250
10.....	12,200
11.....	13,100
12.....	14,050
13.....	15,000

Plus \$950 for each additional family member over 13.

An offset of \$1,100 shall be made for the single independent student.

6. In § 190.48, Subparagraph (a)(6) and paragraph (c) would be added to read as follows:

§ 190.48 Extraordinary circumstances affecting the expected family contribution determination for independent students.

(a) \* \* \*

(6) An applicant or spouse whose income was included in the calculation of the expected family contribution as determined in § 190.43 has experienced a loss of unemployment benefits in the base year or the tax year subsequent to the base year.

(c) An applicant may submit a revised application to reflect changes in asset amounts reported on the previously submitted application if the applicant or the applicant's spouse has suffered a loss of or damage to assets resulting from a natural disaster in an area which has been declared a national disaster area by the President of the United States.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Service Order No. 1297]

PART 1033—CAR SERVICE

Railroad Operating Regulations for Freight Car Movement

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order (Service Order No. 1297).

SUMMARY: An acute shortage of several types of freight cars exists throughout the country. Service Order No. 1297 applies to all loaded and empty cars of mechanical designations "XM" and "XMI" boxcars, "LO" covered hopper cars and "FC" flat cars. Service Order No. 1297 requires these loaded cars to be placed within 24 hours following arrival at destination; empty cars must be removed from point of unloading or interchange tracks within 24 hours, and loaded and empty cars shall be forwarded within 24 hours. Cars held for light repairs or cleaning shall be placed not later than the first 7 a.m. after car is carded, and these repairs shall be completed within 24 hours. Empty cars, owned by and bearing the registered reporting marks assigned to the line holding the car, are exempt from provisions of this order.

DATES: Effective 11:59 p.m., January 31, 1978. Expires 11:59 p.m., May 31, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: The order is printed in full below.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 24th day of January 1978.

There are acute shortages of freight cars throughout the country resulting in failures of carriers to furnish an adequate supply of freight cars to shippers located on their lines. These shortages of freight cars are impeding both the domestic and export movements of agricultural, mineral, forest, and manufactured products, and other commodities. The existing car service rules, regulations, and practices of the railroads are ineffective with respect to the use, supply, control, movement, distribution, exchange, interchange, and return of freight cars to meet the

requirements of shippers. It is the opinion of the Commission that an emergency exists requiring immediate action to promote car service in the interest of the public and the commerce of the people. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that a good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1297 Car Service Order 1297.

(a) Railroad operating regulations for freight car movement. Each common carrier by railroad subject to the Interstate Commerce Act shall observe, enforce, and obey the following rules, regulations, and practices with respect to its car service:

(1) Application. (i) The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

(ii) This order shall apply to all freight cars listed in the Official Railway Equipment Register ICC-R.E.R. No. 405, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "XM," "LO," or "FC."

(iii) Exception. Empty cars owned by the Alaska Railroad, while held in the State of Washington, pursuant to instructions of the car owner, are exempt from the provisions of this order.

(iv) Exception. Empty cars described in part (ii) of this section owned by and bearing the registered reporting marks assigned to the line holding the car, and empty cars of private ownership reported and awaiting instructions from the car owner, are exempt from the provisions of this order.

(v) Exception. To alleviate hardships or inequities, including, but not limited to those caused by extreme weather disruptions, exceptions to this order may be authorized to the carrier by the Railroad Service Board, Interstate Commerce Commission, Washington, D.C. Requests for such exceptions may be made only by carriers and shall be sent to W. H. Van Slyke, Chairman, Car Service Division, Association of American Railroads, Washington, D.C., for recording and submission to the Railroad Service Board, Interstate Commerce Commission, for consideration.

(vi) Actual placement means placing a car in an accessible position for loading or unloading, or placing on an industrial interchange track serving the consignor or consignee. If such placing is prevented by any cause attributable to consignor or consignee and car is placed on the private or other than public delivery tracks serving the consignor or consignee, it shall be considered constructively placed without notice.

(vii) Holidays shall be those listed in item 525 of Agent D. M. Rogers' tariff 4-K, ICC H-74, general car demurrage rules and charges, supplements thereto, or successive issues thereof.

(2) Placing of cars. (i) Loaded cars shall be actually or constructively placed within 24 hours, exclusive of Saturdays, Sundays, and holidays, following arrival at destination, or after arrival at the yard from which cars are dispatched for actual placement.

(ii) Empty cars which after placement will be subject to demurrage, storage, or detention rules applicable to cars for loading, or which are subject to storage rules and charges applicable to assigned cars held empty awaiting placement for loading by the assignee, shall be actually placed or appropriate notice as required by applicable tariffs issued within 48 hours, exclusive of Saturdays, Sundays, and holidays, after arrival at the point where held.

(iii) When delivery of a car, either empty or loaded, consigned or ordered to an industrial interchange tract or to an other than public delivery track, cannot be made because of any condition attributable to consignor or consignee, such car shall be held at destination or, if it cannot reasonably be accommodated there, at an available hold point; and constructive placement notice shall be sent or given the consignor or consignee within 24 hours, exclusive of Saturdays, Sundays, and holidays, after arrival of car at destination or hold point.

(iv) Proper notice for cars placed on public delivery tracks shall be sent or given within 24 hours after placement, exclusive of Saturdays, Sundays, and holidays.

(v) Cars held at destination for accessorial terminal services described in the applicable tariffs, such as holding for orders or inspection, shall be placed on unloading, hold, or inspection tracks; and proper notice shall be given within 24 hours, exclusive of Saturdays, Sundays, and holidays, after arrival of car at destination or at hold point. Time and charges shall be computed following such notice and demurrage or detention charges assessed in accordance with provisions of governing tariffs.

(3) Removal of cars. (i) Empty cars must be removed from point of unloading or interchange tracks of industrial plants within 24 hours, exclusive of Sundays and holidays, following unloading or release by consignee or shipper, unless such empty cars are ordered or appropriated by the shipper for reloading within such 24-hour period. Empty cars not ordered for loading at point where made empty must be forwarded or set aside to be cleaned, repaired, or weighed, if to be weighed at that point, within 24 hours following removal of empty cars.

(ii) Outbound loaded freight cars must be removed from point of loading or interchange tracks of industrial plants within 24 hours, exclusive of Sundays and holidays, following acceptance by carrier of the shipping instruction covering the cars. Such cars must be forwarded, weighed, if to be weighed at that point, or set aside for repairs within 24 hours following release and removal.

(iii) Cars subject to parts (i) and (ii) of this section, not made accessible to the carrier, shall be subject to demurrage until such time as they become, and remain, accessible to the carrier.

(iv) Cars shall not be removed from point of unloading or from industrial interchange tracks, nor released from demurrage or detention status, until all bracing, blocking, dunnage, paper, residue of lading, debris, and other foreign matter directly related to the inbound load have been removed from the car in accordance with the requirements of rules 14 and 27 of the Uniform Freight Classification, ICC 8, issued by J. D. Sherson, supplements thereto, or reissues thereof.

Exception. Dunnage being returned to shipper under provisions of the applicable tariffs may be left in cars released as empty, provided that proper shipping instructions are received by the carrier prior to 5 p.m. of the first day, which is not a Saturday, Sunday, or holiday, immediately following release of the car.

(4) Forwarding of cars. (i) Loaded cars and empty cars shall be forwarded within 24 hours, except cars described in parts (ii), (iii), or (iv) of this section, or cars described in part (ii) of section (2).

(ii) Exception. Loaded cars held subject to instructions of consignee, consignor, or other qualified owner of the freight contained therein, while subject to applicable tariffs.

(iii) Exception. Cars held for repairs, weighing, or cleaning. (See section (5).)

(iv) Exception. Cars held because no train or switch engine service is available between hold point and destination.

(5) Cars held for repairs, weighing, or cleaning. (i) Cars of system, foreign, or private ownership which are held for light repairs or cleaning shall be placed on repair or cleaning tracks not later than the first 7 a.m., exclusive of Sundays and holidays, after time carded for repairs or cleaning. Light repairs or cleaning shall be accomplished within 24 hours, exclusive of Sundays and holidays, after placement on repair or cleaning tracks; except that when necessary to order material from car owner to make the repairs to foreign or private cars held awaiting such material, repairs shall be completed within 24 hours, exclusive of Sundays and holidays, after receipt of such material at the station at which the repair point is located.

## RULES AND REGULATIONS

(ii) Light repairs are defined as repairs requiring less than 20 man-hours by repair track forces to complete.

(iii) Cars which must be weighed shall be weighed and restenciled, if required, within 24 hours, exclusive of Sundays and holidays, after arrival at the point at which weighing is to be accomplished, or after request for weight is received, if weights are requested by shipper or by car owner.

(iv) Cars which have been repaired, cleaned, or weighed shall become subject to sections 2, 3, or 4, as applicable, from the date such repairs, cleaning, or weighing have been accomplished.

(6) *Movement of freight cars.* (i) No common carrier by railroad subject to the Interstate commerce Act shall delay the movement of cars by holding such cars in yards, terminals, or sidings for the purpose of increasing the time in transit of such cars.

(ii) Cars shall not be set out between terminals except in cases of emergency.

(iii) Backhauling cars for the purpose of increasing the time in transit is prohibited.

(iv) Through cars shall not be handled on local or way freight trains for the purpose of increasing the time in transit of such cars.

(v) The use by any common carrier by railroad, or the acceptance of instructions from the shipper, for the movement of cars over its line via any route other than its shortest available route or its usual and customary fast freight route from point of receipt of the car from cosignor, or connecting line, to point of delivery to consignee, or to next connecting line, except for the purpose of according a lawfully established transit privilege (not including a diversion or reconsignment privilege) is hereby prohibited.

(b) *Rules and regulations suspended.* The operation of all rules and regulations, insofar as they conflict with the provisions of this order, is hereby suspended.

(c) *Effective date.* This order shall become effective at 11:59 p.m., January 31, 1978.

(d) *Expiration date.* This order shall expire at 11:59 p.m., May 31, 1978, unless otherwise modified, changed, or

suspended by order of this Commission.

(49 U.S.C. 1(10-17).)

*It is further ordered.* That a copy of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington, and John R. Michael. Member Robert S. Turkington not participating.

H. G. HOMME, Jr.,  
Acting Secretary.

(FR Doc. 78-2529 Filed 1-27-78; 8:45 am)

## proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[3410-02]

## DEPARTMENT OF AGRICULTURE

## Agricultural Marketing Service

[7 CFR Part 930]

CHERRIES GROWN IN MICHIGAN, NEW YORK, WISCONSIN, PENNSYLVANIA, OHIO, VIRGINIA, WEST VIRGINIA, AND MARYLAND

## Change in Assessment Procedure

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice invites written comment on a proposal to set exact dates on which handler assessments shall be billed by the Cherry Administrative Board. The uncertainty of the billing dates under the present procedure has caused some administrative problems for the Board and for cherry handlers.

DATE: Comments must be received by February 15, 1978.

ADDRESS: Comments should be addressed to: Hearing Clerk, United States Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250. Two copies of all written comments should be submitted, and they will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: Currently, the Cherry Administrative Board bills each cherry handler for the first one-third of his total program assessment at the time the handler completes his packing for the season; the second one-third is billed 60 days after pack completion; and the final one-third is billed 90 days after pack completion. The uncertainty of the billing dates under the present procedure has caused some administrative problems for the board and for cherry handlers. The proposal would establish exact dates for the billing of these assessments. The proposal was submitted by the Cherry Administrative Board, established under marketing order No. 930 (7 CFR Part 930), regulating the handling of cherries grown in eight designated states, under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

The proposal would amend § 930.107(a) to read as follows:

§ 930.107 Assessment procedure.

(a) Each handler shall be billed for the first one-third of his total assessments on September 1, the second one-third of such assessments on October 1, and all remaining unpaid assessments on November 1.

Dated: January 25, 1978.

CHARLES R. BRADER,  
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

(FR Doc. 78-2530 Filed 1-27-78; 8:45 am)

## POTATO RESEARCH AND PROMOTION PLAN

## Proposed Amendment Regarding Designated Handler

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice invites comments on an amendment proposed by the Potato Board to clarify the responsibilities of potato handlers regarding assessments. This proposed amendment would elaborate on regulations concerning who is responsible for paying assessments for seed potatoes.

DATE: Comments due by February 15, 1978.

ADDRESSES: Comments may be addressed to the Hearing Clerk, Room 1077 South Building, U.S. Department of Agriculture, Washington, D. C. 20250. Two copies of all written comments shall be submitted and they will be made available for inspection at the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D. C. 20250, phone 202-447-6393.

SUPPLEMENTARY INFORMATION: The Potato Board is the administrative agency established by the Potato Research and Promotion Plan (7 CFR Part 1207). The Plan is effective under the Potato Research and Promotion Act (7 U.S.C. 2611-2627).

The proposal is as follows:

§ 1207.512 [Amended.]

1. In § 1207.512 revise the first sentence in paragraph (a) to read as follows:

(a) Unless otherwise provided in paragraphs (a)(8), (b), and (c) of this section, the designated handler shall be the first handler of such potatoes.

2. In § 1207.512 revise paragraph (a)(8) to read as follows:

(a) \* \* \*

(8) Producer utilizes potatoes of his own production for seed in planting his subsequent crop. Such seed potatoes do not enter the current of commerce; there is no designated handler in this instance since the potatoes have not been handled as heretofore defined and no assessment is due. However, seed potatoes sold or shipped to other producers for planting or to other persons for subsequent disposition enter the current of commerce and are subject to assessment.

The producer of seed potatoes shall be the designated handler of such potatoes shipped to other producers for planting and the assessment is due when he first sells or otherwise handles such potatoes. The first person who acquires seed potatoes from the producer thereof for subsequent disposition other than planting by said person shall be the designated handler of such potatoes.

Dated: January 25, 1978.

CHARLES R. BRADER,  
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

## DEPARTMENT OF ENERGY

Economic Regulatory Administration  
[10 CFR Part 211]DOMESTIC CRUDE OIL ALLOCATION  
PROGRAM

Proposed Amendment to the Entitlements Program as to Certain Limited-Product Refineries Located in State of Alaska and Request for Comment on Similar Situations Elsewhere

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of proposed rulemaking and public hearing.

SUMMARY: The Economic regulatory Administration ("ERA") of the Department of energy ("DOE") hereby gives notice of a proposal to amend the domestic crude oil allocation program (the "entitlements program") to clarify the proper calculation of entitlements to be issued to certain refineries located in the State of Alaska, in order to avoid the potential for duplicate entitlement issuances for the same volume of crude oil. The refineries affected are specialized facilities that produce and sell or use only certain products from Alaskan crude oil. The remaining unfinished oils or refined products from these refineries are then injected into the Trans-Alaska Pipeline and commingled with the crude oil in the pipeline for further shipping and ultimate sale to other refiners as crude oil. The proposed rule would make it clear that such limited-product Alaskan refineries earn entitlements only on that portion of the processed crude oil that is not injected into the pipeline in the form of either unfinished oil or refined products.

DATES: Comments by March 9, 1978, 4:30 p.m. Hearings: Anchorage, Alaska, March 13, 1978, 9:30 a.m.; Washington, D.C., March 16, 1978, 9:30 a.m. Requests to speak by March 6, 1978, 4:30 p.m.

ADDRESSES: Send comments to Office of Regulations Management, Economic Regulatory Administration, Room 2214, Box RD, 2000 M Street NW., Washington, D.C. 20461.

## HEARINGS

- (1) Anchorage hearing: March 13, 1978, 9:30 a.m., Z. J. Loussac Library, 427 F Street, Anchorage, Alaska 99501.
  - (2) Washington hearing: March 16, 1978, 9:30 a.m., Room 2105, 2000 M Street NW., Washington, D.C. 20461.
- Send requests to speak to (1) Anchorage hearing: Department of Energy, Subregional Office G-11, Room 229, Federal Office Building, 605 West 4th Avenue, Anchorage, Alaska 99501; (2) Washington hearing: Office of Regulation Management,

## PROPOSED RULES

Margaret R. Dinneen (Office of General Counsel), Department of Energy, Room 5136, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, 202-566-9565.

## SUPPLEMENTARY INFORMATION:

- I. Background.
- II. Proposed amendment.
- III. Proposed effective date.
- IV. Specific comments requested.
- V. Comment procedures.

## I. BACKGROUND

The DOE's entitlements program is designed basically to equalize the cost of crude oil purchases among U.S. refiners. Each refiner is issued each month a number of entitlements equal to the total volume in barrels of its crude oil runs to stills for the month, multiplied by the national domestic crude oil supply ratio (a fraction which represents generally that percentage of crude oil processed by domestic refiners which is domestic price-controlled crude oil, with a weighting based on the respective volumes of upper and lower tier crude oil). By roughly equalizing crude oil acquisition costs for all refiners, the program fulfills one of its key objectives: Namely, preserving a competitive market for all refiners, regardless of their relative access to controlled domestic crude oil. Entitlement issuances to refiners characteristically deal with a crude oil feedstock fully processed into a range of finished products for sale in the marketplace.

However, certain facilities in the State of Alaska do not fit the characteristic pattern: These facilities process crude oil produced on Alaska's North Slope in order to obtain only a limited range of products and inject all of the remaining products or unfinished oils into the TAPS pipeline,

where they flow commingled with unprocessed crude oil. Several of these limited product facilities retain for sale or use only products dedicated for consumption at or near the remote locations where the facilities operate. One facility, a joint venture of two of the North Slope producing companies, is located at Prudhoe Bay; it processes crude oil which has not yet traversed the TAPS pipeline and is therefore eligible only for upper tier entitlements. Another plant at Fairbanks is independently owned but also makes a limited range of distillate-type material for local markets, with the remainder of its crude runs reinjected into the TAPS pipeline. Three other facilities are currently operational or planned at TAPS pipeline pumping stations south of the Brooks Range. These plants are operated by Alyeska, the TAPS pipeline service company, and make products solely for pipeline operational consumption. The net draw-off of crude oil by the facilities expected to report for entitlements purposes is less than 1.5 percent of current pipeline throughput. The unfinished oils and products injected into the TAPS pipeline and thus commingled with the crude oil in the pipeline are transported on to Valdez for tanker loading and ultimate sale to and processing by other refiners as crude oil, for which those refiners are issued entitlements.

The proper treatment of the Alaskan facilities described above involves two issues under the entitlements program:

- (a) Are the limited-product facilities "refineries" for purposes of the entitlements program?

The definition of a refinery currently found in 10 CFR 211.62 is as follows:

"Refinery" means an industrial plant, regardless of capacity, processing crude oil feedstock and manufacturing refined petroleum products, residual fuel oil or petrochemicals, and shall include a petrochemical plant.

Since the facilities in question process crude oil and manufacture at least some refined petroleum products, they are refineries under current regulations. Furthermore, such facilities located in the Lower 48 States have always been treated as refineries under the entitlements program. (Some of these limited-product facilities are sometimes referred to as "topping plants." However, nothing of significance turns upon the terminology applied. Such plants are in fact limited-product refineries and are "refineries" within the meaning of § 211.62.)

- (b) Should these limited product refineries receive entitlements for all of their crude oil runs to stills, as is typically the case with other refiners?

Alaska's limited-product refineries present the potential for a given volume of crude oil to earn entitlements

twice. Such a double-counting could arise if the initial refiner reported its total crude oil runs to stills for the calculation of entitlements issuances. From this total, however, a measurable and in some instances large volumes of unfinished oils or refined products would be returned to be commingled with Alaska North Slope ("ANS") crude oil in the TAPS pipeline and sold as crude oil after being transported to the lower 48 states. A refiner purchasing and processing the commingled stream, unless it had received the appropriate certification under § 212.131 as to the composition of the stream (which would create a difficult accounting burden upon sellers because of the necessity to trace or allocate the injected products and unfinished oils to particular purchasers), would then report the total volume of the commingled stream in its crude oil runs to stills, thus earning entitlements as to volumes for which the original refiner has already been issued entitlements. Such a double counting of entitlements would not be proper, and the purpose of the proposed amendment is to make clear the method by which this result is to be avoided.

## II. PROPOSED AMENDMENT

To avoid the possibility of erroneous duplicate entitlement issuances for the same oil, the ERA proposes an amendment which explicitly requires the subtraction from a refiner's crude oil runs to stills of any volumes of unfinished oils or refined products which are injected or reinjected into the TAPS pipeline and commingled with the crude oil in the line. For example, if a refiner processes 15,000 barrels of crude oil in a particular month to obtain a limited range of products and returns 10,000 barrels of unfinished oil or refined products to the pipeline, it would report only 5,000 barrels as crude oil runs to stills. This amendment would add a new subparagraph (8) to § 211.67(d).

## III. PROPOSED EFFECTIVE DATE

The ERA understands that those limited-product Alaskan refiners in question that now report under the entitlements program are in fact accounting for their crude oil runs to stills on a "net" basis, as proposed herein. Thus, adoption of the amendment proposed herein would expressly confirm the propriety of the existing practices of the refiners in question. The amendment is therefore proposed to be made effective upon adoption.

## IV. SPECIFIC COMMENTS REQUESTED

- (a) The proposed amendment would apply only to limited-product refineries as described in this notice that operate in the State of Alaska, because

## PROPOSED RULES

the ERA is not aware of any similar situation elsewhere in the United States. However, the ERA wants to know: (1) whether other similar facilities (i.e., facilities which retain only a limited amount of products and commingle the remaining unfinished oils or refined products with unprocessed crude oil) exist in other parts of the United States, (2) how any such additional limited-product refineries are reporting their crude oil runs to stills under the entitlements program, and (3) whether any such additional refineries should receive similar regulatory treatment.

(b) The ERA also specifically asks whether it is necessary and appropriate to include some or all of the limited-product refineries covered in this proposal in the entitlements program at all, given that these facilities typically produce and retain products for which there are only limited practical uses under the circumstances and given that, because of their geographic location, at least some of these refineries are not practically in competition with other refiners. The ERA wishes to assess whether these refineries should continue to be treated as refineries for purposes of the entitlements program, since the purpose of equalizing crude oil costs among refiners may not be pertinent in light of the fact that the production of at least some of these refineries is not practically in market-place competition with other refinery production.

(c) Finally, assuming that these refineries continue to be covered under the entitlements program, the ERA requests comments upon whether continued imported tier entitlements treatment for ANS crude oil refined in Alaskan refineries is appropriate, in view of the facts that the principal reason for affording such entitlements treatment to ANS oil was the high cost of transporting the oil to the Lower 48 States and that the cost of shipping oil to the refineries in question here is considerably less.

V. WRITTEN COMMENTS AND PUBLIC  
HEARING PROCEDURES

## a. WRITTEN COMMENTS

You are invited to participate in this rulemaking by submitting views, data, or arguments with respect to the proposal set forth in this notice. Comments should be submitted to the address indicated in the "Addresses" section of this notice and should be identified on the outside envelope with the designation "Amendment of Entitlements Program for Alaskan Refineries." Fifteen copies should be submitted. All comments received by March 9, 1978, and all relevant information will be considered by the ERA before final action is taken on the proposed amendment. All comments received by

the ERA will be available for public inspection in the DOE Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. We reserve the right to determine the confidential status of the information or data and to treat it according to our determination.

## b. PUBLIC HEARINGS

1. *Request procedure.* The times and places for the hearings are indicated in the "Hearings" section of this notice. If necessary to present all testimony, the hearings will be continued to 9:30 a.m. of the first business day following the dates therefor shown above.

Any person may make a written request for an opportunity to make an oral presentation at the hearings. You should be prepared to describe the interest concerned; if appropriate, to state why you are a proper representative of a group or class of persons that has such an interest; and to give a concise summary of the proposed oral presentation and a phone number where you may be contacted through the day before the hearing.

Each person selected to be heard will be so notified before 4:30 p.m., March 8, 1978, and must submit 50 copies of his or her statement before 4:30 p.m., March 15, 1978. Statements for the Washington hearing should be sent to Office of Regulations Management, Economic Regulatory Administration, Room 2214, 2000 M Street NW., Washington, D.C. 20461. Statements for the Anchorage hearing should be sent to the Department of Energy, Subregional Office G-11, Federal Office Building, 605 West 4th Avenue, Anchorage, Alaska 99501.

2. *Conduct of the hearings.* We reserve the right to select the persons to be heard at these hearings, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearings. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An ERA official will be designated to preside at each of the hearings. These will not be judicial or evidentiary-type hearings. Questions may be asked only by those conducting the hearings, and there will be no cross-examination of persons presenting statements. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were

PROPOSED RULES

made and will be subject to time limitations.

You may submit questions to be asked of any person making a statement at the hearings to the Office of Regulations Management at the above address before 4:30 p.m., March 9, 1978. You may also submit any questions, in writing, to the presiding officer at the time of the hearing. The ERA or the presiding officer, if the question is submitted at a hearing, will determine whether the question is relevant, and whether time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearings will be announced by the presiding officer.

Transcripts of the hearings will be made and the entire record of the hearings, including the transcripts, will be retained by the ERA and made available for inspection at the DOE Freedom of Information Office, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday. Any person may purchase copies of the transcripts from the reporters.

As required by section 7(a)(1) of the Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, a copy of this notice has been submitted to the Administrator of the Environmental Protection Agency for his comments concerning the impact of this proposal on the quality of the environment. The Administrator had no comments on this proposal.

NOTE.—The ERA has determined that this document does not contain a major proposal requiring preparation of an inflationary impact statement under Executive Order 11821 and OMB Circular A-107.

Pursuant to the requirements of section 404 of the Department of Energy Organization Act (Pub. L. 95-91), upon issuance this proposed rule will be referred to the Federal Energy Regulatory Commission for a determination of whether this proposed rule may significantly affect any function within the Commission's jurisdiction pursuant to section 402 (a)(1), (b), and (c)(1) of the Act. The Commission will have until March 9, 1978, the date the public comment period closes, to make this determination.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-332, Pub. L. 94-385, Pub. L. 95-70, and Pub. L. 95-91; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385 and Pub. L. 95-70; Department of Energy Organization Act, Pub. L. 95-91; E.O. 11790, 39 FR 23185; E.O. 12009, 42 FR 46267.)

In consideration of the foregoing, Part 211 of Chapter II, Title 10 of the

Code of Federal Regulations, is proposed to be amended as set forth below.

Issued in Washington, D.C., January 24, 1978.

DAVID J. BARDIN,  
Administrator, Economic  
Regulatory Administration.

Section 211.67 is amended in paragraph (d) to add a new subparagraph (8) to read as follows:

§ 211.67 Allocation of domestic crude oil.

(d) Adjustments to volume of crude oil runs to stills.

(8) The volume of crude oil runs to stills of a refinery as to any of its refineries located in the State of Alaska in a particular month, for purposes of the calculations in paragraph (a)(1) of this section and the calculations for the national domestic crude oil supply ratio, shall not include the number of barrels of unfinished oils or refined petroleum products injected or reinjected by that refinery into the Trans-Alaska Pipeline System in that month.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Extension of time for comments on NPRM.

SUMMARY: This extension of time to comment upon a Notice of Proposed Rule Making published December 12, 1977, in 42 FR 62398 is necessary to permit interested parties to provide information not previously known to the FAA.

DATES: The new deadline for comment is extended to February 10, 1978.

ADDRESSES: Federal Aviation Administration, Northwest Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket, Docket No. 77-NW-28-AD, 9010 East Marginal Way South, Seattle, Washington 98108.

FOR FURTHER INFORMATION, CONTACT:

Joseph M. Starkel, Airframe Section, ANW-212, Engineering and Manu-

facturing Branch, FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108, telephone 206-767-2516.

SUPPLEMENTARY INFORMATION: The Federal Aviation Administration issued a Notice of Proposed Rulemaking in the above referenced docket on December 2, 1977 (Published in 42 FR 62398 on December 12, 1977), which solicited comments on an inspection program of the emergency escape slide cool gas generator system, used on the Boeing 747 series airplanes.

In conjunction with comments received by FAA from the Air Transport Association, several airlines, The Boeing Co., and Rocket Research Corp., the manufacturer of the cartridge for the cool gas generator has indicated that it would like to provide information not previously available regarding the safety issue involved.

The comment period specified in the NPRM expired on January 13, 1978. The FAA has determined that comments from the manufacturer of the cartridge for the cool gas generator are essential to evaluate the safety issue involved.

DRAFTING INFORMATION

The principal authors of this document are Joseph M. Starkel, Engineering and Manufacturing Branch, FAA Northwest Region, and Jonathan Howe, Regional Counsel, Northwest Region.

EXTENSION OF COMMENT PERIOD

Accordingly, the deadline for comments on the NPRM in Docket No. 77-NW-28-AD is hereby extended to February 10, 1978.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.85.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A107.

Issued in Seattle, Wash., on January 20, 1978.

C. B. WALK, Jr.,  
Director, Northwest Region.

[Docket No. 78-SO-2]

DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Proposed Designation of Transition area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule will designate the Danville, Ky., transition area. An NDB approach procedure is being developed for Goodall Field, and additional controlled airspace is required for containment of IFR operation. This action will lower the base of controlled airspace from 1200 to 700 feet in the vicinity of Danville to accommodate aircraft executing the NDB approach procedure.

DATES: Comments must be received on or before March 7, 1978.

ADDRESS: Send comments on the proposal to: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320.

FOR FURTHER INFORMATION CONTACT:

Ronald T. Niklasson, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320, telephone 404-763-7646.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Federal Aviation Administration, attention: Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before March 7, 1978, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each public contact with FAA personnel concerned with this rulemaking will be filed in the public, regulatory docket.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling 202-426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory circular No. 11-2 which describes the application procedures.

PROPOSED RULES

THE PROPOSAL

The FAA is considering an amendment to subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate the Danville, Ky., transition area. This action will provide additional controlled airspace to accommodate aircraft performing IFR operations at Goodall Field.

DRAFTING INFORMATION

The principal authors of this document are Ronald T. Niklasson, Airspace and Procedures Branch, Air Traffic Division, and Eddie L. Thomas, Office of Regional Counsel.

THE PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by adding the following:

DANVILLE, KY.

That airspace extending upwards from 700 feet above the surface within a 7-mile radius of Goodall Field (Lat. 37°34'45" N., Long. 84°46'10" W.); within 3.5 miles each side of the 033° bearing from the Goodall RBN (Lat. 37°34'35" N., Long. 84°45'50" W.) extending from the 7-mile radius to 8.5 miles northeast of the RBN.

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in East Point, Ga., on January 20, 1978.

GEORGE R. LACAILLE,  
Acting Director, Southern Region.  
(FR Doc. 78-2462 Filed 1-27-78; 8:45 am)

[4910-13]

[14 CFR Part 73]

[Airspace Docket No. 77-EA-59]

RESTRICTED AREA

Proposed Alteration

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The FAA proposes to alter the time designation of Fort Indiantown Gap, Pa., Restricted Area R-5802. This proposal would extend the hours of utilization of R-5802 on Saturday to 2400 hours local time during the summer months only. This action would eliminate the necessity by the Army to issue NOTAMS each time

training requirements could not be completed within the authorized designated hours.

DATES: Comments must be received on or before March 1, 1978.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA, Eastern Region; Attention: Chief, Air Traffic Division, Docket No. 77-EA-59, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, N.Y. 11430. The official docket may be examined at the following location: FAA Office of the Chief Counsel, Rules Docket, (AGC-24), Room 916, 800 Independence Avenue SW., Washington, D.C. 20591. An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Mr. Lewis W. Still, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-8525.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, N.Y. 11430. All communications received on or before March 1, 1978, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling 202-426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Part 73 of the Federal Avi-

## PROPOSED RULES

ation Regulations (14 CFR Part 73) that would alter the time designation for utilization of Fort Indiantown Gap, Pa., Restricted Area R-5802. Time of designation of this restricted area is staggered throughout the year and includes 0800 to 2000 local time everyday from May 11 through August 31. This proposal would increase this time of designation on Saturdays, between May 11 and August 31, from 0800 to 2400 local time. During the summer of 1977, the Army was burdened with the requirement to issue NOTAMS to extend the time utilization of R-5802 as set forth in the rule in order to complete training. This action creates an additional communications workload for the Army airspace officer and for the involved FAA agencies. On the basis of this review, the FAA believes this action would relieve the Army of a NOTAM communications problem. Also, associated flight service stations would be relieved of an additional workload of dissemination and transmission of these time utilization extension NOTAMS. The NOTAM authorization presently permits the Army to extend the time designation of R-5802 whenever it is deemed necessary.

The current time of designation for Saturdays from May 11 through August 21 is 0800-2000 hours local. This action would extend the time designation to 2400 hours local time. NOTAMS must be issued at least 48 hours in advance.

## DRAFTING INFORMATION

The principal authors of this document are Mr. Lewis W. Still, Air Traffic Service, and Mr. Jack P. Zimmerman, Office of the Chief Counsel.

## THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 73.58 of Part 73 of the Federal Aviation Regulations (14 CFR Part 73) as republished (43 FR 703) to increase the time of designation of R-5802, Fort Indiantown Gap, Pa., as follows:

R-5802 FORT INDIANTOWN GAP, PA.

Time of designation. May 11 through August 31, 0800-2400 hours local time, Saturdays.

(Secs. 307(a), 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on January 20, 1978.

WILLIAM E. BROADWATER,  
Chief, Airspace and Air  
Traffic Rules Division.  
(FR Doc. 78-2463 Filed 1-27-78; 8:45 am)

[4910-13]

[14 CFR Part 139]

(Docket No. 13397; Reference Notice No. 73-31)

PART 139—CERTIFICATION AND OPERATIONS:  
LAND AIRPORTS SERVING CAB-CERTIFICATED AIR CARRIERS

Withdrawal of Proposal Requiring Safety Equipment To Be Listed and Described in Airport Operations Manuals

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Withdrawal of notice of proposed rulemaking.

SUMMARY: This is a withdrawal of a notice of proposed rulemaking in which the FAA invited comments on a proposed amendment to the Federal Aviation Regulations that would have required firefighting and rescue equipment and other safety equipment required for airport certification to be listed and described in airport operations manuals approved by the Administrator. This action is taken as a result of an analysis of comments received and is intended to avoid imposing an unnecessary administrative burden on airport management.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert J. Endres, Office of Airports Programs, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-3085.

SUPPLEMENTARY INFORMATION: Notice 73-31 was published in the FEDERAL REGISTER on December 21, 1973 (38 FR 35017). It proposed to amend Part 139 to require that firefighting and rescue equipment and other safety equipment required for certification be described and listed in each certificate holder's operations manual. Under the proposal equipment listed in this manner would have been eligible for Federal funding in accordance with the applicable statutes and the Federal Aviation Regulations related to airport aid programs.

In the comments received in response to Notice No. 73-31, the principal objection made was related to the requirement of listing safety equipment in airport operations manuals. This requirement was viewed as creating an unnecessary administrative burden. Also, the FAA has determined that the proposed amendment, as published, can cause confusion and that

the purpose for which it was intended can be served by setting forth lists of eligible items of safety equipment in advisory circulars or other documents associated with the Airport Aid Program.

In view of the foregoing, the FAA has determined that rule making action on the proposed amendment would not be appropriate at the present time and the Notice 73-31 should be withdrawn. However, withdrawal of this proposed amendment does not preclude the FAA from issuing similar notices in the future, nor does it commit the FAA to any course of action.

## DRAFTING INFORMATION

The principal authors of this document are Augustus A. Melton, Jr., Office of Airports Programs, and Howard A. Bartnick, Office of the Chief Counsel.

## WITHDRAWAL OF PROPOSED AMENDMENTS

Accordingly, the notice of proposed rule making published in the FEDERAL REGISTER (38 FR 35017) on December 21, 1973, and circulated as Notice NO. 73-31, entitled "Certification and Operations: Land Airports Serving CAB-Certificated Air Carriers" is hereby withdrawn by the Federal Aviation Administration.

(Sec. 313(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on January 19, 1978.

WILLIAM V. VITALE,  
Acting Assistant Administrator,  
Office of Airports Programs.

INTERSTATE COMMERCE  
COMMISSION

[49 CFR Part 1241]

(Docket No. 36557 (Sub-No. 1))

## REPORTING RAILROAD TRACK MAINTENANCE

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Informal Conference.

SUMMARY: The objective of this conference is to provide a forum for the exchange of views on the topics of deferred maintenance and betterment vs.

depreciation accounting for railroads. The Commission believes that clarification of the specific issues relating to these topics can be better obtained through participation of interested parties in an informal conference.

Docket No. 36557, Reporting Railroad Track maintenance, was served July 5, 1977 (June 20, 1977, 42 FR 32819). The revised response period expired September 15, 1977. Among the major issues to be addressed by the participants at this conference are the following: (1) Determining what information concerning railroad track maintenance is obtainable and relevant to the analysis of a railroad's track maintenance efforts, (2) developing an appropriate definition for deferred maintenance, (3) developing an appropriate methodology and format for quantification and disclosure of deferred maintenance by railroads, and (4) betterment vs. depreciation accounting for railroads.

DATES: The conference will be conducted by a Commission staff group beginning February 15, 1978, and will continue until all parties have been heard.

ADDRESSES: The conference will be held at the Interstate Commerce Commission, 12th Street and Constitution Avenue NW., Washington, D.C.

All parties interested in making a presentation must contact Ronald Young, Chief, Section of Accounting, Bureau of Accounts, at 202-275-7448, by January 31, 1978, advising him of their intention to present oral comments. All participants will receive a list of the names of all parties scheduled to speak containing the date and time of their presentation.

## PROPOSED RULES

All those scheduled to speak at the conference are requested to submit six copies of a position paper outlining their proposed oral comments to James B. Thomas, Jr., Director, Bureau of Accounts, 12th and Constitution Avenue NW., Washington, D.C. 20423, by February 8, 1978.

FOR FURTHER INFORMATION CONTACT:

Ronald Young, Chief, Section of Accounting, 12th and Constitution Avenue NW., Washington, D.C. 20423, phone 202-275-7448.

H. G. HOMME, Jr.,

## DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric  
Administration

[50 CFR Part 216]

## BOWHEAD WHALES

Withdrawal of Proposed Regulations Regarding Taking of Bowhead Whales by Indians, Aleuts, or Eskimos for Subsistence Purposes

AGENCY: National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Department of Commerce.

ACTION: Withdrawal of proposed rule.

SUMMARY: The National Marine Fisheries Service (NMFS) hereby withdraw the proposed regulations governing the subsistence harvest of bowhead whales published on November 25, 1977.

EFFECTIVE DATE: January 30, 1978.

FOR FURTHER INFORMATION CONTACT:

William P. Jensen, Marine Mammal Program Manager, Marine Mammal and Endangered Species Division, National Marine Fisheries Service, Washington, D.C. 20235, telephone 202-634-7461.

SUPPLEMENTARY INFORMATION: Under the authority of the Marine Mammal Protection Act (MMPA) the NMFS published proposed regulations (42 FR 60185, Friday, November 25, 1977) to govern the subsistence harvest of bowhead whales. These regulations were proposed to implement a research and conservation program developed by the United States and presented to a special meeting of the International Whaling Commission (IWC) in December 1977.

The United States sought IWC acceptance of a comprehensive research and conservation program which would provide for a controlled subsistence harvest. At the December 1977 meeting, the IWC amended its schedule to allow a limited native subsistence harvest of bowhead whales during 1978 and established a harvest quota for the Bering Sea bowhead whale stock of 18 whales struck or 12 landed.

In view of the foregoing events, the NMFS has determined that rulemaking based on the proposed regulations under the NMFA is not appropriate at the present time, and that the regulations proposed on November 25, 1977, should be withdrawn.

The NMFS, as a result of the recent IWC adoption of limited subsistence harvest, will propose regulations under the authority of the Whaling Convention Act to regulate the subsistence harvest of bowhead whales.

Dated: January 24, 1978.

WINFRED H. MEIBOHM,  
Associate Director, National  
Marine Fisheries Service.

(FR Doc. 78-2472 Filed 1-27-78; 8:45 am)

## notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

### DEPARTMENT OF AGRICULTURE

Farmers Home Administration  
(Designation No. A561)

#### ILLINOIS

##### Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in Johnson County, Ill., as a result of drought, April 15 through August 15, 1977.

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended, and the provisions of 7 CFR 1904, Subpart C, Exhibit D, Paragraph V B, including the recommendation of Gov. James R. Thompson that such designation be made.

Applications for emergency loans must be received by this Department no later than July 20, 1978, for physical losses and January 19, 1979, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C., this 20th day of January 1978.

GORDON CAVANAUGH,  
Administrator,  
Farmers Home Administration.  
(FR Doc. 78-2425 Filed 1-27-78; 8:45 am)

[3410-07]

(Designate No. A562)

#### KANSAS

##### Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in the following Kansas counties as a result of severe hailstorms, accompanied by high winds, October 31 and November 1, 1977: Coffey, Franklin, and Osage.

Therefore, the Secretary has designated these areas as eligible for emer-

gency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended, and the provisions of 7 CFR 1904, Subpart C, Exhibit D, Paragraph V B, including the recommendation of Gov. Robert F. Bennett that such designation be made.

Applications for emergency loans must be received by this Department no later than July 20, 1978, for physical losses and January 19, 1979, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C., this 20th day of January 1978.

GORDON CAVANAUGH,  
Administrator,  
Farmers Home Administration.

[3410-07]

(Designation No. A556)

#### MINNESOTA

##### Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in the following Minnesota counties as a result of a hailstorm and tornado July 14, 1977, and a hailstorm July 16, 1977, in Fillmore County; excessive rainfall ranging during periods from July 15 through October 21, 1977, in Koochiching, Lake of the Woods, Roseau, and St. Louis Counties; also a hailstorm and windstorm September 8, 1977, in Roseau County; and also a hailstorm July 15, 1977, in St. Louis County.

Therefore, the Secretary has designated these areas as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended, and the provisions of 7 CFR 1904, Subpart C, Exhibit D, Paragraph V B, including the recommendation of Gov. Rudy Perpich that such designation be made.

Applications for emergency loans must be received by this Department

no later than July 17, 1978, for physical losses and January 16, 1979, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C., this 20th day of January 1978.

#### Forest Service

##### PROPOSED LAND EXCHANGE, LAKE-Forest ENTERPRISES, INC., SUPERIOR NATIONAL FOREST

##### Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for a proposed land exchange with Lake-Forest Enterprises, Inc., in the Superior National Forest, USDA-FS-FES-(Adm)-76-08.

The environmental statement concerns a proposed land exchange between Lake-Forest Enterprises, a land agent for Erie Mining Co., and the United States.

## NOTICES

This final environmental statement was transmitted to EPA on January 20, 1978.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Building, room 3210, 12th Street and Independence Avenue, SW., Washington, D.C. 20013.

USDA, Forest Service, Eastern Region, 633 West Wisconsin Avenue, Milwaukee, Wis. 53203

USDA, Forest Service, Superior National Forest, Federal Building, Duluth, Minn. 55801

A limited number of single copies are available upon request to Forest Supervisor, Superior National Forest, Federal Building, Duluth, Minn. 55801.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

EINAR L. ROGET,  
Acting Deputy Chief.

[3410-16]

#### Soil Conservation Service

##### LOWER QUEEN CREEK WATERSHED, ARIZONA

##### Intent To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is being prepared for the Lower Queen Creek Watershed, Arizona.

The environmental assessment of this federally-assisted action indicates that the project may cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Thomas G. Rockenbaugh, State Conservationist, Soil Conservation Service, has determined that the preparation and review of an environmental impact statement is needed for this project.

The purpose of this project is to provide one hundred year frequency flood protection to people, livestock, farmland, and residential and other properties situated in the area frequently inundated by floodwaters from Queen Creek and Sonoqui Washes. Works of improvement will include conservation land treatment, a floodwater retarding dam, emergency spillway, and channel work.

A draft environmental impact statement will be prepared and circulated

for review by agencies and the public. The SCS invites participation of agencies and individuals with expertise or interest in the preparation of the draft environmental impact statement. The draft environmental impact statement will be developed by Mr. Thomas G. Rockenbaugh, State Conservationist, Soil Conservation Service, 3008 Federal Building, 230 North First Avenue, Phoenix, Ariz. 85025, FTS 261-6711.

No administrative action on implementation of the proposal will be taken until 30 days after the date of the publication.

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention Program, Pub. L. 83-566, 16 U.S.C. 1001-1008.)

Dated: January 18, 1978.

VICTOR H. BARRY, Jr.,  
Deputy Administrator  
for Programs.

[3410-16]

##### SOUTH BRANCH-PARK RIVER WATERSHED, CONNECTICUT

##### Intent To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is being prepared for the South Branch-Park River Watershed, Hartford County, Conn.

The environmental assessment of this Federally-assisted action indicates that the project may cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. John W. Tippie, State Conservationist, has determined that the preparation and review of an environmental impact statement is needed for this project.

The project concerns a plan for the purpose of completing the channel work as planned under the watershed protection and flood prevention work plan of 1961. This Pub. L. 566 project will carry a peak discharge equal to the August 8, 1955, event. The project objectives are reduction of floodwater and sediment damages in the city of Hartford and the towns of West Hartford and Newington. The planned works of improvement include 1.7 miles of channel in Trout Brook and on Asylum Branch, including approximately 1,500 feet of conduit, and 1.1 miles on Mill Brook and 0.7 mile on Piper Brook. The modification of six bridges is anticipated.

A draft environmental impact statement will be prepared and circulated for review by agencies and the public. The Soil Conservation Service invites participation of agencies and individuals with expertise or interest in the preparation of the draft environmental impact statement. The draft environmental impact statement will be developed by Mr. John W. Tippie, State Conservationist, Soil Conservation Service, Mansfield Professional Park, Storrs, Conn. 06268, telephone 203-429-9361.

### CIVIL AERONAUTICS BOARD

(Docket No. 24847)

#### TRANSAVIA HOLLAND B.V.

##### Reassignment of Proceeding

This proceeding, previously assigned to Administrative Law Judge Ralph L. Wiser, has been reassigned to Administrative Law Judge William A. Kane, Jr. Future communications should be addressed to Judge Kane.

Dated at Washington, D.C., January 24, 1978.

NAHUM LITT,  
Chief Administrative Law Judge.  
(FR Doc. 78-2487 Filed 1-27-78; 8:45 am)

[6320-01]

(Docket No. 28125; Order 78-1-106)

#### TRANSPORTES AEROS BENIANOS, S.A.

##### Statement of Tentative Findings and Conclusions and Order To Show Cause Regarding Permit Cancellation

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 24th day of January 1978.

Transportes Aereos Benianos, S.A. (TABSA), a Bolivian air carrier, holds a foreign air carrier permit<sup>1</sup> authorizing: (a) Foreign air transportation of property and mail between a point or points in Bolivia, the intermediate points Lima, Peru; Guayaquil, Ecuador; and Panama City, Panama; and the terminal point Miami, Fla.; and (b) the performance of off-route charter trips in foreign air transportation

<sup>1</sup>Order E-25697, approved September 18, 1967.

## NOTICES

under Part 212 of the Board's economic regulations.

The Board has been advised that the Government of Bolivia informed<sup>1</sup> the Department of State that TABSA's Bolivian operating permit has been canceled.<sup>2</sup>

By Order 75-7-142, adopted July 30, 1975, the Board directed all interested persons to show cause why TABSA's permit should not be canceled. Objections were filed, and no final order was issued at that time.

In view of the foregoing and all the facts of records, the Board tentatively finds and concludes:

1. That it is in the public interest to cancel the foreign air carrier permit held by TABSA; and

2. That Order 75-7-142 should be vacated.

Accordingly, it is ordered, That: 1. All interested persons are directed to show cause why the Board should not make final its tentative findings and conclusions, and why an order should not be issued which would, subject to the approval of the President, pursuant to section 801 of the Act, cancel the foreign air carrier permit held by Transportes Aereos Benianos, S.A., pursuant to Order E-25697;

2. Any interested person having objection to the issuance of an order making final the Board's tentative findings and conclusions and issuing the permit shall, within 21 days after the adoption of this order, file with the Board and serve upon the persons named in paragraph 5, a statement of objections specifying the part or parts of the tentative findings and conclusions objected to, together with a summary of testimony, statistical data, and such evidence expected to be relied upon in support of the statement of objections. If an evidentiary hearing is requested, the objector should state in detail why such hearing is considered necessary and what relevant and material facts he would expect to establish through such hearing which cannot be established in written pleadings;

3. If timely and properly supported objections are filed, further consideration will be given to the matters and issues raised by the objections before further action is taken by the Board; *Provided*, That the Board may proceed to enter an order in accordance with its tentative findings and conclusions if it is determined that there are no factual issues present that warrant the holding of an evidentiary hearing.<sup>4</sup>

<sup>1</sup>Diplomatic note from the Embassy of Bolivia, October 28, 1977.

<sup>2</sup>Bolivian Ministerial Resolution No. 1749.

<sup>3</sup>Since provision is made for the filing of objections to this order, petitions for reconsideration will not be entertained.

4. In the event no objections are filed, all further procedural steps will be deemed to have been waived, and the Board may proceed to enter an order in accordance with its tentative findings and conclusions; and

5. This order shall be served upon Transportes Aereos Benianos, S.A., and the Ambassador of Bolivia in Washington, D.C.

This order will be published in the FEDERAL REGISTER and will be transmitted to the President.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,  
Secretary.

## DEPARTMENT OF COMMERCE

## Bureau of Census

## CENSUS ADVISORY COMMITTEE ON THE ASIAN AND PACIFIC AMERICANS POPULATION FOR THE 1980 CENSUS

## Public Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C., Appendix I, 1976), notice is hereby given that the Census Advisory Committee on the Asian and Pacific Americans Population for the 1980 census will convene on February 24, 1978. The committee will meet in Room 2424, Federal Building 3, at the Bureau of the Census in Suitland, Md.

This committee was established in June 1976 to advise the Director,

\*All Members concurred.

Bureau of the Census, during the planning of the 1980 Census of Population and Housing on such elements as improving the accuracy of the population count, developing definitions and terminology for improved identification and classification of the Asian and Pacific Americans population, suggesting areas of research, recommending subject content, and tabulations of particular use to the Asian and Pacific Americans population, and expanding the dissemination of census results among present and potential users of census data in the Asian and Pacific Americans community.

This committee is composed of 21 members appointed by the Secretary of Commerce, and constitutes a broad spectrum of community leaders, scholars, and other appropriate persons.

The agenda for the meeting, which is scheduled to adjourn at 5 p.m., is: (1) Current status of 1980 census planning, (2) testing and selection aids, (3) public information plans for dress rehearsal, (4) affirmative action programs, (5) instructions for processing race and ethnic origin items, (6) data publication plans, (7) update on current surveys, (8) committee discussion, and (9) committee recommendations and plans for next meeting.

The meeting will be open to the public, and a brief period will be set aside for public comment and questions. Extensive questions or statements must be submitted in writing to the Committee Control Officer at least 3 days prior to the meeting.

Persons planning to attend and wishing additional information concerning this meeting should contact the Committee Control Officer, Mr. Clifton S. Jordan, Deputy Chief, Demographic Census Staff, Bureau of the Census, Room 3779, Federal Building 3, Suitland, Md., mailing address: Washington, D.C. 20233, telephone 301-763-5169.

Dated: January 24, 1978.

MANUEL D. PLOTKIN,  
Director,  
Bureau of Census.

## SURVEY OF RETAIL SALES, PURCHASES, AND INVENTORIES

## Determination

In accordance with Title 13, United States Code, sections 182, 224, and 225, and due notice of consideration having been published December 9, 1977 (42 FR 62176), I have determined that certain 1977 annual data for retail trade are needed to provide a sound statistical basis for the formation of policy by various governmental agencies, and that these data are also applicable to a

variety of public and business needs. This annual survey is a continuation of similar surveys conducted each year since 1951. It provides on a comparable classification basis, data covering 1976 and 1977 yearend inventories and 1977 annual sales and purchases. Additional data covering payroll and operating expenses, capital expenditures, and changes in depreciable assets are requested in the 1977 survey as supplemental data for the 1977 Census of Retail Trade. These data are not publicly available on a timely basis from nongovernmental or other governmental sources.

Reports will be required only from a selected sample of firms operating retail establishments in the United States, with probability of selection based on their sales size. The use of scientific sampling techniques will effectively serve to relieve respondent burden by not requiring this information to be reported for each establishment filing 1977 Census of Retail Trade reports. The sample will provide, with measurable reliability, statistics on the subjects specified above.

Report forms will be furnished to the firms covered by the survey and will be due 20 days after receipt. Copies of the forms are available on written request to the Director, Bureau of the Census, Washington, D.C. 20233.

I have, therefore, directed that an annual survey be conducted for the purpose of collecting these data.

Dated: January 24, 1978.

MANUEL D. PLOTKIN,  
Director,  
Bureau of the Census.

## Industry and Trade Administration

## ELECTRONIC INSTRUMENTATION TECHNICAL ADVISORY COMMITTEE

## Closed Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. App. I (1976 ed.)), notice is hereby given that a meeting of the Electronic Instrumentation Technical Advisory Committee will be held on Tuesday, February 21, 1978, at 9:30 a.m., in Room 3817, Main Commerce Building, 14th and Constitution Avenue NW., Washington, D.C. The meeting will continue February 22 in Room 6802, Main Commerce Building to its conclusion.

The Electronic Instrumentation Technical Advisory Committee was initially established on October 23, 1973. On October 7, 1975, and October 21, 1977, the Assistant Secretary for Administration approved the recharter and extension of the Commit-

tee pursuant to section 5(c)(1) of the Export Administrative Act of 1969, as amended, 50 U.S.C. App. 2404(c)(1) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration with respect to questions involving: (A) Technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which may affect the level of export controls applicable to electronic instrumentation, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls.

The Committee will meet only in executive session to discuss matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

Written statements may be submitted at any time before or after the meeting.

The Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the general counsel, formally determined on October 21, 1977, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409 that the mat-

ters to be discussed in the executive session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the executive session will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by an Executive order to be kept secret in the interests of the national defense or foreign policy. All materials to be reviewed and discussed by the Committee during the meeting have been properly classified under Executive Order 11652. All Committee members have appropriate security clearances.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Industry and Trade Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202-377-4196.

The complete notice of determination to close meetings or portions thereof of the series of meetings of the Electronic Instrumentation Technical Advisory Committee and of any subcommittees thereof was published in the FEDERAL REGISTER on October 28, 1977 (42 FR 56767).

## NOTICES

Dated: January 25, 1978.

RAUER H. MEYER,  
Director, Office of Export Administration,  
Bureau of Trade Regulation, U.S. Department of Commerce.

## SEMICONDUCTOR TECHNICAL ADVISORY COMMITTEE

## Closed Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (1976 ed.), notice is hereby given that a meeting of the Semiconductor Technical Advisory Committee will be held on Wednesday, February 22, 1978, at 9:30 a.m., in Room 1851, Main Commerce Building, 14th and Constitution Avenue NW., Washington, D.C.

The Semiconductor Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, and January 13, 1977, the Assistant Secretary for Administration, approved the recharter and extension of the Committee, pursuant to section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App., sec. 2404(c)(1), and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration with respect to questions involving: (A) Technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to semiconductor products, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls.

The Committee will meet only in executive session to discuss matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

Written statements may be submitted at any time before or after the meeting.

The Acting Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the general counsel, formally determined on January 27, 1977, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409 that the matters to be discussed in the executive session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meet-

Maritime Administration

LYKES BROS. STEAMSHIP CO., INC.

Application for 20-Year Operating-Differential Subsidy Agreement; Correction

In FR Doc. 78-147, appearing in the FEDERAL REGISTER on January 6, 1978 (43 FR 1116) notice was given that with respect to the application of Lykes Bros. Steamship Co., Inc. (Lykes), for a 20-year operating-differential subsidy agreement, the Maritime Subsidy Board had decided to extend an opportunity for interested parties to present their views on the section 601(a)(4) aspects of Lykes' application, such comments to be considered separately from any consideration of the section 605(c) issues under Docket No. S-451.

Written comments were invited for filing by February 3, 1978, with the Secretary, Maritime Subsidy Board, Room 3099-B, Department of Commerce Building, 14th and E Streets NW., Washington, D.C. 20230. Replies to submitted comments were requested by close of business on March 6, 1978.

Upon request made and good cause shown by Lykes, the date for submission of comments is hereby extended

to close of business on March 17, 1978. Any reply to submitted comments shall be filed by close of business on April 14, 1978.

Dated: January 24, 1978.

By order of the Maritime Subsidy Board/Maritime Administration.

ROBERT J. PATTON, JR.,  
Assistant Secretary.

NEW ENGLAND FISHERY MANAGEMENT COUNCIL

Public Meeting

This is a public announcement of a meeting of the Standing Regulatory Measures Committees of four Regional Fishery Management Councils, established under section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265). The councils concerned are the New England, Mid-Atlantic, South Atlantic, and Caribbean Fishery Management Councils.

The meeting will be from 1 p.m.-5 p.m. on February 18, 1978, and from 8:30 a.m.-noon, on February 17, 1978, at the Howard Johnson's Motor Lodge, 2646 Jefferson Davis Highway, Crystal City, Arlington, Va. 22202, telephone 703-684-7200.

**Proposed agenda.** (1) Common needs for regulation of Atlantic coast marine fisheries; (2) common logbook and catch reporting systems; (3) common license systems; (4) reciprocal interstate enforcement agreements; and (5) other business.

The meeting is open to the public. For more information on seating, changes to the agenda, and/or written comments, contact Mr. Spencer Apollonio, Executive Director, New England Fishery Management Council, Peabody Office Building, 1 Newbury Street, Peabody, Mass. 01960, telephone 617-535-5450.

Dated: January 25, 1978.

FUEL OIL MARKETING ADVISORY COMMITTEE SUBCOMMITTEE

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub.

L. 92-463, 86 Stat. 770), and the FEDERAL REGISTER notice of 43 FR 2917, January 20, 1978, notice is hereby given that the Middle Distillate Monitoring Subcommittee of the Fuel Oil Marketing Advisory Committee will meet in Washington, D.C. at 10:00 a.m., on February 15, 1978. The meeting will be held in Room 2105, 2000 M Street NW., Washington, D.C.

The purpose of this initial meeting will be to address the process by which the Subcommittee will inquire into the reasons for differences in the trends of heating oil marketing costs. The Subcommittee will make recommendations on the development of guidelines for judging the reasonableness of the margins observed in the current heating season.

The agenda for the meeting is as follows:

1. Introductory Remarks and Overview of Procedures;
2. Introduction of Subcommittee Members and Mediator;
3. Establishment of Subcommittee Procedures and Schedules;
4. Discussion of Preliminary Middle Distillate Data;
5. Review of Preliminary Benchmark Calculations; and
6. Remarks From the Floor (10 Minute Rule).

Consideration will be given to the views of each Subcommittee member with regard to the appropriate cost elements to be considered in reviewing the heating oil market performance. Subsequent Subcommittee meetings will be conducted on or about the 15th of each successive month following February until June, with appropriate notice published in the FEDERAL REGISTER.

The meeting is open to the public. The Chairman of the Subcommittee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Subcommittee will be permitted to do so, either before or after the meetings. Members of the public who wish to make oral statements should inform Georgia Hildreth, Advisory Committee Management Office 202-566-9996 and reasonable provision will be made for their appearance on the agenda.

The transcripts of the meetings will be available for public review and copying at the Freedom of Information Public Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Any person may purchase a copy of the transcript from the reporter.

NOTICES

Issued at Washington, D.C. on January 25, 1978.

Federal Energy Regulatory Commission

[Docket No. R177-115]

ART MACHIN & ASSOCIATES, INC.

Order Granting Special Relief and Permitting Intervention

JANUARY 20, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "savings provisions" of section 705(b) of the DOE Act provide that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of these proceedings were specifically transferred to the FERC by section 402(d)(1) of the DOE Act.

The joint regulation adopted on October 1, 1977, by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR —, provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above mentioned authorities.

On July 18, 1977, as supplemented on August 19, 1977, Art Machin & Associates, Inc. (Machin), filed a petition for special relief pursuant to section 2.76 of the Commission's General Policy and Interpretations for the sale of natural gas to United Gas Pipe Line Co. (United) from the G. A. Kelly No. 1 Well, Willow Springs Field, Gregg County, Tex.<sup>1</sup> Subsequently, on October 31, 1977, Machin filed an amended petition for special relief.

Machin's sale of gas to United is being made pursuant to a small pro-

ducer certificate granted in Docket No. CS71-1133 on October 12, 1971, and under a contract dated June 10, 1968, which provides for the current rate of 41 cents per Mcf. Machin proposes to re-perforate and re-acidize the existing zones at a cost of \$30,000. Machin states that this expenditure will enhance production and prevent a premature abandonment. Consequently, Machin requests that the Commission authorize it to collect a total rate of 69.18 cents per Mcf at 14.73 psia for the sale.

Notice of Machin's petitions for special relief was issued on September 8, 1977, and on November 11, 1977, notice of Machin's amended petition for special relief was issued. United filed a timely petition to intervene, stating that it would support any price that the Commission determines to be just and reasonable.

Based on data submitted by Machin, an estimated additional 571,474 Mcf of gas and 7,714 Bbls. of liquids will be recovered over the remaining 12 year producing life. Machin has a net book investment of \$77,000 and will incur an estimated \$106,575 in operating costs over the remaining producing life.

Using the above costs and reserves in a traditional costing methodology, and allocating costs between gas and liquids by the modified Btu method, Staff estimates that a total rate of 69.18 cents per Mcf at 14.73 psia would allow Machin to recover all costs associated with the productive gas portion of this well plus a 15 percent rate of return,<sup>2</sup> and concludes that the requested rate is cost supported.

Upon consideration of the data submitted and Staff's analysis thereof, we conclude that it is in the public interest to grant special relief to Machin.

The Commission orders: (A) Machin's petition for special relief, as amended, is hereby granted.

(B) Machin is authorized to collect a total rate of 69.19 cents per Mcf at 14.73 psia for the sale of natural gas to United from G. A. Kelly No. 1 Well, Willow Springs Field, Gregg County, Tex., effective on the date of issuance of this order or on the date of completion of the proposed work, whichever is later. This authorization is contingent upon Machin's filing within 30 days of the effective date set forth above a statement signed by United that the proposed work has been performed to United's satisfaction.

(C) The special rate authorized in Ordering Paragraph (B) shall not become effective as provided therein unless Machin files within 30 days of the issuance of this order a contractual amendment authorizing the rate granted herein and an appropriate rate change filing in accordance with § 154.94 of the Commission's Regulations (18 CFR 154.94).

(D) United is permitted to intervene in the above-entitled proceeding subject to the rules and regulations of the Commission; *Provided, however*, That participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene; and *Provided, further*, That the admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order of the Commission entered in this proceeding and that such intervenor agrees to accept the record as it now stands.

By the Commission.

LOIS D. CASHELL,  
Acting Secretary.

[6740-02]

[Docket No. RI77-108]

## MARINE CONTRACTORS AND SUPPLY, INC.

## Order Granting Special Relief and Permitting Intervention

JANUARY 20, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "savings provisions" of section 705(b) of the DOE Act provide that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been acted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of these proceedings were specifically transferred to the FERC by section 402(a)(1) of the DOE Act.

The joint regulation adopted on October 1, 1977 by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR —, provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above mentioned authorities.

On June 17, 1977, as amended on August 4, 1977, Marine Contractors and Supply, Inc. (Marine) filed a petition for special relief pursuant to § 2.76 of the Commission's General Policy and Interpretations for the sale of natural gas to Transcontinental Gas Pipe Line Corp. (Transco) from the CRA/SUA Montgomery No. 1 Well, Lucy Field, St. Charles Parish, La.

Marine's sale of gas to Transco is being made under a contract dated August 22, 1957, pursuant to a small producer certificate granted in Docket No. CS76-414 on March 1, 1976. Marine is currently receiving 85 cents per Mcf for the subject gas pursuant to a Commission order granting special relief issued September 20, 1976 in Docket No. RI76-131. Marine states that it is necessary to undertake extensive rebuilding of the access road to

this facility and major tank repairs. These projects are estimated to cost \$51,230 and \$8,580, respectively. Also, a sand infiltration problem associated with the well will require annual expenditures of \$47,550. Furthermore, Marine states that a rework project estimated to cost \$128,000 in its previous special relief application, filed in Docket No. RI76-131, actually cost \$210,000. Marine requests that the Commission authorize it to collect a total rate of \$1.51 per Mcf for the sale. In a letter to Marine dated June 10, 1977, Transco agreed to amend the subject gas purchase contract to provide for a price of \$1.62 per Mcf or such lesser price which the Commission may approve.

Notice of Marine's petition for special relief was issued on June 29, 1977 and on September 20, 1977, notice of Marine's amended petition for special relief was issued. Transco filed a timely petition to intervene.

Based on data submitted by Marine, Staff accepts as reasonable Marine's estimated costs of \$51,230 for road repair and \$8,580 for tank repair. Staff has computed Marine's remaining net book value at \$226,718 for lease and equipment. Staff estimates no salvage value for equipment due to the length of the project and the nature of the proposed work. Marine expects to spend \$43,987 initially in annual well operating expense, which includes pump operating costs plus \$47,550 annually for sand treatment. Based on these costs and allowing for 5 percent annual inflation for well operating expenses over the first five years of this project, Staff estimates total operating expenses of \$688,160 for the seven year operating life of this project. Staff also accepts as reasonable Marine's reserve estimate of 775,559 Mcf of gas attributable to its 87.50 percent net working interest.

Using the above costs and reserves in a traditional costing methodology, Staff estimates that a total rate of \$1.51 per Mcf would allow Marine to recoup all costs associated with the project and earn a 15 percent rate of return.<sup>1</sup>

Upon consideration of the data submitted and Staff's analysis thereof, we conclude that it is in the public interest to grant special relief to Marine.

The Commission orders: (A) Marine's petition for special relief, as amended, is hereby granted.

(B) Marine is authorized to collect a total rate of \$1.51 per Mcf for gas sold to Transco from the CRA/SUA Montgomery No. 1 Well, Lucy Field, St. Charles Parish, La., effective on the date of issuance of this order or on the date of completion of the proposed work, whichever is later. This authori-

NOTICES

[6740-02]

Federal Energy Regulatory Commission  
(Docket No. CP73-184 and Docket No. CI73-485)

COLORADO INTERSTATE GAS CO. AND CIG  
EXPLORATION, INC.

Informal Conference

JANUARY 19, 1978.

Take notice that on January 31, 1978, at 3:30 p.m., an informal conference will be convened of all interested persons including representatives of the applicant and Commission staff, for the purpose of explaining and clarifying issues raised in the joint petition of Colorado Interstate Gas Co. and CIG Exploration, Inc., to amend order. The conference will be held in Room 8402, at the office of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C.

Customers and other interested persons will be permitted to attend, but if such persons have not previously been permitted to intervene by order of the Commission, attendance will not be deemed to authorize intervention as a party in this proceeding.

KENNETH F. PLUMB,  
Secretary.

[FR Doc. 78-2412 Filed 1-27-78; 8:45 am]

[6740-02]

(Docket No. CP78-1541)

COLUMBIA GULF TRANSMISSION CO.

Application

JANUARY 24, 1978.

Take notice that on January 12, 1978, Columbia Gulf Transmission Co. (applicant), P.O. Box 683, Houston, Tex. 77001, filed in Docket No. CP78-154 an application pursuant to section 7(c) of the Natural Gas Act and § 157.7(b) and 157.7(g) of the regulations thereunder (18 CFR 157.7(b) and 157.7(g)) for a certificate of public convenience and necessity authorizing the construction during the 12-month period commencing January 1, 1978, and operation of facilities to enable applicant to take into its certificated main pipeline system natural gas which would be purchased from producers or other similar sellers thereof, and authorizing the construction and for permission and approval to abandon for the same period and operation of new or additional field compression and related metering and appurtenant facilities, all as more fully set forth in the application on file with the Commission and open for public inspection.

The stated purpose of this budget type application is to augment applicant's ability to act with reasonable

dispatch in the construction of gas-purchase facilities to enable applicant to connect its system with the facilities of an independent producer or other similar seller, authorized by the Commission to make a sale of gas to applicant for resale in interstate commerce, or the system of another natural gas company authorized to transport gas for the account of or for the exchange of gas with applicant and to augment applicant's ability to act with reasonable dispatch in the construction, relocation, and operation and abandonment of facilities which will not result in changing applicant's system-salable capacity or service from that authorized prior to the filing of the instant application.

Applicant states that the total cost of the proposed gas-purchase facilities would not exceed \$12 million with no single offshore project expenditure to exceed \$2.5 million and no single onshore project to exceed \$1.5 million and that the total cost of its proposed construction, relocation, removal, or abandonment of field compression facilities will not exceed \$3 million with no single project to exceed \$500,000. Applicant states that these costs would be financed from internally generated funds.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 15, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.70). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion be-

lieves that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

LOIS D. CASHELL,  
Acting Secretary.

[FR Doc. 78-2415 Filed 1-27-78; 8:45 am]

[6740-02]

(Docket No. EL78-41)

FLORIDA CITIES v. FLORIDA POWER & LIGHT  
CO.

Order Instituting Investigation and Designating  
Officers

JANUARY 24, 1978.

On October 14, 1977, Florida Power & Light Co. (F.P. & L.) tendered for filing with the Commission in Docket No. ER78-19, proposed changes in sheet Nos. 5 through 10 of its FERC electric tariff, original volume No. 1, applicable to its various municipal and rural electric sales-for-resale customers.<sup>1</sup> Public notice of the filing was issued on October 20, 1977, with comments, protests, and petitions to intervene due to be filed with the Commission on or before November 7, 1977.

On November 7, 1977, the city of Homestead, the Fort Pierce Utilities Authority, the city of Starke and the Utilities Commission of New Smyrna Beach (hereinafter collectively referred to as "Florida cities"), all situated within the State of Florida, filed a petition to intervene, protest, motion to reject, or in the alternative, request for 5 months suspension, expedited hearing and investigation, and documents request and consolidation. Florida cities allege, inter alia, that the existing SR-1 tariff (which F.P. & L. proposes to supersede by the instant filing), which makes wholesale power service available in all territories served by F.P. & L. without restriction, has been violated. Florida cities aver that F.P. & L. continually refuses to sell wholesale power service to Fort Pierce under the SR-1 tariff, despite repeated requests for such power. Consequently, Florida cities request an investigation by the Commission of this issue, and if the Commission deems it appropriate, a reference to the appropriate enforcement agencies for violation of the tariff and the Federal Power Act.

In addition, Florida Cities allege, inter alia, that the proposed SR-2 tariff filing would limit wholesales service to a limited class of customers and exclude service availability to municipal

<sup>1</sup>This filing is designated as rate schedule SR-2.

ities in Florida who have adequate generation, but desire to purchase firm power service for their economic benefit. The allegations relating to SR-2 will be investigated within the context of the ratemaking proceedings in Docket No. ER 78-19.<sup>2</sup>

Specifically, Florida Cities' petition to intervene sets forth the following allegations, inter alia, with respect to the issue of F.P. & L.'s alleged refusal to sell wholesale power to Fort Pierce:

(1) That the utilities authority of Fort Pierce has, since 1976, repeatedly requested the opportunity to purchase wholesale power from F.P. & L. Despite the clear commands of F.P. & L.'s existing tariff, their request has been denied. For example, by letter of September 12, 1977, F.P. & L. stated to the Fort Pierce Director of Utilities that:

In regard to your comment that it was the consensus of you and your associates that my position on SR-1 amounted to a refusal, I would prefer to stand on the statement that I actually made during the meeting and that is in view of actual and potential restrictions on our generation capability we are reluctant at this time to extend the obligations for utility type service over and beyond those which we have hitherto undertaken;

(2) That Fort Pierce reiterated its request after September 12, 1977; and,

(3) That F.P. & L. has not agreed to sell wholesale power.

On December 1, 1977, F.P. & L. answered Florida Cities' petition to intervene. In response, F.P. & L. recognized that Homestead, New Smyrna Beach and Starke were interested parties. However, F.P. & L. asserted that Fort Pierce is not now, nor has it ever been, a sales-for-resale customer of F.P. & L. and, therefore, has not shown that it is an interested party to the case and F.P. & L. opposes its intervention. In addition, F.P. & L. denied that it has attempted to exclude municipally owned utilities in its service area from access to wholesale power and to limit those municipalities which can qualify for wholesale power purchases under the tariff from generation coordination.

F.P. & L.'s so-called SR tariff was tendered for filing with the Federal Power Commission (FPC) on January 29, 1973. This represented the first tariff-type filing ever made by F.P. & L. and was designed to supersede the contract-type filings of the past. Under the tariff F.P. & L. grouped all

<sup>2</sup>Pursuant to Commission order issued December 30, 1977, in Docket Nos. ER 78-19 and ER 78-81, the issues raised by Florida Cities' petition which relate to alleged restrictive availability provisions of the PR and SR-2 tariff, the proposed termination of service to Homestead, inter alia, will be investigated in the context of the on going consolidated proceedings in Docket Nos. ER 78-19 and ER 78-81.

NOTICES

3931

wholesale customers, consisting of rural electric cooperatives and municipal customers, together. The rate changes reflected in the tariff were requested to become effective on April 1, 1973, for customers whose contracts had lapsed by that date, and with respect to others, as their respective contracts expired.

By order of March 29, 1973, in Docket No. E-8008, the Commission accepted F.P. & L.'s tariff for filing, suspended the rates reflected therein for 5 months until September 1, 1973, at which time they became effective subject to refund and granted intervention.

Thereafter, F.P. & L.'s SR tariff was superseded by the SR-1 tariff which became effective April 1, 1976.

Original sheet No. 5 of the SR-1 tariff which became effective on April 1, 1976, and which is on file with this Commission provides in pertinent part:

SALE FOR RESALE RATE SCHEDULE SR-1

Available: In all territory served by the company.

Application: To electric service supplied to a municipal electric utility or to a cooperative non-profit membership corporation organized under the provisions of the rural electric cooperative law for their own use or for resale.

Limitation of service: Neither the company nor the customer, unless ordered to do so by a properly constituted authority, shall distribute or furnish electric power and energy to a customer of the other. No power and energy sold hereunder shall be resold at wholesale for use outside the State of Florida. Standby or emergency service is not permitted hereunder.

The Florida Cities' allegations and the answer by F.P. & L. raise legal and factual questions which in our view would be most expeditiously handled through the initiation of an investigation pursuant to section 307 of the Federal Power Act. In addition, we perceive that this investigation will be enhanced by the delegation of authority to the investigative Staff so as to permit access to witnesses and records necessary for the progress of the investigation. The following issues are to be investigated:

(1) Has F.P. & L. refused to serve the Fort Pierce Utilities Authority;

(2) If so, was the refusal a violation of the filed SR-1 tariff and the applicable provisions of the Federal Power Act; and

(3) If F.P. & L. has unlawfully refused to serve the Fort Pierce Utilities Authority, what sanction, if any, is justified under the Federal Power Act.

In light of the nature of the allegations, the Commission deems it appropriate

<sup>1</sup>F.P. & L., FERC electric tariff, original volume No. 1, original sheet No. 5.

to advise the parties involved, that if a violation of the Federal Power Act has occurred and that the alleged acts or omissions may fall within the sanctions set forth in sections 314 and 316 of the Federal Power Act, or the Commission's rules, regulations, conditions, restrictions, or orders, the Commission will pursue all available civil and criminal sanctions should it be found that the nature of the violation and the surrounding circumstances therefore warrant such action.

Moreover, the seriousness of the allegations, as well as the need for an expeditious determination of the issues dictates that this investigative proceeding be conducted separate and apart from the proceedings in Docket No. ER 78-19.

The Commission finds: (1) It is necessary and appropriate in the proper exercise of the Commission's responsibilities under the Federal Power Act that an investigation be initiated pursuant to section 307 of the Federal Power Act for the purpose of investigating the issues as set forth above. The staff is instructed to report back to the Commission on the basis of appropriate action to be undertaken at the conclusion of the investigation.

(2) This investigation will be enhanced by the delegation of authority to the investigative Staff to permit access to witnesses and records necessary for progress of the investigation.

The Commission orders: (A) Pursuant to the authority of the Federal Power Act, particularly sections 205, 206, 301, 307, 309, 314, and 316 thereof and the Commission's rules of practice and procedure, an investigation is hereby instituted for the purpose of the investigation of the issues as set forth above in this docket.

(B) Bernard Cromes and Sheila Hollis are hereby designated as officers of this Commission under section 307(b) of the Federal Power Act for the purposes of the investigation in this docket and are hereby empowered to perform, any and all of the powers specifically set forth in that section of the Act during the course of this investigation.

(C) Any person desiring to be heard or to make any protest with reference to the matters presented in this proceeding, should, on or before January 31, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petition to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to participate as a party in any hearing herein must file

3932

petitions to intervene in accordance with the Commission's rules.

(D) The Secretary shall cause prompt publication of this order to be made in the *FEDERAL REGISTER*.

(E) Said officers designated in paragraph (B) above shall submit findings and recommendations to this Commission on or before April 7, 1978.

By the Commission.

KENNETH F. PLUMB,  
Secretary.

[6740-02]

[Docket No. ER76-83]

OHIO POWER CO.

Proposed Settlement Agreement

JANUARY 24, 1978.

Take notice that Ohio Power Co. (OPCo) tendered for filing on January 5, 1978, agreements of settlement and compromise (agreements) between OPCo and 13 of its municipal customers (Municipals).

OPCo indicates that all of the agreements which are identical except for the Municipal signatory, provide for the following changes in OPCo's FPC (FERC) tariff MRS:

(1) The inclusion of an additional new subsection dealing with mutually agreed upon procedures for the curtailment of power and energy deliveries to Municipals in the event there were to be a shortage of capacity and/or electric energy requiring OPCo to curtail power and energy deliveries to its own customers;

(2) A reduction in the demand charge, without change in the originally stated energy charge; and

(3) The reduction in the demand charge has the effect of reducing, for the twelve (12) month period ending June 30, 1975 (period I), the proposed increase of revenues from the approximately \$911,024 for which the filing was made in Docket No. ER76-83 to a level of approximately \$680,984.

Any person desiring to be heard or to protest said filing should file comments or protests with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such comments or protests should be filed on or before February 10, 1978. Comments and protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing

[Docket No. ER76-17]

OHIO POWER CO.

Proposed Settlement Agreement

JANUARY 24, 1978.

Take notice that Ohio Power Co. (OPCo) on January 5, 1978, tendered for filing an agreement of settlement and compromise (agreement) between OPCo and Wheeling Electric Co.

OPCo indicates that the agreement provides for the following changes in OPCo's FPC Rate Schedule No. 18:

(1) The inclusion of an additional new subsection dealing with mutually agreed upon procedures for the curtailment of power and energy deliveries to Wheeling in the event there were to be a shortage of capacity and/or electric energy requiring OPCo to curtail power and energy deliveries to its own customers;

(2) A reduction in the demand charge without change in the originally stated energy charge; and

(3) The reduction in the demand charge has the effect of reducing, for the twelve (12) month period ending December 31, 1975 (period II), the proposed increases of revenues from the approximately \$6,228,660 for which the filing was made in Docket No. ER76-17 to a level of approximately \$4,556,110.

Any person desiring to be heard or to protest said filing should file comments or protests with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such comments or protests should be filed on or before February 10, 1978. Comments and protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

FEDERAL REGISTER, VOL. 43, NO. 20—MONDAY, JANUARY 30, 1978

[6740-02]

[Docket No. C168-815]

PHILLIPS PETROLEUM CO.

Extension of Time

JANUARY 13, 1978.

On January 10, 1978, Phillips Petroleum Co. filed a motion to extend the date set for the prehearing conference in the above-referenced proceeding, as established by Commission order issued December 16, 1977. The motion states that counsel for United Gas Pipe Line Co. does not object to the requested extension.

Upon consideration, notice is hereby given that the date for the prehearing conference in this proceeding is changed to February 9, 1978, at 10 a.m., e.s.t. The conference will be held in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426.

[6740-02]

[Docket No. RP77-136-1]

SOUTHERN NATURAL GAS CO.

Order Denying Rehearing and Granting Clarification

JANUARY 23, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977), and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "savings provisions" of section 705(b) of the DOE Act provide that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of these proceedings were specifically transferred to the FERC by section 402(a)(1) of the DOE Act.

The joint regulation adopted on October 1, 1977, by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and

the FERC," 10 CFR —, provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above mentioned authorities.

By our November 29, 1977, order in the subject docket, we denied a petition of Southern Natural Gas Co. (Southern), which petition sought advance authorization to recover the costs of a proposed emergency storage service arrangement. By petition filed on December 22, 1977, Southern seeks clarification and rehearing of our November 29 order.

After review of Southern's petition for rehearing, we find that it fails to state grounds sufficient to warrant a grant of rehearing. Accordingly, we shall deny the petition.

Southern's request for clarification asserts that uncertainty remains with respect to the question whether § 2.68 may be used to accomplish steps taken in anticipation and avoidance of an emergency prior to the outset of the emergency. Our response is that § 2.68 may be used to accomplish steps taken in anticipation and avoidance of an emergency. Although this conclusion is not specified in the text of § 2.68 itself, it is implied by the language used in Order No. 402 in promulgating § 2.68. Therein the Federal Power Commission adopted a policy to facilitate responses to requests made of non-jurisdictional distribution and pipeline companies for temporary assistance by jurisdictional concerns which are confronted with emergency gas supply situations. Specifically, it was declared that the exempt status of nonjurisdictional concerns would not be jeopardized by their short-term sale or transportation of gas in interstate commerce. In issuing our November 29 order, we interpreted § 2.68 as authorizing the conduct of emergency transactions for the purpose of augmenting storage capability in order to meet the requirements of a jurisdictional concern in a forthcoming heating season. The enlargement of storage capability being an anticipatory undertaking, it is clearly our view that preventative as well as curative steps may be taken in accordance with the policy of § 2.68.

The Commission orders: (A) Southern's petition for rehearing is denied. (B) Southern's request for clarification is granted to the extent discussed herein. (C) The Secretary shall cause prompt publication of this order in the *FEDERAL REGISTER*.

By the Commission.

LOIS D. CASHELL,  
Acting Secretary.

## NOTICES

[6740-02]

[Docket No. RP78-32]

TEXAS EASTERN TRANSMISSION CORP.

Order Instituting Investigation

JANUARY 20, 1978.

The Commission has determined that an investigation should be commenced and an investigatory proceeding should be conducted before the Commission and its duly appointed hearing officers to examine the questions raised by the telegram of Texas Eastern Transmission Corp. (Tetco), filed January 20, 1978, requesting Commission approval of Tetco's recovery of costs which would be incurred in the purchase and transportation of gas pursuant to emergency procedures set forth in the Commission's statement of general policy and interpretations and regulations under the Natural Gas Act.

In its filing, Tetco states that it proposes to commence purchasing 200,000 Mcf per day at a price of \$2.25 per Mcf for a 60-day period from Houston Pipeline Co. in order to alleviate projected curtailments in category 1 of 7.25 percent in January and 2.75 percent in February. The point of delivery of the emergency gas has not yet been specified; however, it is indicated that delivery will commence immediately upon receipt of Commission approval.

Tetco did not specify the appropriate regulation under which the emergency procedure would be instituted but it requests that the Commission permit "the recovery of costs incurred in the purchase and transportation . . . of this gas through the PGA provisions." It appears that the proposed transaction would be consummated either under § 2.68 of the Commission's statement of general policy and interpretations or § 157.22 of the regulations under the Natural Gas Act.

The Commission has concluded that a public investigatory proceeding shall be held to investigate the nature of the reported emergency, the underlying causes and questions of fact raised by Tetco's proposal to alleviate that emergency. We herein authorize the Secretary or person designated by him to issue subpoenas as provided in ordering paragraph (C).

The Commission finds: Prior notice and publication in the *FEDERAL REGISTER* of this proceeding is impracticable and unnecessary, given the circumstances.

The Commission orders: (A) Pursuant to sections 4, 5, 7, 14, 15, and 16 of the Natural Gas Act, and section 401(g) of the Department of Energy Organization Act, the Commission institutes an investigation with respect to Tetco's request described above, including the alleged existing emergency condition, compensation to be received

3933

by the seller, and any other matter relevant to the Commission's actions with respect to this matter.

(B) A public investigatory proceeding shall be convened on January 21, 1978, at 3 p.m., e.s.t., in hearing room A of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington D.C. 20426, for the purpose of taking evidence on all issues of law and fact which are material to Tetco's request described above, and the other matters described in paragraph (A).

(C) The Secretary, or any person designated by him, is authorized to issue such subpoenas as the Secretary or his designee determines appropriate, which subpoenas may require the personal appearance of, and production of documents by, officers or employees of Tetco, Gulf Oil Corp., Columbia Gulf Transmission Corp., any supplier, or proposed supplier, or transporter for Tetco, or any officer or employee of any person affiliated with any of the above-described persons.

(D) Tetco, Gulf Oil Corp., Columbia Gulf Transmission Corp., and any other persons to whom subpoenas are issued under ordering paragraph (C) are directed to appear, give such testimony, produce such documents, and respond to such questions as the Commission or its officers may require at the hearing described in ordering paragraph (B). Any other person invited by the Commission for such purpose may appear and give such testimony as the Commission may request at such hearing.

By the Commission.

LOIS D. CASHELL,  
Acting Secretary.

ENVIRONMENTAL PROTECTION  
AGENCY

[FRL 848-1]

AGENCY COMMENTS ON ENVIRONMENTAL  
IMPACT STATEMENTS AND OTHER ACTIONS  
IMPACTING THE ENVIRONMENT

Pursuant to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969, and section 309 of the Clean Air Act, as amended, the Environmental Protection Agency (EPA) has reviewed and commented in writing on Federal agency actions impacting the environment contained in the following appendices during the period of June 1, 1977, and June 30, 1977.

Appendix I below contains a listing of draft environmental impact statements reviewed and commented upon in writing during this review period. The list includes the Federal agency

FEDERAL REGISTER, VOL. 43, NO. 20—MONDAY, JANUARY 30, 1978

responsible for the statement, the number and title of the statement, the classification of the nature of EPA's comments as defined in Appendix II below, and the EPA source for copies of the comments as set forth in Appendix VI below.

Appendix II below contains the definitions of the classifications of EPA's comments on the draft environmental impact statements as set forth in Appendix I below.

Appendix III below contains a listing of final environmental impact statements reviewed and commented upon in writing during this review period. The listing includes the Federal agency responsible for the statement, a summary of the nature of EPA's comments, and the EPA source for copies of the comments as set forth in Appendix VI.

Appendix IV below contains a listing of final environmental impact statements reviewed but not commented upon by EPA during this review period. The listing includes the Federal agency responsible for the statement, the number and title of the statement, and the source of the EPA review as set forth in Appendix VI below.

Appendix V below contains a listing of proposed Federal agency regulations.

PETER L. COOK,  
Acting Director,  
Office of Federal Activities.

Dated: January 20, 1978.

APPENDIX II.—DEFINITIONS OF CODES FOR THE GENERAL NATURE OF EPA COMMENTS

ENVIRONMENTAL IMPACT OF THE ACTION

L.O.—Lack of Objection

EPA has no objections to the proposed action as described in the draft impact statement; or suggests only minor changes in the proposed action.

E.R.—Environmental Reservations

EPA has reservations concerning the environmental effects of certain aspects of the proposed action. EPA believes that further study of suggested alternatives or modifications is required and has asked the originating Federal agency to reassess these impacts.

E.U.—Environmentally Unsatisfactory

EPA believes that the proposed action is unsatisfactory because of its potentially harmful effect on the environment. Furthermore, the Agency believes that the potential safeguards which might be utilized may not adequately protect the environment from hazards arising from this action. The Agency recommends that alternatives to the action be analyzed further (including the possibility of no action at all).

ADEQUACY OF THE IMPACT STATEMENT

Category 1.—Adequate

The draft impact statement adequately sets forth the environmental impact of the proposed project or action as well as alternatives reasonably available to the project or action.

Category 2.—Insufficient Information

EPA believes that the draft impact statement does not contain sufficient information to assess fully the environmental impact of the proposed project or action. However, from the information submitted, the Agency is able to make a preliminary determination of the impact on the environment. EPA has requested that the originator provide the information that was not included in the draft statement.

Category 3.—Inadequate

EPA believes that the draft impact statement does not adequately assess the environmental impact of the proposed project, or that the statement inadequately analyzes reasonable available alternatives. The Agency has requested more information and analysis concerning the potential environmental hazards and has asked that substantial revision be made to the impact statement.

APPENDIX III.—Final Environmental Impact Statements for which comments were issued between June 1, and June 30, 1977

Identifying No.	Title	General nature of comments	Source for copies of comments
S-COE-A32487-FL	Tampa Harbor, Deepening, Hillsborough County, Fla.	In general, EPA's concerns were adequately addressed in the supplement to the final EIS. However, EPA believes the overall result of the project will involve degradation in water quality values.	E
F-COE-82099-LA	Removal of Water Hyacinth and Aquatic Plant Control Program, New Orleans, La.	EPA continues to have environmental reservations on the project as proposed. The draft EIS rates environmental quality values based on the use of 24-D on moving waterways since 24-D was registered for aquatic use on still waters. Since then Weedar 64 (EPA registration No. 264-2) has been registered for use by Federal or State agencies against the water hyacinth.	G

APPENDIX III.—Final Environmental Impact Statements for which comments were issued between June 1, and June 30, 1977—Continued

Identifying No.	Title	General nature of comments	Source for copies of comments
CORPS OF ENGINEERS			
F-COE-82009-LA	Removal of Water Hyacinth and Aquatic Plant Control Program, New Orleans, La.	cinth in quiescent or slow-moving waters. While 2, 4-D has been approved for some uses, EPA's experience indicates that herbicides control aquatic plant growth during use, but once the application ceases the growth returns. The additional burden of 2, 4-D application on Louisiana waters and treatment plants may be excessive in view of Louisiana's history of problems with chlorinated organic compounds in drinking water supplies.	
F-COE-B35003-ME	George's River Maintenance Dredging Project, Thomaston, Maine.	EPA's review of the final EIS has been completed and the project has been found to be satisfactory from the standpoint of environmental quality, health and welfare, within EPA's areas of jurisdiction and expertise.	B
F-COE-E35042-NC	Wanchese Harbor Development Project, N.C.	In general, EPA's concerns were adequately addressed in the final EIS. However, EPA feels that the Corps determination that the public benefits to be derived from the Wanchese Harbor project outweigh the damage to the wetlands is a matter for discolore under the National Environmental Policy Act (NEPA).	E
F-COE-F26001-MN	Reserve Mining Co., Discharge Structure, Lake County, Minn.	In general, EPA's concerns were adequately addressed in the final EIS. However, EPA recommends to the Corps of Engineers measures that should be required to minimize the impacts of the Reserve Mining Co.'s operations upon air quality.	F
F-COE-30008-MI	Ludington Harbor, Mitigation of Shore Damage, Federal Navigation Structures, Michigan.	EPA's concerns were adequately addressed in the final EIS.	F

NOTICES

PESTICIDE PROGRAMS

Rebuttable Presumption Against Registration and Continued Registration of Certain Pesticide Products Containing Thiophanate-methyl; Extension of Period for Submission of Rebuttal Evidence and Comments

On November 23, 1977, the Environmental Protection Agency (EPA) issued a notice of presumption against registration and continued registration of pesticide products containing the ingredient thiophanate-methyl. This notice was published in the FEDERAL REGISTER on December 7, 1977 (42 FR 61970). The regulations governing rebuttable presumptions provide that the applicant or registrant of such pesticide products shall have forty-five (45) days from the date such notice is sent to submit evidence in rebuttal of the presumption. However, for good cause shown, an additional sixty (60) days may be granted in which such

evidence may be submitted (40 CFR 162.11(a)(1)(i)).

A request for an additional 60 days in which to present evidence to the Agency has been received from one of the major registrants who was affected by the notice of presumption. The requester has specified a need for additional time to communicate with foreign developers of the chemical and the industrial users of their products and to complete and submit certain test data that would not be available by January 24, 1978.

The Agency agrees that additional time would be beneficial for the submission of complete and accurate responses to this notice of presumption. Therefore, because good cause has been shown, all registrants, applicants for registration, and other interested persons shall have until March 27, 1978, to submit rebuttal evidence and other comments or information. Such evidence, comments, or other information relevant to the presumption against registration and continued registration should be submitted to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Environmental Protection Agency, Rm. 401, East Tower, 401 M St., SW., Washington, D.C. 20460. Three copies of the comments should be submitted to facilitate the efforts of the Agency and of others interested in inspecting them. All comments should bear the identifying notation "OPP-30000/24A".

Comments and information received on or before March 27, 1978, shall be considered before it is determined whether a notice shall be issued in accordance with 40 CFR 162.11(a)(5)(ii) and 7 U.S.C. 136(a)(6) or 7 U.S.C. 136(d)(b)(1). Comments received after March 27, 1978, shall be considered only to the extent feasible consistent with the time limits imposed by 40 CFR 162.11(a)(5)(ii). All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section at the above address from 8:30 to 4 p.m. on normal business days. The file supporting the Agency's presumption against this pesticide is available for public inspection in the Office of Special Pesticide Reviews, Rm. 447, East Tower during the same time period.

Dated: January 25, 1978.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

FEDERAL COMMUNICATIONS COMMISSION

(Docket No. 21417)

AMERICAN TELEPHONE & TELEGRAPH CO.  
Order Regarding Long Lines Department, Revisions of Tariff FCC No. 260, Private Line Services, Series 1000 (Telegraph)

<sup>1</sup>See 42 FR 64737.

Adopted: January 20, 1978.

Released:

By the Chief, Common Carrier Bureau:

1. Comments in this proceeding were to have been filed on or before February 1, 1978, and reply comments on or before February 22, 1978. We have determined that the proceeding would be materially aided by our extending the due dates by approximately 1½ months. This additional time will afford interested persons and the Commission an adequate opportunity to review the American Telephone & Telegraph Co. cost submissions received on December 19, 1977 and January 16, 1978, and the "Petition for Enlargement of Issues and for Modification of Procedures," submitted by the Central Station Electrical Protection Association on December 5, 1977. Delegated authority to the Chief, Common Carrier Bureau, to so order is contained in § 0.303(c) of the Commission's rules and regulations, 47 CFR 0.303(c).

2. Accordingly, it is ordered, That the due dates for comments and reply comments in this proceeding are hereby extended to March 20, 1978, and April 10, 1978, respectively.

For the Federal Communications Commission.

PHILIP V. PERMUT,  
Deputy Chief,  
Common Carrier Bureau.

(Report No. 894)

COMMON CARRIER SERVICES INFORMATION  
Re: Applications Accepted for Filing

JANUARY 23, 1978.

By the Chief, Common Carrier Bureau:

The applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications, if upon further examination, it is determined they are defective and not in conformance with the Commission's rules and regulations or its policies.

Final action will not be taken on any of these applications earlier than 31 days following the date of this notice, except for radio applications not requiring a 30-day notice period (see section 309(c) of the Communications Act), applications filed under Part 68, applications filed under Part 63 relative to small projects, or as otherwise noted. Unless specified to the contrary, comments or petitions may be filed concerning radio and section 214 applications within 30 days of the date of this notice and within 20 days for Part 68 applications.

In order for an application filed under Part 21 of the Commission's rules (Domestic Public Radio Services) to be considered mutually exclusive with any other such application appearing herein, it must be substantially complete and tendered for filing by whichever date is earlier: (a) The close of business 1 business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which the subsequent application is in conflict) as having been accepted for filing. In common carrier radio services other than those listed under Part 21, the cutoff date for filing a mutually exclusive application is the close of business 1 business day preceding the day on which the previously filed application is designated for hearing. With limited exceptions, an application which is subsequently amended by a major change will be considered as a newly filed application for purposes of the cutoff rule. (See § 1.227(b)(3) and 21.30(b) of the Commission's rules.)

For the Federal Communications Commission.

WILLIAM J. TRICARICO,  
Secretary.

Applications accepted for filing:

#### DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

- 20613-CD-P-(4)-78 Delta Valley Radiotelephone Co., Inc. (KMA743). C.P. for additional facilities to operate on 2178.4 MHz, control at locations No. 1: 3502 Kroy Way, Sacramento, Calif., additional facilities to operate on 2128.4 MHz, control at location No. 4: 2171 Ralph Avenue, Stockton, Calif., and additional facilities to operate on 2128.4 and 2178.4 MHz, repeater, to be located at a new site described as location No. 5: At north peak of Mount Diablo, approximately 7.5 miles northeast of Danville, Calif.
- 20616-CD-P-78 Little Rock Radio Telephone Co., Inc. (new). C.P. for a new 1-way station to operate on 35.58 MHz to be located at 1501 North University, Little Rock, Ark.
- 20622-CD-P-(2)-78 Tel-Illinois, Inc. (new). C.P. for a new 1-way station to operate on 158.70 MHz, base to be located at location No. 1: 1029 Main Street, Danville, Ill., and

control facilities to operate on 459.300 MHz to be located at location No. 2: 2424 West Skyline Drive, Champaign, Ill.

20629-CD-P-(2)-78 Mount Shasta Radiotelephone, Inc. (KUS379). C.P. for additional facilities to operate on 929.0 MHz, repeater at location No. 2: Summit Gray Butte, 7.1 miles northeast of Mount Shasta, Calif., and for additional facilities to operate on 939.5 MHz, control at a new site described as location No. 3: 612 South Mount Shasta Boulevard, Mount Shasta, Calif.

20651-CD-P-(3)-78 Nashville Mobilphone, Inc. (KIY750). C.P. to replace transmitter and relocate facilities operating on 454.200, 454.225, and 454.350 MHz from location No. 3 to location No. 2: 0.5 miles north of Old Hickory Boulevard and 1 mile west of Granny White Pike, Nashville, Tenn.

20652-CD-TC-78 North Alabama Paging Co., Inc. Consent to transfer of control from Walter B. Smith, transferor, to Ernest A. Poole, transferee. Station: KUC951, Decatur, Ala.

20653-CD-P-78 RAM Broadcasting of Massachusetts, Inc. (KSV956). C.P. for additional facilities to operate on 152.24 MHz to be located at a new site described as location No. 4: Asnebumskit Hill, 2.6 miles east of Paxton, Mass.

20656-CD-P-(2)-78 James D. and Lawrence D. Garvey, d.b.a. Radiofone (KUS285). C.P. to relocate facilities operating on 43.22 MHz and 43.58 MHz at location No. 1 to be located at 700 Poydras Street, New Orleans, La.

20657-CD-P-(3)-78 Otis L. Hale, d.b.a. Mobilphone Communications (KLB500) (resubmitted). C.P. to change antenna system operating on 152.21 MHz at location No. 2 and replace transmitter operating on 152.09 MHz, base and replace transmitter and change antenna system and relocate facilities operating on 459.05 and 152.09 to be located from location No. 1 to location No. 2: Shinall Mountain, 9 miles west-northwest of Little Rock, Ark.

20658-CD-R-78 Southwestern Bell Telephone Co. (KWB401) (developmental). Renewal of license expiring February 9, 1978. Term: February 9, 1978 to February 9, 1979.

20659-CD-P-(3)-78 South Central Bell Telephone Co. (KIB389). C.P. to change antenna system operating on 152.51, 152.63, and 152.81 MHz, located approximately 7.9 miles northeast of Signal Mountain, Tenn.

20660-CD-P-(2)-78 Industrial Communications Systems, Inc. (KSV926). C.P. for additional facilities to operate on 2173.8 MHz, repeater at location No. 1: Santiago Peak radio site, Santa Ana, Calif.; and for additional facilities to operate on 2123.6 MHz, control to be located at a new site described as location No. 9: 2660 Woodland Drive, Anaheim, Calif.

20662-CD-P-(2)-78 Industrial Communications Systems, Inc. (KMD990). C.P. for additional facilities to operate on 2173.6 MHz, repeater at location No. 1: Santiago Peak radio site, Santa Ana, Calif.; and for additional facilities to operate on 2123.6 MHz, control, to be located at a new site described as location No. 6: 2660 Woodland Drive, Anaheim, Calif.

20663-CD-P-(4)-78 American Communications Systems, Inc. (KIG300). C.P. for additional facilities to operate on 43.58 MHz at four new sites described as location No. 3: 255 Scenic Highway, Lawrenceville, Ga.;

location No. 4: 1000 Atlanta West Boulevard, Lithia Springs, Ga.; location No. 5: 1412 Milstead Road, Conyers, Ga.; and location No. 6: 1480 Lawrenceville Road, Marietta, Ga.

20664-CD-P-78 Selective Radio Paging, Inc. (KKT407). C.P. to change antenna system operating on 35.22 MHz located at 700 Poydras Street, New Orleans, La.

20665-CD-AL-78 Alco Telephone Answering Service of Greenville, Miss., Inc. Consent to assignment of license from Alco Telephone Answering Service of Greenville, Miss., Inc., assignor, to L & L Services, Inc., d.b.a. Metro Communication Services, assignee. Station: KUC976, Oxford, Miss.

20666-CD-MP-78 Digital Paging Systems of Toledo, Inc. (KWU348). Modification of C.P. to relocate facilities operating on 454.325 MHz to be located at 1049 South McCord Street, Toledo, Ohio.

20667-CD-P-(2)-78 ComEx, Inc. (KCI295). C.P. for additional facilities to operate on 72.22 and 72.62 MHz, control at location No. 2: Uncanoonuc Mountain, near Gofftown, N.H.

20668-CD-MP-(5)-78 Southwest Mobilphone, Inc. (KDS461). Modification of C.P. to replace transmitter, change antenna system and relocate facilities operating on 454.325 and 454.350 MHz at location No. 1: 3.5 miles north of U.S. Highway 83 and 23rd Street, 0.1 mile east on unmarked road, McAllen, Tex.; replace transmitter and change antenna system operating on 454.075 and 454.150 MHz at location No. 2: 2105 East 14th Street, Brownsville, Tex.; and replace transmitter and change antenna system operating on 454.025 MHz at location No. 3: off New Hampshire Road, 0.75 mile south of Harlingen, Tex.

20669-CD-P-78 Edythe L. Kies, d.b.a. Traverse Answering Service (KRS702). C.P. for additional facilities to operate on 152.12 MHz at location No. 1: Cedar Run Road, Traverse City, Mich.

#### CORRECTIONS

20611-CD-AL-78 AAA Answerphone, Inc., Jackson. Correct station location to read Tupelo, Miss., instead of Jackson, Miss. All other particulars to remain as reported on PN No. 893, dated January 16, 1978.

20615-CD-P-78 General Telephone Co. of California (KUA300). Correct file number to read: 20615-CD-P/ML-78. All other particulars to remain as reported on PN No. 893, dated January 16, 1978.

#### MAJOR AMENDMENTS

21755-CD-P-77 Mobile Communication Service, Inc. Amend to change the base frequency to 43.22 MHz. All other particulars to remain as reported on PN No. 868, dated July 25, 1977.

20160-CD-P-(2)-78 Schaller Telephone Co., Schaller, Iowa (KWU471). Amend base frequency 152.21 MHz to read 152.51 MHz. All other particulars to remain as reported on PN No. 883, dated November 7, 1977.

#### POINT TO POINT MICROWAVE RADIO SERVICES

## FM AND TV TRANSLATOR

Applications Ready and Available for Processing Pursuant to Sections 1.572(c) and 1.573(d) of the Commission's Rules

Adopted: January 20, 1978.

Released: January 25, 1978.

By the Chief, Broadcast Bureau.  
Notice is hereby given pursuant to §§ 1.572(c) and 1.573(d) of the Commission's rules, that on March 16, 1978, the TV and FM translator applications listed in the attached appendix will be considered as ready and available for processing. Pursuant to § 1.227(b)(1) and § 1.519(b) of the Commission's rules, an application, in order to be considered with any application appearing on the attached list or with any other application on file by the close of business on March 15, 1978, which involves a conflict necessitating a hearing with any application on this list, must be substantially complete and submitted for filing at the offices of the Commission in Washington, D.C., by the close of business on March 15, 1978. The attention of prospective applicants is directed to the fact that some contemplated proposals may not be eligible for consideration with an application appearing in the attached appendix by reason of conflicts between the listed applications and applications appearing in previous notices published pursuant to § 1.573(d) of the Commission's rules.

The attention of any party in interest desiring to file pleadings concerning any pending TV and FM translator application, pursuant to section 309(d)(1) of the Communications Act of 1934, as amended, is directed to section 1.580(i) of the Commission's rules for provisions governing the time for filing and other requirements relating to such pleadings.

For the Federal Communications Commission.

WILLIAM J. TRICARICO,  
Secretary.

## VHF TV TRANSLATOR APPLICATIONS

BPTTV-5971 (K02FV), Franklin, Ariz., York-Sheldon Television. Req: Add Loma Linda Estates and Verde Lee Acres, Nevada, to present principal community, increase output power to 5 watts.  
BPTTV-5972 (K07IR), York, Sheldon, Duncan, and Franklin, Ariz., York-Sheldon Television Association. Req: Add Verde Lee Acres and Loma Linda Estates, Arizona, to present principal community, increase output power to 10 watts.

BPTTV-5973 (K11JJ), York, Sheldon, Duncan, and Franklin, Ariz., York-Sheldon Television Association. Req: Add Verde Lee Acres and Loma Linda Estates, Arizona, to present principal community, increase output power to 10 watts.

BPTTV-5977 (K09EF), Royal City and Beverly, Wash., Sentinel Bluff Television, Inc. Req: Change principal community to Vantage and Beverly, Wash., increase output power to 10 watts, change primary TV station to KVEW, Channel 42, Kennewick, Wash.

BPTTV-5980 (K04DD), Weaverville, Calif., Weaverville Translator Co., Inc. Req: Add Douglas City and Junction City, Calif., to present principal community.

BPTTV-5985 (new), McGrath, Alaska, Iditarod Area School District. Req: Channel 2, 54-60 MHz, 10 watts. Primary: KAKM-TV, KENI-TV, KIMO-TV, and KTVA-TV Anchorage, Alaska.

BPTTV-5986 (K13NL), Dry Lake, Thayer Junction, Point of Rocks, Wyo., Upper Bear River TV Service. Req: Change frequency to Channel 7, 174-180 MHz.

BPTTV-5995 (new), Tuscarora, Nev., Washoe Empire. Req: Channel 13, 210-216 MHz, 10 watts. Primary: KTVN-TV, Reno, Nev.

## [6712-01]

[FCC 78-18]

## TANNER ELECTRONIC SYSTEMS TECHNOLOGY, INC.

## Petition for Waiver of Section 15.59(g) of the Commission's Rules

Adopted: January 10, 1978.

Released: January 16, 1978.

By the Commission.

1. On November 14, 1977, Tanner Electronic Systems Technology, Inc. (TEST), filed a petition for waiver of the marketing cutoff date in § 15.59(g) of January 1, 1978, in which to market a CB receiver/converter which is designed for installation and use with a conventional automobile AM radio.<sup>1</sup>

2. TEST was one of the 25 petitioners denied the same relief requested here in the Commission's order released November 30, 1977 (FCC 77-768).<sup>2</sup> However, TEST has again requested a waiver since it does not believe the reasons for denial in the November order apply to TEST. It is alleged that one reason for the earlier decision was the purported "failure" of petitioners to cease manufacturing prior to the August 1, 1977, cutoff date; and the petitioner does not fall into this category since it ceased the manufacture of equipment in November of 1976.

<sup>1</sup>Some models are designed for 40 channel reception, although most models receive only 23 channels.

<sup>2</sup>In a judgment of December 16, 1977, the U.S. Court of Appeals for the District of Columbia Circuit affirmed that order, but authorized TEST to seek reconsideration before the Commission on grounds of its "special circumstances." *Arthur Fulmer, Inc. v. FCC*, D.C. Cir., No. 77-2064. We have treated TEST's November 14th pleading as a petition for reconsideration.

## FEDERAL RESERVE SYSTEM

## STRATTON AGENCY, INC.

## Formation of Bank Holding Company

Stratton Agency, Inc., Stratton, Nebr., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 100 percent (less directors' qualifying shares) of the voting shares of Commercial Bank, Stratton, Nebr. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received no later than February 19, 1978.

Board of Governors of the Federal Reserve System, January 23, 1978.

GRIFFITH L. GARWOOD,  
Deputy Secretary of the Board.

## REGULATORY REPORTS REVIEW

## Receipt of Report Proposals

The following requests for clearance of reports intended for use in collecting information from the public were received by the Regulatory Reports Review staff, GAO, on January 18 and 19, 1978. See 44 U.S.C. 3512(c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed EEOC requests are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before February 17, 1978, and should be addressed to Mr. John M. Lovelady, Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5033, 441 G Street NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the

Applicable trade names: TEST CB-23, TEST CB Receiver, CB-40, Citizens Band Monitor, Art Linkletter CB-23, Art Linkletter CB Receiver, Craftsman CB-40, Surveyor CB-23, and Fulcomm CB Converter.

<sup>3</sup>In the matter of petitions to extend the sales cutoff date for certain CB radios. Order extending date adopted August 24, 1977, released September 1, 1977, FCC 77-586, — FCC 2d —.

<sup>4</sup>In the matter of petitions to extend the January 1, 1978, sales cutoff date for 23-channel CB radios and CB receiver/converter. Order denying extension adopted November 9, 1977, released November 30, 1977, FCC 77-768, — FCC 2d —.

Regulatory Reports Review Staff, 202-275-3532.

**EQUAL EMPLOYMENT OPPORTUNITY COMMISSION**

The EEOC requests clearance of a new Form 283, Intake Questionnaire. The form is in compliance with the Privacy and Freedom of Information Acts as well as amendment to the Commission's procedural regulations at 29 CFR 1601.19. The purpose of Form 283 is to assist the Commission in its evaluation of the allegations brought forth to it by potential Charging Parties. The data on the form is used by EEOC in its pre-charge counseling process to screen out non Title VII matters, assist Charging Parties in evaluating their charges and to frame the charge in such a manner as to direct the investigation and effect any potential relief. Use of the form is not mandatory; however, pursuant to the Commission's Procedural Regulation at 29 CFR 1601.19, the Commission requires that this information be secured in order to ascertain whether there is a factual basis for invoking the Commission's jurisdiction and upon which to proceed. The EEOC estimates that respondents will number approximately 45,000 annually and that reporting time will average 30 minutes for each Form 283 filed.

The EEOC requests clearance of revisions to Form 5, Charge of Discrimination to bring it into compliance with changes in the Commission's procedural regulations at 29 CFR 1601.12, 42 FR 55389. The revisions will be three new forms 5A, 5B, and 5C which will replace Form 5. Form 5A is used when charges are filed with EEOC; Form 5B is used when charges are filed with EEOC and a state/local agency; and Form 5C is used when charges are filed with a state/local agency and then EEOC also. The purpose of the forms is to assist persons who believe they have been aggrieved to file charges of unlawful employment practices with the Commission. Use of the forms is not mandatory; however section 706(b) of Title VII of the Civil Rights Act of 1964, as amended, requires that charges be in writing under oath, affirmation, or verified under penalty of perjury. The EEOC estimates that approximately 45,000 charges of Discrimination will be filed annually and that reporting time will average 2.5 hours for each form filed.

**DEPARTMENT OF HEALTH,  
EDUCATION, AND WELFARE**

*Health Care Financing Administration*

**HEALTH CARE FINANCING ADMINISTRATION  
RULINGS**

*Publication*

The purpose of this notice is to inform the public that the Administrator, Health Care Financing Administration, has authorized establishment of a new rulings publication, to be entitled Health Care Financing Administration Rulings. The Health Care Financing Administration Rulings will include materials required to be made public by the Freedom of Information Act (5 U.S.C. 552(a)(1)): that is, final opinions, including concurring and dissenting opinions, as well as orders made in the adjudication of cases; statements of policy and interpretations adopted by the Health Care Financing Administration or one of its components not published in the FEDERAL REGISTER; and indexes of administrative staff manuals and instructions to staff that affect a member of the public. Health Care Financing Administration jurisdiction includes responsibility for the medicare and medicaid programs; the certification of health standards for health care facilities; the Professional Standards Review Organization program; the maintenance of program integrity against fraud and abuse; the Provider Reimbursement Review Board; and related matters.

Examples of the kinds of materials to be published are: significant Federal court decisions concerning Health Care Financing Administration programs; significant decisions of Administrative Law Judges and the Appeals Council of the Social Security Administration, the Provider Reimbursement Review Board, and the Administrator of the Health Care Financing Administration on behalf of the Secretary; opinions of the Office of the General Counsel; and other formal policy statements.

Health Care Financing Administration Rulings will be binding upon all components of the Health Care Financing Administration to which they apply. They will be published and updated periodically to maintain their currency and relevance.

(Social Security rulings concerning medicare matters previously published by the Commissioner of Social Security in Social Security Rulings will be either republished as Health Care Financing Administration Rulings, or rescinded; no publications that are similar in nature to the new Health Care Financing Administration Rulings announced herein were published by the former Social and Rehabilitation Service, or by the Public Health Service.)

Copies of the publication, when issued, will be available from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. A check or money order covering the cost of the publication, when listed, must accompany the publication order.

**MICHIGAN STATEWIDE PROFESSIONAL  
STANDARDS REVIEW COUNCIL**

*Request for Nominations for Public Member  
Positions*

Nominations are being accepted for public member positions on the Michigan Statewide Professional Standards Review Council.

Statewide Councils are established in each State in which there are located three or more Professional Standards Review Organizations (PSROs). Because there are now three PSROs in Michigan, the Michigan Statewide Council is being formed.

PSROs review medical care services paid for under the medicare, medicaid, and maternal and child health and crippled children services programs in order to assure that those services are medically necessary, of acceptable quality, and provided at the appropriate level of care. The Statewide Council: (1) Helps to coordinate PSRO activities and disseminates information among them; (2) assists the Secretary in the development of uniform data gathering and operating procedures; (3) reviews certain determinations and recommendations made by PSROs as a result of their reviews of medical care; (4) works with doctors and other practitioners and with medical facilities so that they will assure that medical care provided is necessary, appropriate, and of acceptable quality; and (5) assists the Secretary of Health, Education, and Welfare to carry out several of his responsibilities, including the evaluation of the PSROs' review activities and the selection of replacement PSROs when necessary.

There will be four public representatives on the Statewide Council. Nominees for these four Council positions will be considered on the basis of whether they are:

(1) Knowledgeable about health care provided in Michigan under the medicare, medicaid, and maternal and child

health and crippled children services programs;

(2) Willing and able to represent the interests of the public; and

(3) Willing and able to discharge the responsibilities of membership in the Statewide Council.

Special consideration will be given to qualified individuals not affiliated with organizations and groups: (1) Whose representation on the Statewide Council is required by law (PSRO representatives or physician representatives), or (2) which are represented on the Statewide Council Advisory Group (health care practitioners other than physicians, hospitals, and other health care facilities).

Persons selected for public member positions on the Council should represent a broad segment of public interest. Please include with your nomination biographical data concerning the nominee, including a brief description of the nominee's participation in community activities.

Persons or organizations may submit nominations. All nominations received within 60 days of this notice will be considered.

Please send your nominations to: George R. Holland, Acting Regional Administrator, Health Care Financing Administration, 300 South Wacker Drive, Chicago, Ill. 60606.

After consideration of all nominees, including nominees of the Governor of Michigan, the Secretary will appoint four public representatives, two of whom will have been recommended by the Governor of Michigan.

For further information about the nature and functions of the Council and the role of public members in Council activities, please call the Office of the Regional Administrator, HCFA, 312-353-8057.

Dated: January 23, 1978.

*Office of Education*

**STATE POSTSECONDARY EDUCATION  
COMMISSIONS**

*Closing Date for Receipts of Information Concerning Establishment of State Postsecondary Education Commissions*

In order for a State to receive funds appropriated for fiscal year 1978 to support statewide comprehensive planning for postsecondary education as authorized under section 1203(a) of the Higher Education Act of 1965 (20 U.S.C. 1142b(a)), it must have established a State Postsecondary Education Commission which, as required by section 1202(a) of that Act, is "broadly and equitably representative of the general public and public and private nonprofit and proprietary institutions of postsecondary education in the State, including community colleges, junior colleges, postsecondary vocational schools, area vocational schools, technical institutes, 4-year institutions of higher education and branches thereof." States which have not previously submitted information concerning establishment of such a State Commission and which wish to receive such planning funds must submit the following information to the U.S. Commissioner of Education by March 1, 1978:

(1) An indication of which of the following three options for establishing a section 1202 State Commission a State has chosen to follow: (i) Creation of a new Commission; (ii) designation of an existing State agency or State Commission; or (iii) expanding, augmenting or reconstituting the membership of an existing State agency or State Commission.

(2) An indication whether any of the following State-administered program authorities contained in the Higher Education Act of 1965 have been assigned to the section 1202 State Commission:

(i) Community Services and Continuing Education (HEA section 105); (ii) Equipment for Undergraduate Instruction (HEA section 603); and (iii) Grants for Construction of Undergraduate Academic Facilities (HEA section 704).

(3) The official name, address and telephone number of the State Commission.

(4) The names, mailing addresses and terms of office of the members of the State Commission.

(5) The name, title, mailing address and telephone number of the principal staff officer of the State Commission.

(6) A letter, signed by the Governor, explaining how the membership of the State Commission meets the "broadly and equitably representative" requirements of section 1202(a) and what provisions have been made to ensure continuing compliance with these requirements of the law.

The above information may be sent by mail or hand-delivered.

(a) *Information sent by mail.* Information sent by mail should be addressed to the U.S. Commissioner of Education, 400 Maryland Avenue SW., Washington, D.C. 20202. Such information will be considered to be received on time if:

(1) The information was sent by registered or certified mail not later than February 24, 1978, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The information is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail rooms in Washington, D.C. (In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.)

(b) *Information delivered by hand.* Information to be delivered by hand must be taken to Room 4181, 400 Maryland Avenue SW., Washington, D.C. Hand-delivered information will be accepted daily between the hours of 8 a.m. and 4 p.m. Washington, D.C. time, except Saturdays, Sundays, and Federal holidays. Information will not be accepted after 4 p.m. on the closing date.

[4110-12]

Office of the Secretary  
OFFICE OF PUBLIC AFFAIRS

Statement of Mission, Organization, and Functions

Part A of the Statement of Mission, Organization, and functions for the

Department of Health, Education, and Welfare, Office of the Secretary, Office of Public Affairs (42 FR 61632-33 date December 6, 1977), is amended to delete reference to the Deputy Assistant Secretary for Media Relations and make other minor functional changes. The amended Chapter reads as follows:

SECTION AP.00. *Mission.* The mission of the Office of Public Affairs is to serve as the Secretary's principal public affairs policy adviser; to provide centralized professional leadership and continuous monitoring and evaluation of Department-wide policies, procedures and operating practices regarding public affairs activities; and to administer the Freedom of Information Act.

SECTION AP.10. *Organization.* The Office of Public Affairs, headed by the Assistant Secretary for Public Affairs, who reports to the Secretary, consists of the following organizations:

The Office of the Assistant Secretary for Public Affairs  
Planning and Evaluation Public Affairs Staff  
Inspector General Public Affairs Staff  
Media Relations Division  
Freedom of Information Division  
Regional Operations Division  
Review and Outreach Division  
Editorial Operations Division

SECTION AP.20. *Functions.*

A. *The Office of the Assistant Secretary for Public Affairs.* Provides executive leadership, policy direction, and management strategy for the Department's public affairs programs and activities.

Counsels and acts for the secretary and the Department in carrying out responsibilities under statutes, Presidential directives, and Secretarial orders for informing the media, general public, specialized audiences, HEW employees, and other Federal employees about the programs, policies, and services of the Department.

Establishes and enforces policies and practices which produce an accurate, clear, efficient, and consistent flow of information to the media, general public and other audiences about Departmental programs and activities.

Maintains channels and procedures for transmitting to Departmental policy officials information on how the Department's programs and proposals are viewed by the media and both the general and specialized publics.

Consults on the selection of key public affairs personnel in the Principal Operating Components (POCs) and the Regions.

Establishes guidelines and standards (with the Office of Personnel and Training) for development, training, promotions, details, and related matters for the public affairs personnel in the Department.

Concurs in all public affairs plans and budgets for the POC's and regional offices and otherwise exercises functional supervision over their public affairs activities.

Ensures coordination among public affairs components. Manages public affairs issues and special activities that cut across POC lines.

Reviews and approves all publications and audio-visual materials produced with Departmental funds. Provides administrative and budgetary services for the Office of Public Affairs.

A.1. *Office of Planning and Evaluation Public Affairs Staff.* Provides advice and assistance on all public affairs matters to the Office of Planning and Evaluation, Office of the Secretary, in consultation with the Assistant Secretary for Public Affairs.

Assists in the preparation of press releases, articles, speeches and related materials.

Provides information to news gathering and reporting media on planning and evaluation issues.

Arrange interviews and other direct contacts with media representatives.

Coordinates with other elements of OASPA the public affairs activities of P&E.

A.2. *Inspector general public affairs staff.* Provides advice and assistance on all public affairs matters to the Office of Inspector General (OIG), Office of the Secretary, in consultation with the Assistant Secretary for Public Affairs.

Assists in the preparation of press releases, articles, speeches, and related materials.

Provides information to news gathering and reporting media on issues relating to the OIG.

Arranges interviews and other direct contacts with media representatives.

Coordinates with other elements of OASPA the public affairs activities of OIG.

B. *Media relations division.* Plans, directs and coordinates the issuance of public information from HEW to the press and broadcast media.

Prepares news releases and other news material for the Secretary and other top Department officials. Reviews and clears all news releases and other news material prepared by HEW components.

Coordinates and arranges news conferences, briefings, interviews and appearances by the Secretary and other key HEW officials with the press and broadcast media.

Directs the preparation of the *Green Sheet*, a daily compilation of news concerning HEW programs and activities.

C. *Freedom of information division.* Administers the Freedom of Information Act (FOIA) and the HEW regulations implementing that law. Develops policy guidelines and training programs for all HEW components re-

garding the FOIA and related legislation, i.e., the Privacy Act, Federal Advisory Committee Act, and the Government in the Sunshine Act; and, together with staff of the Office of General Counsel, assists in development of HEW regulations implementing these statutes. Provides responses to requests made under the Freedom of Information Act and determines the availability of records and information under the law and HEW regulations.

Coordinates with the Office of Fair Information Practices in resolving questions which overlap the FOIA and the Privacy Act regarding release of records.

Directs operation of the HEW Public Reading Room, visitors information and telephone locator service.

Provides policy guidance on and maintains the index of materials required by FOIA.

D. *Regional operations division.* Advises the ASPA on all regional public affairs issues and procedures. Informs the ASPA of all regional public affairs issues.

Provides technical assistance, direction and general information to public affairs staff in the Regions. Coordinates public affairs activities among Regions.

Provides briefing materials for Presidential and Secretarial travel to the region.

Serves as liaison between the regional staff and headquarters agencies.

E. *Review and outreach division.* Under the direction of the Assistant Secretary for Public Affairs, establishes Departmental policy and procedures for the procurement, design, production, distribution and quality control of publications, audiovisual products, and exhibits.

Reviews and clears all publications, audiovisual products, and exhibits.

Reviews audiovisual and publications aspects of HEW public affairs components' plans to ensure they are supportive of Departmental priorities and standards.

Provides technical assistance on development of publications and audiovisual products.

Provides the central coordinating function with HEW for outreach activities, including citizen participation and involvement.

Initiates, designs and effects outreach and citizen participation programs with national and community organizations, minority and women's groups, organizations for the handicapped, student and public interest groups, and individuals which are concerned with the broad range of policies, programs and issues of the Department.

Coordinates, assists and maintains liaison with all elements of the Department, including the Regions, involved in outreach and citizen participation activities.

Acts as the central resource within HEW for information on national organizations and interest groups. Conducts seminars and conferences to achieve productive citizen interaction with HEW issues, programs and policies.

F. *Editorial operations division.* Serves as the principal resource within the Department for preparing, reviewing, and editing written materials reflecting HEW policy.

Prepares speeches, statements, articles, and related material for the Secretary and other top Departmental officials.

Drafts other materials for non-departmental publications.

Edits Congressional testimony of Departmental officials.

Directs the preparation of publications with Department-wide implications such as *HEW Now*.

Manages the Public Affairs Resource Center containing information on HEW programs and activities.

Directs the HEW Speakers' Bureau. Screens requests for the Secretary's speaking engagements and coordinates the scheduling of speaking engagements of other policy-level officials of the department.

Dated: January 17, 1978.

JOSEPH A. CALIFANO, Jr.,  
Secretary.

DEPARTMENT OF HOUSING AND  
URBAN DEVELOPMENT

Federal Disaster Assistance Administration  
[Docket No. NFD-592; FDAA-545-DR]

WASHINGTON

Amendment to Notice of Major Disaster  
Declaration

AGENCY: Federal Disaster Assistance Administration, HUD.

ACTION: Notice.

SUMMARY: This notice amends the notice of major disaster declaration for the State of Washington (FDAA-545-DR), dated December 10, 1977.

DATED: January 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Frank J. Muckenhaupt, Chief Program Support Staff, Federal Disaster Assistance Administration, Department of Housing and Urban Development, Washington, D.C. 20410, 202-634-7825.

NOTICE: The notice of major disaster for the State of Washington, dated December 10, 1977, and amended on December 16, 1977, and December 20, 1977, is hereby further amended to in-

clude the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of December 10, 1977:

The county of Whitman.  
The city of Bingen (in Klickitat County).

Office of Interstate Land Sales Registration  
[Docket No. 77-169-IS]

BROOKRIDGE COMMUNITY, UNITS 1 AND 2  
Hearing

In the matter of Brookridge, Inc., and Charles M. Sasser, Jr., president, respondent; Docket No. N-78-837; OILSR No. 0.2843-09-834 and A.

Pursuant to 15 U.S.C. 1706(e) and 24 CFR 1720.165(b) notice is hereby given that:

1. Brookridge Community, unit 1 and 2, Brookridge, Inc., and Charles M. Sasser, Jr., president, its officers and agents, hereinafter referred to as "respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90-448) (15 U.S.C. 1701, et seq.) received a notice of proceedings and opportunity for hearing dated December 8, 1977, which was sent to the developer pursuant to 15 U.S.C. 1706(b), 24 CFR 1701.45(a)(1) and 1720.120 based on information obtained by the Office of Interstate Land Sales Registration showing that the statement of record and property report for Brookridge Community, units 1 and 2, located in Brooksville, Fla., contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The respondent filed an answer received January 3, 1978/January 5, 1978, in response to the notice of proceedings and opportunity for hearing.

3. In said answer the respondent requested a hearing on the allegations contained in the notice of proceedings and opportunity for hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), it is hereby ordered, That a public hearing for the purpose of taking evidence on the questions set forth in the notice of proceedings and opportunity for hearing will be held before Judge James W. Mast, in Tampa, Fla., at a place to be determined at later date, on March 8, 1978.

5. The following time and procedure is applicable to such hearing: The par-

ties are directed to file all affidavits and a list of all witnesses with the Hearing Clerk, HUD Building, Room 10278, Washington, D.C. 20410, on or before February 8, 1978. Copies of all documents filed should be served at the same time on all parties of record.

6. The respondent is hereby notified that failure to appear at the above schedule hearing shall be deemed a default and the proceedings shall be determined against respondent, the allegations of which shall be deemed to be true, and an order suspending the statement of record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1). This notice shall be served upon the respondent forthwith pursuant to 24 CFR 1720.440.

Dated: January 12, 1978.

By the Secretary.

JAMES W. MAST,  
Chief Administrative Law Judge.

#### BROOKRIDGE COMMUNITY, UNIT 3

##### Notice of Hearing

In the matter of Brookridge, Inc., and Charles M. Sasser, Jr., president, respondent; Docket No. N-78-838; OILSR No. 0-3663-09-934.

Pursuant to 15 U.S.C. 1706(e) and 24 CFR 1720.165(b) notice is hereby given that:

1. Brookridge Community, unit 3, Brookridge, Inc., and Charles M. Sasser, Jr., president, its officers and agents, hereinafter referred to as "respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90-448) (15 U.S.C. 1701, et seq.) received a notice of proceedings and opportunity for hearing dated December 8, 1977, which was sent to the developer pursuant to 15 U.S.C. 1706(b), 24 CFR 1701.45(a)(1) and 1720.120 based on information obtained by the Office of Interstate Land Sales Registration showing that the statement of record and property report for Brookridge Community, unit 3, located in Brooksville, Fla., contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The respondent filed an answer received January 3 and 5, 1978, in response to the notice of proceedings and opportunity for hearing.

3. In said answer the respondent requested a hearing on the allegations contained in the notice of proceedings and opportunity for hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR

1720.160(d), it is hereby ordered, That a public hearing for the purpose of taking evidence on the questions set forth in the notice of proceedings and opportunity for hearing will be held before Judge James W. Mast, in Tampa, Fla., at a place to be determined at later date, on March 8, 1978.

5. The following time and procedure is applicable to such hearing: The parties are directed to file all affidavits and a list of all witnesses with the Hearing Clerk, HUD Building, Room 10278, Washington, D.C. 20410, on or before February 8, 1978. Copies of all documents filed should be served at the same time on all parties of record.

6. The respondent is hereby notified that failure to appear at the above schedule hearing shall be deemed a default and the proceedings shall be determined against respondent, the allegations of which shall be deemed to be true, and an order suspending the statement of record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1). This notice shall be served upon the respondent forthwith pursuant to 24 CFR 1720.440.

Dated: January 12, 1978.

#### BROOKRIDGE COMMUNITY, UNIT 4

##### Hearing

In the matter of Brookridge, Inc., and Charles M. Sasser, Jr., president, respondent; Docket No. N-78-839; OILSR No. 0-3972-09-1041.

Pursuant to 15 U.S.C. 1706(e) and 24 CFR 1720.165(b) notice is hereby given that:

1. Brookridge Community, unit 4, Brookridge, Inc., and Charles M. Sasser, Jr., president, its officers and agents, hereinafter referred to as "respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90-448) (15 U.S.C. 1701, et seq.) received a notice of proceedings and opportunity for hearing dated December 8, 1977, which was sent to the developer pursuant to 15 U.S.C. 1706(b), 24 CFR 1701.45(a)(1) and 1720.120 based on information obtained by the Office of Interstate Land Sales Registration showing that the statement of record and property report for Brookridge Community, unit 4, located in Brooksville, Fla., contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The respondent filed an answer received January 3 and 5, 1978, in response to the notice of proceedings and opportunity for hearing.

3. In said answer the respondent requested a hearing on the allegations contained in the notice of proceedings and opportunity for hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR

2. The respondent filed an answer received January 3 and 5, 1978, in response to the notice of proceedings and opportunity for hearing.

3. In said answer the respondent requested a hearing on the allegations contained in the notice of proceedings and opportunity for hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), it is hereby ordered, That a public hearing for the purpose of taking evidence on the questions set forth in the notice of proceedings and opportunity for hearing will be held before Judge James W. #### FORRESTER'S RETREAT, SECTIONS I, II AND III

##### Notice of Hearing

In the matter of Green Forest Estates Co. and Clark G. Thompson, President, Respondent; OILSR No. 0-3008-49-309; (Docket No. N-78-836).

Pursuant to 15 U.S.C. 1706(e) and 24 CFR 1720.165(b) notice is hereby given that:

1. Forrester's Retreat, sections I, II, and III, Green Forest Estates Co. and Clark G. Thompson, President, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90-448) (15 U.S.C. 1701, et seq.) received a notice of proceedings and opportunity for hearing dated December 13, 1977, which was sent to the developer pursuant to 15 U.S.C. 1706(b), 24 CFR 1701.45(a)(1) and 1720.120 based

on information obtained by the Office of Interstate Land Sales Registration showing that the Statement of Record and Property Report for Forrester Estates Company, sections I, II, and III, located in Polk County, Tex., contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an answer received January 9 and 12, 1978, in response to the notice of proceedings and opportunity for hearing.

3. In said answer the Respondent requested a hearing on the allegations contained in the notice of proceedings and opportunity for hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), it is hereby ordered, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Houston, Tex., at a place to be determined at later date, on March 1, 1978.

5. The following time and procedure is applicable to such hearing: The parties are directed to file all affidavits and a list of all witnesses with the Hearing Clerk, HUD Building, Room 10278, Washington, D.C. 20410, on or before February 8, 1978. Copies of all documents filed should be served at the same time on all parties of record.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an Order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: January 18, 1978.

By the Secretary.

JAMES W. MAST,  
Chief Administrative Law Judge.

#### DEPARTMENT OF THE INTERIOR

Bureau of Land Management  
(NM 32483, 32484 and 32485)

##### NEW MEXICO

##### Applications

JANUARY 11, 1978.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural

Gas Co., has applied for six 4½-inch natural gas pipeline rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 21 S., R. 22 E.,  
Sec. 10, E½SE¼;  
Sec. 15, E½NE¼;  
T. 17 S., R. 27 E.,  
Sec. 34, E½SE¼;  
T. 18 S., R. 27 E.,  
Sec. 3, lots 1, 2, SW¼NE¼, N½SW¼,  
SW¼SW¼ and NW¼SE¼;  
Sec. 4, lot 20;  
Sec. 8, SE¼SW¼, N½SE¼ and SW¼SE¼;  
Sec. 9, N½NE¼, E½NW¼, SW¼NW¼ and  
NW¼SW¼.

These pipelines will convey natural gas across 4,565 miles of public lands in Eddy County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, N. Mex. 88201.

FRED E. PADILLA,  
Chief, Branch of Lands and  
Minerals Operations.

##### WYOMING

##### Application

JANUARY 19, 1978.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Cities Service Gas Company of Oklahoma City, Okla., filed an application for a right-of-way to construct a 4½ inch pipeline and install anodes for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 22 N., R. 95 W.,  
Sec. 8, S½N¼,  
Sec. 10, N½S½;  
T. 22 N., R. 96 W.,  
Sec. 4, S½S½,  
Sec. 10, NE¼NE¼,  
Sec. 12, N½N¼.

The proposed pipeline will transport natural gas from the Champlin 438 Wellhead located in the SE¼ of Section 5, T. 22 N., R. 96 W., in an easterly direction to connect with Cities Service Gas Co.'s gathering line located in the SE¼ of Section 11, T. 22., R. 95 W., Sweetwater County, Wyo.

The purpose of this notice is to inform the public that the Bureau will

be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Street, P.O. Box 670, Rawlins, Wyo. 82301.

HAROLD G. STINCHCOMB,  
Chief, Branch of Lands and  
Minerals Operations.

##### WYOMING

##### Application

JANUARY 19, 1978.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Colorado Interstate Gas Company has filed an application for a right-of-way to construct a 4½ inch O.D. pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 21 N., R. 94 W.,  
Sec. 32, N½NW¼, SE¼NW¼

The pipeline will transport natural gas from a well located in the NW¼ of section 32 to an existing natural gas pipeline within the NW¼ section 32, T. 21 N., R. 94 W., Sweetwater County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Street, P.O. Box 670, Rawlins, Wyo. 82301.

##### WYOMING

##### Application

JANUARY 20, 1978.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing

3950

## NOTICES

Act of 1920, as amended (30 U.S.C. 185), the Colorado Interstate Gas Co., has filed an application for a right-of-way to construct a 4½ inch O.D. pipeline for the purpose of transporting natural gas across the following described public lands:

## SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 21 N., R. 94 W.,  
Sec. 28, NW¼SW¼.

The pipeline will transport natural gas produced from a well located in the SW¼ of section 28 extending in a westerly direction to the point of connection with an existing natural gas pipeline facility in section 29, T. 21 N., R. 94 W., Sweetwater County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Street, P.O. Box 670, Rawlins, Wyo. 82301.

HAROLD G. STINCHCOMB,  
Chief, Branch of Lands and  
Minerals Operations.

(FR Doc. 78-2454 Filed 1-27-78; 8:45 am)

## [4310-84]

(Wyoming 61843)

WYOMING  
Application

JANUARY 20, 1978.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Colorado Interstate Gas Co., of Colorado Springs, Colo., filed an application for a right-of-way to construct two 4½ inch pipelines and a 6½ inch pipeline for the purpose of transporting natural gas across the following described public lands:

## SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 17 N., R. 93 W.,  
Secs. 8 and 20;  
T. 17 N., R. 94 W.,  
Sec. 4, 10 and 12;  
T. 18 N., R. 94 W.,  
Sec. 32.

The two 4½ pipelines will transport natural gas from the Sinclair No. 1-8 well located in the SW¼ of section 8, T. 17 N., R. 93 W., Carbon County, Wyo., and from the CIGE No. 1-20-17-93 well located in the NW¼ of section 20, T. 17 N., R. 93 W., Carbon County, Wyo., and both will connect into Colorado Interstate Gas Co.'s proposed 6½ inch pipeline. The 6½ inch pipeline

will transport natural gas from the Ladd Petroleum Federal No. 1-12-74 well located in the SW¼ of section 12, T. 17 N., R. 94 W., Sweetwater County, Wyo., and will connect into an existing pipeline located in the SW¼ of section 32, T. 18 N., R. 94 W., Sweetwater County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Street, P.O. Box 670, Rawlins, Wyo. 82301.

HAROLD G. STINCHCOMB,  
Chief, Branch of Lands and  
Minerals Operations.

## [4310-84]

(Wyoming 62180)

WYOMING  
Application

JANUARY 20, 1978.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Northern Gas Co. has filed an application for a right-of-way to construct a 4-inch pipeline and appurtenant facilities for the purpose of transporting natural gas across the following described public lands:

## SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 32 N., R. 95 W.,  
Sec. 3, SW¼SW¼;  
Sec. 4, lot 2, S¼NE¼;  
T. 33 N., R. 95 W.,  
Sec. 27, SE¼SW¼, SW¼SE¼;  
Sec. 34, W¼E¼.

The pipeline will transport natural gas from a point in section 27, T. 33 N., R. 95 W., southerly to a compressor station in section 10, T. 32 N., R. 95 W., Fremont County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management,

1300 Third Street, P.O. Box 670, Rawlins, Wyo. 82301.

## National Park Service

## COLORADO NATIONAL MONUMENT

## Boundary Revision

Pursuant to the Act of October 21, 1976, Pub. L. 94-578 (90 Stat. 2734) section 302(a), the Secretary of the Interior is authorized to revise the boundary of the Colorado National Monument and to include additional lands into the monument, not to exceed 2,800 acres within the areas so designated for addition, and to publish these revisions by map or other boundary description in the FEDERAL REGISTER.

1. In accordance with the Act, supra, notice is hereby given that the boundary of the Colorado National Monument is hereby revised to exclude from the monument 13.10 acres of privately owned lands as delineated on the attached map.

2. Further, notice is hereby given that an additional 2,793.65 acres, consisting of both federally and privately owned lands, are added to and made part of the existing monument as delineated on the attached map.

3. The lands excluded from and added to the Colorado National Monument are identified and depicted on the official Colorado National Monument boundary map numbered 119/80,006, and dated January 1977. This map and supporting legal descriptions for revisions authorized by the Act, supra, are available for inspection in the headquarters office for the Colorado National Monument, P.O. Box

## NOTICES

3953

438, Fruita, Colo. 81521, the Rocky Mountain Regional Office of the National Park Service, 655 Parfet Street, Lakewood, Colo. 80225, and the Department of the Interior, Washington, D.C. 20240.

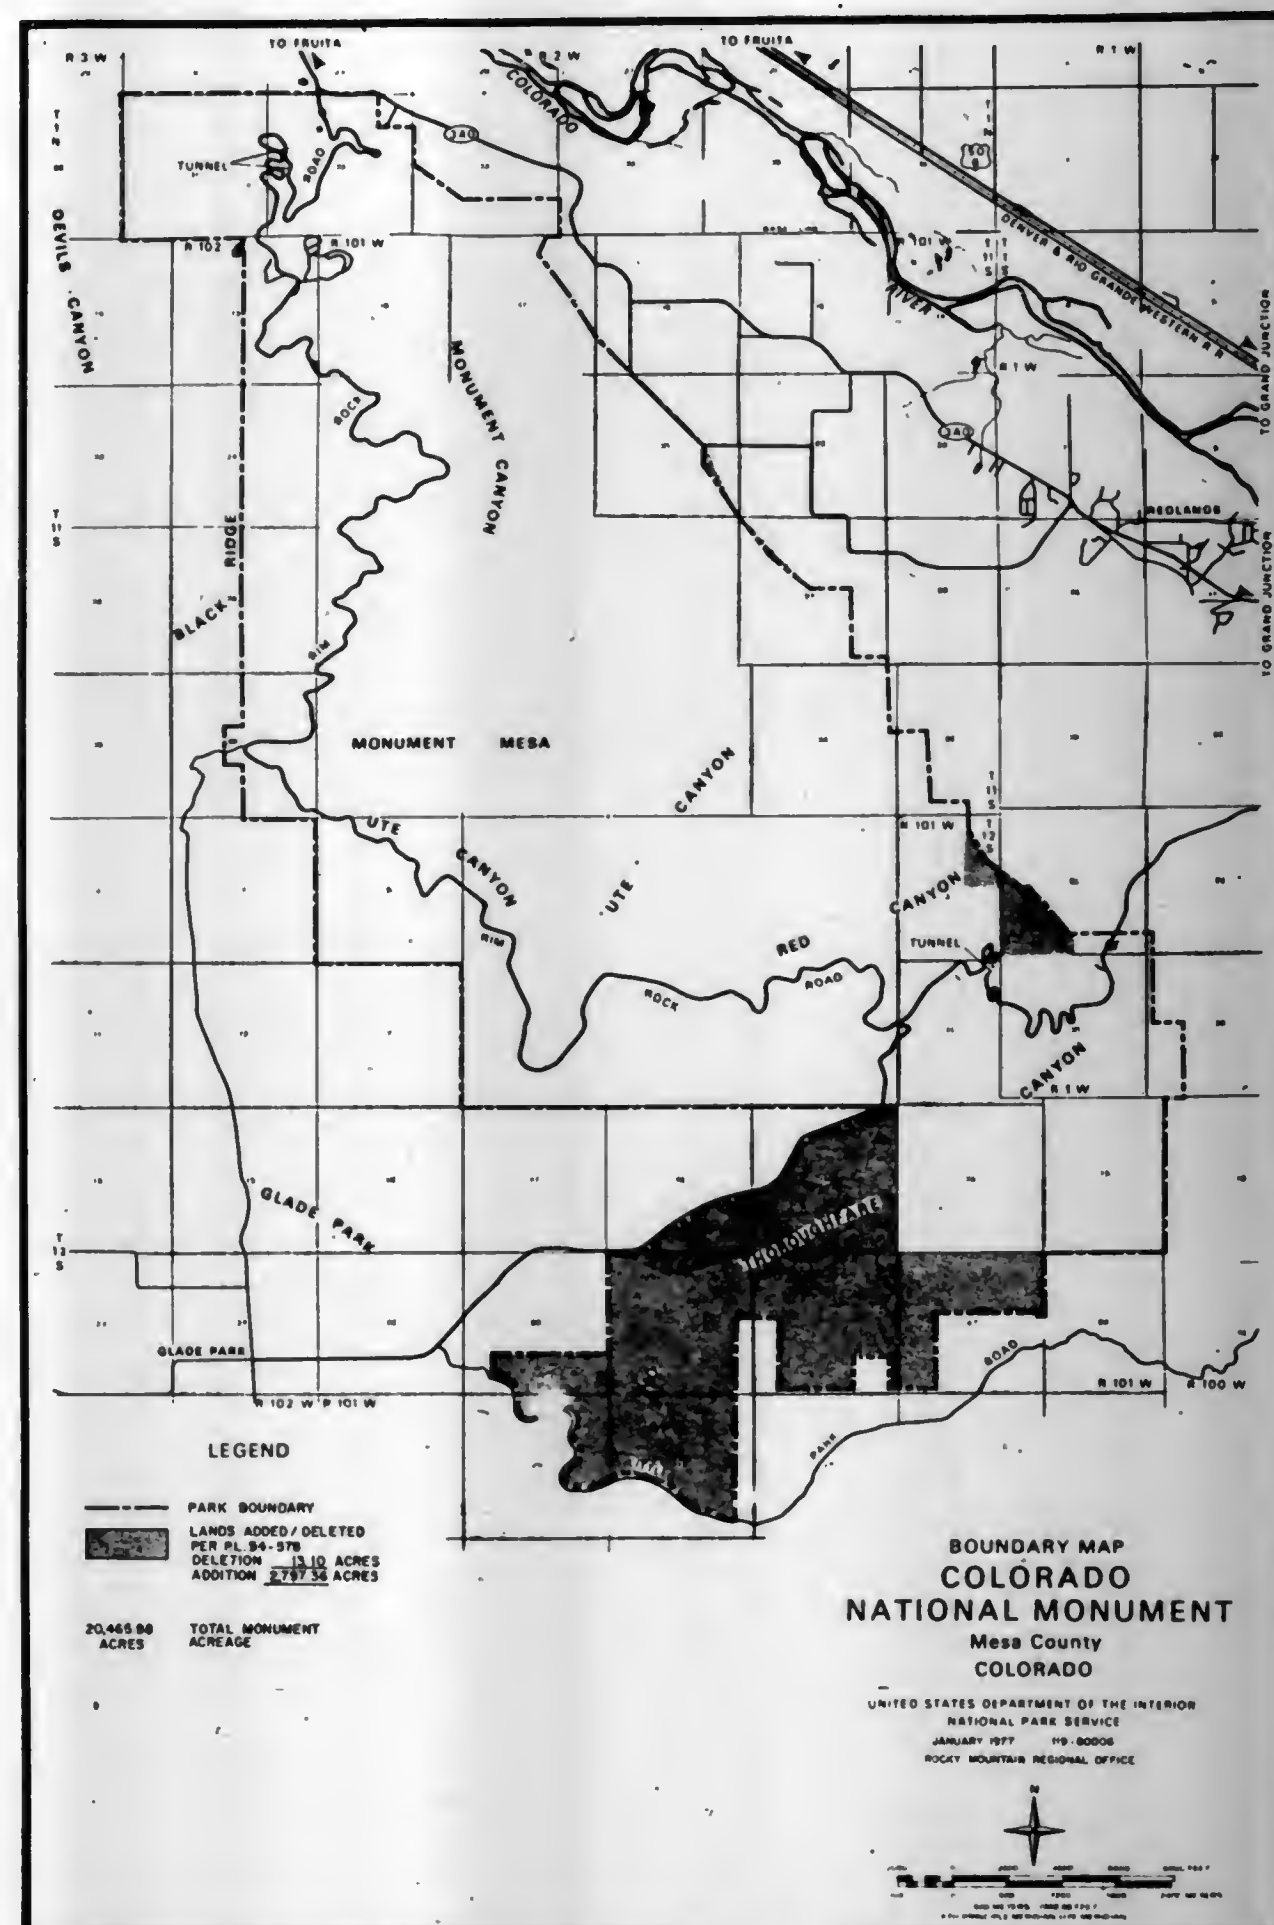

All federally owned lands lying within the revised boundary as delineated on the referenced map are therefore included in the Colorado National Monument and are subject to the laws and regulations applicable to the monument. Subject to valid existing rights, all federally owned lands designated hereby are prohibited from all forms of use, application, location, settlement, and disposal under the authority of the public land laws and the general mining and mineral leasing laws and regulations.

The administration and jurisdiction of said lands is transferred to the National Park Service.

Dated: January 19, 1978.

CECIL D. ANDRUS,  
Secretary of the Interior.

## DEPARTMENT OF JUSTICE

Drug Enforcement Administration  
[Docket No. 77-25]

MALCOLM E. BRIDWELL, M.D.

Revocation of Registration

On July 7, 1977, the Administrator of the Drug Enforcement Administration directed to Malcolm E. Bridwell, M.D., of Hobart, Okla. (hereinafter respondent), an order to show cause why respondent's DEA registration AB2144602 should not be revoked pursuant to 21 U.S.C. 824, for the reason that on May 12, 1977, in the U.S. District Court for the Western District of Oklahoma, respondent was found guilty of one count of conspiracy to distribute schedule II controlled substances, 17 counts of illegal distribution of controlled substances, and 13 counts of failure to keep proper records, all felonies relating to controlled substances; and for the further reason that on May 28, 1977, the Board of Medical Examiners for the State of Oklahoma revoked respondent's license to practice medicine in the State of Oklahoma, thereby terminating respondent's authority to prescribe, dispense, administer, or otherwise handle controlled substances in said State. On August 23, 1977, respondent, through his attorney, requested a hearing on the order to show cause.

Respondent suggested that this matter be submitted on briefs and Government counsel concurred. Accordingly, the Administrative Law Judge directed that no evidentiary hearing would be held in this matter and that the case would be decided on the briefs submitted on the following issues:

1. Whether respondent's felony convictions can serve as lawful basis for revocation of his DEA registration since they have been appealed and thus, in a sense, are not yet final; and
2. Whether the State board action revoking respondent's license to practice medicine in Oklahoma can lawfully serve as a basis for DEA revocation since that action has been appealed to the appropriate Oklahoma State court and thus, in a sense, is not yet final.

Respondent's felony convictions, revocation of respondent's license to practice medicine in the State of Oklahoma, and the appeal of both these actions to the appropriate appellate courts were stipulated by both parties.

The Administrative Law Judge found that the Administrator of DEA has repeatedly and consistently interpreted the word "convicted" in section 824(a)(2) of Title 21 of the United States Code, as not meaning a final

conviction in the sense that all appeals have been exhausted. The term has been construed to mean nothing more than that a judgment of conviction has been duly entered in a trial court. Accordingly, the Administrative Law Judge concluded that respondent's conviction in the instant case, even though it be presently under challenge in a Court of Appeals, does provide at this time a lawful basis for revocation of his DEA registration pursuant to 21 U.S.C. 824(a)(2).

Additionally, the Administrative Law Judge found that the State Board of Medical Examiners chose to proceed against respondent for unprofessional conduct under the procedures set forth in 59 Okl. St. Ann. 503 and since there is no requirement for finality of conviction under section 503, respondent's license to practice medicine in the State of Oklahoma has been revoked.

The Administrative Law Judge further found that 21 U.S.C. 824(a)(3) does not require that the Government wait until all appeals concerning the revocation of a state license have been exhausted before proceeding against a registrant on the basis that his license has been revoked by competent state authority.

Accordingly, the Administrative Law Judge concluded that respondent's Oklahoma State license to practice has been revoked and that respondent is no longer authorized by Oklahoma State law to engage in distribution or dispensing of controlled substances insofar as the applicable provisions of the Controlled Substances Act are concerned. (21 U.S.C. 823(f) and 824(a)(3).)

The Administrator adopts these findings of fact and conclusions of law and, therefore, concludes that the registration of Malcolm E. Bridwell should be revoked.

Accordingly, under the authority vested in the Attorney General by section 304 of the Controlled Substances Act (21 U.S.C. 824), and redelegated to the Administrator of the Drug Enforcement Administration by Title 28, Code of Federal Regulations § 0.100, as amended, the Administrator hereby orders that the registration of Malcolm E. Bridwell, be, and hereby is, revoked, effective immediately.

Dated: January 24, 1978.

PETER B. BENSINGER,  
Administrator.

NATIONAL FOUNDATION ON THE  
ARTS AND THE HUMANITIES

LITERATURE ADVISORY PANEL

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub.

L. 92-463), as amended, notice is hereby given that a meeting of the Literature Advisory Panel to the National Council on the Arts will be held on February 17, 1978, from 9 a.m. to 5 p.m.; on February 18, 1978, from 9 a.m. to 5 p.m.; and on February 19, 1978, from 9 a.m. to 2 p.m., in Room 1422, Columbia Plaza Office Building, 2401 E Street NW., Washington, D.C. 20506.

A portion of this meeting will be open to the public on February 18, 1978, from 2 p.m. to 5 p.m. At this time there will be a question-and-answer exchange.

The remaining sessions of this meeting on February 17, 1978, from 9 a.m.-5 p.m.; on February 18, 1978, from 9 a.m.-2 p.m.; and on February 19, 1978, from 9 a.m.-2 p.m. are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the FEDERAL REGISTER, March 17, 1977, these sessions will be closed to the public pursuant to subsections (c) (4), (6), and 9(B) of section 552(b) of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. Robert M. Sims, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call 202-634-6378.

ROBERT M. SIMS,  
Administrative Officer, National  
Endowment for the Arts, Na-  
tional Foundation on the Arts  
and the Humanities.

## NATIONAL SCIENCE FOUNDATION

ADVISORY PANEL FOR SOCIAL AND  
DEVELOPMENTAL PSYCHOLOGY

Closed Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

SUBCOMMITTEE ON SOCIAL AND DEVELOPMENTAL PSYCHOLOGY OF THE ADVISORY COMMITTEE FOR BEHAVIORAL AND NEURAL SCIENCES

Date and time: February 16-17, 1978, 9 a.m.-5 p.m. each day.

Place: National Science Foundation, 1800 G Street NW., Washington, D.C. 20550, Room 338.

Type of meeting: Closed.

Contact person: Kelly G. Shaver, Program Director for Social and Developmental Psychology, Room 317, National Science Foundation, Washington, D.C. 20550, telephone 202-632-5714.

Purpose of panel: To provide and evaluate research proposals and projects as part of the selection process for awards.

Reason for closing: The proposals and projects being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals and projects. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee pursuant to provisions of section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make determinations by the Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,  
Acting Committee  
Management Officer.

JANUARY 25, 1978.

[FR Doc. 78-2491 Filed 1-27-78; 8:45 am]

## [7555-01]

## NATIONAL SCIENCE BOARD REGIONAL FORUMS

The National Science Board is planning a series of regional forums in response to language in the NSF Authorization Act for Fiscal Year 1976 which directed the Foundation " . . . to facilitate the participation of members of the public in the formulation, development, and conduct of the National Science Foundation's programs, policies, and priorities."

The primary objective of the forums is to encourage the expression of views by the general public on scientific and science education issues. Several Members of the National Science Board will participate in each forum; participation is invited from business, State and local government, educational institutions, public interest and citizen groups, and the community at large. Ideas exchanged at the forum will help the Board expand its information base and assist in its policymaking role for the National Science Foundation.

The NSB will hold the fifth of its regional forums in Denver, Colo., on February 21, 1978. Six issue areas were identified for discussion by a regionally based planning group. These areas are briefly described:

## WATER

When the supply of water is limited, as is the case with this region, demand becomes more intense. Concerns relating to water management, water availability for the numerous requirements, jurisdictional issues, and water quality questions need intensive examination and research. In addition, the issues relating to water resources require appropriate and effective discussion with the broadest possible public.

## ENERGY

Energy is one of this region's greatest resources. Yet within this vast re-

source are questions relating to environmental concerns and regional growth strategies. There remain questions in the energy area regarding access to and development of traditional and nontraditional sources of energy, the conservation of energy, the research related to various energy sources, socioeconomic impacts, and the role of institutions on energy-related research. In addition, there needs to be greater public understanding of this complex issue.

## LAND USE

Land as a resource is also finite in nature. Issues of land use and the related management questions regarding institutions are particularly important to this region. Whether land be for recreational, agricultural, industrial, or municipal use and purposes, additional research on land use priorities is required.

## THE ROLE OF COMMUNICATION AND INFORMATION

Information and understanding combine to form knowledge. Communication of this knowledge is essential to the resolution of problems dealing with such issues as water, energy, and land. Components of this knowledge include awareness, affordability, and understanding. Science, technology, and research create large amounts of information; however, more investigation leading to how to use and communicate the research information is needed.

## THE ROLE OF SCIENCE, TECHNOLOGY, AND RESEARCH

Societal problems and goals are closely interwoven with science, technology, and research. This interrelationship creates opportunities as well as challenges. By the proper use of science, technology, and research, problems once considered insoluble may now be resolved and, as potential problems emerge, these may be addressed before they become divisive issues. Since many decisions have political and socioeconomic components, as well as scientific and technical ones, these aspects must be considered and addressed. The specific issues of water, energy, and land use are current examples of this interaction of science, technology, and research in today's society.

## THE ROLE OF INSTITUTIONS

The implementation of solutions to many issues such as water, energy, and land involve institutions such as those in the governmental sector (Federal, State, local, and Indian), various citizen groups, legal and academic groups, and businesses and industry. Problems may occur more rapidly than institutions can change; this gradually dimin-

ishes the effectiveness of a single solution to the problem. Institutions often operate by crisis decisionmaking and may make decisions based upon inadequate information, even though research results of science, technology, and research are often available. How might this problem be overcome?

In addition to the issues selected above, the National Science Board is asking that participants consider three areas of concern to the Board and provide some suggestions to the Board on these issues. The three areas are:

## (1) CAREERS FOR WOMEN, MINORITIES, AND HANDICAPPED IN SCIENCE

The National Science Board hopes to increase the participation of women, minorities, and the handicapped in careers in science. These groups have been traditionally underrepresented in the sciences and in receipt of doctoral degrees in the sciences. Programs have been initiated in order to improve the opportunities for these groups. Are other types of forms of programs needed?

## (2) YOUNG RESEARCHERS: SUPPLY AND DEMAND

Fewer and fewer faculty positions in the sciences are becoming available today. As a result, the supply of young Ph. D.'s is outstripping the demand for them in academic science. If the supply is curtailed, do we lose a generation of scientific researchers? Are other sources of employment available and appropriate?

## (3) ALTERNATIVE PERFORMERS OF BASIC RESEARCH

The National Science Foundation's primary mission is the support of basic research in the sciences. The Nation's primary producer of basic research is the university. Almost all of NSF's funds for basic research go to colleges and universities. What should the role of industry or other possible producers be in federally funded basic research?

The Fifth NSB Forum will take place at the Cosmopolitan Hotel in Denver, Colo. The Forum will begin at 9 a.m. and adjourn at 4:45 p.m. on February 21. Participation is encouraged from interested citizens from the States of Arizona, California, Colorado, Nevada, New Mexico, and Utah. Further information may be obtained from the Community Affairs Branch, Room 527, National Science Foundation, 1800 G Street NW., Washington, D.C.

Interested citizens from the far southwest region who cannot attend the Forum are invited to send written comments on science policy issues to

the above NSF address by March 15, 1978.

RAYMOND E. BYE, Jr.,  
Office of Government  
and Public Programs.

JANUARY 25, 1978.

## [7555-01]

## SUBCOMMITTEE ON POLITICAL SCIENCE OF THE ADVISORY COMMITTEE FOR SOCIAL SCIENCES

## Closed Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Subcommittee on Political Science of the Advisory Committee for Social Sciences.

Date and Time: February 16 and 17, 1978, 9 a.m. to 5 p.m. each day.

Place: Room 643 and Room 338, National Science Foundation, 1800 G Street NW., Washington, D.C. 20550.

Type of meeting: Closed.

Contact person: Dr. Richard E. Dawson, Program Director, Political Science Program, Room 316, National Science Foundation, Washington, D.C. 20550, telephone 202-632-4348.

Purpose of subcommittee: To provide advice and recommendations concerning support for research in political science.

Agenda: To review and evaluate research proposals and projects as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,  
Acting Committee  
Management Officer.

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-14270; File No. SR-Amex-77-37]

## AMERICAN STOCK EXCHANGE, INC.

## Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on December 12, 1977, the above-men-

tioned self-regulatory organization filed with the Securities and Exchange Commission a rule change as follows:

## STATEMENT OF TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

Commentary .01 to Rule 347 is amended to read as follows:

## GRATUITIES TO EMPLOYEES OF FINANCIAL CONCERNS

\*\*\* Commentary.

.01 Gratuity Defined.—A gratuity is a gift of any nature. Pursuant to Exchange policy, however, gratuities valued at [\$25] \$50 or less in total to any one person during a calendar year are considered an exception to Rule 347 and no notice of the employer's consent is required to be filed with the Exchange.

Commentary .01 and .02 to Rule 348 are redesignated .02 and .03 respectively and a new .01 is added to read as follows:

## GRATUITIES TO EMPLOYEES OF EXCHANGE

\*\*\* Commentary.

.01. Gratuity Defined.—A gratuity is a gift of any nature. Pursuant to Exchange policy, however, gratuities valued at \$50 or less in total to any one person during a calendar year are considered an exception to Rule 348, and prior written approval of the Exchange is not required.

\*\*\*

## AMEX' STATEMENT OF BASIS AND PURPOSE

The purpose of the proposed rule change is to modify Exchange policy as to the amount of a gratuity which will be considered an exception to the requirements of Rule 347 and 348, to take account of inflation. The \$25 exception has been in effect for many years.

The proposed change relates to a stated policy of an administrative character, and is consistent with section 6(b)(1) of the Act.

No comments were solicited or received with respect to the proposed rule change.

The Amex has determined that no burden on competition will be imposed by the proposed rule change.

The foregoing rule change has become effective, pursuant to section 19(b)(3) of the Securities Exchange Act of 1934. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protec-

tion of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary to the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted within 21 days of the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,  
Secretary.

DECEMBER 14, 1977.

[FR Doc. 78-2508 Filed 1-27-78; 8:45 am]

#### [8010-01]

[Rel. No. 10101; (811-1694)]

#### DAVIDGE EARLY BIRD FUND

Filing of Application Order Declaring That Company Has Ceased To Be Investment Company

JANUARY 23, 1978.

In the matter of Davidge Early Bird Fund, 1747 Pennsylvania Avenue NW., Washington, D.C. 20036.

Notice is hereby given, that Davidge Early Bird Fund ("Applicant"), registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified management investment company, has filed an application pursuant to section 8(f) of the Act for an order of the Commission declaring that the Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that at a special meeting of shareholders held on December 20, 1977, Applicant's shareholders approved an Agreement and Plan of Reorganization and Liquidation providing for exchange of substantially all of Applicant's assets for shares of the common stock of Stratton Growth Fund. The settlement upon the Plan of Reorganization took

place on December 21, 1977, and Applicant received 82,512,357 shares of the common stock of Stratton Growth Fund in exchange for its assets. As of December 30, 1977, Applicant had distributed all of such Stratton Growth Fund shares to shareholders on a pro rata basis and retained no other assets after the distribution. Provision has been made for payment of all of Applicant's liabilities.

Section 8(f) provides, in substance, that whenever the Commission, on its own motion or upon application, finds that a registered investment company has ceased to be an investment company, it may so declare by order, and upon the effectiveness of such order the registration of such company shall cease to be in effect.

Notice is further given, that any interested person may, not later than February 17, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant(s) at the address(es) stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,  
Secretary.

#### [8010-01]

[Rel. No. 14408; (SR-MSE-77-38)]

#### MIDWEST STOCK EXCHANGE, INC.

Order Approving Proposed Rule Change

JANUARY 23, 1978.

In the matter of Midwest Stock Exchange, Inc., 120 South LaSalle Street, Chicago, Ill. 60606.

On October 27, 1977, the Midwest Stock Exchange, Inc., filed with the Commission, pursuant to Section 19(b) of the Securities Exchange Act of 1934 (the "Act"), as amended by the Securities Acts Amendments of 1975, and Rule 19b-4 thereunder, copies of a proposed rule change to eliminate its policy requiring agreements for all discretionary accounts for which options are traded to be renewed annually in writing.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 14266 (December 13, 1977)) and by publication in the FEDERAL REGISTER (42 FR 63977 (December 21, 1977)).

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges, and in particular, the requirements of Section 6, and the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority:

GEORGE A. FITZSIMMONS,  
Secretary.

[FR Doc. 78-2505 Filed 1-27-78; 8:45 am]

#### [8010-01]

[Rel. No. 34-14397; File No. SR-MSRB-77-9]

#### MUNICIPAL SECURITIES RULEMAKING BOARD

##### Proposed Rule Changes

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on January 17, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

##### STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGES

The Municipal Securities Rulemaking Board (the "Board") is filing herewith the amendments set forth below (hereafter referred to as the "proposed amendments" or the "proposed rule changes") to the Board's proposed rule G-11 (hereafter sometimes referred to as the "proposed rule").

Proposed rule G-11 establishes certain terms and conditions for sales of

Proposed rule G-11 was filed with the Securities and Exchange Commission on August 17, 1977 (File No. SR-MSRB-77-9), and has not yet been approved.

new issue municipal securities during the underwriting period. The proposed amendments effect the following changes in the proposed rule:

1. The definition of the term "order period," which had been in section (e) of the proposed rule, has been moved to the definitional section.

2. The definition of the term "underwriting period" has been modified to provide that it ends at the later of such time as the issuer delivers the securities to the syndicate or the syndicate no longer retains an unsold balance of securities.

3. Section (b) of the proposed rule, relating to disclosure of capacity, has been modified to require disclosure of identity of the municipal securities dealer submitting an order for a municipal securities investment portfolio (a "related portfolio"), or for an affiliated municipal securities investment trust or accumulation account (hereafter collectively referred to as an "affiliated investment trust"), rather than the specific identity of the related portfolio or affiliated investment trust for which the order is submitted.

4. Section (c) of the proposed rule, relating to confirmations of sales, has been modified to permit a confirmation of sale to be issued for the account of a related portfolio or affiliated investment trust to the affiliated municipal securities dealer placing the order.

5. A new section (d) has been added which requires disclosure of the identity of persons on whose behalf group orders are submitted to a syndicate or syndicate member. The senior syndicate manager must disclose to other members of the syndicate, upon request made prior to final settlement of the account, the identity of the person on whose behalf a group order is submitted, as well as the aggregate face amount of each maturity and the maturity dates of the securities which are the subject of the order. "Group order" is defined in section (a) to mean an order for securities held in syndicate which is for the account of all members of the syndicate on a pro rata basis in proportion to their respective participations in the syndicate. With respect to disclosure of the identity of related portfolios and affiliated investment trusts, the requirements of section (b) would govern.

6. A new sentence has been added to section (e) of the proposed rule (formerly section (d)), relating to the priority of orders, expressly placing on a syndicate manager the burden of justifying that any allocation made in a manner other than in accordance with the agreed-upon order of priority is in the best interests of the syndicate.

7. Section (f) of the proposed rule (formerly section (e)), has been modified to require that communications relating to priority of orders and order

period be in writing. This would apply both to communications between a syndicate manager and syndicate members and between syndicate members and others.

8. Section (g) of the proposed rule (formerly section (f)), relating to disclosure of syndicate expenses, has been modified to clarify that, for purposes of the proposed rule, the term "management fees" included compensation accruing to a syndicate manager in the circumstances described.

The proposed amendments also include changes of a technical or clarifying nature.

##### STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule changes is as follows:

##### Purpose of Proposed Rule Changes

Proposed rule G-11 is designed to meet the Board's statutory mandate in section 15B(b)(2)(K) of the Securities Exchange Act of 1934, as amended (the "Act"), by increasing the scope of information available to syndicate managers and members, other municipal securities professionals and the investing public, in connection with the distribution of new issue municipal securities. The Board believes that such information will, among other matters, enable syndicates to make more informed decisions in allocating securities among prospective purchasers; assure that information obtained by the senior syndicate manager in its capacity as such is available to other members of the syndicates; enable prospective purchasers to frame their orders to the syndicate in a manner that will enhance their ability to obtain securities; render syndicate managers accountable for the allocation of securities in accordance with announced allocation procedures; and provide syndicate members with information regarding syndicate expenses to enable them to analyze the operation of the syndicate account and to make an initial determination whether to participate in a syndicate. The Board has adopted the proposed amendments in furtherance of these purposes and as a result of its review of the proposed rule and its consideration of comments received on the proposed rule subsequent to its filing with the Commission. The specific purposes of the proposed amendments are discussed below.

In the proposed rule as filed, the term "underwriting period" was defined to end "at such time as the issuer delivers the securities to the syndicate." One of the commentators

\*The Commission published the proposed rule for comment in the FEDERAL REGISTER on August 26, 1977 (FR Doc. 77-24780).

on the proposed rule, Continental Illinois National Bank & Trust Co. ("Continental Bank") noted that under this definition the disclosure requirements of the proposed rule would cease if an issuer effects early delivery of securities, although distribution of the securities might still be in process. To address this point, the proposed amendments modify the definition of "underwriting period" to provide that it ends, for purposes of the proposed rule, at the later of such time as the issuer delivers the securities to the syndicate or the syndicate no longer retains an unsold balance of securities. This modification will assure that the underwriting period is of sufficient duration to accomplish the purposes of the proposed rule.

The proposed amendments also modify the disclosure requirements in section (b) of the proposed rule with respect to the identity of related portfolios and affiliated investment trusts. Continental Bank, the Dealer Bank Association, and the Public Securities Association (the "PSA") all objected to the provision in proposed rule G-11(b) requiring disclosure of the specific identity of the related portfolio or affiliated investment trust. After consideration of their comments, the Board determined that such disclosure is not necessary to accomplish the purpose of section (b) of the proposed rule which is to enable the senior syndicate manager to evaluate on an informed basis for allocation purposes all orders submitted to the syndicate and to assure that all members of the syndicate have access to the information provided to the senior syndicate manager. Accordingly, the proposed amendments modify section (b) to require a syndicate manager to disclose the identity of the municipal securities dealer submitting an order for a related portfolio or affiliated investment trust, and that the order is for a related portfolio or for an affiliated investment trust of such municipal securities dealer, rather than the specific identity of the related portfolio or affiliated investment trust for which the order is submitted. Reference is made to the discussion below concerning new section (d) of the proposed rule.

Section (c) of the proposed rule has been modified to reflect the change effected by the proposed amendments in section (b). Since the specific identity of a related portfolio or affiliated investment trust will not be required, the confirmation of sale may be issued to the municipal securities dealer who places the order, indicating on the confirmation that it is for the account of a related portfolio or for the account of an affiliated investment trust, as the case may be. Section (c) has also been amended to make clear that it is not intended to preclude designated sales.

The proposed amendments also add a new section (d) to the proposed rule. Under this section, every municipal securities dealer that submits a group order, as defined, will be required to disclose the identity of the person for whose account the order is submitted. Submission of a group order directly to the senior syndicate manager would be deemed to be the submission of a group order by such manager to the syndicate. The senior syndicate manager must disclose to the other syndicate members, upon request made prior to final settlement of the account, certain information concerning the group order, including the identity of the person on whose behalf the group order is submitted.

Group orders are defined for purposes of the proposed rule to mean orders for securities held in syndicate, which are for the account of all members of the syndicate on a pro rata basis in proportion to their respective participations in the syndicate. The definition would require disclosure with respect to group orders submitted by municipal securities dealers, whether or not members of the syndicate, as well as group orders of customers. Designated orders are not subject to the disclosure requirements in new section (d) to the extent of the designation.

As a matter of contract and law, group orders belong to all members of a syndicate on a pro rata basis in proportion to their respective participations in the syndicate. The Board therefore believes it appropriate to require disclosure of the identity of persons on whose behalf group orders are submitted and to require the senior syndicate manager to give access to such information to the other members of the account. In its comment letter on proposed rule G-11 the Weeden Holding Corp. ("Weeden") states that "the knowledge of which institutions are currently buying is of value to the marketplace, and the identity of these buyers should not be restricted to managers alone."

As reflected in the proposed amendment to section (b), related portfolios and affiliated investment trusts may be identified by reference to the affiliated municipal securities dealer entering an order on their behalf. The Board believes that this information is sufficient to identify the entity or entities on whose behalf the order is placed and that any further identification requirement would be burdensome and constitute unnecessary regulation. For example, a municipal securities dealer often purchases securities on behalf of banks within a bank holding company system without the specific allocation of such securities among such banks having been determined. To require the specific identification of the related portfolio or portfolios for which securities are being

purchased would necessitate a decision within the bank holding company system at an early point concerning the allocation of the securities. This type of decision does not serve the purposes of proposed rule G-11 and could have an undue adverse impact on the legitimate investment activities of related portfolios within a bank holding company system. By contrast, the specific identity of nonrelated purchasers on whose behalf group orders are submitted is necessary to identify sufficiently the account for which the orders are submitted.

The PSA and Weeden expressed concern in their respective comment letters regarding the provision in section (e) (formerly section (d)) authorizing a syndicate manager on a case-by-case basis to allocate securities in a manner other than in accordance with the agreed upon order of priority. If the syndicate manager determines in its discretion that it is in the best interests of the syndicate. The Board believes that the grant of such discretion, if permitted by a syndicate, is appropriate and necessary in order to provide a syndicate manager with the flexibility to react to unanticipated developments in the course of an underwriting. However, the Board believes that the responsibility of a syndicate manager to make the required determination before departing from the agreed upon order of priority should be emphasized and made more explicit. Accordingly, the proposed amendments expressly place the burden on the syndicate manager to justify that such an allocation is in the best interests of the syndicate, should the question arise.

The Chubb Corp. and Weeden recommend that the requirement in section (f) of the proposed rule (formerly section (e)) to disclose information relating to the establishment of the order of priority be modified to require that such disclosure be in writing. The Board believes this is an appropriate and necessary modification to assure that the information is transmitted to all interested parties.

With respect to the proposed amendments in section (g) of the proposed rule (formerly section (f)), the National Association of Securities Dealers, Inc., recommended that "management fees" be defined to include compensation accruing to a syndicate manager in the situation in which a syndicate manager buys securities from an issuer and sells them to a syndicate of which it is the manager. To address this concern, the Board has added a new sentence to section (g) providing that, for purposes of the proposed rule, management fees will include any amount to be realized by a syndicate manager and not shared with other members of the syndicate, which is attributable to the difference in the price to be paid

to an issuer for the purchase of a new issue of municipal securities and the price at which such securities are to be delivered by the syndicate manager to the members of the syndicate.

The other changes effected by the proposed amendments are of a clarifying or technical nature.

#### Basis Under the Act for Proposed Rule Changes

The Board adopted proposed rule G-11 pursuant to sections 15B(b)(2)(C) and 15B(b)(2)(K) of the Act. Section 15B(b)(2)(C) provides that the Board's rules must

be designed . . . to promote just and equitable principles of trade . . . to remove impediments to and perfect the mechanism of a free and open market in municipal securities, and, in general, to protect investors and the public interest; and [must] not be designed to permit unfair discrimination between customers . . .

Section 15B(b)(2)(K) authorizes and directs the Board to adopt rules to

. . . establish the terms and conditions under which any municipal securities dealer may sell, or prohibit any municipal securities dealer from selling, any part of a new issue of municipal securities to a municipal securities investment portfolio during the underwriting period.

#### Comments Received From Members, Participants or Others on Proposed Rule Changes

The Commission published the proposed rule for comment in the FEDERAL REGISTER on August 26, 1977. The Board reviewed all of the comment letters received by the Commission as well as letters submitted to the Board on the proposed rule, which letters have previously been forwarded to the Commission.

#### Burden on Competition

The Board is of the opinion that the proposed rule changes will not impose any burden on competition but, to the contrary, will promote competition by increasing the information available in the market place regarding the distribution of new issue municipal securities.

By March 6, 1978, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule changes, or

(B) Institute proceedings to determine whether the proposed rule changes should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submis-

sions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted by February 20, 1978.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,  
Secretary.

JANUARY 20, 1978.

#### Text of Proposed Rule Changes<sup>1</sup>

Rule G-11. Sales of new issue municipal securities during the underwriting period.

(a) Definitions. For purposes of this rule, the following terms have the following meanings:

(i) The term "accumulation account" means an account established in connection with a municipal securities investment trust to hold securities pending their deposit in such trust.

(ii) The term "customer" means any person other than a broker, dealer, or municipal securities dealer acting in its capacity as such.

(iii) The term "group order" means an order for securities held in syndicate, which order is for the account of all members of the syndicate on a pro rata basis in proportion to their respective participations in the syndicate. Any such order submitted directly to the senior syndicate manager will, for purposes of this rule, be deemed to be the submission of such order by such manager to the syndicate.

(iv) The term "municipal securities investment trust" means a unit investment trust, as defined in the Investment Company Act of 1940, the portfolio of which consists in whole or in part of municipal securities.

(v) The term "order period" means the period of time, if any, announced by a syndicate during which orders will be solicited for the purchase of securities held in syndicate.

(vi) The term "related portfolio," when used with respect to a municipal securities dealer, means a municipal securities investment portfolio of such municipal securities dealer or of any person directly or indirectly controlling, controlled by or under common

<sup>1</sup> Italics indicate additions; [brackets] indicate deletions.

control with such municipal securities dealer.

(vi) The term "syndicate" means an account formed by two or more persons for the purpose of purchasing, directly or indirectly, all or any part of a new issue of municipal securities from the issuer, and making a distribution thereof.

(vii) The term "underwriting period" means the period commencing with the first submission to a syndicate of an order for the purchase of new issue municipal securities or the purchase of such securities from the issuer, whichever first occurs, and ending at such time as the issuer delivers the securities to the syndicate or the syndicate no longer retains an unsold balance of securities, whichever last occurs.

(b) Disclosure of Capacity. Every municipal securities dealer that submits an order to a syndicate or to a member of a syndicate for the purchase of municipal securities held by the syndicate shall disclose at the time of submission of such order if the securities are being purchased for its dealer account, for the account of a related portfolio of such municipal securities dealer, for a municipal securities investment trust sponsored by such municipal securities dealer, or for an accumulation account established in connection with such a municipal securities investment trust. The senior syndicate manager shall promptly disclose to the other members of the syndicate, upon request made prior to final settlement of the syndicate account, each order submitted for such a related portfolio, municipal securities investment trust, or accumulation account, indicating the identity of the municipal securities dealer submitting the order [related portfolio, municipal securities investment trust, or accumulation account], whether it is for a related portfolio or for a municipal securities investment trust or for an accumulation account, and the aggregate face amount of each maturity and the maturity dates of the securities which are the subject of the order.

(c) Confirmations of Sale. Sales of securities held by a syndicate to a related portfolio, municipal securities investment trust or accumulation account referred to in section [paragraph] (b) above shall be confirmed by the syndicate manager directly to such related portfolio, municipal securities investment trust or accumulation account or for the account of such related portfolio, municipal securities investment trust or accumulation account to the municipal securities dealer submitting the order. Nothing herein contained shall be construed to require that sales of municipal securities to a related portfolio, municipal securities investment trust or accumulation account be made for the benefit of [by] the syndicate.

(d) Disclosure of group orders. Every municipal securities dealer that submits a group order to a syndicate or to a member of a syndicate, shall disclose at the time of submission of such order the identity of the person on whose behalf the order is submitted, except as otherwise provided in section (b) of this rule. The senior syndicate manager shall promptly disclose to the other members of the syndicate, upon request made prior to final settlement of the syndicate account, each group order, indicating the identity of the person on whose behalf the order is submitted (except as otherwise provided in section (b) of this rule), the aggregate face amount of each maturity and the maturity dates of the securities which are the subject of the order.

(e)[(d)] Priority of orders. Every syndicate shall establish [provide for] the priority to be accorded to different types of orders for the purchase of securities from the syndicate during the underwriting period and, if such priority may be changed, the procedure for making changes. For purposes of this rule, the requirement to establish [provide for] priority shall not be satisfied if a syndicate provides only that the syndicate manager or managers may [solely by a provision permitting the syndicate manager or managers to] determine in the manager's or managers' discretion the priority to be accorded different types of orders. Notwithstanding the preceding sentence [foregoing], a syndicate may include a provision permitting the syndicate manager or managers on a case-by-case basis to allocate securities in a manner other than in accordance with the agreed upon order of priority, if the syndicate manager or managers determine in its or their discretion that it is in the best interests of the syndicate. In the event any such allocation is made, the syndicate manager or managers shall have the burden of justifying that such allocation was in the best interests of the syndicate.

(f)[(e)] Communications relating to priority of orders and order period. Prior to the first offer of any securities by a syndicate, the senior syndicate manager shall furnish in writing [communicate] to the other members of the syndicate (i) the priority to be accorded to different types of orders for securities to be distributed by the syndicate, (ii) the procedure, if any, by which such priority may be changed, (iii) if the senior syndicate manager or managers are to be permitted on a case-by-case basis to allocate securities in a manner other than in accordance with the agreed upon order of priority, the fact that they are to be permitted to do so, and (iv) if there is to be an order period, whether orders may be confirmed prior to the end of the order period. [For purposes of this provision, the term "order period"

shall mean a period of time announced by the syndicate during which orders will be solicited for the purchase of securities held in syndicate.) Any change in the provisions governing the priority of orders shall be promptly furnished in writing [communicated] by the senior syndicate manager to the other members of the syndicate. Syndicate members shall promptly furnished in writing [communicate] the information described in this section [paragraph] to others, upon request.

(g)(1)(f) Disclosure of syndicate expenses. At or before the final settlement of a syndicate account, the senior syndicate manager shall furnish to the other members of the syndicate an itemized statement setting forth the nature and amounts of all actual expenses incurred on behalf of the syndicate. Notwithstanding the foregoing, any such statement may include an item for miscellaneous expenses, provided that the amount shown under such item is not disproportionately large in relation to other items of expense shown on the statement and includes only minor items of expense which cannot be easily categorized elsewhere in the statement. Discretionary fees for clearance costs [and management fees] to be imposed by a syndicate manager and management fees shall be disclosed to syndicate members prior to the submission of a bid, in the case of a competitive sale, or prior to the execution of a purchase contract with the issuer, in the case of a negotiated sale. For purposes of this section, the term "management fees" shall include, in addition to amounts categorized as management fees by the syndicate manager, any amount to be realized by a syndicate manager and not shared with the other members of the syndicate, which is attributable to the difference in price to be paid to an issuer for the purchase of a new issue of municipal securities and the price at which such securities are to be delivered by the syndicate manager to the members of the syndicate.

#### [8010-01]

[Rel. No. 14403; (File No. SR-OCC-77-13)]

#### OPTIONS CLEARING CORP.

Order Approving Rule Change Submitted To Improve Its Disciplinary Procedures.

JANUARY 23, 1978.

In the matter of the Options Clearing Corp. 5950 Sears Tower, Chicago, Ill. 60606.

On October 11, 1977, The Options Clearing Corp. ("OCC") submitted, pursuant to Rule 19b-4 under the Securities Exchange Act of 1934 (the "Act"), a proposed rule change to enable OCC to enforce disciplinary

proceedings against its members more effectively.

In accordance with section 19(b) of the Act and Rule 19b-4 thereunder, the proposed rule change was published in the FEDERAL REGISTER (42 FR 59578, November 18, 1977), and the public was invited to submit comments until December 9, 1977. Notice of the filing and an invitation for comments also appeared in Securities Exchange Act Release No. 14163, November 10, 1977. No letters of comment were received.

The Commission has reviewed the OCC submission and finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies, and in particular, the requirements of section 17A and the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the proposed rule change contained in File No. SR-OCC-77-13 be, and hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,  
Secretary.

#### [3190-01]

#### OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

[Docket No. 301-10]

#### AMERICAN IRON & STEEL INSTITUTE

#### Discontinuance Regarding Bilateral Agreement Petition

Pursuant to regulations of the Office of the Special Representative for Trade Negotiations the section 301 committee has provided for public hearings and has conducted a review with respect to a petition by the American Iron & Steel Institute. That petition alleged that a bilateral agreement between the European Community and Japan diverted significant quantities of Japanese steel to the United States adversely affecting U.S. commerce. (See FEDERAL REGISTER of October 15, 1976, p. 45628.)

The Special Representative for Trade Negotiations has reported to the President the results of that review. Pursuant to Presidential decision of January 18, 1977, further action on this petition is hereby discontinued.

The following major factors were significant in the determination to discontinue the section 301 complaint;

(1) During the period covered by the understanding, exports to the EC by

the six largest Japanese steel companies, operating as a government approved cartel, were limited to 1.22 million metric tons per year. However, actual exports by these companies were substantially less in both 1976 and 1977, suggesting that depressed market conditions in the EC were a more effective restraint than the understanding.

(2) The pattern of Japanese exports to the United States of steel products covered by the cartel have been generally consistent with domestic market conditions here. The major growth in export volume in 1976 was in product categories where U.S. demand grew substantially (e.g., sheets).

(3) The surge in Japanese steel exports in 1976 and 1977 was widespread and the increases in shipments to the U.S. market were not more pronounced than increases to many other markets. The U.S. share of one-fifth of total Japanese steel exports has remained relatively stable. The surge appears to be principally the result of the depressed domestic demand in Japan and low rates of steel capacity utilization which created pressure on Japanese firms to increase exports.

On the basis of these considerations, there is not sufficient justification to claim that the EC/Japanese understanding created any unfair burden on the United States.

The discontinuation is effective January 30, 1978.

ROBERT S. STRAUSS,  
Special Representative  
for Trade Negotiations.

#### [4810-22]

#### DEPARTMENT OF THE TREASURY

#### U.S. Customs Service

#### CERTAIN TEXTILES AND TEXTILE PRODUCTS FROM ARGENTINA

#### Receipt of Countervailing Duty Petition and Initiation of Investigation

AGENCY: U.S. Customs Service, Treasury Department.

ACTION: Initiation of countervailing duty investigation.

SUMMARY: This notice is to advise the public that a satisfactory petition has been received and that a countervailing duty investigation has been started to determine if benefits are paid by the Government of Argentina to manufacturers or exporters of textile products which constitute the payment of a bounty or grant within the meaning of the U.S. countervailing duty law. A preliminary determination will be made not later than May 7, 1978, and a final determination not later than November 7, 1978.

EFFECTIVE DATE: January 30, 1978.

#### FOR FURTHER INFORMATION CONTACT:

Vincent P. Kane, Operations Officer, Technical Branch, Duty Assessment Division, Office of Operations, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, 202-566-5492.

SUPPLEMENTARY INFORMATION: A petition in satisfactory form was received on November 7, 1977, alleging that benefits conferred by the Government of Argentina upon the manufacture, production or exportation of men's and boys' apparel and textile mill products of cotton, wool, and manmade fiber from Argentina constitute the payment or bestowal of a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303).

For purposes of this notice "textile mill products" include yarns, fabrics, household textiles, and miscellaneous products of textile mills made of cotton, wool, and manmade fibers, as specified in U.S. bilateral textile agreements; and "men's and boys' apparel" includes those items described in the appendix to this notice, together with their Tariff Schedule classifications.

The textile items involved include those in categories 1-38, 101-110, and 200-213 of the correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated, as published in the FEDERAL REGISTER on February 3, 1975 (40 FR 5010), and amended on December 31, 1975 (40 FR 60220), December 30, 1976 (41 FR 56881), January 21, 1977 (42 FR 3888) and March 7, 1977 (42 FR 12898). In addition, all

Alleged bounties or grants as provided in the petition include the following:

1. Customs duty exemptions on imports of equipment to be used for export production.
2. Regional incentives including tax concessions and development grants.
3. Cash rebates (reembolso) or tax credits of up to 30 percent paid on export transactions.
4. Preferential financing for export operations and transactions.
5. Government provisions of export credit insurance that is not otherwise available privately and is operated at below-cost rates.
6. More favorable exchange rate for export transactions and adjustments to offset domestic cost increases.

Pursuant to section 303(a)(4) Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(4)), the Secretary of the Treasury is required to issue a preliminary determination as to whether or not any bounty or grant is being paid or bestowed within the meaning of that statute within 6 months of receipt, in satisfactory form, of a petition alleging the payment or bestowal of a bounty or grant. A final determination must be issued within 12 months of the receipt of such petition.

Therefore, a preliminary determination on this petition will be made no later than May 7, 1978, as to whether or not the alleged payments or bestowals conferred by the Government of Argentina upon the manufacture, production or exportation of the merchandise described above constitute a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended. A final determination will be issued no later than November 7, 1978.

This notice is published pursuant to section 303(a)(3) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(3)), and § 159.47(c), Customs Regulations (19 CFR 159.47(c)).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190 Revision 14, July 1, 1977, the provisions of Treasury Department Order No. 165, Revised, November 2, 1954 and § 159.47(c) of the Customs Regulations (19 CFR 159.47(c)), insofar as they pertain to the initiation of a countervailing duty investi-

similar products not covered by these categories because they are "certified handloomed and folklore products" are considered "textile mill products" for the purposes of this notice.

gation by the Commissioner of Customs, are hereby waived.

HENRY C. STOCKELL, Jr.,  
Acting General Counsel  
of the Treasury.

JANUARY 19, 1978.

## [4810-22]

## CERTAIN TEXTILES AND TEXTILE PRODUCTS FROM BRAZIL

## Receipt of Countervailing Duty Petition and Initiation of Investigation

AGENCY: U.S. Customs Service, Treasury Department.

ACTION: Initiation of countervailing duty investigation.

SUMMARY: This notice is to advise the public that a satisfactory petition has been received and that a countervailing duty investigation has been started to determine if benefits are paid by the Government of Brazil to manufacturers or exporters of textile products which constitute the payment of a bounty or grant within the meaning of the U.S. Countervailing Duty Law. A preliminary determination will be made not later than May 7, 1978, and a final determination not later than November 7, 1978.

EFFECTIVE DATE: January 30, 1978.

## FOR FURTHER INFORMATION CONTACT:

Vincent P. Kane, Operations Officer, Technical Branch, Duty Assessment Division, Office of Operations, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, 202-566-5492.

SUPPLEMENTARY INFORMATION: A petition in satisfactory form was received on November 7, 1977, alleging that benefits conferred by the Government of Brazil upon the manufacture,

production or exportation of men's and boys' apparel and textile mill products of cotton, wool, and man-made fiber from Brazil constitute the payment or bestowal of a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303).

For purposes of this notice "textile mill products" include yarns, fabrics, household textiles, and miscellaneous products of textile mills made of cotton, wool, and man-made fibers, as specified in U.S. bilateral textile agreements; and "men's and boys' apparel" includes those items described in the appendix to this notice, together with their Tariff Schedule classifications.

The textile items involved include those in categories 1-38, 101-110, and 200-213 of the Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated, as published in the FEDERAL REGISTER on February 3, 1975 (40 FR 5010), and amended on December 31, 1975 (40 FR 60220), December 30, 1976 (41 FR 56881), January 21, 1977 (42 FR 3888) and March 7, 1977 (42 FR 12898). In addition, all similar products not covered by these categories because they are "certified handloomed and folklore products" are considered "textile mill products" for the purposes of this notice.

Alleged bounties or grant as provided in the petition include the following:

1. Excessive Industrial Products Tax (IPI) and Goods Circulation Tax (ICM) credits on export transactions.

2. Exemption of export profits from the corporate income tax.

3. Preferential financing for export transactions.

4. Tax relief on equipment and earnings to certain new industries and to industries located in economically depressed areas.

5. Partial exemption from payment of IPI and import duties on machinery purchases dependent on export performance.

The leather wearing apparel from Brazil specified in the petition which is classifiable under item 791.7600 of the Tariff Schedules of the United States Annotated (TSUSA) is eligible for duty free entry under the Generalized System of Preferences. In the event that it becomes necessary to refer this matter to the United States International Trade Commission pursuant to section 303(a)(2), Tariff Act of 1930 as amended, (19 U.S.C. 1301(a)(2)), there is evidence on record concerning injury to, or likelihood of injury to, or prevention of the establishment of an industry in the United States. That information indicates that a sharp rise in imports as a percentage of total consumption of leather wearing apparel has occurred in the United States during a recent period of time. In addition, there is information contained in the petition that em-

ployment has dropped in addition to actual manhours expended for this industry during a recent period of time.

Pursuant to section 303(a)(4) Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(4)), the Secretary of the Treasury is required to issue a preliminary determination as to whether or not any bounty or grant is being paid or bestowed within the meaning of that statute within 6 months of receipt, in satisfactory form, of a petition alleging the payment or bestowal of a bounty or grant. A final determination must be issued within 12 months of the receipt of such petition.

Therefore, a preliminary determination on this petition will be made no later than May 7, 1978, as to whether or not the alleged payments or bestowals conferred by the Government of Brazil upon the manufacture, production or exportation of the merchandise described above constitute a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended. A final determination will be issued no later than November 7, 1978.

This notice is published pursuant to section 303(a)(3) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(3)), and § 159.47(c), Customs Regulations (19 CFR 159.47(c)).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190 Revision 14, July 1, 1977, the provisions of Treasury Department Order No. 165, Revised, November 2, 1954 and § 159.47(c) of the Customs Regulations (19 CFR 159.47(c)), insofar as they pertain to the initiation of a countervailing duty investigation by the Commissioner of Customs, are hereby waived.

HENRY C. STOCKELL, Jr.,  
Acting General Counsel  
of the Treasury.

JANUARY 19, 1978.

## CERTAIN TEXTILES AND TEXTILE PRODUCTS FROM THE REPUBLIC OF CHINA

## Receipt of Countervailing Duty Petition and Initiation of Investigation

AGENCY: U.S. Customs Service, Treasury Department.

ACTION: Initiation of countervailing duty investigation.

SUMMARY: This notice is to advise the public that a satisfactory petition has been received and that a countervailing duty investigation has been started to determine if benefits are paid by the Government of the Republic of China to manufacturers or exporters of textile products which constitute the payment of a bounty or grant within the meaning of the U.S. Countervailing Duty Law. A preliminary determination will be made not later than May 7, 1978, and a final determination not later than November 7, 1978.

EFFECTIVE DATE: January 30, 1978.

## FOR FURTHER INFORMATION CONTACT:

Al Jemmott, Operations Officer, Technical Branch, Duty assessment Division, Office of Operations, United States Customs Service, 1301 Constitution Avenue NW., Washington, D. C. 20229, 202-566-5492.

## SUPPLEMENTARY INFORMATION:

A petition in satisfactory form was received on November 7, 1977, alleging that benefits conferred by the Government of the Republic of China upon the manufacture, production or exportation of men's and boys' apparel and textile mill products of cotton, wool, and man-made fiber from the Republic of China constitute the payment or bestowal of a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303).

For purposes of this notice "textile mill products" include yarns, fabrics,

household textiles, and miscellaneous products of textile mills made of cotton, wool, and man-made fibers, as specified in U.S. bilateral textile agreements; and "men's and boys' apparel" includes those items described in the appendix to this notice, together with their Tariff Schedule classifications.

Alleged bounties or grants as provided in the petition include the following:

1. Income tax holidays for firms opening or expanding production facilities or accelerated depreciation of their fixed assets used for exportation.

2. Special incentives for enterprises requiring higher technology and equipment with longer service life.

3. Loans under preferential terms for companies producing for export.

4. Exemption from import duties on certain machinery and equipment.

5. A tax incentive for sales promotion abroad.

6. Tax benefits for exporting firms that locate in Export Processing Zones, including exemption from import duties and dues on machinery and equipment, raw materials and semi-finished products imported for their own use.

7. Government supported export risk insurance at premiums below cost.

Pursuant to section 303(a)(4) Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(4)), the Secretary of the Treasury is required to issue a preliminary determination as to whether or not any bounty or grant is being paid or bestowed within the meaning of that statute within 6 months of receipt, in satisfactory form, of a petition alleging the payment or bestowal of a bounty or grant. A final determination must be issued within 12 months of the receipt of such petition.

Therefore, a preliminary determination on this petition will be made no later than May 7, 1978, as to whether or not the alleged payments or bestowals conferred by the Government of the Republic of China upon the manufacture, production or exportation of the merchandise described above constitute a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended. A final determination will be issued no later than November 7, 1978.

The textile items involved include those in categories 1-38, 101-110, and 200-213 of the Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated, as published in the FEDERAL REGISTER on February 3, 1975 (40 FR 5010), and amended on December 31, 1975 (40 FR 60220), December 30, 1976, (41 FR 56881), January 21, 1977 (42 FR 3888) and March 7, 1977 (42 FR 12898). In addition, all similar products not covered by these categories because they are "certified handloomed and folklore products" are considered "textile mill products" for the purposes of this notice.

This notice is published pursuant to section 303(a)(3) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(3)), and § 159.47(c), Customs Regulations (19 CFR 159.47(c)).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190 Revision 14, July 1, 1977, the provisions of Treasury Department Order No. 165, Revised, November 2, 1954 and § 159.47(c) of the Customs Regulations (19 CFR 159.47(c)), insofar as they pertain to the initiation of a countervailing duty investigation by the Commissioner of Customs, are hereby waived.

HENRY C. STOCKELL, Jr.,  
Acting General Counsel  
of the Treasury.

JANUARY 19, 1978.

## CERTAIN TEXTILES AND TEXTILE PRODUCTS FROM COLOMBIA

## Receipt of Countervailing Duty Petition and Initiation of Investigation

AGENCY: U.S. Customs Service, Treasury Department.

ACTION: Initiation of countervailing duty investigation.

SUMMARY: This notice is to advise the public that a satisfactory petition has been received and that a countervailing duty investigation has been started to determine if benefits are paid by the Government of Colombia to manufacturers or exporters of textile products which constitute the payment of a bounty or grant within the meaning of the U.S. Countervailing Duty Law. A preliminary determination will be made not later than May 7, 1978, and a final determination not later than November 7, 1978.

EFFECTIVE DATE: January 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Vincent P. Kane, Operations Officer, Technical Branch, Duty Assessment

Division, Office of Operations, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, 202-566-5492.

**SUPPLEMENTARY INFORMATION:** A petition in satisfactory form was received on November 7, 1977, alleging that benefits conferred by the Government of Colombia upon the manufacture, production, or exportation of men's and boys' apparel and textile mill products of cotton, wool, and manmade fiber from Colombia constitute the payment or bestowal of a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303).

For purposes of this notice "textile mill products" include yarns, fabrics, household textiles, and miscellaneous products of textile mills made of cotton, wool, and manmade fibers, as specified in U.S. bilateral textile agreements; and "men's and boys' apparel" includes those items described in the appendix to this notice, together with their tariff schedule classifications.

Alleged bounties or grants as provided in the petition include the following:

1. Payment of negotiable tax certificates (CAT's) at 5 percent of the value of export transactions.

2. Customs duty exemptions on equipment used in production for export.

3. Direct subsidy payments as well as indirect maritime subsidies for export-oriented industries.

4. Advantageous rates for loans to finance export production.

5. Government assistance in the payment of export credit insurance costs.

6. Tax concessions for firms located in free trade zones.

The leather wearing apparel from Colombia specified in the petition which is classifiable under item 791.7600 of the Tariff Schedules of the United States Annotated (TSUSA), is eligible for duty-free entry under the Generalized System of Preferences. In the event that it becomes necessary to refer this matter to the U.S. International Trade Commission pursuant to section 303(a)(2), Tariff Act of 1930 as amended (19 U.S.C. 1301(a)(2)), there

The textile items involved include those in categories 1-38, 101-110, and 200-213 of the Correlation: Textile and Apparel Categories with Tariff Schedules of The United States Annotated, as published in the FEDERAL REGISTER on February 3, 1975 (40 FR 5010), and amended on December 31, 1975 (40 FR 60220), December 30, 1976 (41 FR 56881), January 21, 1977 (42 FR 3888), and March 7, 1977 (42 FR 12898). In addition, all similar products not covered by these categories because they are "certified handloomed and folklore products" are considered "textile mill products" for the purposes of this notice.

is evidence on record concerning injury to, or likelihood of injury to, or prevention of the establishment of an industry in the United States. That information indicates that a sharp rise in imports as a percentage of total consumption of leather wearing apparel has occurred in the United States during a recent period of time. In addition, there is information contained in the petition that employment has dropped in addition actual man-hours expended for this industry during a recent period of time.

Pursuant to section 303(a)(4) Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(4)), the Secretary of the Treasury is required to issue a preliminary determination as to whether or not any bounty or grant is being paid or bestowed within the meaning of that statute within 6 months of receipt, in satisfactory form, of a petition alleging the payment or bestowal of a bounty or grant. A final determination must be issued within 12 months of the receipt of such petition.

Therefore, a preliminary determination on this petition will be made no later than May 7, 1978, as to whether or not the alleged payments or bestowals conferred by the Government of Colombia upon the manufacture, production, or exportation of the merchandise described above constitute a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended. A final determination will be issued no later than November 7, 1978.

This notice is published pursuant to section 303(a)(3) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(3)), and § 159.47(c), Customs Regulations (19 CFR 159.47(c)).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190, Revision 14, July 1, 1977, the provisions of Treasury Department Order No. 165, Revised, November 2, 1954, and § 159.47(c) of the Customs Regulations (19 CFR 159.47(c)), insofar as they pertain to the initiation of a countervailing duty investigation by the Commissioner of Customs, are hereby waived.

HENRY C. STOCKELL, JR.,  
Acting General Counsel  
of the Treasury.

## [4810-22]

## CERTAIN TEXTILES AND TEXTILE PRODUCTS FROM INDIA

## Receipt of Countervailing Duty Petition and Initiation of Investigation

AGENCY: U.S. Customs Service, Treasury Department.

ACTION: Initiation of countervailing duty investigation.

SUMMARY: This notice is to advise the public that a satisfactory petition has been received and that a countervailing duty investigation has been started to determine if benefits are paid by the Government of India to manufacturers or exporters of textile products which constitute the payment of a bounty or grant within the meaning of the U.S. Countervailing Duty Law. A preliminary determination will be made not later than May 7, 1978, and a final determination not later than November 7, 1978.

EFFECTIVE DATE: January 30, 1978.

FOR FURTHER INFORMATION CONTACT:

David R. Chapman, Operations Officer, Technical Branch, Duty Assessment Division, Office of Operations, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, 202-566-5492.

SUPPLEMENTARY INFORMATION: A petition in satisfactory form was re-

ceived on November 7, 1977, alleging that benefits conferred by the Government of India upon the manufacture, production or exportation of men's and boys' apparel and textile mill products of cotton, wool, and man-made fiber from India constitute the payment or bestowal of a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303).

For purposes of this notice "textile mill products" include yarns, fabrics, household textiles, and miscellaneous products of textile mills made of cotton, wool, and man-made fibers, as specified in U.S. bilateral textile agreements; and "men's and boys' apparel" includes those items described in the appendix to this notice, together with their Tariff Schedule classifications.

Alleged bounties or grants as provided in the petition include the following:

1. Direct cash assistance provided to exporters of textiles and textile products on exportation and amounting to from 9 to 17.5 percent of the f.o.b. value on certain textile products.

2. Direct tax credits of 15 percent of export value which may be applied directly to outstanding income or business taxes.

3. Deduction of 150 percent of overseas expenses for export promotion from total taxable income. Through the Market Development Fund, the Indian Government may make outright grants for export promotion to individual firms.

4. Remission of Customs duties and excise taxes on machinery and equipment used in export production.

5. Comprehensive export insurance and low rate export credits available to Indian exporters for overseas market development available through the Export Credit and Guarantee Corporation and the Industrial Development Bank of India, both Indian Government entities.

6. Favorable treatment with respect to import licenses and foreign exchange as a reward for export performance.

7. Special foreign exchange concessions and financial assistance for purchase of equipment to firms located in the Kandla Free Trade Zone.

The textile items involved include those in categories 1-38, 101-110, and 200-213 of the Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated, as published in the FEDERAL REGISTER on February 3, 1975 (40 FR 5010), and amended on December 31, 1975 (40 FR 60220), December 30, 1976 (41 FR 56881), January 21, 1977 (42 FR 3888) and March 7, 1977 (42 FR 12898). In addition, all similar products not covered by these categories because they are "certified handloomed and folklore products" are considered "textile mill products" for the purposes of this notice.

The leather wearing apparel from India specified in the petition which is classifiable under item 791.7600 of the Tariff Schedules of the United States Annotated (TSUSA) is eligible for duty free entry under the Generalized System of Preferences. In the event that it becomes necessary to refer this matter to the United States International Trade Commission pursuant to section 303(a)(2), Tariff Act of 1930 as amended (19 U.S.C. 1301(a)(2)), there is evidence on record concerning injury to, or likelihood of injury to, or prevention of the establishment of an industry in the United States. That information indicates that a sharp rise in imports as a percentage of total consumption of leather wearing apparel has occurred in the United States during a recent period of time. In addition, there is information contained in the petition that employment has dropped in addition to actual man-hours expended for this industry during a recent period of time.

Pursuant to section 303(a)(4) Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(4)), the Secretary of the Treasury is required to issue a preliminary determination as to whether or not any bounty or grant is being paid or bestowed within the meaning of that statute within 6 months of receipt, in satisfactory form, of a petition alleging the payment or bestowal of a bounty or grant. A final determination must be issued within 12 months of the receipt of such petition.

Therefore, a preliminary determination on this petition will be made no later than May 7, 1978, as to whether or not the alleged payments or bestowals conferred by the Government of India upon the manufacture, production or exportation of the merchandise described above constitute a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended. A final determination will be issued no later than November 7, 1978.

This notice is published pursuant to section 303(a)(3) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(3)), and § 159.47(c), Customs Regulations (19 CFR 159.47(c)).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190 Revision 14, July 1, 1977, the provisions of Treasury Department Order No. 165, Revised, November 2, 1954 and § 159.47(c) of the Customs Regulations (19 CFR 159.47(c)), insofar as they pertain to the initiation of a countervailing duty investi-

gation by the Commissioner of Customs, are hereby waived.

HENRY C. STOCKELL, Jr.,  
Acting General Counsel  
of the Treasury.

JANUARY 19, 1978.

## CERTAIN TEXTILES AND TEXTILE PRODUCTS FROM THE REPUBLIC OF KOREA

## Receipt of Countervailing Duty Petition and Initiation of Investigation

AGENCY: U.S. Customs Service, Treasury Department.

ACTION: Initiation of countervailing duty investigation.

SUMMARY: This notice is to advise the public that a satisfactory petition has been received and that a countervailing duty investigation has been started to determine if benefits are paid by the Government of the Republic of Korea to manufacturers or exporters of textile products which constitute the payment of a bounty or grant within the meaning of the U.S. Countervailing Duty Law. A prelimi-

nary determination will be made not later than May 7, 1978, and a final determination not later than November 7, 1978.

EFFECTIVE DATE: January 30, 1978.  
FOR FURTHER INFORMATION CONTACT:

Anthony L. Russo, Operations Officer, Technical Branch, Duty Assessment Division, Office of Operations, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, 202-566-5492.

SUPPLEMENTARY INFORMATION: A petition in satisfactory form was received on November 7, 1977, alleging that benefits conferred by the Government of the Republic of Korea upon the manufacture, production or exportation of men's and boys' apparel and textile mill products of cotton, wool, and man-made fiber from the Republic of Korea constitute the payment or bestowal of a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303).

For purposes of this notice "textile mill products" include yarns, fabrics, household textiles, and miscellaneous products of textile mills made of cotton, wool, and man-made fibers, as specified in U.S. bilateral textile agreements; and "men's and boys' apparel" includes those items described in the appendix to this notice, together with their Tariff Schedule classifications.

Alleged bounties or grant as provided in the petition include the following:

1. Short and long term financing at preferential interest rates.
2. Credit on duty payments for imports used in export production.
3. Deferred payment export financing arrangements.
4. Deferral of due dates for certain domestic taxes.
5. "Link" of distribution of import permits for otherwise restricted items on the basis of export performance.
6. Inclusion in loss accounts of reserve funds for losses from exports.
7. Special depreciation allowance related to export performance.
8. Tax exemption, special public services and other benefits to firms located in Export Industrial Estates and Masan and Iri Export Zones.

The textile items involved include those in categories 1-38, 101-110, and 200-213 of the Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated, as published in the FEDERAL REGISTER on February 3, 1975 (40 FR 5010), and amended on December 31, 1975 (40 FR 60220), December 30, 1976 (41 FR 56881), January 21, 1977 (42 FR 3888) and March 7, 1977 (42 FR 12898). In addition, all similar products not covered by these categories because they are "certified handloomed and folklore products" are considered "textile mill products" for the purposes of this notice.

9. Excessive "wastage" drawback allowances.

Pursuant to section 303(a)(4) Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(4)), the Secretary of the Treasury is required to issue a preliminary determination as to whether or not any bounty or grant is being paid or bestowed within the meaning of that statute within 6 months of receipt, in satisfactory form, of a petition alleging the payment or bestowal of a bounty or grant. A final determination must be issued within 12 months of the receipt of such petition.

Therefore, a preliminary determination on this petition will be made no later than May 7, 1978, as to whether or not the alleged payments or bestowals conferred by the Government of the Republic of Korea upon the manufacture, production or exportation of the merchandise described above constitute a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended. A final determination will be issued no later than November 7, 1978.

This notice is published pursuant to section 303(a)(3) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(3)), and section 159.47(c), Customs Regulations (19 CFR 159.47(c)).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190 Revision 14, July 1, 1977, the provisions of Treasury Department Order No. 165, Revised, November 2, 1954 and § 159.47(c) of the Customs Regulations (19 CFR 159.47(c)), insofar as they pertain to the initiation of a countervailing duty investigation by the Commissioner of Customs, are hereby waived.

HENRY C. STOCKWELL, JR.,  
Acting General Counsel  
of the Treasury.

JANUARY 19, 1978.

## Customs Service

## LEATHER WEARING APPAREL FROM URUGUAY

## Final Countervailing Duty Determination

AGENCY: Customs Service, U.S. Treasury Department.

ACTION: Final Countervailing Duty Determination.

SUMMARY: This notice is to advise the public that an investigation has resulted in a determination that the Government of Uruguay has given benefits considered to be bounties or grants within the countervailing duty law to manufacturers who export leather wearing apparel to the United States. Since this merchandise is duty-free, the case is being referred to the U.S. International Trade Commission for an injury determination. However, should the Commission's determination be affirmative, the Treasury would consider it appropriate to waive countervailing duties, based upon the criteria established by the Trade Act of 1974, including the actions taken and to be taken by the Government of Uruguay to reduce significantly the bounty or grant.

EFFECTIVE DATE: January 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Vincent P. Kane, Operations Officer, Duty Assessment Division, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, 202-566-5492.

SUPPLEMENTARY INFORMATION: On July 27, 1977, a "Preliminary Countervailing Duty Determination" was published in the FEDERAL REGISTER (42 FR 38251). The notice stated that it preliminarily had been determined that benefits had been received by the Uruguayan manufacturers/exporters of leather wearing apparel which may constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (19 U.S.C. 1303) (referred to in this notice as "the Act"). The benefits preliminarily determined to be bounties or grants were:

(1) Income tax exemptions on certain export-related income;

(2) Preferential financing for exports; and

(3) The granting of tax certificates, known as "reintegros," to manufacturers of leather wearing apparel, upon the exportation of the goods.

The rebate of value-added taxes upon export of goods and a rebate of import duties paid on raw materials used in the production of leather wearing apparel for export has been determined not to constitute a bounty or grant within the meaning of the Act.

Programs found not to have been utilized by the leather wearing apparel industry included government-sponsored export insurance, a tax holiday for new industries, and benefits for locating within certain free ports and zones.

The notice offered interested parties an opportunity to submit any relevant data, views or arguments in writing with respect to the preliminary determination in time to be received not later than August 26, 1977.

Subsequent investigation lead to the conclusion that the subsidy granted to the tanners upon the exportation of the finished leather wearing apparel constitute a bounty or grant within the meaning of the Act. Based on present information available, however, the tanners' subsidy serves to make Uruguayan tannery prices equal with neighboring country competition, which is readily available to leather wearing apparel manufacturers in Uruguay. Thus the net effect of the bounty or grant is zero since the cost of producing leather wearing apparel absent the subsidy would not be increased due to lower prices available from neighboring countries.

In addition, the effect of the export subsidy is offset by certain fiscal charges which are indirect taxes that are directly related to the exported leather wearing apparel. These taxes are not rebated on export, and under the Act would be eligible for rebate and thus act to reduce the effective export benefit. Such taxes include:

(1) Export taxes charged on the value of the leather wearing apparel plus a tax on the value of the export rebate certificates;

(2) Value-added taxes that are charged in manufacturing the leather wearing apparel (the Government of Uruguay generally rebates 75 percent of value-added taxes paid);

(3) Taxes on agricultural transactions which in this case involve a 4-percent tax on the value of the hide purchased by the tanner; and

(4) Import taxes and other special taxes which are assessed on the non-leather items of the leather apparel.

Finally, the export benefit is reduced due to a regular devaluation of the peso to the dollar since the certificate tendering the benefit is not received before 90 days after application has been made for it.

After consideration of all information received, it is hereby determined that leather wearing apparel from Uruguay is subject to bounties or grants within the meaning of section 303 of the Act. The bounties or grants are in the form of the payments referred to in the preliminary determination, taking into account the offsets described in this notice. The net amount of the bounty or grant has been estimated and determined to be

approximately 12 percent of the f.o.b. price for export to the United States of leather wearing apparel from Uruguay.

Further, the leather wearing apparel subject to this determination is classified under item 791.7600 of the Tariff Schedules of the United States, Annotated (TSUSA), and is entered duty-free pursuant to the U.S. Generalized System of Preferences, authorized by Title V of the Trade Act of 1974 (19 U.S.C. 2461-2465, 88 Stat. 2066-2071).

In accordance with sec. 303(a)(2) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(2)), countervailing duties may not be imposed upon any article of merchandise which is free of duty in the absence of a determination by the U.S. International Trade Commission that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such article or merchandise into the United States.

Accordingly, the U.S. International Trade Commission is being advised of this determination and the liquidation of entries, or withdrawals from warehouse, for consumption of the duty-free leather wearing apparel in question will be suspended pending the determination of the Commission.

Should the determination of the Commission be affirmative, the Treasury would consider it appropriate to waive countervailing duties under section 303(d) of the Act. The Government of Uruguay is committed to the total removal of the net bounty derived from the tax rebate certificate program (reintegro) for all leather products, except tanned leather, between January 1, 1978 and January 1, 1979. A 50-percent reduction in the effective bounty was accomplished December 29, 1977. A 50-percent reduction in the remaining effective export subsidy will be made on or before July 1, 1978, with total elimination accomplished on or before January 1, 1979. These actions will have the effect of removing almost completely the effective bounty or grant, thus satisfying the first waiver criteria under section 303(d) of the Act. Based on the very active role of the developing countries in the Multilateral Trade Negotiations in Geneva, combined with progress that is being made to negotiate agreements eliminating non-tariff barriers to trade, the remaining criteria governing the waiver provision would appear to be satisfied.

Effective on or after January 30, 1978, and until further notice, upon the entry for consumption of withdrawal from warehouse for consumption of such duty-free leather wearing apparel, liquidation will be suspended pending the determination of the U.S. International Trade Commission.

Pursuant to Regorization Plan No. 26 of 1950 and Treasury Department

Order 190 Revision 14, July 1, 1977, the provisions of Treasury Department Order No. 165, Revised November 2, 1954, and section 159.47(d) of the Customs Regulations (19 CFR 159.47(d)), insofar as they pertain to the issuance of a countervailing duty order by the Commissioner of Customs, are hereby waived.

ROBERT H. MUNDHEIM,  
General Counsel  
of the Treasury.

## CERTAIN TEXTILES AND TEXTILE PRODUCTS FROM THE PHILIPPINES

## Receipt of Countervailing Duty Petition and Initiation of Investigation

AGENCY: U.S. Customs Service, Treasury Department.

ACTION: Initiation of countervailing duty investigation.

SUMMARY: This notice is to advise the public that a satisfactory petition has been received and that a countervailing duty investigation has been started to determine if benefits are paid by the Government of the Philippines to the manufacturers or exporters of textile products which constitute the payment of a bounty or grant within the meaning of the U.S. countervailing duty law. A preliminary determination will be made not later than May 7, 1978, and a final determination not later than November 7, 1978.

EFFECTIVE DATE: January 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Edward F. Haley, Operations Officer, Technical Branch, Duty Assessment Division, Office of Operations, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, 202-566-5492.

SUPPLEMENTARY INFORMATION: A petition in satisfactory form was received on November 7, 1977, alleging that benefits conferred by the Government of the Philippines upon the manufacture, production, or exportation of men's and boys' apparel and textile mill products of cotton, wool, and manmade fiber from India constitute the payment or bestowal of a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303).

For purposes of this notice "textile mill products" include yarns, fabrics, household textiles, and miscellaneous products of textile mills made of cotton, wool, and manmade fibers, as specified in U.S. bilateral textile agree-

ments; and "men's and boys' apparel" includes those items described in the appendix to this notice, together with their tariff schedule classifications.

A. Deductions for 5 years of costs for direct labor and local raw materials used in the manufacture of products for export.

B. Exemption from import duties and compensating taxes on imported machinery and equipment.

C. Tax credits on domestic capital equipment purchased equal to the amount of taxes and duties that would have been paid had the equipment been imported.

D. Reduced income tax for 5 years.

2. Various incentives for qualifying enterprises under the Investment Incentives Act (R.A. 5186), including:

A. Tax deductions of organizational and preoperating expenses.

B. Accelerated depreciation of assets with a life expectancy over 5 years.

C. Tax deductions of net operating loss carryovers.

D. Exemption from duties and compensation tax on necessary imports.

E. Tax deductions of expansion of investments.

F. Tax credit for import duties and compensatory taxes not paid if domestic machinery purchased.

G. Tax deductions of labor training expenses.

H. Tax credit for taxes withheld on loan payments made and direct-labor costs.

I. Exemption from all but income tax for new industries.

3. Special incentives granted to companies located in the Bataan export processing zone, including:

A. Accelerated depreciation rates for fixed assets.

B. The carryover as deductions from taxable income for 5 years of losses incurred during the first 5 years of operation.

C. The exemption of taxes and duties on imports of machinery and equipment used in the production of articles to be exported.

D. Financial and use of special public services.

4. Export insurance against commercial and political risks.

5. Relaxed cash deposit requirements on letters of credit opened by

"The textile items involved include those in categories 1-38, 101-110, and 200-213 of the Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated, as published in the FEDERAL REGISTER on February 3, 1975 (40 FR 5010), and amended on December 31, 1975 (40 FR 60220), December 30, 1976 (41 FR 56881), January 21, 1977 (42 FR 3888), and March 7, 1977 (42 FR 12898). In addition, all similar products not covered by these categories because they are "certified handloomed and folklore products" are considered "textile mill products" for the purposes of this notice.

Philippine importers whose importer directly or indirectly encourages local export enterprises.

The leather wearing apparel from the Philippines specified in the petition which is classifiable under item 791.7600 of the Tariff Schedules of the United States Annotated (TSUSA) is eligible for duty-free entry under the generalized system of preferences. In the event that it becomes necessary to refer this matter to the U.S. International Trade Commission pursuant to section 303(a)(2), Tariff Act of 1930 as amended (19 U.S.C. 1303(a)(2)), there is evidence on record concerning injury to, or likelihood of injury to, or prevention of the establishment of an industry in the United States. That information indicates that a sharp rise in imports as a percentage of total consumption of leather wearing apparel has occurred in the United States during a recent period of time. In addition, there is information contained in the petition that employment has dropped in addition to actual man-hours expended for this industry during a recent period of time.

Pursuant to section 303(a)(4) Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(4)), the Secretary of the Treasury is required to issue a preliminary determination as to whether or not any bounty or grant is being paid or bestowed within the meaning of that statute within 6 months of receipt, in satisfactory form, of a petition alleging the payment or bestowal of a bounty or grant. A final determination must be issued within 12 months of the receipt of such petition.

Therefore, a preliminary determination on this petition will be made no later than May 7, 1978, as to whether or not the alleged payments or bestowals conferred by the Government of the Philippines upon the manufacture, production, or exportation of the merchandise described above constitute a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended. A final determination will be issued no later than November 7, 1978.

This notice is published pursuant to section 303(a)(3) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(3)), and section 159.47(c), Customs Regulations (19 CFR 159.47(c)).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190, Revision 14, July 1, 1977, the provisions of Treasury Department Order No. 165, Revised, November 2, 1954, and § 159.47(c) of the Customs Regulations (19 CFR 159.47(c)), insofar as they pertain to the initiation of a countervailing duty investi-

gation by the Commissioner of Customs, are hereby waived.

HENRY C. STOCKELL, Jr.,  
Acting General Counsel  
of the Treasury.

JANUARY 19, 1978.

#### [4810-22]

#### CERTAIN TEXTILES AND TEXTILE PRODUCTS FROM URUGUAY

#### Receipt of Countervailing Duty Petition and Initiation of Investigation

AGENCY: U.S. Customs Service, Treasury Department.

ACTION: Initiation of Countervailing Duty Investigation.

SUMMARY: This notice is to advise the public that a satisfactory petition has been received and that a countervailing duty investigation has been started to determine if benefits are paid by the Government of Uruguay to manufacturers or exporters of textile products which constitute the payment of a bounty or grant within the meaning of the U.S. Countervailing Duty Law. A preliminary determination will be made not later than May

7, 1978, and a final determination not later than November 7, 1978.

EFFECTIVE DATE: January 30, 1978. FOR FURTHER INFORMATION CONTACT:

Vincent P. Kane, Operations Officer, Technical Branch, Duty Assessment Division, Office of Operations, United States Customs Service, 1301 Constitution Avenue NW, Washington, D.C. 20229, 202-566-5492.

SUPPLEMENTARY INFORMATION: A petition in satisfactory form was received on November 7, 1977, alleging that benefits conferred by the Government of Uruguay upon the manufacture, production or exportation of men's and boys' apparel and textile mill products of cotton, wool, and made-made fiber from India constitute the payment or bestowal of a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303).

For purposes of this notice "textile mill products" include yarns, fabrics, household textiles, and miscellaneous products of textile mills made of cotton, wool, and man-made fibers, as specified in U.S. bilateral textile agreements; and "men's and boys' apparel" includes those items described in the appendix to this notice, together with their Tariff Schedule classifications.

Alleged bounties or grants as provided in the petition include the following:

1. Exemption of export earnings from the corporate income and dividends taxes.

2. Tax holidays on all earnings and concessions for new investments in export-oriented industries.

3. Rebates ("reintegros") allegedly up to 50 percent of export value that are in addition to the ordinary VAT rebate.

4. Advantageous loan rates for exports and export credit insurance.

5. Tax concessions and free services for firms located within free ports and zones.

Pursuant to section 303(a)(4) Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(4)), the Secretary of the Treasury is required to issue a preliminary determination as to

## NOTICES

any bounty or grant is being paid or bestowed within the meaning of that statute within 6 months of receipt, in satisfactory form, of a petition alleging the payment or bestowal of a bounty or grant. A final determination must be issued within 12 months of the receipt of such petition.

Therefore, a preliminary determination on this petition will be made no later than May 7, 1978, as to whether or not the alleged payments or bestowals conferred by the Government of Uruguay upon the manufacture, production or exportation of the merchandise described above constitute a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended. A final determination will be issued no later than November 7, 1978.

This notice is published pursuant to section 303(a)(3) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(3)), and § 159.47(c), Customs Regulations (19 CFR 159.47(c)).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190 Revision 14, July 1, 1977, the provisions of Treasury Department Order No. 165, Revised, November 2, 1954 and § 159.47(c) of the Customs Regulations (19 CFR 159.47(c)), insofar as they pertain to the initiation of a countervailing duty investigation by the Commissioner of Customs, are hereby waived.

HENRY C. STOCKELL, Jr.,  
Acting General Counsel  
of the Treasury.

JANUARY 19, 1978.

## NOTICES

[4810-40]

Office of the Secretary  
(Public Debt Series No. 2-78)

TREASURY NOTES OF MAY 15, 1981

Series M-1981

JANUARY 26, 1978.

## 1. INVITATION FOR TENDERS

1.1. The Secretary of the Treasury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately \$2,500,000,000 of U.S. securities, designated Treasury Notes of May 15, 1981, Series M-1981 (CUSIP No. 912827 HK 1). The securities will be sold at auction with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts may also be issued for cash to Federal Reserve Banks as agents of foreign and international monetary authorities.

1.2. If the interest rate determined in accordance with this circular is identical to the rate on an outstanding issue of U.S. notes, and the terms and conditions of such outstanding issue are otherwise identical to terms and conditions of the securities offered by this circular, this shall be considered an invitation for an additional amount of the outstanding securities and this circular will be amended accordingly. Payment for the securities in that event will be calculated on the basis of the auction price determined in accordance with this circular plus accrued interest from the last preceding interest payment date on the outstanding securities.

## 2. DESCRIPTION OF SECURITIES

2.1. The securities will be dated February 15, 1978, and will bear interest from that date, payable on a semiannual basis on November 15, 1978, and each subsequent 6 months on May 15 and November 15, until the principal becomes payable. They will mature May 15, 1981, and will not be subject to call for redemption prior to maturity.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any

possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Bearer securities with interest coupons attached, and securities registered as to principal and interest, will be issued in denominations of \$5,000, \$10,000, \$100,000, and \$1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of coupon, registered and book-entry securities, and the transfer of registered securities will be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

## 3. SALE PROCEDURES

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., eastern standard time, Tuesday, January 31, 1978. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Monday, January 30, 1978.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is \$5,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.11 percent. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender and the amount may not exceed \$1,000,000.

3.3. All bidders must certify that they have not made and will not make any agreements for the sale or purchase of any securities of this issue prior to the deadline established in section 3.1. for receipt of tenders. Those authorized to submit tenders for the account of customers will be required to certify that such tenders are submitted under the same conditions, agreements, and certifications as tenders submitted directly by bidders for their own account.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities,

may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.5. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; federally insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by a deposit of 5 percent of the face amount of securities applied for (in the form of cash maturing Treasury securities or readily collectible checks), or by a guarantee of such deposit by a commercial bank or a primary dealer.

3.6. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, a coupon rate will be established, on the basis of a  $\frac{1}{4}$  of 1 percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.250. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per 100, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full, or when the price is over par.

#### 4. RESERVATIONS

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this section is final.

#### 5. PAYMENT AND DELIVERY

5.1. Settlement for allotted securities must be made or completed on or before Wednesday, February 15, 1978, at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing U.S. securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received at such institution no later than:

(a) Friday, February 10, 1978, if the check is drawn on a bank in the Federal Reserve District of the institution to which the check is submitted (the Fifth Federal Reserve District in case of the Bureau of the Public Debt), or

(b) Thursday, February 9, 1978, if the check is drawn on a bank in another Federal Reserve District.

Checks received after the dates set forth in the preceding sentence will not be accepted unless they are payable at the applicable Federal Reserve Bank. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment is not completed on time, the deposit submitted with the tender, up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered as deposits and in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer form and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve Bank or Branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5.5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

#### 6. GENERAL PROVISIONS

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

PAUL H. TAYLOR,  
Acting Fiscal  
Assistant Secretary.

[4810-40]

(Public Debt Series—No. 3-78)

#### 8 PERCENT TREASURY NOTES OF FEBRUARY 15, 1985

Series A-1985

JANUARY 26, 1978.

#### 1. INVITATION FOR TENDERS

1.1. The Secretary of the Treasury, under the authority of the Second Liberty bond Act, as amended, invites tenders for approximately \$3,000,000,000 of United States securities, designated 8 percent Treasury Notes of February 15, 1985, Series A-1985 (CUSIP No. 912827 HL 9). The securities will be sold at auction with bidding on the basis of price. Payment will be required at the bid price of each accepted tender in the manner described below. Additional amounts of these securities may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts may also be issued for cash to Federal Reserve Banks as agents of foreign and international monetary authorities.

#### 2. DESCRIPTION OF SECURITIES

2.1. The securities will be dated February 15, 1978, and will bear interest from that date, payable on a semiannual basis on August 15, 1978, and each subsequent 6 months on February 15 and August 15, until the principal becomes payable. They will mature February 15, 1985, and will not be subject to call for redemption prior to maturity.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Bearer securities with interest coupons attached, and securities registered as to principal and interest, will be issued in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of coupon, registered and book-entry securities, and the transfer of registered securities will be permitted.

2.5. The Department of the Treasury's general regulations, governing

United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

#### 3. SALE PROCEDURES

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Standard time, Wednesday, February 1, 1978. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, January 31, 1978.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is \$1,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the price offered, expressed on the basis of 100 with two decimals, e.g., 100.00. Common fractions may not be used. Only tenders at a price more than the original issue discount limit of 98.25 will be accepted. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified price. No bidder may submit more than one noncompetitive tender, and the amount may not exceed \$1,000,000.

3.3. All bidders must certify that they have not made and will not make any agreements for the sale or purchase of any securities of this issue prior to the deadline established in Section 3.1. for receipt of tenders. Those authorized to submit tenders for the account of customers will be required to certify that such tenders are submitted under the same conditions, agreements, and certifications as tenders submitted directly by bidders for their own account.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.5. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal

Reserve Banks; and Government accounts. Tenders from others must be accompanied by a deposit of 5 percent of the face amount of securities applied for (in the form of cash, maturing Treasury securities or readily collectible checks), or by a guarantee of such deposit by a commercial bank or a primary dealer.

3.6. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and price range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the highest prices, through successively lower prices to the extent required to attain the amount offered. Tenders at the lowest accepted price will be prorated if necessary. Successful competitive bidders will be required to pay the price that they bid. Those submitting noncompetitive tenders will pay the weighted average price in two decimals of accepted competitive tenders. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the price. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the weighted average price of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full, or when the price is over par.

#### 4. RESERVATIONS

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

#### 5. PAYMENT AND DELIVERY

5.1. Settlement for allotted securities must be made or completed on or before February 15, 1978, at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which

the tender was submitted, which must be received at such institution no later than:

(a) Friday, February 10, 1978, if the check is drawn on a bank in the Federal Reserve District of the institution to which the check is submitted (the Fifth Federal Reserve District in case of the Bureau of the Public Debt), or

(b) Thursday, February 9, 1978, if the check is drawn on a bank in another Federal Reserve District.

Checks received after the dates set forth in the preceding sentence will not be accepted unless they are payable at the applicable Federal Reserve Bank. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment is not completed on time, the deposit submitted with the tender, up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered as deposits and in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall

be issued in bearer form and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve Bank or Branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5.5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

#### 6. GENERAL PROVISIONS

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

PAUL H. TAYLOR,  
Acting Fiscal  
Assistant Secretary.

(FR Doc. 78-2689 Filed 1-27-78; 8:45 am)

#### [4810-40]

[Public Debt Series—No. 4-78]

#### 8 1/4 PERCENT TREASURY BONDS OF 2000-2005 JANUARY 26, 1978.

##### 1. INVITATION FOR TENDERS

1.1. The Secretary of the Treasury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately \$1,250,000,000 of U.S. securities, designated 8 1/4 percent Treasury Bonds of 2000-2005 (CUSIP No. 912810 BU 1). The securities will be sold at auction with bidding on the basis of price. Payment will be required at the bid price of each accepted tender in the manner described below. Additional amounts of these securities may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts may also be issued for cash to Federal Reserve Banks as agents of foreign and international monetary authorities.

##### 2. DESCRIPTION OF SECURITIES

2.1. The securities offered will be identical to the 8 1/4 percent Treasury Bonds of 2000-2005 (CUSIP No. 912810 BU 1) issued under Depart-

ment of the Treasury Circular, Public Debt Series—No. 15-75, dated May 2, 1975, except that interest will accrue from February 15, 1978, and payment for the securities will be calculated on the basis of the auction price determined in accordance with this circular, plus accrued interest from November 15, 1977. With this exception, the securities are as described in the following excerpt from the above circular:

"1. The bonds will be dated May 15, 1975, and will bear interest from that date, payable semiannually on November 15, 1975, and thereafter on May 15 and November 15 in each year until the principal amount becomes payable. They will mature May 15, 2005, but may be redeemed at the option of the United States on and after May 15, 2000, in whole or in part at par and accrued interest on any interest day or days, on 4 months' notice of redemption given in such manner as the Secretary of the Treasury shall prescribe. In case of partial redemption, the bonds to be redeemed will be determined by such method as may be prescribed by the Secretary of the Treasury. From the date of redemption designated in any such notice, interest on the bonds called for redemption shall cease.

"2. The income derived from the bonds is subject to all taxes imposed under the Internal Revenue Code of 1954. The bonds are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

"3. The bonds will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

"4. Bearer bonds with interest coupons attached, and bonds registered as to principal and interest, will be issued in denominations of \$1,000, \$5,000, \$10,000, \$100,000 and \$1,000,000. Book-entry bonds will be available to eligible bidders in multiples of those amounts. Interchanges of bonds of different denominations and of coupon and registered bonds, and the transfer of registered bonds will be permitted.

"5. The bonds will be subject to the general regulations of the Department of the Treasury, now or hereafter prescribed, governing United States bonds."

##### 3. SALE PROCEDURES

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt,

On May 9, 1975, the Secretary of the Treasury announced that the interest rate on the bonds would be 8 1/4 percent per annum.

Washington, D.C. 20226, up to 1:30 p.m., eastern standard time, Thursday, February 2, 1978. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Wednesday, February 1, 1978.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is \$1,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the price offered, expressed on the basis of 100 with two decimals, e.g., 100.00. Common fractions may not be used. Only tenders at a price more than the original issue discount limit of 93.25 will be accepted. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified price. No bidder may submit more than one noncompetitive tender, and the amount may not exceed \$1,000,000.

3.3. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.4. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by a deposit of 5 percent of the face amount of securities applied for (in the form of cash, maturing Treasury securities or readily collectible checks), or by a guarantee of such deposit by a commercial bank or a primary dealer.

3.5. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and price range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the highest prices, through successively lower prices to the extent required to attain the amount offered. Tenders at the lowest accepted price will be prorated if necessary. Successful competitive bidders will be required to pay the

price that they bid. Those submitting noncompetitive tenders will pay the weighted average price in two decimals of accepted competitive tenders. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the price. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the weighted average price of accepted competitive tenders.

3.6. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full or when the price is over par.

#### 4. RESERVATIONS

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

#### 5. PAYMENT AND DELIVERY

5.1. Settlement for allotted securities must be made or completed on or before Wednesday, February 15, 1978, at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted, and must include accrued interest from November 15, 1977, to February 15, 1978, in the amount of \$20.96685 per \$1,000 of securities allotted. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received at such institution no later than:

(a) Friday, February 10, 1978, if the check is drawn on a bank in the Federal Reserve District of the institution to which the check is submitted (the Fifth Federal Reserve District in case of the Bureau of the Public Debt), or

(b) Thursday, February 9, 1978, if the check is drawn on a bank in another Federal Reserve District.

Checks received after the dates set forth in the preceding sentence will not be accepted unless they are payable at the applicable Federal Reserve Bank. Payment will not be considered complete where registered securities are requested if the appropriate identifying

number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment is not completed on time, the deposit submitted with the tender, up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered as deposits and in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The Securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer form and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve Bank or Branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5.5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

#### 6. GENERAL PROVISIONS

6.1. As fiscal agents of the United States, Federal Reserve Banks are au-

thorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

PAUL H. TAYLOR,  
Acting Fiscal  
Assistant Secretary.

[FR Doc. 78-2690 Filed 1-27-78; 8:45 am]

## [8320-01]

## VETERANS ADMINISTRATION

## PRIVACY ACT OF 1974

Proposed Amendment of System Notice;  
Additional Routine Uses

Notice is hereby given that the Veterans Administration is considering adding three new routine use statements to each of the following systems of VA records set forth on pages 49726-49767 of the FEDERAL REGISTER of September 27, 1977.

49VA21 Veterans, Dependents and Beneficiaries Compensation and Pension Records—VA.

50VA22 Veterans, Dependents, Beneficiaries, and Armed Forces Personnel Education and Rehabilitation Records—VA.

58VA21/22 TARGET—Compensation, Pension, Education, and Rehabilitation Records—VA.

The first two routine use statements were previously adopted for the system of records entitled "Patient Medical Records—VA" (24VA136), and the third routine use statement was adopted for the system of records entitled "Veterans and Beneficiary Identification and Records Locator System—VA" (38VA28). Since these routine use statements allow for the release of medical record data, excluding name and address (unless furnished by the requester), for necessary and proper research purposes to epidemiological and other research facilities and allow for the release of the name(s) and address(es) of present or former personnel of the armed services and/or their dependents to Federal agencies for the purpose of conducting, directly or under Federal contract, Government research necessary in order to accomplish a statutory purpose of that agency, the Veterans Administration has determined that, in addition to the "Patient Medical Records—VA" and "Veterans and Beneficiary Identification and Records Locator System—VA", these routine uses are required in

the three additional systems listed above. Release of information for these purposes is considered a necessary and proper use of data in these systems of records and will enable the Veterans Administration to be of maximum assistance in the conduct of authorized medical studies.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420. All relevant material received before March 1, 1978, will be considered. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays), during the mentioned 30-day period and for 10 days thereafter. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Services Unit in room 132. Such visitors to the VA field station will be informed that the records are available for inspection only in Central Office and furnished the address and the above room number.

Notice is given that it is proposed to make these routine use statements effective the date of final approval by the Administrator of Veterans Affairs.

Approved: January 23, 1978.

By direction of the Administrator.

RUFUS H. WILSON,  
Deputy Administrator.

In the system identified as 49VA21, "Veterans, Dependents and Beneficiaries Compensation and Pension Records—VA", appearing at 42 FR 49753, the following routine use statements are added to read as follows:

## System name:

Veterans, Dependents and Beneficiaries Compensation and Pension Records—VA.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

23. Disclosure of medical record data, excluding name and address (unless name and address is furnished by the requester) for research purposes determined to be necessary and proper, to epidemiological and other research facilities approved by the Chief Medical Director.

24. The name(s) and address(es) of present or former personnel of the armed services and/or their dependents may be disclosed to the Depart-

ment of Health, Education, and Welfare, or agency thereof, or other Federal agency, at the written request of the head of the agency or designee of the head of that agency, for the purpose of conducting government research necessary in order to accomplish a statutory purpose of that agency.

25. Inquiry of record by research facilities to obtain data necessary to assist in medical studies on veterans for the Veterans Administration and other agencies, as approved by the Chief Medical Director, provided that the name of the veteran and other pertinent identifying data is furnished by the requester.

In the system identified as 50VA22 "Veterans, Dependents, Beneficiaries and Armed Forces Personnel Education and Rehabilitation Records—VA", appearing at 42 FR 49754, the following routine use statements are added to read as follows:

## System name:

Veterans, Dependents, Beneficiaries and Armed Forces Personnel Education and Rehabilitation Records—VA.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

30. Disclosure of medical record data, excluding name and address (unless name and address is furnished by the requester) for research purposes determined to be necessary and proper, to epidemiological and other research facilities approved by the Chief Medical Director.

31. The name(s) and address(es) of present or former personnel of the armed services and/or their dependents may be disclosed to the Department of Health, Education, and Welfare, or agency thereof, or other Federal agency, at the written request of the head of the agency or designee of the head of that agency, for the purpose of conducting government research necessary in order to accomplish a statutory purpose of that agency.

32. Inquiry of record by research facilities to obtain data necessary to assist in medical studies on veterans for the Veterans Administration and other agencies, as approved by the Chief Medical Director, provided that the name of the veteran and other pertinent identifying data is furnished by the requester.

In the system identified as 58VA21/22, "TARGET—Compensation, Pension, Education, and Rehabilitation Records—VA", appearing at 42 FR 49760, the following routine use statements are added to read as follows:

## System name:

TARGET—Compensation, Pension, Education, and Rehabilitation Records—VA

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

31. Disclosure of medical record data, excluding name and address (unless name and address is furnished by the requester) for research purposes determined to be necessary and proper, to epidemiological and other research facilities approved by the Chief Medical Director.

32. The name(s) and address(es) of present or former personnel of the armed services and/or their dependents may be disclosed to the Department of Health, Education, and Welfare, or agency thereof, or other Federal agency, at the written request of the head of the agency or designee of the head of that agency, for the purpose of conducting government research necessary in order to accomplish a statutory purpose of that agency.

33. Inquiry of record by research facilities to obtain data necessary to assist in medical studies on veterans for the Veterans Administration and other agencies, as approved by the Chief Medical Director, provided that the name of the veteran and other pertinent identifying data is furnished by the requester.

INTERSTATE COMMERCE  
COMMISSION

[Notice No. 578]

## ASSIGNMENT OF HEARINGS

JANUARY 25, 1978.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

AB 1 (Sub 40), Chicago & Northwestern Transportation Co., abandonment between

Gillett, Oconto County, Wis., and Scott Lake, Iron County, Mich., now assigned February 28, 1978, at Rhinelander, Wis., will be held at the City Council Chambers, City Hall, 135 South Steven Street.

MC 126473 (Sub 30), Harold Dickey Transport, Inc., now assigned March 7, 1978, at Chicago, Ill., will be held in Room 1319, Everett McKinley Dirksen Building, 219 South Dearborn Street.

MC 133689 (Sub 135), Overland Express, Inc., now assigned March 8, 1978, at Chicago, Ill., will be held in Room 1319, Everett McKinley Dirksen Building, 219 South Dearborn Street.

AB10 (Sub 6), Wabash Railroad Co. and Norfolk & Western Railway Co., abandonment between Fairbury and Clay in Livingston County, Ill., now being assigned April 17, 1978 (1 week), at Pontiac, Ill., in a hearing room to be later designated.

MC 110420 (Sub 771), Quality Carriers, Inc. and MC 124078 (Sub 726), Schwerman Trucking Co., now being assigned April 11, 1978 (1 day), at Chicago, Ill., in a hearing room to be later designated.

MC 110988 (Sub 346), Schneider Truck Lines, Inc., now being assigned April 12, 1978 (1 day), at Chicago, Ill., in a hearing room to be later designated.

MC 141511 (Sub 1), Robert W. Rettig, d.b.a. Protein Express, now being assigned April 13, 1978 (1 day), at Chicago, Ill., in a hearing room to be later designated.

MC 102401 (Sub 22), Taylor Heavy Hauling, Inc., now being assigned April 14, 1978 (1 day), at Chicago, Ill., in a hearing room to be later designated.

MC 119619 (Sub 110), Distributors Service Co., Inc., now assigned March 9, 1978 at Chicago, Ill., will be held in Room 1319, Everett McKinley Dirksen Building, 219 South Dearborn Street.

MC 119789 (Sub 360), Caravan Refrigerated Cargo, Inc., now assigned March 13, 1978, at Chicago, Ill., will be held in Room 1319, Everett McKinley Dirksen Building, 219 South Dearborn Street.

MC 51146 (Sub 501), Schneider Transport, Inc., now assigned March 14, 1978, at Chicago, Ill., will be held at Room 1319, Everett McKinley Dirksen Building, 219 South Dearborn Street.

MC 113678 (Sub 684), Curtis, Inc., now assigned March 16, 1978, at Chicago, Ill., will be held at Room 1319, Everett McKinley Dirksen Building, 219 South Dearborn Street.

MC 115496 (Sub 70), Lumber Transport, Inc., now being assigned January 31, 1978, for prehearing conference at the Offices of the Interstate Commerce Commission in Washington, D.C.

MC 13163, R. C. Van Lines, Inc.—Purchase—Trans-World Movers, Inc., Transport Clearing of Colorado, Inc., Successor in Interest, and MC 128155 (Sub 5), R. C. Van Lines, Inc., now assigned February 13, 1978, at Denver, Colo., will be held in the Courtroom, 1050 17th Street, Suite 1718.

MC 58035 (Sub 13), Trans-Western Express, Ltd., now assigned February 8, 1978, at Denver, Colo., will be held in the Courtroom, 1050 17th Street, Suite 1718.

(Notice No. 288)

## MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission by March 1, 1978. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopsis form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC-FC-77426, filed November 23, 1977. Transferee: J. R. McGINNIS, d.b.a. ILLINOIS FILM SERVICE, 1405 Old West Main Street, Carbondale, Ill. 62901. Transferor: Madge Evelyn Chamness, d.b.a. Illinois Film Service, 1405 Old West Main Street, Carbondale, Ill. 62901. Applicant's representative: Ernest A. Brooks II, Attorney at Law, 1301 Ambassador Building, St. Louis, Mo. 63101. Authority sought for purchase by transferee of

the operating rights of transferor, as set forth in Certificate No. MC-2332, issued July 18, 1967, as follows: *Motion picture films, theatre supplies, and advertising matter*, between St. Louis, Mo., on the one hand, and, on the other, Anna, Cairo, Mounds, Eldorado, Harrisburg, Carrier Mills, Johnston City, Herrin, Cartersville, Hurst, Royalton, Zeigler, Christopher, Carbondale, Murphysboro, Pinckneyville, Sparta, Marissa, and New Athens, Ill., and Cape Girardeau, Jackson, Lutesville, Ilmo, Chaffee, Oran, Sikeston, East Prairie, Charleston, Campbell, Caruthersville, Poplar Bluff, New Madrid, Dexter, and Malden, Mo. *Newspapers, periodicals, films and materials, supplies, and equipment* used in the operation of motion-picture theatres, between St. Louis, Mo., on the one hand, and, on the other, points in a specified part of Illinois. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77463 filed December 16, 1977. Transferee: FRITZ L. MENSINGER, d.b.a. MENSINGER TRUCKING, 1430 Powers, Lewiston, Idaho, 83501. Transferor: Ron Andrews, d.b.a. Ron Andrews Trucking, P.O. Box 142, Lewiston, Idaho, 83501. Applicant's representative: Donald A. Ericson, 708 Old National Bank Building, Spokane, Washington, 99201. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC-139405 (Sub-No. 2), issued June 29, 1977, as follows: *Bananas*, from Long Beach and Wilmington, Calif., to the facilities of Pacific Gamble Robinson, doing business as Pacific Fruit and Product Co., located at Missoula and Kallispell, Mont., Pendleton, Oreg., and Lewiston, Idaho. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77466 filed December 14, 1977. Transferee: MOVING SERVICES, INC., 800 Route 44, Raynham, Mass. 02767. Transferor: W. H. Luddy & Son Moving Co., Inc., 275 North Central Street, E. Bridgewater, Mass. 02333. Transferee's attorney: Michael M. McLaughlin, 101 Charles Street, Manchester, N.H. 03105. Transferor's attorney: Frank J. Weiner, 15 Court Square, Boston, Mass. 02108. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC-42578 issued March 19, 1975, as follows: *General commodities*, with specified exceptions, over irregular routes, between East Bridgewater, Mass., on the one hand, and, on the other, points within 10 miles of East Bridgewater; Milk and cream, between East Bridgewater, Mass., and points

within 5 miles thereof, on the one hand, and, on the other, Providence and East Providence, R.I., and Somerville, Mass.; and Household goods as defined by the Commission, between East Bridgewater, Mass., and points in Massachusetts within 25 miles of East Bridgewater, on the one hand, and, on the other, points in Maine, New Hampshire, Vermont, Connecticut, New York, and Rhode Island. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77469 filed December 18, 1977. Transferee: ROBERT WILLIAMS AND DANIEL R. WILLIAMS, a partnership, d.b.a. WILLIAMS BROTHERS, Ohio Street, Box 365, Wheatland, Pa. 16161. Transferor: Robert Williams and Thomas Williams, a partnership d.b.a. Williams Brothers, Address: Same as Transferee. Applicants' representative: John H. Evans, Jr., P.O. Box 949, Sharon, Pa. 16146. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate Nos. MC-77255 and MC-77255. (Sub-No. 1), issued December 8, 1943, and June 20, 1950, respectively, as follows: *Bulk commodities*, exempted from cargo security requirements under the provisions of the Commission's order in Ex Parte No. MC-5 entered January 23, 1942, in dump trucks, from Hillsville and Carbon, Pa., to Wheatland, Pa.; Between points and places in Mercer and Lawrence Counties, Pa., on the one hand, and, on the other, points and places in Mahoning, Trumbull, and Ashtabula Counties, Ohio; Contractors' equipment and supplies, and such commodities as are transported in dump trucks, between points and places in Crawford, Mercer, and Lawrence Counties, Pa., on the one hand, and, on the other, points and places in Ashtabula, Trumbull, and Mahoning Counties, Ohio. Materials, used in the construction of highways, between points and places in Mercer County, Pa., on the one hand, and, on the other, points and places in Mahoning, Trumbull, and Ashtabula Counties, Ohio. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77491 filed January 5, 1978. Transferee: VN TRANSPORTATION CO., INC., 37 Doctors Park, Cape Girardeau, Mo. 63701. Transferor: Marvin E. VanNoy, 2000 North 14th Street, St. Louis, Mo. 63155. Applicants' representative: Richard D. Kinder, Box 643, Cape Girardeau, Mo. 63701. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC-141913, issued July 23,

1976, as follows: *Equipment, materials, and supplies* used in the operation and maintenance of hospitals from St. Louis, Mo. to points in McCracken County, Ky., Randolph, Alexander, Williamson, Jefferson, and Saline Counties, Ill., and Crawford County, Kans. and return shipments from the named counties to St. Louis, Mo. Applicant holds no Commission authority and does not seek Section 210a(b) temporary authority.

No. MC-FC-77494, filed January 9, 1978. Transferee: WESTERN DRYWALL TRANSPORT, INC., 2001 Broadway, Vallejo, Calif. 94590. Transferor: V.W.S. MATERIALS & SUPPLY CO., 2001 Broadway, Vallejo, Calif. 94590. Applicant's representative: Daniel W. Baker, attorney at law, 100 Pine Street, San Francisco, Calif. 94111. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Permit No. MC 136644 (Sub-No. 1) and (Sub-No. 3), issued July 20, 1973, and January 9, 1978, as follows: *Gypsum wallboard and materials* used in the installation and application of gypsum wallboard, from the plantsites of Gold Bond Building Products, Division of National Gypsum Co., at or near Richmond and Long Beach, Calif., to points in Arizona, Montana, Idaho, Nevada, Oregon, Utah, and Washington, with no transportation for compensation on return except as otherwise authorized. *Gypsum wallboard and materials* used in the installation and application of gypsum wallboard, from the facility of Kaiser Gypsum Co., Inc., at Antioch, Calif., to the Port of Oakland, Calif., and points in Oregon, with no transportation for compensation on return except as otherwise authorized. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

No. MC-FC-77500, filed January 10, 1978. Transferee: GREENWOOD TRANSFER & STORAGE CO., INC., P.O. Box 1032, Laurens Highway, Greenwood, S.C. 29673. Transferor: HERMAN C. HALEY, doing business as Haley Transport Service, 1130 Jackson Street, Anderson, S.C. 29621. Applicant's representative: Talmadge Seymour, Rt. 11, Staunton Bridge Road, Greenville, S.C. 29605. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in certificate No. MC 134391, issued February 5, 1971, as follows: *Used passenger automobiles, and used trucks*, in truckaway service, from Buffalo, Rochester, and Syracuse, N.Y., to points in Anderson and Greenville Counties, S.C. Transferee is presently authorized to operate as a common carrier under certificate No. MC 108948 and subs thereafter. Applica-

tion has not been filed for temporary authority under section 210a(b).

No. MC-FC-77503, filed January 11, 1978. Transferee: SUN TRANSPORTATION, INC., Robinson Road, Brewster, Mass. 02631. Transferor: PHILIP J. KANE, INC., P.O. Box 987, 130 South Main Street, Fall River, Mass. 02720. Applicant's representative: Frank J. Weiner, 15 Court Square, Boston, Mass. 02108. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in certificate of registration No. MC 3730 (Sub-No. 3), issued January 13, 1964, authorizing the transportation of general commodities anywhere in the Commonwealth of Massachusetts. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

No. MC-FC-77506, filed January 12, 1978. Transferee: MOYER PACKING TRANSPORTATION CO., doing business as V. & J. Derstine, P.O. Box 395, Allentown Road, Souderton, Pa. 18964. Transferor: V & J DERSTINE, INC., 438 Derstine Road, Hatfield, Pa. 19440. Applicant's representative: Edwin L. Scherlis, attorney at law, 1315 Walnut Street, (Suite 420), Philadelphia, Pa. 19107. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in permit No. MC 142051 (Sub-No. 2), issued August 16, 1977, as follows: Over irregular routes, to transport meat, in vehicles equipped with mechanical refrigeration, from the facilities of Moyer Packing Co. at Souderton, Blooming Glen, and Bernville, Pa., to points in Connecticut, Delaware, Florida, Georgia, Indiana, Illinois, Maine, Maryland, Massachusetts, Michigan, North Carolina, New Hampshire, New Jersey, New York, Ohio, Rhode Island, South Carolina, Vermont, Virginia, West Virginia, and Wisconsin, and the District of Columbia under a continuing contract or contracts with Moyer Packing Co. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

H. G. HOMME, Jr.,  
Acting Secretary.

# [7035-01]

(ICC Order No. 43 Under Revised Service Order No. 1252)

## REROUTING TRAFFIC

To all railroads: In the opinion of Joel E. Burns, Agent, the Chicago, Milwaukee, St. Paul & Pacific Railroad Co. is unable to transport promptly all traffic offered for movement over its lines between St. Paul,

Minn., and Tacoma-Seattle, Wash., because of blizzards and a major freight train derailment.

It is ordered, That: (a) *Rerouting traffic.* The Chicago, Milwaukee, St. Paul & Pacific Railroad Co. being unable to transport promptly all traffic offered for movement over its lines between St. Paul, Minn., and Tacoma-Seattle, Wash., because of blizzards and a major freight train derailment, that line is authorized to divert or re-route such traffic via any available route to expedite the movement. Traffic necessarily diverted by authority of this order shall be rerouted so as to preserve as nearly as possible the participation and revenues of other carriers provided in the original routing.

(b) *Concurrence of receiving roads to be obtained.* The railroad rerouting cars in accordance with this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) *Notification to shippers.* Each carrier rerouting cars in accordance with this order, shall notify each shipper at the time each shipment is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 10:30 a.m., January 20, 1978.

(g) *Expiration date.* This order shall expire at 11:59 p.m., February 3, 1978, unless otherwise modified, changed, or suspended.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., January 20, 1978.

For the Interstate Commerce Commission.

JOEL E. BURNS,  
Agent.

**[7035-01]**

[ICC Order No. 44 Under Revised Service Order No. 1252]

**REROUTING TRAFFIC**

To all railroads: In the opinion of Joel E. Burns, Agent, the Consolidated Rail Corp. is unable to transport trailer-on-flatcar and container-on-flatcar traffic over its entire line because of massive snow accumulations and has placed an embargo against such traffic.

It is ordered, That: (a) *Rerouting traffic.* The Consolidated Rail Corp. being unable to transport trailer-on-flatcar and container-on-flatcar traffic over its entire line because of massive snow accumulations and having placed an embargo against such traffic, that line and its connections are authorized to divert or reroute such traffic via any available route to expedite the movement. Traffic necessarily diverted by authority of this order shall be rerouted so as to preserve as nearly as possible the participation and revenues of other carriers provided in the original routing.

(b) *Concurrence of receiving roads to be obtained.* The railroad rerouting cars in accordance with this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) *Notification to shippers.* Each carrier rerouting cars in accordance with this order, shall notify each shipper at the time each shipment is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic. Divisions shall be, during

the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 5 p.m., January 20, 1978.

(g) *Expiration date.* This order shall expire at 11:59 p.m., January 25, 1978, unless otherwise modified, changed, or suspended.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., January 20, 1978.

For the Interstate Commerce Commission.

[AB 149 (SDM)]

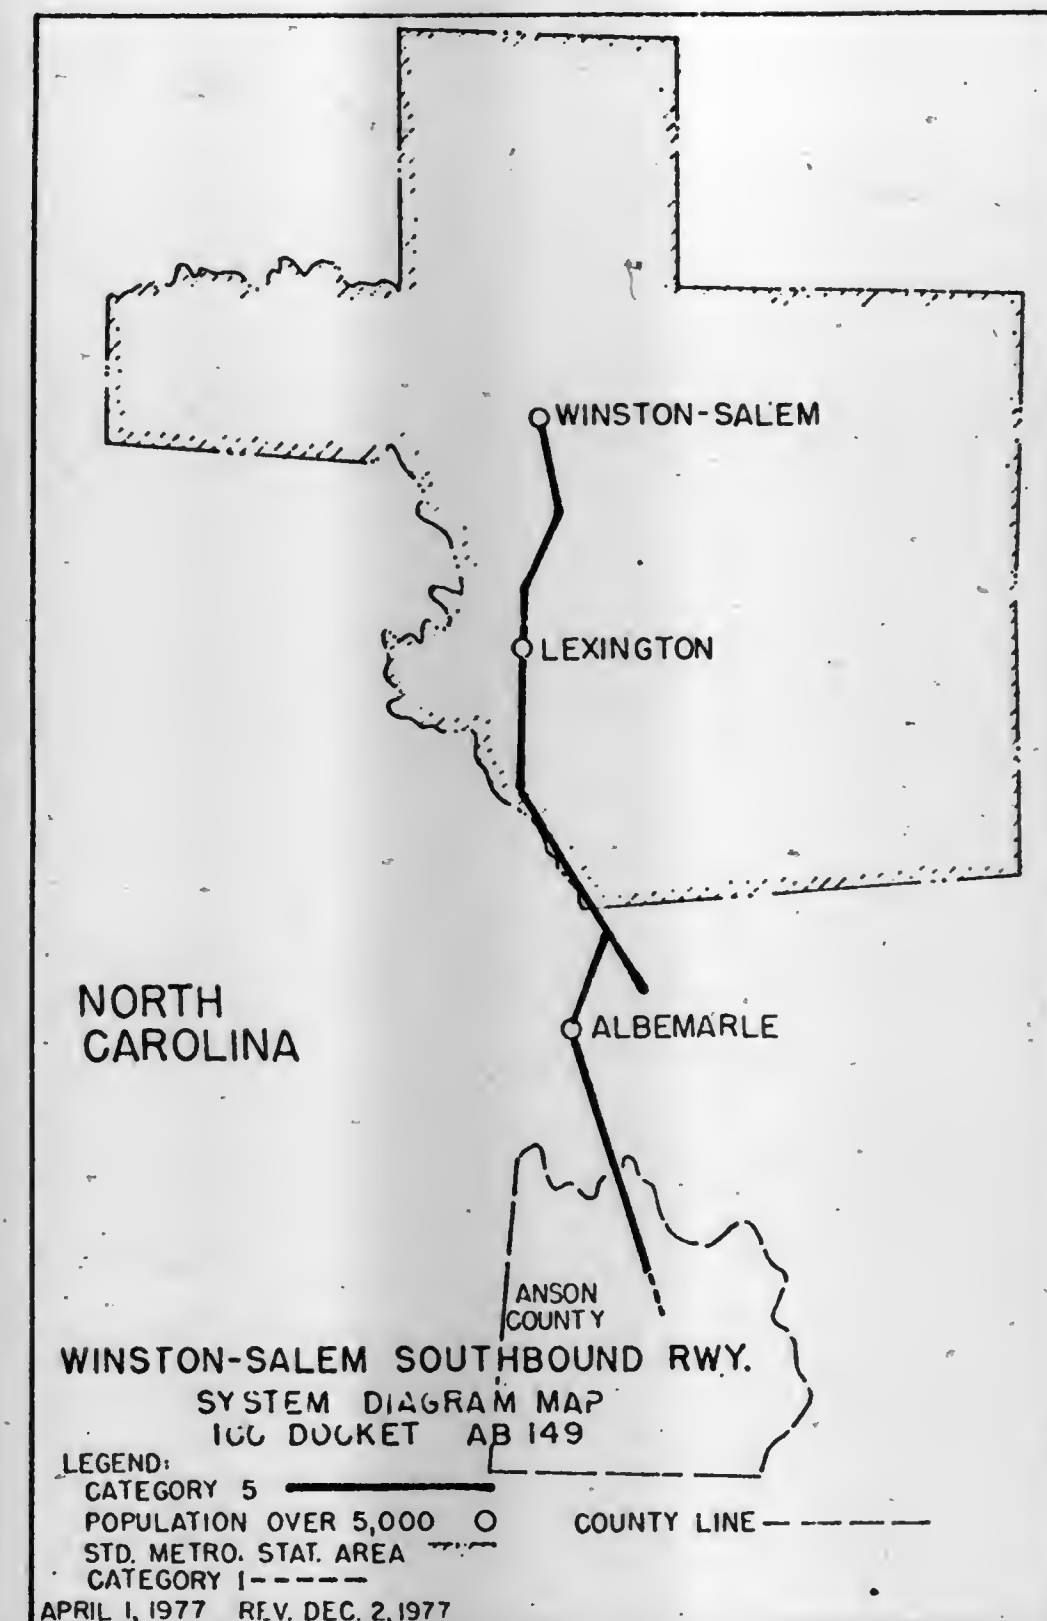

**WINSTON-SALEM SOUTHBOUND RAILWAY CO.**

**Revised System Diagram Map**

Notice is hereby given that, pursuant to the requirements contained in Title 49 of the Code of Federal Regulations, Part 1121.23, that the Winston-Salem Southbound Railway Co., has filed with the Commission its revised color-coded system diagram map in Docket No. AB 149 (SDM). The maps reproduced here in black and white are reasonable reproductions of that revised system diagram map and the Commission on December 23, 1977, received a certificate of publication as required by said regulation which is considered the effective date on which the revised system diagram map was filed.

Color-coded copies of the map have been served on the Governor of each state in which the railroad operates and the Public Service Commission or similar agency and the State designated agency. Copies of the map may also be requested from the railroad at a nominal charge. The maps also may be examined at the office of the Commission, Section of Dockets, by requesting docket No. AB 149 (SDM).

H. G. HOMME, Jr.,  
Acting Secretary.

**WINSTON-SALEM SOUTHBOUND RAILWAY Co.**

ICC DOCKET AB-149

Description of line shown in Category 1 on System Diagram Map: This segment is the terminal 1.23 miles of

the Winston-Salem Southbound main-line located in Wadesboro, Anson County, N.C. It extends from Milepost 87.18 to Milepost 88.41. There will be no agency or non-agency stations affected by this abandonment.

	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Phone 523-5240  
Area Code 202

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

FEDERAL REGISTER, VOL. 43, NO. 21—TUESDAY, JANUARY 31, 1978

## reminders

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

### Rules Going Into Effect Today

NOTE: There were no items eligible for inclusion in the list of RULES GOING INTO EFFECT TODAY.

### List of Public Laws

NOTE: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of PUBLIC LAWS.

## CUMULATIVE LIST OF PARTS AFFECTED DURING JANUARY

## rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

## [6325-01]

## Title 5—Administrative Personnel

## CHAPTER I—CIVIL SERVICE COMMISSION

## PART 213—EXCEPTED SERVICE

## Department of the Treasury

NOTE.—This document originally appeared in the FEDERAL REGISTER for Monday, January 30, 1978. It is reprinted in this issue to meet requirements for publication on an assigned day of the week. (See the inside cover of this issue for information about agencies publishing on assigned days of the week.)

AGENCY: Civil Service Commission.

AC: Final Rule.

SUMMARY: This amendment (1) revokes the Schedule C exception for the position of Adviser to the Secretary (Counselor to the Chairman, Economic Policy Board), Office of the Secretary, and (2) excepts from the competitive service under Schedule C one position of Assistant Secretary (Enforcement and Operations), Office of the Under Secretary, Office of the Secretary, because the position is confidential in nature.

EFFECTIVE DATE: January 30, 1978.

## FOR FURTHER INFORMATION:

On Position Authority Contact, Sallie E. West, Civil Service Commission, 202-632-3782.

On Position Content Contact, Henry DeSeguirant, Department of the Treasury, 202-566-2707.

Accordingly, 5 CFR 213.3305(a)(59) is revoked and (78) is added as set out below:

§ 213.3305 Department of the Treasury.

(a) Office of the Secretary. . . .

(59) [Revoked.]

(78) Assistant Secretary (Enforcement and Operations), Office of the Under Secretary.

(5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954-1958 Comp., p. 218)

For the United States Civil Service Commission.

JAMES C. SPRY,  
Executive Assistant  
to the Commissioners.

## [6325-01]

## PART 213—EXCEPTED SERVICE

## Department of Energy

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment (1) changes the title of an existing schedule C position from Confidential Secretary to Private Secretary for the purpose of more accurately describing the duties of the position; and (2) excepts under schedule C one position of Executive Assistant to the Assistant Secretary for Policy and Evaluation because it is confidential in nature.

EFFEC DATE: January 31, 1978.

## FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3331(c)(2) is amended and (o)(2) is added as set out below:

§ 213.3331 Department of Energy.

(c) Federal Energy Regulatory Commission. . . .

(2) One Private Secretary to one member of the Commission and one Confidential Secretary to each of the Commission's remaining three members.

(o) Office of the Assistant Secretary for Policy and Evaluation. . . .

(2) One Executive Assistant to the Assistant Secretary.

(5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954-1958 Comp., p. 218.)

## Title 8—Aliens and Nationality

### CHAPTER I—IMMIGRATION AND NATURALIZATION SERVICE, DEPARTMENT OF JUSTICE

#### PART 235—INSPECTION OF PERSONS APPLYING FOR ADMISSION

##### Notice to Nonimmigrants

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This final rule amends the regulations of the Immigration and Naturalization Service to require the Service to attach Form M-211 "Notice to Nonimmigrants," to the Entry-Departure documents (Forms I-94 nonimmigrant aliens entering the United States. The form tells the alien that the period of time for which he is permitted to remain in the United States is that written on his Form I-94 by the Immigration Inspector and not the period of time for which his visa is valid. The form has been created in order to eliminate confusion on the part of nonimmigrant aliens as to the length of time they may lawfully remain in the United States. The amendment is necessary to include reference to the form in the regulations.

EFFECTIVE DATE: January 31, 1978.

### FOR FURTHER INFORMATION CONTACT:

James G. Hoofnagle, Jr., Instructions Officer, Immigration and Naturalization Service, 425 Eye Street NW., Washington, D.C. 20538, telephone 202-376-8373.

SUPPLEMENTARY INFORMATION: This final rule amends 8 CFR 235.1(f) to add a new subparagraph (1a) to include a reference to Form M-211 "Notice to Nonimmigrants," which is to be attached to the Form I-94 pre-

pared for nonimmigrants entering the United States.

In Part 235, § 235.1(f) is amended by adding a new subparagraph (1a) to read as follows:

### § 235.1 Scope of examination.

(f) *Arrival-Departure Card, Form I-94—(1)* . . .

(1a) *Notice to Nonimmigrants.* Form M-211, "Notice to Nonimmigrants" shall be attached to the original copy of each Form I-94 issued to a nonimmigrant alien under subparagraph (1) of this paragraph.

(Sec. 103 (8 U.S.C. 1103).)

This amendment is issued under the provisions of section 552 of Title 5 of the United States Code, as amended by Pub. L. 93-502 (88 Stat. 1561) and the authority contained in section 103 of the Immigration and Nationality Act (8 U.S.C. 1103), 28 CFR 0.105(b) and 8 CFR 2.1. Compliance with the provisions of section 553 of Title 5 of the United States Code as to notice of proposed rulemaking and delayed effective date is not necessary in this instance because the amendment contained in this order relates to Service procedure.

*Effective date.* This amendment becomes effective on January 31, 1978.

Dated: January 25, 1978.

LEONEL J. CASTILLO,  
Commissioner of  
Immigration and Naturalization,  
[FR Doc. 78-2569 Filed 1-30-78; 8:45 am]

# [4410-01]

## PART 238—CONTRACTS WITH TRANSPORTATION LINES

Addition of British Caledonian Airways, Ltd.  
and Korean Air Lines Co., Ltd. to Listing

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This is an amendment of the regulations of the Immigration and Naturalization Service to add two carriers to the list of transportation lines which have entered into agreements with the Commissioner of Immigration and Naturalization to guarantee the passage through the United States in immediate and continuous transit of aliens destined to foreign countries. These amendments are necessary because transportation lines which have signed such agreements are published in the Service's regulations.

EFFECTIVE DATE: January 31, 1978.

### FOR FURTHER INFORMATION CONTACT:

James G. Hoofnagle, Jr., Instructions Officer, Immigration and Naturalization Service, 425 Eye Street NW., Washington, D.C. 20538, telephone 202-376-8373.

SUPPLEMENTARY INFORMATION: These amendments to 8 CFR 238.3 are published pursuant to section 552 of Title 5 of the United States Code (80 Stat. 383), as amended by Pub. L. 93-502 (88 Stat. 1561), and the authority contained in section 103 of the Immigration and Nationality Act (8 U.S.C. 1103), 28 CFR 0.105(b), and 8 CFR 2.1. Compliance with the provisions of section 553 of Title 5 of the United States Code as to notice of proposed rulemaking and delayed effective date is unnecessary in this instance because the amendments contained in this order add transportation lines to the listing and are editorial in nature.

1. On October 28, 1977, the Commissioner of Immigration and Naturalization concluded an agreement with British Caledonian Airways Limited to guarantee the passage through the United States in immediate and continuous transit of aliens destined to foreign countries pursuant to section 238(d) of the Immigration and Nationality Act and 8 CFR Part 238. This agreement supersedes the agreements between the Service and two predecessor lines, British United Airlines Ltd. and Caledonian Airways (Prestwick) Ltd. Accordingly, 8 CFR 238.3 will be amended by adding in alphabetical sequence "British Caledonian Airways, Limited", and deleting "British United Airlines Ltd." and "Caledonian Airways (Prestwick) Ltd." from the listing.

2. On December 16, 1977, the Commissioner of Immigration and Naturalization concluded an agreement with Korean Air Lines Co., Ltd. to guarantee the passage through the United States in immediate and continuous transit of aliens destined to foreign countries pursuant to section 238(d) of the Immigration and Nationality Act and 8 CFR 238.3. This agreement supersedes the agreement between the Service and its predecessor, Korean National Airlines. Accordingly, 8 CFR 238.3(b) will be further amended by adding "Korean Air Lines Co., Ltd." in alphabetical sequence and by deleting "Korean National Airlines" from the listing.

In the light of the foregoing, the following amendments are hereby prescribed to Chapter I of Title 8 of the Code of Federal Regulations.

### § 238.3 [Amended]

In § 238.3 aliens in immediate and continuous transit, the listing of transportation lines in paragraph (b) signatory lines is amended by adding in alphabetical sequence, "British Caledonian Airways Limited" and "Korean Air Lines Co., Ltd." and by deleting

## RULES AND REGULATIONS

"British United Airlines Ltd.", "Caledonian Airways (Prestwick) Ltd." and "Korean National Airlines".

(Sec. 103, 238(d), (8 U.S.C. 1103, 1228(d)).)

*Effective date.* The amendments contained in this order will become effective on January 31, 1978.

Dated: January 25, 1978.

LEONEL J. CASTILLO,  
Commissioner of  
Immigration and Naturalization.

## Title 10—Energy

### CHAPTER II—FEDERAL ENERGY ADMINISTRATION<sup>1</sup>

#### PART 205—ADMINISTRATIVE PROCEDURES AND SANCTIONS

##### Amendments to Administrative Procedures Regarding Issuance of Remedial Orders

EDITORIAL NOTE: This document originally appeared in the FEDERAL REGISTER of Friday, January 13, 1978, at page 1930. This document is reprinted here in full text to correct typographical errors involving the capitalization of certain words and the codification of § 205.199F.

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Interim Rule.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby amends its administrative procedures regulations regarding the manner in which Remedial Orders are issued. The purpose of the amendments is to provide a fuller administrative review of the issues raised in each Remedial Order proceeding prior to issuance of the Order in final form. Remedial Orders will be issued in proposed form and aggrieved or interested parties will be able to present evidence relevant thereto prior to issuance of the Order in final form. Evidentiary hearings will be convened where appropriate and an opportunity for oral argument provided as a matter of right. The revised procedures will also apply to Remedial Orders for Immediate compliance and Orders of Disallowance.

EFFECTIVE DATE: January 6, 1978; Comments by February 15, 1978.

ADDRESSES: Written Comments to: Department of Energy, Office of Regulations Management, Room 2214, 2000 M Street, Box QW, Washington, D.C. 20461.

<sup>1</sup>EDITORIAL NOTE: Chapter II will be renamed at a future date to reflect that it contains regulations administered by the Economic Regulatory Administration of the Department of Energy.

### FOR FURTHER INFORMATION CONTACT:

Deanna Williams (DOE Reading Room), 12th and Pennsylvania Avenue NW., Room 2107, Washington, D.C. 20461, 202-566-9161.

Ed Vilade (Media Relations), 12th and Pennsylvania Avenue NW., Room 3104, Washington, D.C. 20461, 202-566-9833.

Melvin Goldstein (Office of Administrative Review), 2000 M Street NW., Room 8002, Washington, D.C. 20461, 202-254-5134.

Nancy E. Williams (Office of General Counsel), 12th and Pennsylvania Avenue NW., Room 7132, Washington, D.C. 20461, 202-566-2454.

### SUPPLEMENTARY INFORMATION:

- I. Background.
- II. Amendments Adopted.
- III. Comment Procedure.
- IV. Interim Requirements.
- V. Other Procedural Considerations.

#### A. BACKGROUND

The procedures which now govern the issuance of Remedial Orders pursuant to the Emergency Petroleum Allocation Act of 1973, as amended, are found in Subpart O of 10 CFR Part 205. ERA wishes to revise these procedures in order to produce a more fully developed administrative record prior to issuance of a Remedial Order. The development of a record through the hearing process described below will assist any reviewing authority in considering arguments on the appeal of a Remedial Order in an effective and efficient manner. These procedures will also give interested parties a better chance to present facts and legal arguments in support of the position they contend the ERA should adopt in the Remedial Order.

The ERA has separated the prosecutorial and adjudicatory functions which are within the jurisdiction of the Administrator. Under the amendments, the offices of the Special Counsel for Compliance and of the Assistant Administrator for Enforcement will issue Proposed Remedial Orders. Those Proposed Orders will then be subject to review by the Office of Administrative Review. In any proceeding before the Office of Administrative Review regarding a Proposed Remedial Order, the enforcement office that issued the Proposed Order will be a party to the proceeding and will submit its position in the same manner as any other party.

#### B. AMENDMENTS ADOPTED

Under the new procedures the Special Counsel for Compliance or the Assistant Administrator for Enforcement of the ERA will issue Notices of Probable Violation or Proposed Remedial Orders under Subpart O of Part 205 in

order to commence most formal compliance proceedings. If a Notice of Probable Violation is served, the person upon whom it is served will continue to have an opportunity to file a reply as now provided in § 205.191. If the enforcement office then finds that a violation exists or is about to occur, it will issue a Proposed Remedial Order. It may also eliminate the Notice of Probable Violation step and proceed immediately to the issuance of a Proposed Remedial Order. In either case, the Proposed Remedial Order will be served upon all parties to the compliance proceeding. Once the Proposed Remedial Order is issued, further proceedings in the matter will be before the Office of Administrative Review.

Any aggrieved party will have the opportunity to file briefs and other documents specifying the errors which it is believed appear in the Proposed Remedial Order. Parties will also have the opportunity to request that an evidentiary hearing be convened with respect to relevant, substantial and material issues of fact. An opportunity for oral argument will, in addition, be provided as a matter of right, and the parties to the proceeding will be afforded an opportunity to respond in a formal manner to the written submissions of any other party.

The amendments also include provisions which will permit various types of pre-hearing discovery. A prior showing will, however, have to be made that the discovery is necessary to obtain relevant and material evidence and that discovery will not unduly delay the proceeding.

After the completion of such proceedings, the Proposed Remedial Order will be considered in view of the material presented and, if appropriate, a final Remedial Order will be issued by the Office of Administrative Review.

The amendments provide that decisions with respect to the issuance of final Remedial Orders will be made solely by the Office of Administrative Review. Consequently, individuals in the Office of Administrative Review who are responsible for deciding a case will not be permitted to receive *ex parte* communications from persons outside that Office regarding matters involved in a Remedial Order proceeding.

The new procedures will apply to Remedial Orders for Immediate Compliance and Orders of Disallowance as well as to Remedial Orders.

The amendments provide that a recipient of a Remedial Order issued pursuant to a NOPV issued after October 1, 1977, may request a review of that Order by the Federal Energy Regulatory Commission, in accord with the DOE Organization Act. For purposes of the amendments, the con-

test and review of a Remedial Order as described in Section 503 of the DOE Act shall be deemed to be an Appeal, and governed by § 205.199C of the new regulations, "Appeal of Remedial Order."

Nothing in these amendments is intended to prohibit the Special Counsel for Compliance or the Assistant Administrator for Enforcement, in coordination with the Department of Justice, from initiating an appropriate civil or criminal enforcement action in court rather than utilizing the administrative procedures established in these regulations.

#### C. COMMENT PROCEDURE

No substantial issue of fact or law exists with respect to the amendments, and the amendments are unlikely to have a substantial impact on the Nation's economy or large numbers of individuals or businesses. Thus, ERA will not provide opportunity for oral presentation of views, data, or arguments regarding the amendments.

You are, however, invited to submit written views, data or arguments regarding the amendments set forth in this notice. Submit comments to the address indicated in the "addresses" section of this preamble and write on the outside of the envelope the designation "Amendments to Administrative Procedures Regarding Issuance of Remedial Orders." Fifteen copies should be submitted. You may inspect all comments received by DOE in the DOE Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue, N.W., between 8:00 a.m. and 4:30 p.m., Monday through Friday, and in the Office of Administrative Review Public Docket Room, Room B-120, 2000 M Street, N.W., between 1:00 p.m. and 5:00 p.m., Monday through Friday.

#### D. INTERIM REQUIREMENTS

The amendments will be adopted immediately by the ERA for purposes of further Remedial Order proceedings, although the regulations will not be promulgated as final rules until public comment thereon has been received and analyzed. Immediate adoption of the new procedures will provide for a consistent approach with respect to Remedial Order proceedings in the period until these regulations are adopted as final rules.

The ERA also believes immediate adoption of the procedures in the amendments will aid in effectuating the intent of Congress as expressed in the Conference Report accompanying the DOE Organization Act, i.e., to guarantee a "separation of the prosecutorial and judicial functions relating to enforcement." Further, since the new procedures provide additional rights in that a greater opportunity is afforded for submission of factual

data and legal arguments in support of a party's position prior to the issuance of a final Order, the ERA believes it is appropriate, and that no party will be adversely affected thereby, to adopt the new procedures effective immediately.

Since the proposed regulations will be adopted immediately, any formal administrative remedial action which is taken by the Assistant Administrator for Enforcement or the Special Counsel for Compliance subsequent to the issuance of these amendments will be issued in the form of a Proposed Remedial Order. The procedures of the amendments will then be applicable to issuance of the Proposed Remedial Order as a final Order.

#### E. OTHER PROCEDURAL CONSIDERATIONS

These amendments do not affect the quality of the environment, and therefore the provisions of Section 7(a)(1) of the Federal Energy Administration Act of 1974, as amended, are not applicable to the amendments.

This document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

In accord with Section 404 of the DOE Organization Act, the Federal Energy Regulatory Commission was notified that the Administrator intended to adopt these amendments, and the Commission has not determined that the regulations would significantly affect any function within its jurisdiction pursuant to Section 402(a)(1), (b) and (c)(1) of that Act.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-332, Pub. L. 94-385, Pub. L. 95-70, and Pub. L. 95-91; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385, and Pub. L. 95-70; Department of Energy Organization Act, Pub. L. 95-91; E.O. 11790, 39 FR 23185; E.O. 12009, 42 FR 46267.)

In consideration of the foregoing, Part 205 of Chapter II, Title 10 of the Code of Federal Regulations, is amended as set forth below, effective immediately.

Issued in Washington, D.C., January 6, 1978.

DAVID J. BARDIN,  
Administrator, Economic  
Regulatory Administration.

1. The table of contents for Part 205, Subpart O, is amended by revising the entries for Section 205.190 through 205.197 and by adding Sections 205.198 through 205.199J, as follows:

#### Subpart O—Notice of Probable Violation, Remedial Order, Notice of Proposed Disallowance, and Order of Disallowance

- Sec.  
205.190 Purpose and Scope.  
205.191 Notice of Probable Violation, Commencement of Enforcement Proceedings.  
205.192 Issuance of Proposed Remedial Order.  
205.193 Notice of Objection.  
205.194 Statement of Objections.  
205.195 Response to Statement of Objections.  
205.196 Motion for Evidentiary Hearing.  
205.197 Decision with Respect to Motion for Evidentiary Hearing.  
205.198 Discovery.  
205.199 Evidentiary Hearing.  
205.199A Hearing for the Purpose of Oral Argument Only.  
205.199B Issuance of Remedial Order.  
205.199C Appeal of Remedial Order.  
205.199D Interim Remedial Order for Immediate Compliance.  
205.199E Notice of Proposed Disallowance, Proposed Order of Disallowance, and Order of Disallowance.  
205.199F Ex Parte Communications.  
205.199G Extension of Time; Interim and Ancillary Orders.  
205.199H Actions Not Subject to Administrative Appeal.  
205.199I Remedies.  
205.199J Consent Orders.

2. Sections 205.190, 205.191, 205.192, 205.193, 205.194, 205.195, 205.196 and 205.197 are revised and §§ 205.198 through 205.199J are added as follows:

§ 205.190 Purpose and Scope; Commencement of Enforcement Proceedings.

(a) This subpart establishes the procedures for determining the nature and extent of violations of the ERA regulations and the procedures for issuance of a Notice of Probable Violation, a Proposed Remedial Order, a Remedial Order, or a Remedial Order for Immediate Compliance, except that it shall not apply with respect to violations of Parts 209 and 213. Nothing in these regulations is intended to affect the authority of ERA enforcement officials in coordination with the Department of Justice to initiate appropriate civil or criminal enforcement actions in court without first initiating administrative proceedings pursuant to this Subpart.

(b) When any report required by the ERA or any audit or investigation discloses, or the ERA otherwise discovers, that there is reason to believe a violation of any provision of this chapter, or any order issued thereunder, has occurred, is continuing or is about to occur, the ERA may conduct proceedings to determine the nature and extent of the violation and may issue a Remedial Order thereafter. The ERA may commence such proceeding by serving a Notice of Probable Violation,

a Proposed Remedial Order, or an Interim Remedial Order for Immediate Compliance.

§ 205.191 Notice of Probable Violation.

(a) The ERA may begin a proceeding under this subpart by issuing a Notice of Probable Violation if the ERA has reason to believe that a violation has occurred, is continuing or is about to occur.

(b) Within 10 days of the service of a Notice of Probable Violation, the person upon whom the Notice is served may file a reply with the ERA office that issued the Notice of Probable Violation at the address provided in § 205.12. The ERA may extend the 10-day period for good cause shown.

(c) The reply shall be in writing and signed by the person filing it. The reply shall contain a full and complete statement of all relevant facts pertaining to the act or transaction that is the subject of the Notice of Probable Violation. Such facts shall include a complete statement of the business or other reasons that justify the act or transaction, if appropriate; a detailed description of the act or transaction; and a full discussion of the pertinent provisions and relevant facts reflected in any documents submitted with the reply. Copies of all relevant contracts, agreements, leases, instruments, and other documents shall be submitted with the reply. When the Notice of Probable Violation pertains to only one step of a larger integrated transaction, the facts, circumstances, and other relevant information regarding the entire transaction shall be submitted.

(d) The reply shall include a discussion of all relevant authorities which support the position asserted, including rulings, regulations, interpretations, and previous decisions issued by DOE or its predecessor agencies.

(e) The reply should indicate whether the person requests or intends to request a conference regarding the notice. Any request not made at the time of the reply shall be made as soon thereafter as possible to insure that the conference is held when it will be most beneficial. A request for a conference must conform to the requirements of § 205.171.

(f) If a person has not filed a reply with the ERA within the 10-day period provided, and the ERA has not extended the 10-day period, the person shall be deemed to have conceded the accuracy of the factual allegations and legal conclusions stated in the Notice of Probable Violation.

(g) If the ERA finds, after the 10-day period provided in § 205.191(b), that no violation has occurred, is continuing, or is about to occur, or that for any reason the issuance of a Remedial Order would not be appropriate, it shall rescind the Notice of Probable

Violation and inform the person to whom the Notice was issued of the rescission.

§ 205.192 Issuance of Proposed Remedial Order.

(a) If the ERA finds, after the 10-day period provided in Section 205.191(b), that a violation has occurred, is continuing, or is about to occur, it may issue a Proposed Remedial Order, which shall set forth the relevant facts and legal basis for the conclusions reached therein.

(b) The ERA may issue a Proposed Remedial Order at any time it finds that a violation has occurred, is continuing, or is about to occur even if it has not previously issued a Notice of Probable Violation.

(c) The ERA shall serve a copy of the Proposed Remedial Order upon the person to whom it is directed and upon any other person readily identifiable by the ERA as likely to be aggrieved by issuance of the Proposed Remedial Order as a final order.

(d) A Proposed Remedial Order may be referred at any time to the Department of Justice for appropriate action in accordance with Subpart P.

§ 205.193 Notice of Objection.

(a) Within 10 days of service of the Proposed Remedial Order any aggrieved person may file a Notice of Objection to the Order with the National Office of Administrative Review. The Notice shall briefly describe how the person would be aggrieved by issuance of the Proposed Remedial Order as a final order.

(b) Any person who fails to file a timely Notice of Objection shall be deemed to consent to the issuance of the Proposed Remedial Order as a final order.

(c) Any person who files a Notice of Objection shall serve a copy of the Notice upon each person who is readily identifiable as a person who will be aggrieved by the ERA action sought, including those persons who have been served copies of the Proposed Remedial Order, and upon the person who issued the Proposed Remedial Order.

(d) The Notice shall include a certification of compliance with the provisions of this section, the names and addresses of each person served with a copy of the Notice, and the date and manner of service.

(e) The Office of Administrative Review may issue a final Remedial Order without further proceedings if no person files a timely Notice of Objection.

(f) In order to exhaust administrative remedies with respect to a Remedial Order proceeding, a party must file a timely Notice of Objection with the Office of Administrative Review.

## § 205.194 Statement of Objections.

(a) *Filing Requirement.* A Statement of Objections to a Proposed Remedial Order must be filed within 30 days of service of the Proposed Remedial Order. A request for an extension of time for filing must be submitted in writing and may be granted for good cause shown.

(b) *Filing and Service of Statement of Objections and Related Documents.*

(1) Statements of Objections, Responses to such Statements, and any motions or other documents filed in connection with the proceeding shall be filed with the National Office of Administrative Review.

(i) Any document referred to in (b)(1) shall be filed in triplicate.

(ii) If a party claims that any portion of a document referred to in (b)(1) contains confidential information, such information should be deleted from two (2) of the copies which are filed. One copy from which confidential information has been deleted will be placed in the Public Docket Room described in § 303.13.

(2) A copy of each of the documents referred to in subsection (b)(1) shall be served upon each person who is readily identifiable as a person who will be aggrieved by the ERA action sought, including those persons who have been served copies of the Proposed Remedial Order, and upon the person who issued the Proposed Remedial Order.

(3) Any filing made under this section shall include a certification of compliance with the provisions of this section, the names and addresses of each person served, and the date and manner of service.

(c) *Contents of Statement of Objections.* The Statement of Objections shall set forth the basis for the objections to the issuance of the Proposed Remedial Order as a final order, including a specification of every issue of fact or law which the party intends to contest in any further proceeding involving the compliance matter which is the subject of the Proposed Remedial Order. The Statement shall set forth the particular findings of fact contained in the Proposed Remedial Order which are contested and the alternative findings which are sought. The Statement shall include a discussion of all relevant authorities which support the position asserted, including rulings, regulations, interpretations, and previous decisions issued by DOE or its predecessor agencies.

## § 205.195 Response to Statement of Objections.

Within 20 days of receipt of a Statement of Objections any party may file a Response. The Response shall contain a full discussion of the position which the party asserts should be

adopted in the matter and a discussion of the legal and factual basis which supports that position.

## § 205.196 Motion for Evidentiary Hearing.

Any party may file a motion requesting that an evidentiary hearing be convened with respect to relevant, substantial and material issues of fact at the same time that it files a Statement of Objections. A motion requesting an evidentiary hearing may be filed by any other party within 15 days after that party is served with a Statement of Objections.

(a) *Contents of Motion for Evidentiary Hearing.* A Motion for Evidentiary Hearing shall specify the manner in which the movant proposes to establish the basis for the alternative findings it asserts in its Statement of Objections. The movant shall also describe the manner in which the issue of fact was raised in any prior administrative proceeding which led to issuance of the Proposed Remedial Order. If the movant asserts that its position can only be established through the introduction of evidence at an evidentiary hearing, the movant shall with respect to each disputed finding of fact:

(1) Identify each witness whose testimony is required;

(2) State the reasons why the testimony of the witness is necessary; and

(3) State the reasons why the asserted position can be established only through the direct questioning of witnesses at an evidentiary hearing.

(b) *Statement of Additional Factual Representations.* At the time a Motion for an Evidentiary Hearing is filed, the movant may also file a Statement of Factual Representations which are not referred to in the Proposed Remedial Order that the movant contends are material and relevant to establish that the Proposed Remedial Order is either erroneous in fact or law or is arbitrary or capricious. The Statement shall set forth the particular findings of fact which the movant asserts should be made, the reasons why such representations are relevant and material, and the manner by which the validity of the factual representations will be established. The movant shall also specify if and how the issue of fact was raised in any prior administrative proceeding which led to issuance of the Proposed Remedial Order. If the movant asserts that its position can only be established through the introduction of evidence at an evidentiary hearing, the movant shall:

(1) Identify each witness whose testimony is required;

(2) State the reasons why the testimony of the witness is necessary; and

(3) State the reasons why the asserted position can be established only through the direct questioning of witnesses at an evidentiary hearing.

(c) *Response to Motion for Evidentiary Hearing.* Within 20 days of receipt of any Motion for Evidentiary Hearing and accompanying Statements, the person who has issued the Proposed Remedial Order shall, and any aggrieved party may, file a Response with the Office of Administrative Review. A Response shall, with respect to each factual representation in the movant's Statements:

(1) Specify the particular factual representations which are accepted as correct for purposes of the proceeding;

(2) Specify the particular factual representations which are denied;

(3) Specify the particular factual representations which the movant is not in a position to accept or deny;

(4) Specify the particular factual representations which are not accepted and the responding party wishes proven by the submission of evidence; and

(5) Specify the particular factual representations which the responding party is prepared to dispute through the testimony of witnesses or the submission of verified documents.

(d) *Motions to Dismiss.* Within 20 days of receipt of any Motion for Evidentiary Hearing and accompanying Statements, any party may also file a Motion to Dismiss any factual representation put forward by the movant on the grounds of vagueness, immateriality, or irrelevance. Any party filing a Motion to Dismiss shall have 10 days following a decision on the Motion to Dismiss to file the Response referred to in (c) above.

## § 205.197 Decision With Respect to Motion for Evidentiary Hearing.

(a) After all submissions with respect to a Motion for Evidentiary Hearing are filed, the Office of Administrative Review may conduct conferences in order to resolve any differences of view and may convene a hearing for the presentation of oral argument. Any such hearing shall be convened pursuant to § 205.172. In addition, the Office of Administrative Review may adopt procedural measures which it concludes are appropriate to facilitate a resolution of the matter.

(b) After considering all relevant information received in connection with the Motion, the Office of Administrative Review shall enter an Order with respect to the Motion. If the Motion is granted in whole or in part, the Order shall specify the particular issues of fact which will be set forth for the evidentiary hearing. If the Motion is denied, the Order may nevertheless permit the movant to file affidavits or other documents in support of the particular finding of fact(s) which it asserted should be reached in the Motion.

(c) The Order of the Office of Administrative Review with respect to a

Motion for Evidentiary Hearing shall be deemed to be an Interlocutory Order which is subject to further administrative review or appeal only upon issuance of the Remedial Order referred to in § 205.199B.

## § 205.198 Discovery.

(a) Any party may file a Motion for Discovery at the same time that it files the Statement of Objections referred to in § 205.194. A Motion for Discovery may be filed by any other party within 15 days after that party is served with a Statement of Objections.

(b) A Motion for Discovery may request that:

(1) A party produce for inspection and photocopying non-privileged written material in its possession;

(2) A party respond to written interrogatories;

(3) A party admit to the genuineness of any relevant document or the truth of any relevant fact; or

(4) The deposition of a material witness be taken.

(c) Any Motion for Discovery shall set forth in detail the reasons why the particular discovery is necessary in order to obtain relevant and material evidence.

(d) Within 10 days after a Motion for Discovery is received, any party may file a request that the Motion be denied in whole or in part, stating the reasons which support the request.

(e) Discovery may be conducted only pursuant to an Order issued by the Office of Administrative Review. A Motion for Discovery will be granted only if it is concluded that discovery is necessary for the party to obtain relevant and material evidence and that discovery will not unduly delay the proceeding. Depositions will be permitted only if a clear and convincing showing is made that the party cannot obtain the material through one of the other discovery means specified in § 205.198(b).

(f) The Director of the Office of Administrative Review or his designee may issue subpoenas in connection with the approval of a Motion for Discovery. The provisions of § 205.8 for witness fees shall apply to any such subpoena.

(g) Any direct expenses incurred by a party to produce evidence pursuant to a Motion for Discovery may be charged to the party who filed the Motion, if so ordered by the Office of Administrative Review.

(h) (1) If a party fails to comply with an Order relating to discovery, the Office of Administrative Review may take appropriate action, including but not limited to the following:

(i) Infer that the testimony, documents or other evidence sought to be discovered would have been adverse to the party;

(ii) Rule that for the purposes of the proceeding the matter or matters sought to be discovered be taken as established adversely to the party;

(iii) Rule that the party may not introduce into evidence or otherwise rely, in support of any claim or defense, upon testimony by such party or the documents or other evidence;

(iv) Rule that the party may not be heard to object to introduction and use of secondary evidence to show what the withheld testimony, documents or other evidence would have shown;

(v) Rule that a pleading, or part of a pleading, or a motion or other submission by the party, concerning which discovery was sought, be stricken, or that a decision with regard to the proceeding be rendered against the party, or both.

(2) It shall be the duty of parties to request action of the foregoing types or to request that other appropriate relief be fashioned to compensate them for the lack of withheld testimony, documents or other evidence.

(3) For purposes of subsection (h)(1), an evasive or incomplete answer will be deemed a failure to answer.

(i) Any Order issued by the Office of Administrative Review with respect to discovery shall be deemed to be an Interlocutory Order which is subject to further administrative review or appeal only upon issuance of the Remedial Order referred to in § 205.199B.

## § 205.199 Evidentiary Hearing.

(a) All evidentiary hearings convened pursuant to this section shall be conducted by the Director of the Office of Administrative Review or his designee.

(b) At any evidentiary hearing, the parties shall have the opportunity to present evidence which:

(1) Directly relates to a particular issue of fact which has been set forth for hearing; and

(2) Is material and relevant to establish the validity of the position which it is asserted the ERA should adopt.

(c) The presiding officer shall afford the right of cross examination to the extent he determines that such is necessary for a full and true disclosure of the facts.

(d) The presiding officer may administer oaths and affirmations, rule on objections to the presentation of evidence, receive relevant material, dispose of procedural requests, determine the format of the hearing, direct that written motions or briefs be provided with respect to issues raised during the course of the hearing and otherwise regulate the course of the hearing. Further, the presiding officer may take reasonable measures to exclude duplicative material from the hearing.

The presiding officer may also require that evidence be submitted through

affidavits or other documents if he concludes that the presentation of evidence through the direct testimony of witnesses will unduly delay the orderly progress of the hearing and would add little substantive value in resolving the issues involved in the hearing.

(e) The provisions of § 205.8 of this Part which relate to subpoenas and witness fees shall apply to any evidentiary hearing.

(f) Following the presentation of all evidence, the parties shall be afforded an opportunity to present oral argument. The presiding officer may direct that written memoranda, briefs or other documentary material be submitted in support of any position which a party advances or with respect to any other issue specified. If written submissions are requested, other parties shall be permitted to file responsive memoranda, briefs or documents.

## § 205.199A Hearing for the Purpose of Oral Argument Only.

(a) If an evidentiary hearing is not convened, any party may nevertheless request a hearing so that oral argument may be presented with respect to the Proposed Remedial Order.

(1) If a party does not file a Motion for Evidentiary Hearing at the time it files the Statement of Objections referred to in § 205.194, a request for oral argument shall be filed at the time a Statement of Objections is filed.

(2) If a party files a Motion for Evidentiary Hearing at the time a Statement of Objections is filed, but that Motion is subsequently denied, the party shall file a request for oral argument within 10 days of receipt of that denial.

(3) A request for a hearing for oral argument shall be filed by any other party within 10 days after that party is served with a Statement of Objections.

(b) Upon a timely request by any party or on its own initiative, the Office of Administrative Review shall conduct a hearing for the purpose of receiving oral argument. A hearing will generally be conducted only after the issues involved in the proceeding have been delineated and any written material which the Office of Administrative Review has requested as a supplement to the Statement of Objections, referred to in § 205.194, or the Response, referred to in § 205.195, has been submitted. The procedures specified in § 205.172 shall generally apply to such hearings.

(c) The provisions of § 205.199(f) above with respect to written submissions shall also apply to hearings convened pursuant to this section.

## § 205.199B Issuance of Remedial Order.

(a) After considering all information received during the proceeding, the di-

rector of the Office of Administrative Review or his designee shall issue a final Remedial Order. The Remedial Order may adopt the findings and conclusions contained in the Proposed Remedial Order or may modify or rescind any such finding or conclusion on the basis of a determination that the finding or conclusion is erroneous in fact or law or is arbitrary or capricious. The Office of Administrative Review may also reach the determination that no Remedial Order should be issued. Every determination issued pursuant to this section shall include a statement which sets forth the relevant facts and legal basis supporting the determination.

(b) The ERA shall serve a copy of any final Remedial Order upon the person to whom it is directed, any person who was served a copy of the Proposed Remedial Order, the person who issued the Proposed Remedial Order, and any other person readily identifiable by the ERA as one who is aggrieved by the Order. A copy of each Remedial Order, modified to insure the confidentiality of information protected from disclosure under 18 U.S.C. 1905 and 5 U.S.C. 552, will also be placed on file in the Public Docket Room described in § 303.13.

(c) A Remedial Order may be referred at any time to the Department of Justice for appropriate action in accordance with Subpart P.

#### § 205.199C Appeal of Remedial Order.

(a) An Appeal may be filed from the following Remedial Orders:

(1) Those issued prior to the effective date of these regulations and pursuant to a NOPV issued prior to October 1, 1977; and

(2) Those issued pursuant to NOPV's or Proposed Remedial Orders issued subsequent to October 1, 1977;

(b)(1) An Appeal as described in (a)(1) shall be filed with and decided by the National Office of Administrative Review in accord with Subpart H of this part. Any such Appeal must be filed within 30 days of service of the Order. In any such proceeding, the Remedial Order shall be sustained unless the appellant demonstrates that the Order was erroneous in fact or law or was arbitrary or capricious.

(2) An Appeal as described in (a)(2) shall be instituted by the recipient notifying the National Office of Administrative Review within 30 days of service of the Order that it wishes to contest the Order.

(c) The Office of Administrative Review shall immediately advise the Federal Energy Regulatory Commission of its receipt of a notice described in (b)(2).

(d) The Office of Administrative Review may, on a case by case basis, set reasonable time limits for the Federal Energy Regulatory Commission to

complete action on a proceeding referred to in (c).

(e) In order to exhaust administrative remedies with respect to a Remedial Order proceeding, a party must file a timely Appeal pursuant to the procedures set forth in this section and await an order granting or denying the Appeal.

#### § 205.199D Interim Remedial Order for Immediate Compliance.

(a) Notwithstanding the provisions of §§ 205.191 through 205.199C, the ERA may issue an Interim Remedial Order for Immediate Compliance, which shall be effective upon issuance and until rescinded or suspended, if it finds:

(1) There is a strong probability that a violation has occurred, is continuing or is about to occur;

(2) Irreparable harm will occur unless the violation is remedied immediately; and

(3) The public interest requires the avoidance of such irreparable harm through immediate compliance and waiver of the procedures afforded under §§ 205.191 through 205.199C.

(b) An Interim Remedial Order for Immediate Compliance shall be served promptly upon the person against whom such Order is issued by telex or telegram, with a copy served by registered or certified mail. The copy shall contain a written statement of the relevant facts and the legal basis for the Remedial Order for Immediate Compliance, including the findings required by paragraph (a) of this section.

(c) The ERA may rescind or suspend an Interim Remedial Order for Immediate Compliance if it appears that the criteria set forth in paragraph (a) of this section are no longer satisfied. When appropriate, however, such a suspension or rescission may be accompanied by a Notice of Probable Violation issued under § 205.191.

(d) If at any time in the course of a proceeding commenced by a Notice of Probable Violation the criteria set forth in paragraph (a) of the section are satisfied, the ERA may issue an Interim Remedial Order for Immediate Compliance, even if the 10-day period for reply specified in § 205.191(b) has not expired.

(e) At any time after an Interim Remedial Order for Immediate Compliance has become effective, the order may be referred to the Department of Justice for appropriate action in accordance with Subpart P.

(f) Any person who is aggrieved by an Interim Remedial Order for Immediate Compliance may contest the basis for the order by filing a Notice of Objection which meets the requirements of § 205.193 within 10 days of the issuance of the Interim Order. The person objecting to the issuance

of the Interim Remedial Order for Immediate Compliance shall follow the procedures specified in §§ 205.192 through 205.199C of this subpart to establish that the Interim Order is erroneous in fact or law or is arbitrary or capricious.

(g) Any aggrieved person who fails to file a timely Notice of Objection to the issuance of an Interim Remedial Order shall be deemed to consent to issuance of the Interim Order in final form. Under those circumstances, the Interim Order shall as a matter of course be made a permanent Order of the ERA.

(h) After considering all information received during a proceeding convened pursuant to a Notice of Objection described in (f), the Director of the Office of Administrative Review or his designee shall determine whether the Interim Order should be made permanent, should be modified, or should be rescinded. The general procedures in §§ 205.192 through 205.199D of this subpart shall apply to any such determination.

(i) Any party aggrieved by an Interim Order for Immediate Compliance may file an application for a temporary stay or an application for a stay of that Order with the National Office of Administrative Review. The Office of Administrative Review shall decide on an application for a temporary stay within 48 hours of receipt of the application and on an application for stay within 10 working days of receipt of the application.

(j)(1) Any party whose application for a stay of an Interim Remedial Order is denied may appeal that denial to the Federal Energy Regulatory Commission. The Office of Administrative Review may, on a case by case basis, set reasonable time limits for the Commission to complete action on any such appeal.

(2) After reaching a decision on an appeal involving an application for stay, the Federal Energy Regulatory Commission shall refer the matter back to the Office of Administrative Review for proceedings on the merits of the Interim Remedial Order pursuant to (f) through (h) above.

(j)(1) An Appeal from a Remedial Order for Immediate Compliance issued pursuant to § 205.199D(h) must be filed within 30 days of service of the Order.

(2) If a person who receives a Remedial Order for Immediate Compliance issued pursuant to a proceeding as to which no NOPV had been issued as of October 1, 1977, or issued pursuant to a NOPV issued on or after October 1, 1977, wishes to contest the Remedial Order, that person shall so notify the National Office of Administrative Review in accordance with the procedures set forth in § 205.199C(b)(2), and the procedures of § 205.199C(c) and (d) shall apply to the Appeal.

(3) In order to exhaust administrative remedies with respect to a Remedial Order for Immediate Compliance proceeding, a party must file an Appeal pursuant to the procedures set forth in this section and await an Order granting or denying the Appeal.

#### § 205.199E Notice of Proposed Disallowance, Proposed Order of Disallowance, and Order of Disallowance.

(a) The ERA shall begin a proceeding under this section by issuing a Notice of Proposed Disallowance pursuant to the provisions of Parts 205 and 212 of this chapter.

(b) Within 10 days of service, the person upon whom the Notice of Proposed Disallowance is served may file a reply with the ERA office that issued the Notice. The ERA may extend the 10-day period for good cause shown.

(c) The reply shall set forth all relevant facts pertaining to the matter that is the subject of the Notice, and be signed by the person filing it.

(d) The reply shall include a discussion of all relevant authorities which support the position asserted, including rulings, regulations, interpretations, and previous decisions issued by DOE or its predecessor agencies.

(e) A request for a conference regarding the Notice should be included in the reply, or made as soon as possible after the reply is filed. A request for a conference must conform to the requirements of § 205.171.

(f) If a reply has not been filed with the ERA within the 10-day or extended period provided, the recipient shall be deemed to have conceded the accuracy of the factual allegations and legal conclusions stated in the Notice of Proposed Disallowance, and the Notice shall become a Proposed Order of Disallowance.

(g) After consideration of any timely reply filed, the ERA may adopt, modify, or rescind the Notice of Proposed Disallowance and issue a Proposed Order of Disallowance. The Proposed Order shall set forth the relevant facts and legal basis for the conclusions reached therein.

(h) The procedures specified in §§ 205.192 through 205.199C shall be applicable to Proposed Orders of Disallowance, and shall govern the issuance of Orders of Disallowance and Appeals from Orders of Disallowance.

(i) An Order of Disallowance shall be effective upon issuance.

(j) An Order of Disallowance may be referred at any time to the Department of Justice for appropriate action in accordance with Subpart P.

#### § 205.199F Ex Parte Communications.

(a) No person who is not employed or otherwise supervised by the Office of Administrative Review shall submit ex parte communications to the Direc-

tor or any person employed or otherwise supervised by the Office with respect to any matter involved in Remedial Order or Order of Disallowance proceedings.

(1) Ex parte communications includes any ex parte oral or written communications relative to the merits of a Proposed Remedial Order, Interim Remedial Order for Immediate Compliance, or Proposed Order of Disallowance proceeding pending before the Office of Administrative Review. The term shall not, however, include requests for status reports, inquiries as to procedures, or the submission of statistical or technical data or reports containing proprietary or confidential information requested after notice to all parties by a person employed or otherwise supervised by the Office of Administrative Review.

(b) If any communication occurs that violates the provisions of this section, the Office of Administrative Review shall take appropriate action to mitigate the adverse impact to any party of the ex parte contact.

#### § 205.199G Extensions of Time; Interim and Ancillary Orders.

The Director of the Office of Administrative Review or his designee may permit any document or submission referred to in this subpart to be filed within a time period different from that specified. The Director or his designee may also issue any interim or ancillary Orders or make any rulings or determinations which are deemed necessary to ensure that the proceedings specified in this Subpart are conducted in an appropriate manner and are not unduly delayed.

#### § 205.199H Actions Not Subject to Administrative Appeal.

A Notice of Probable Violation, Notice of Proposed Disallowance, Proposed Remedial Order or Interim Remedial Order for Immediate Compliance issued pursuant to this subpart shall not be an action of which there may be an administrative appeal pursuant to Subpart H. In addition, a determination by the Office of Administrative Review that a Remedial Order or a Remedial Order for Immediate Compliance should not be issued shall not be appealable pursuant to Subpart H. Further, any Remedial Order which is first issued as a Proposed Remedial Order pursuant to a NOPV issued prior to October 1, 1977, or any Order of Disallowance which is first issued as a Proposed Order of Disallowance pursuant to a Notice of Proposed Disallowance issued prior to October 1, 1977, shall not be appealable pursuant to Subpart H.

#### § 205.199I Remedies.

(a) A Remedial Order, a Remedial Order for Immediate Compliance, an

Order of Disallowance, or a consent order may require the person to whom it is directed to roll back prices, to make refunds equal to the amount (plus interest) charged in excess of those amounts permitted under Part 212, to make appropriate compensation to third persons for administrative expenses of effectuating appropriate remedies, and to take such other action as the ERA determines is necessary to eliminate or to compensate for the effects of a violation or any cost disallowance pursuant to §§ 212.83 or 212.84. Such action may include a direction to the person to whom the Order is issued to make refunds directly to any purchasers of the products involved, notwithstanding that those purchasers obtained such products from an intermediate distributor of such person's products, and may require as part of the remedy that the person to whom the Order is issued maintain his prices at certain designated levels, notwithstanding the presence or absence of other regulatory controls on such person's prices.

(b) The ERA may, when appropriate, issue Orders ancillary to a Remedial Order, Remedial Order for Immediate Compliance, Order of Disallowance, or consent order requiring that a direct or indirect recipient of a refund pass through, by such means as the ERA deems appropriate, including those described in paragraph (a) of this section, all or a portion of the refund, on a pro rata basis, to those customers of the recipient who were adversely affected by the initial overcharge.

#### § 205.199J Consent Orders.

(a) Notwithstanding any other provision of this subpart, the ERA may at any time resolve an outstanding compliance investigation or proceeding, or a proceeding involving the disallowance of costs pursuant to § 205.199E of this subpart, with a consent order. A consent order shall be the exclusive administrative means, besides a Remedial Order or Order of Disallowance, for resolving compliance proceedings in which the ERA has issued a Notice of Probable Violation, a Proposed Remedial Order, a Notice of Proposed Disallowance or a Proposed Order of Disallowance, and a violation or overrecovery has been found. A consent order must be signed by the person to whom it is issued, or a duly authorized representative, and must indicate agreement to the terms contained therein. A consent order need not constitute an admission by any person that ERA regulations have been violated, nor need it constitute a finding by the ERA that such person has violated ERA regulations. A consent order shall, however, set forth the relevant facts which form the basis for the order.

RULES AND REGULATIONS

(b) A consent order is a final order of the ERA having the same force and effect as a Remedial Order issued pursuant to § 205.199B or an Order of Disallowance issued pursuant to § 205.199E, and may require one or more of the remedies authorized by § 205.199I and § 212.84(d)(3). A consent order becomes effective no sooner than 30 days after publication under paragraph (c) below, except that the ERA may make a consent order effective immediately if expressly deemed necessary in the public interest. However, all consent orders involving sums of less than \$500,000 in the aggregate, excluding penalties, will be effective when signed both by the person to whom it is issued and the ERA, and will not be subject to the provisions of paragraph (c) unless the ERA determines otherwise. A consent order shall not be appealable pursuant to the provisions of § 205.199C or § 205.199D and Subpart H, and shall contain an express waiver of such appeal or judicial review rights as might otherwise attach to a final order of the ERA.

(c) When a proposed consent order has been signed, both by the person to whom it is issued and the ERA, the ERA will publish notice of such proposed consent order in the FEDERAL REGISTER and in a press release to be issued simultaneously therewith. The FEDERAL REGISTER notice and the press release will state at a minimum the name of the company concerned, a brief summary of the consent order and other facts or allegations relevant thereto, and the address and telephone number of the ERA office at which copies of the proposed consent order will be available free of charge, the address to which comments on the proposed consent order will be received by the ERA, and the date by which such comments should be submitted, which date will not be less than 30 days from publication of the FEDERAL REGISTER notice. After the expiration of the comment period the ERA may withdraw its agreement to the consent order, attempt to negotiate a modification of the consent order, or issue the consent order as proposed. The ERA will publish in the FEDERAL REGISTER, and by press release, notice of any action taken on a proposed consent order and such explanation of the action taken as deemed appropriate. The provisions of this paragraph shall be applicable notwithstanding that a consent order may have been made immediately effective pursuant to paragraph (b) of this section (except in cases where the consent order involves sums of less than \$500,000 in the aggregate, excluding penalties).

(d) At any time and in accordance with the procedures of Subpart J, a consent order may be modified or rescinded, upon petition by the person

to whom the consent order was issued, and may be rescinded by the ERA upon discovery of new evidence which is materially inconsistent with evidence upon which the ERA's acceptance of the consent order was based. Modifications of a consent order which is subject to public comment under the provisions of paragraph (c) of this section, which in the opinion of the ERA significantly change the terms or the impact of the original order, shall be republished under the provisions of that paragraph.

(e) Notwithstanding the issuance of a consent order, the ERA may seek civil or criminal penalties or compromise civil penalties pursuant to Subpart P concerning matters encompassed by the consent order, unless the consent order by its terms expressly precludes the ERA from so doing.

(f) If at any time after a consent order becomes effective it appears to the ERA that the terms of the consent order have been violated, the ERA may refer such violations to the Department of Justice for appropriate action in accordance with Subpart P.

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

PART 201—EXTENSIONS OF CREDIT BY FEDERAL RESERVE BANKS

Changes in Rates

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Change in discount rates.

SUMMARY: The Board of Governors has amended its Regulation A, "Extensions of Credit By Federal Reserve Banks," for the purpose of adjusting discount rates with a view to accommodation commerce and business in accordance with other related rates and the general credit situation of the country.

EFFECTIVE DATE: The changes were effective on the dates specified below.

FOR FURTHER INFORMATION CONTACT:

Theodore E. Allison, Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-3257.

Pursuant to section 14(d) of the Federal Reserve Act (12 U.S.C. 357), Part 201 is amended as set forth below:

1. Section 201.51 is amended to read as follows:

§ 201.51 Advances and discounts for member banks under sections 13 and 13a.

The rates for all advances and discounts under sections 13 and 13a of

the Federal Reserve Act (except advances under the last paragraph of such section 13 to individuals, partnerships, or corporations other than member banks) are:

	Rate	Effective
Federal Reserve Bank of:		
Boston .....	6½	Jan. 10, 1978.
New York .....	6½	Jan. 9, 1978.
Philadelphia .....	6½	Jan. 20, 1978.
Cleveland .....	6½	Do.
Richmond .....	6½	Jan. 13, 1978.
Atlanta .....	6½	Jan. 18, 1978.
Chicago .....	6½	Jan. 9, 1978.
St. Louis .....	6½	Jan. 13, 1978.
Minneapolis .....	6½	Jan. 10, 1978.
Kansas City .....	6½	Jan. 13, 1978.
Dallas .....	6½	Do.
San Francisco .....	6½	Do.

2. Section 201.52 is amended to read as follows:

§ 201.52 Advances to member banks under section 10(b).

(a) The rates for advances to member banks under section 10(b) of the Federal Reserve Act are:

	Rate	Effective
Federal Reserve Bank of:		
Boston .....	7	Jan. 10, 1978.
New York .....	7	Jan. 9, 1978.
Philadelphia .....	7	Jan. 20, 1978.
Cleveland .....	7	Do.
Richmond .....	7	Jan. 13, 1978.
Atlanta .....	7	Jan. 18, 1978.
Chicago .....	7	Jan. 9, 1978.
St. Louis .....	7	Jan. 13, 1978.
Minneapolis .....	7	Do.
Kansas City .....	7	Do.
Dallas .....	7	Jan. 13, 1978.
San Francisco .....	7	Do.

(b) The rates for advances to member banks for prolonged periods and significant amounts under section 10(b) of the Federal Reserve Act and § 201.2(e)(2) of Regulation A are:

	Rate	Effective
Federal Reserve Bank of:		
Boston .....	7½	Jan. 10, 1978.
New York .....	7½	Jan. 9, 1978.
Philadelphia .....	7½	Jan. 20, 1978.
Cleveland .....	7½	Do.
Richmond .....	7½	Jan. 13, 1978.
Atlanta .....	7½	Jan. 18, 1978.
Chicago .....	7½	Jan. 9, 1978.
St. Louis .....	7½	Jan. 13, 1978.
Minneapolis .....	7½	Jan. 10, 1978.
Kansas City .....	7½	Jan. 13, 1978.
Dallas .....	7½	Do.
San Francisco .....	7½	Do.

3. Section 201.53 is amended to read as follows:

§ 201.53 Advances to persons other than member banks.

The rates for advances under the last paragraph of section 13 of the Federal Reserve Act to individuals, partnerships, or corporations other than member banks secured by direct obligations of, or obligations fully guaranteed as to principal and interest

by, the United States or any agency thereof are:

	Rate	Effective
Federal Reserve Bank of:		
Boston .....	9½	Jan. 10, 1978.
New York .....	9½	Jan. 9, 1978.
Philadelphia .....	9½	Jan. 20, 1978.
Cleveland .....	9½	Do.
Richmond .....	9½	Jan. 13, 1978.
Atlanta .....	9½	Jan. 18, 1978.
Chicago .....	9½	Jan. 9, 1978.
St. Louis .....	9½	Jan. 13, 1978.
Minneapolis .....	9½	Jan. 10, 1978.
Kansas City .....	9½	Do.
Dallas .....	9½	Jan. 13, 1978.
San Francisco .....	9½	Do.

(12 U.S.C. 248 (i). Interprets or applies 12 U.S.C. 357.)

By order of the Board of Governors, January 23, 1978.

GRIFFITH L. GARWOOD,  
Deputy Secretary of the Board.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket Nos. 8733-o and 8973-o]

PART 13—PROHIBITED TRADE PRACTICES AND AFFIRMATIVE CORRECTIVE ACTIONS

National Housewares, Inc., et al. and Emdeko International, Inc., et al.

AGENCY: Federal Trade Commission.

ACTION: Final Order.

SUMMARY: This order, among other things, requires a Salt Lake City, Utah distributor of household products to cease engaging in package selling, as it is defined in the order to cease encouraging, advising or assisting others to engage in package selling. Additionally, the firm is required to maintain prescribed records for a period of 5 years.

DATES: Complaints, March 13, 1967, June 21, 1974; Final Order, November 18, 1977.\*

FOR FURTHER INFORMATION CONTACT:

William A. Arbittman, Director, San Francisco Regional Office, Federal Trade Commission, 450 Golden Gate Ave., San Francisco, Calif. 94102, 415-556-1270.

SUPPLEMENTARY INFORMATION: In the Matter of National Housewares, Inc., a corporation, and Edward J. Gilson, individually and as an officer of said corporation and Emdeko International, Inc., a corporation, and Anthony J. Wanlass, individually and as an officer of said corporation. The

\*Copies of the Complaint, Initial Decision, Opinion and Final Order filed with the original document.

RULES AND REGULATIONS

prohibited trade practices and/or corrective actions as codified under 16 CFR 13, are as follows:

Subpart—Aiding, Assisting and Abetting Unfair or Unlawful Act or Practice: § 13.290 Aiding, assisting and abetting unfair or unlawful act or practice.

Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; 13.533-20 Disclosures; 13.533-45 Maintain records; 13.533-45(c) Complaints; 13.533-45(e) Correspondence. Subpart—Furnishing Means and Instrumentalities of Misrepresentation or Deception: § 13.1055 furnishing means and instrumentalities of misrepresentation and deception. Subpart—Misrepresenting Oneself and Goods—Business Status, Advantages or Connections: § 13.1440 Identity; § 13.1513 Operations generally.—Goods: § 13.1625 Free goods or services; § 13.1663 Individual's special selection or situation; § 13.1705 Prize contests; § 13.1740 Scientific or other relevant facts; § 13.1757 Surveys.—Prices: § 13.1790 Coupons, credit vouchers, etc., of specified value.—Promotional Sales Plans; § 13.1830 Promotional sales plans. Subpart—Neglecting, Unfairly or Deceptively to Make Material Disclosure: § 13.1855 Identity; § 13.1883 Prize contests; § 13.1895 Scientific or other relevant facts. Subpart—Offering Unfair, Improper and Deceptive Inducements to Purchase or Deal: § 13.1925 Coupon, certificate, check, credit voucher, etc., deductions in price; § 13.1928 Customer connection or action; § 13.1955 Free goods; § 13.2020 Premium or premium conditions; § 13.2027 Prize contests; § 13.2063 Scientific or other relevant facts.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45.)

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

FINAL ORDER

This matter having been heard by the Commission upon the appeal of respondents and complaint counsel from the initial decision, and upon briefs and oral argument in support thereof and opposition thereto, and the Commission for the reasons stated in the accompanying Opinion having determined to sustain the initial decision with certain modifications:

It is Ordered, That the initial decision of the administrative law judge, pages 1-74, be adopted as the Findings of Fact and Conclusions of Law of the Commission, except to the extent modified or otherwise indicated in the accompanying Opinion.

Other Findings of Fact and Conclusions of Law of the Commission are contained in the accompanying Opinion.

It is further Ordered, That the following Order to Cease and Desist be, and it hereby is, entered:

ORDER

I

For purposes of this order the following definitions shall apply:

A. "Package selling" means:

(1) Soliciting a consumer by telephone, mail, or other means of direct communication to attend a sales presentation; or

(2) Offering a gift, premium, prize, coupon, or a chance to secure any of the above, in connection with a solicitation to attend a sales presentation; or

(3) Representing that a survey or promotion is being undertaken, or that the consumer is invited to participate in an advertising or promotional program, unless no offer of sale is made to the consumer to whom such representation is made; or

(4) Using any artifice or device, to solicit a consumer for the purpose of making a sales presentation, which has a tendency or capacity to lead a consumer to conclude that there is any other reason for the contact with him; or

(5) Offering or selling three or more unrelated products for a single price.

Provided, That package selling shall not include the use of any of the above practices by regular multi-line retail establishments, such as department stores. Provided further, That use of the practices enumerated in subparagraphs (1), (2), or (5) shall not constitute package selling if each solicitation, offer or sales presentation comprehended by such practices is immediately preceded by a clear and conspicuous disclosure and if a cooling-off period is given in connection with any sale that may follow.

B. "Clear and conspicuous disclosure" means the statement "We would like the opportunity to sell our products to you," in print at least as large and prominent as the largest and most prominent used in any other portion of the written material with which it appears or, in oral presentations, in speech at least as clear and distinct as the most clear and distinct speech used in any other portion of the oral presentation with which it is given.

C. To give a "cooling-off period" means to fulfill all of the obligations established by 16 CFR Part 429 as if the sale were a door-to-door sale, as defined by that part, whether it is or not.

D. "Encouraging or advising" includes providing sales materials, guidance, advice or other similar assistance.

E. "Assisting" includes providing products by sale, consignment or any other means of transfer.

F. "Sale," in any of its grammatical forms, includes leases and all other transfers of goods and services.

## II

*It is Ordered*, That respondents Emdeko International, Inc., a corporation, its successors and assigns, and its officers; Edward J. Gilson, individually and as an officer of said corporation; and Anthony J. Wanlass, individually and as an officer of said corporation; and the agents, representatives and employees of the foregoing respondents, directly or through any corporation, subsidiary, division or other device, in or affecting commerce as "commerce" is defined in the Federal Trade Commission Act, shall forthwith cease and desist in any manner from:

- (1) Encouraging or advising any other person to engage in package selling; or
- (2) Engaging in package selling; or
- (3) Assisting any other person to engage in package selling.

*Provided*, That it shall be a defense to a charge of assisting another in package selling in violation of this Paragraph of the Order if respondents establish that they ceased doing business for one year with a person engaged in package selling within thirty (30) days of having knowledge that such person engaged in such conduct.

## III

*It is further Ordered*, That the corporate respondent shall deliver, or cause to be delivered, a copy of this order to its divisions, distributors, dealers, retailers, and franchisees.

## IV

*It is further Ordered*, That respondents shall, for a period of five (5) years after receipt of consumer, Better Business Bureau, or consumer or law enforcement agency complaints, comments, and inquiries concerning respondents' activities or the activities of their distributors, dealers, retailers, or franchisees, retain records of all such complaints or inquiries, and copies of any written correspondence and complete summaries of telephone conversations relating thereto. These records shall be available, at their request and upon reasonable advance notice, to representatives of the Federal Trade Commission during respondents' regular business hours.

## V

*It is further Ordered*, That the corporate respondents shall notify the Federal Trade Commission at least thirty (30) days prior to any proposed change in the corporate respondents, such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other

change in said corporations which may affect compliance obligations arising out of the order.

## VI

*It is further Ordered*, That each individual respondent named herein promptly notify the Commission of the discontinuance of his present business or employment and of his affiliation with a new business or employment. In addition, for a period of 10 years from the effective date of this order, the respondent shall promptly notify the Commission of each affiliation with a new business or employment. Each such notice shall include the respondent's new business address and a statement of the nature of the business or employment in which the respondent is newly engaged as well as a description of respondent's duties and responsibilities in connection with the business or employment. The expiration of the notice provision of this paragraph shall not affect any other obligation arising under this order.

## VII

*It is further Ordered* That respondents shall within sixty (60) days after service upon them of this Order, file with the Federal Trade Commission a report in writing setting forth in detail the manner and form in which they have complied with this Order.

CAROL M. THOMAS,  
Secretary.

## [4110-07]

## Title 20—Employees' Benefits

## CHAPTER III—SOCIAL SECURITY ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[Reg. No. 16]

## PART 416—SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

## Subpart B—Eligibility

## Eligibility of Individuals Residing in Publicly Operated Community Residences Serving No More Than 16 Residents

AGENCY: Social Security Administration, HEW.

ACTION: Interim regulation.

SUMMARY: The interim regulation provides that the term "public institution" does not include publicly operated community residences which serve no more than 16 residents. The authority for this rule is section 1611(e)(1)(C) of the Social Security Act, as added by section 505(a) of Pub. L. 94-566, effective October 1, 1976. Thus, individuals who are residing in publicly operated community residences which serve no more than 16 residents, and who are otherwise qual-

fied, are eligible for supplemental security income (SSI) benefits.

This amendment to the Act encourages the development of small residential alternatives to care in large institutional settings for persons who would benefit from a living arrangement closely approximating independent living in a community setting while, at the same time receiving supportive care and some degree of supervision. These provisions are designed to acclimate residents to community living and to ease the transition into an independent living situation.

EFFECTIVE DATE: This interim regulation shall be effective on January 31, 1978.

COMMENTS: Comments must be received on or before May 1, 1978.

ADDRESSES: Prior to final adoption of the interim regulation, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing to the Commissioner of Social Security, Department of Health, Education, and Welfare, P.O. Box 1585, Baltimore, Md. 21203.

Copies of all comments received in response to this notice will be available for public inspection during regular business hours at the Washington Inquiries Section, Office of Information, Social Security Administration, Department of Health, Education, and Welfare, North Building, Room 5131, 330 Independence Avenue SW., Washington, D.C. 20201.

## FOR FURTHER INFORMATION CONTACT:

Mr. S. J. Weissman, Legal Assistant, Social Security Administration, 6401 Security Boulevard, Baltimore, Md. 21235, telephone 301-594-7341.

SUPPLEMENTARY INFORMATION: Prior to the enactment of section 505(a) of Pub. L. 94-566, Subparagraph (A) of section 1611(e)(1) of the Act provided only one exception to the general rule that no person shall be eligible to receive SSI benefits for any month throughout which the individual is an inmate of a public institution. The sole exception, subparagraph (B) of § 1611(e)(1), provides that an individual who is throughout a month in a public institution may be eligible for SSI benefits if the institution is receiving payments under a State plan approved under Title XIX (Medicaid) on his or her behalf, assuming all other SSI eligibility criteria are met. In this situation, the standard payment amount is \$25 for each full month of such institutionalization. This amount is then subject to reduction for any countable income which the individual may have. However, if the public institution is not receiving Title XIX (Medicaid) payments on his or her behalf, the individual would be ineligible for

SSI benefits. These statutory provisions are reflected in Regulations No. 16, § 416.231 of Subpart B of Title 20 of the Code of Federal Regulations.

With the enactment of section 505(a) of Pub. L. 94-566, a new subparagraph (C) is added to section 1611(e)(1) of the Act which provides a second exception to subparagraph (A). It states that as used in subparagraph (A), the term "public institution" does not include publicly operated community residences which serve no more than 16 residents. Accordingly, we have amended § 416.231 by adding new paragraph (a)(4) to state that for purposes of § 416.231 the term public institution does not include publicly operated community residences which serve no more than 16 residents.

In developing a definition for "publicly operated community residences which serve no more than 16 residents", we looked to the wording of the statute. We also considered the background materials contained in the subcommittee hearings on the Keys Amendment and the Senate Finance Committee Report on H.R. 10210. (See Hearings on H.R. 10210 Before the Subcomm. on Public Assistance of the House Comm. on Ways and Means, 94th Cong., 2nd Sess. (1976). Also see S. Rep. No. 1265, 94th Cong., 2nd Sess. 29 (1976).) The central theme in these materials is the underlying philosophy that community residences provide a desirable alternative to large institutions because they can provide not only life sustaining services of food and shelter, but also can encourage

personal independence in an atmosphere of mutual acceptance and support for emotional growth and life enrichment activities. Based on this information, the critical factors used in developing a definition were size, location, and purpose. We have also considered the problems which can arise because of fluctuating occupancy levels in this type of facility. We believe the most feasible and equitable way to meet the intent of the legislation is to look to the number of residents the facility is designed or planned to serve. This is in keeping with the intent of the statute which envisions a 16 resident capacity as an outer limit applicable to community residences. The test is whether or not community residences are designed or planned, according to their specifications, to house and provide services for no more than 16 residents.

A publicly operated community residence, while not considered a "public institution" for purposes of making residents ineligible for SSI under section 1611(e)(1)(A) of the Act, is nevertheless an institution, and as such is expected to provide some services beyond food and shelter (§ 416.231(b)(1)). Thus, a publicly operated community residence must make

available some other services such as social services, or help with personal living activities, or training in socialization and life skills. Such services may also include occasional or incidental medical or remedial care. It is intended that these services will provide the individual with the skills necessary to return to community living.

Thus, we have amended § 416.231 by adding a new paragraph (b)(6)(i) to provide the definition for the term "publicly operated community residence which serves no more than 16 residents." The definition is designed to assure that publicly operated community residences provide the desired living situation.

To further insure clarity of the definition, we have added a new paragraph (b)(6)(ii) to § 416.231. It describes those public facilities which are not considered community residences even if their accommodations are for 16 or fewer residents. Excluded are educational or vocational training institutions, correctional or holding facilities, medical treatment facilities, and residential facilities located on the grounds of or immediately adjacent to any large institution or multiple-purpose complex.

Educational and vocational training institutions are designed to provide individuals with approved, accredited, or recognized educational or training programs preparatory to gainful employment. A publicly operated community residence is designed to acclimate its residents to community living, thereby easing their transition into independent living situations. Since each differs in its primary goal, educational and vocational training institutions cannot qualify as publicly operated community residences. Even though individuals residing in educational or vocational training institutions would not be eligible for SSI benefits under this proposed rule, such individuals may be eligible for SSI benefits under § 416.231(b)(3). This is so because § 416.231(b)(3) provides that a person is not considered an "inmate of a public institution" when he or she is in a public educational or vocational training institution for purposes of securing educational or vocational training.

Correctional or holding facilities are part of the criminal justice system, and medical treatment facilities primarily focus on providing medical or remedial care. Since neither institution (described in the preceding sentence) is designed to provide the desired living arrangement envisioned by the statute, they are excluded from the definition of publicly operated community residences.

Residential facilities located on or adjacent to a larger institution or multiple purpose complex are excluded because they are an integral part of the

larger institution. Therefore, such a living arrangement would not be considered as an alternative to institutional living. Moreover, a facility so situated is really not part of the community and thus could not as readily accomplish the intended goal.

As a matter of interest, it should be noted that section 505(d) of Pub. L. 94-566 amends section 1616(e) of the Act. It provides in part that, effective October 1, 1977, each State shall establish one or more State or local authorities to establish and enforce standards for any category of institutions, foster homes, or group living arrangements in which, as determined by the State, a significant number of SSI beneficiaries are residing or are likely to reside. Thus, if a State determines that a publicly operated community residence houses or will house a significant number of SSI beneficiaries, such a facility may be subject to standards set by the State or local authority. This provision of the law is reflected in 45 CFR Part 229, which is published in this edition of the FEDERAL REGISTER.

Since section 505(a) of Pub. L. 94-566, was effective October 1, 1976, operating personnel have been alerted to this change and the need to process such cases under the newly enacted legislation. This action was necessary to insure prompt recognition and equitable handling of these cases, on an interim basis, until final regulations are in effect. This amendment to the regulations is being published with interim effectiveness because it is a substantive rule which provides an exclusion to the definition of public institutions as required by section 505(a) of Pub. L. 94-566. Thus, the Notice of Proposed Rule Making is being dispensed with because a delay in implementing this amendment would be impractical, unnecessary, and contrary to the public interest (5 U.S.C. 553(b)(3)).

The interim regulation is to be issued under the authority contained in sections 1102, 1611, and 1631 of the Social Security Act as amended, 49 Stat. 647, as amended, 86 Stat. 1466 and 1475; 42 U.S.C. 1302, 1382(e) and 1383(d)(1).

(Catalog of Federal Domestic Assistance Program No. 13.807, Supplemental Security Income Program.)

NOTE.—The Social Security Administration has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821, as amended by Executive Order 11949, and OMB circular A-107.

Dated: January 9, 1978.

DON WORTMAN,  
Acting Commissioner  
of Social Security.

Approved: January 20, 1978.

HALE CHAMPION,

*Acting Secretary of Health,  
Education, and Welfare.*

Part 416 of Chapter III of Title 20 of the Code of Federal Regulations is amended as set forth below:

Section 416.231 is amended by revising paragraph (a)(1) and adding paragraphs (a)(4), (b)(6)(i), and (b)(6)(ii) to read as follows:

§ 416.231 Limitation on eligibility due to institutional status.

(a) *General.* (1) Except as provided in subparagraphs (2), (3), and (4) of this paragraph, no person shall be an eligible individual or eligible spouse for purposes of title XVI of the Act with respect to any month if throughout such month the person is an inmate of a public institution.

(3) [Reserved]

(4) Effective October 1, 1976, the term "public institution", as used in this section, does not include a publicly operated community residence which serves no more than 16 residents. Where it is determined that a community residence is not publicly operated such residence is not a public institution as defined in § 416.231(b)(2) and this section will not apply.

(b) *Definitions.* For purposes of this part the following definitions shall apply:

(6)(i) The term "publicly operated community residence which serves no more than 16 residents" (see § 416.231(a)(4)) means:

(a) It must be publicly operated as defined in § 416.231(b)(2); and

(b) It must be designed and planned to serve no more than 16 residents, or the plan and design was changed to serve no more than 16 residents; and

(c) It must be serving 16 or fewer residents; and

(d) It must make available some services beyond food and shelter such as social services, or help with personal living activities, or training in socialization and life skills; occasional or incidental medical or remedial care may also be provided (as defined in 45 CFR 228.1).

(ii) Excluded from the definition of "publicly operated community residences" are the following facilities, even if their accommodations are for 16 residents or less:

(a) Residential facilities located on the grounds of or immediately adjacent to any large institution or multiple-purpose complex; and

(b) Educational or vocational training institutions that primarily provide an approved or accredited or recognized program to some or all of the individuals residing within it; and

(c) Correctional or holding facilities which provide for individuals whose

personal freedom is restricted because of a court sentence to confinement (prisoners), court ordered holding (material witness, juvenile) or a pending disposition of charges or status (individuals who have been arrested or detained); and

(d) Medical treatment facilities (hospitals and skilled nursing facilities, see 42 U.S.C. 1395x and intermediate care facilities, see 42 U.S.C. 1396d) which provide medical or remedial care on an inpatient basis.

Title 21—Food and Drugs

SUBCHAPTER E—ANIMAL DRUGS, FEEDS, AND RELATED PRODUCTS

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Amprolium

AGENCY: Food and Drug Administration

ACTION: Final rule.

SUMMARY: The animal drug regulations are amended to reflect approval of a supplemental new animal drug application (NADA) filed by Merck Sharp & Dohme Research Laboratories providing for use of a higher concentration amprolium supplement in the feed of calves.

EFFECTIVE DATE: January 31, 1978.  
FOR FURTHER INFORMATION CONTACT:

Adriano R. Gabuten, Bureau of Veterinary Medicine (HFV-149), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4913.

SUPPLEMENTARY INFORMATION: Merck & Co., Inc., P.O. Box 2000, Rahway, N.J. 07065, filed a supplemental NADA (12-350V) increasing the upper concentration limit for amprolium permitted in calf supplements from 0.5 to 1.25 percent. The proper amount of this supplement is either top-dressed on or thoroughly mixed in the daily feed ration of calves.

This independent action has not required a reevaluation of the parent NADA and does not constitute a reaffirmation of the drug's safety and effectiveness.

In accordance with the Freedom of Information Regulations and § 514.11(e)(2)(ii) of the animal drug regulations (21 CFR 514.11(e)(2)(ii)), a summary of the safety data and information submitted to support the approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk (HFC-20), Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857, between 9 a.m. and 4 p.m., Monday through Friday, except on Federal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 558 is amended in § 558.55 by revising the introductory text of paragraph (e)(1) and paragraph (e)(1), (i)(b) and (ii)(b), to read as follows:

§ 558.55 Amprolium.

(e) *Conditions of use.*—(1) *Calves.* It is top-dressed on or thoroughly mixed in the daily feed ration as follows:

(i) • • • • •

(b) *Limitations.* Administer from a supplement containing from 0.05 to 1.25 percent amprolium with the usual amount of feed consumed in 1 day; feed for 21 days during periods of exposure or when experience indicates that coccidiosis is likely to be a hazard, withdraw 24 hours before slaughter; as sole source of amprolium.

(ii) • • • • •

(b) *Limitations.* Administer from a supplement containing from 0.05 to 1.25 percent amprolium with the usual amount of feed consumed in 1 day; feed for 5 days; for a satisfactory diagnosis, a microscopic examination of the feces should be done by a veterinarian or diagnostic laboratory before treatment; when treating outbreaks, the drug should be administered promptly after diagnosis is determined; withdraw 24 hours before slaughter; as sole source of amprolium.

Effective date. January 31, 1978.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))).

Dated: January 23, 1978.

SUBCHAPTER F—BIOLOGICS

[Docket No. 77N-0433]

PART 610—GENERAL BIOLOGICAL PRODUCTS STANDARDS

Dating Periods for Specific Products

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document amends the regulations for dating periods for specific products. This amendment will explicitly provide manufacturers to establish for their products, and also label their products with extended dating periods, after approval of the Director, Bureau of Biologics.

EFFECTIVE DATE: January 31, 1978.

ADDRESS: Office of the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Al Rothschild, Bureau of Biologics (HFB-620), Food and Drug Administration, Department of Health, Education, and Welfare, 8800 Rockville Pike, Bethesda, Md. 20014, 301-443-1920.

SUPPLEMENTARY INFORMATION: The biologics regulations, under § 610.53 (21 CFR 610.53), prescribe dating periods for all licensed biological products. The times prescribed in the regulation apply to types of licensed products, rather than each manufacturer's brand of each product. The dating period for a particular product type is the period during which all products of that type are expected to yield their specific results and retain their safety, purity, potency, and effectiveness. Under §§ 610.60(a)(4) and 610.61(d) (21 CFR 610.60(a)(4) and 610.61(d)), the labeling for all biological products includes a statement of their expiration date.

However, a manufacturer may submit to the Bureau of Biologics stability data for its particular brand and seek an amendment to its product license to permit an exemption or modification of the requirements for that product prescribed under § 610.53.

For example, Merck Sharp & Dohme, Division of Merck & Co., Inc., citing improvements in manufacturing, has submitted stability data collected at various temperatures and has applied for an amendment to its product license for Measles Virus Vaccine, Live, Attenuated to permit a 2-year dating period. The Commissioner of Food and Drugs finds that the data submitted by Merck support the requested extension. Measles Virus Vaccine, Live, Attenuated produced by other licensed manufacturers shall continue to provide for a maximum of 1 year of storage at the prescribed temperature after issuance, in accordance with § 610.53. Vaccine produced by Merck Sharp & Dohme under an amended license will be labeled with the 2-year period. A summary of the Merck data supporting an extended dating period is on public display in the office of the Hearing Clerk, Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

The Commissioner is amending § 610.53 to explicitly provide for such exemptions or modifications, with the approval of the Director of the Bureau of Biologics in the form of an approved license amendment. A similar provision for modification of shipping temperatures is currently provided in § 600.15 (21 CFR 600.15).

Therefore, under the Public Health Service Act (sec. 351, 58 Stat. 702 as amended (42 U.S.C. 262)) and under authority delegated to the Commissioner (21 CFR 5.1), Part 610 is amended in § 610.53 by designating the existing text as paragraph (a) *General* and adding new paragraph (b) to read as follows:

§ 610.53 Dating periods for specific products.

(a) *General.* • • • • •

(b) *Exemptions.* Exemptions or modifications shall be made only upon written approval, in the form of an amendment of the product license, issued by the Director, Bureau of Biologics.

Under the Administrative Procedure Act (5 U.S.C. 553 (b) and (d)), the Commissioner finds that notice, public procedure, and delayed effective date are unnecessary for this amendment of § 610.53 because it does not impose an additional duty or burden on any person, but rather relieves an unnecessary restriction and permits published regulations to remain consistent with approved license provisions.

Effective date: This amendment shall be effective on January 31, 1978. (Sec. 351, 58 Stat. 702 as amended (42 U.S.C. 262).)

WILLIAM F. RANDOLPH,  
Acting Associate Commissioner  
for Compliance.

JANUARY 25, 1978.

Title 24—Department of Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-77-109]

PART 1931—PURCHASE OF INSURANCE AND ADJUSTMENT OF CLAIMS

PART 1932—PROTECTIVE DEVICE REQUIREMENTS

Reduction of Certain Requirements

AGENCY: Department of Housing and Urban Development.

ACTION: Final rule.

SUMMARY: This rule amends current regulations pertaining to protective device requirements under Federal Crime Insurance Program. The amendments provide more flexible standards for compliance at less cost to applicants, authorize pro rata return of premiums under certain conditions, and modify inspection requirements in order to serve better the needs of small businesses.

EFFECTIVE DATE: March 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. James M. Rose, Jr., Assistant Administrator for Urban Property Insurance—Riot and Crime, 451 7th Street, SW., Washington, D.C. 20410, 202-755-6555.

SUPPLEMENTARY INFORMATION: On May 5, 1977, the Department published a proposed rule (42 FR 22900) to amend the protective device requirements set forth in 24 CFR Part 1932. The amendments grew out of the GAO report, "The Federal Crime Insurance Program: How it Can be Made More Effective" and the Department's reevaluation of the program.

Since publication of the proposed rule, the Department has received comments noting that the provisions of § 1931.7 frustrate the objectives of the proposed amendments to Part 1932. Section 1931.7(c) imposes a penalty on an insured who wishes to change insurance coverage on a date other than an anniversary date. Section 1931.7(c) is amended, therefore, to permit changes in the coverage or limits of a policy at any time and to provide for a pro rata return of a premium whenever a policy is cancelled to change its coverage or limits. Additionally, § 1931.2 is amended so that it conforms with the new provisions of Part 1932. The Agency for the reasons stated finds that notice and public procedure thereon are impractical, unnecessary, or contrary to the public interest and has decided to publish the amendments to §§ 1931.7 and 1931.2 as a final regulation.

Several errors of a nonsubstantive nature were discovered after publication of the proposed rule and are corrected now. The amendment of § 1932.4 was set forth in the regulation but was not discussed in the Preamble. Paragraph (h) of § 1932.5 was labeled incorrectly and should read § 1932.5(g).

All comments were considered carefully in the development of the final rule. A discussion of the comments and the action taken by the Department is presented.

DISCUSSION OF COMMENTS

It was suggested that changes in protective device requirements be made applicable to applicants with annual gross receipts up to \$500,000 rather than those to \$300,000. The purpose of the amendment is to increase the affordability of commercial crime insurance for those whose relatively low gross receipts have made compliance with existing requirements difficult and inordinately costly. Approximately three-fourths of the current commercial insureds will benefit from these regulations and the Department believes that at the present time the \$300,000 limit adequately addresses the issue of affordability. Therefore, the suggestion was not adopted.

It was noted that, because applicants for commercial burglary insurance

now receive policies upon the basis of a mandatory preinspection to determine compliance with protective device requirements, there is no longer a need for applicants to certify that their premises meet the protective device standards. Therefore, § 1931.2, paragraph (a)(2) has been deleted and the remaining paragraphs renumbered. This change reflects previous program changes and makes the regulations consistent both as to commercial and residential crime insurance policies.

It was noted that some existing commercial insureds whose business has prospered under the protection of the Federal Crime Insurance Program are from time to time compelled to move to new premises in order to accommodate their supplies of merchandise or to improve their facilities. It is necessary for such insureds to be able to make such moves without having their insurance coverage interrupted at such critical times. It is not always possible for the new premises to be inspected prior to the move, and, in any event, there would not always be adequate time for an insured to correct deficiencies revealed in the inspection. Therefore, there has been added to the proposed regulation an additional paragraph (h) at the end of § 1932.5 which gives a newly moved insured 30 days from the date on which he is notified of a protection device deficiency to make the necessary changes to his security devices, thus enabling him to avoid an interruption in coverage.

Editorial changes have been made to improve clarity, readability, and organization.

A Finding of Inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD Regulations published at 38 FR 19182, 19186. A copy of this Finding of Inapplicability is available for public inspection during regular business hours at the following address:

Rules Docket Clerk, Department of Housing and Urban Development, Room 5218, 451 7th Street SW., Washington, D.C. 20410.

NOTE: It is also certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with OMB Circular A-107.

Accordingly, Subchapter C of Chapter X of Title 24 is amended as follows:

#### § 1931.2 [Amended]

1. Present § 1931.2 is amended to delete paragraph (a)(2) thereof and paragraphs (a) (3), (4), and (5) are renumbered to read paragraphs (a) (2), (3), and (4).

2. Present § 1931.7, paragraph (c), is amended to read as follows:

§ 1931.7 Cancellations, modifications, and renewals of coverage.

(c) Changes in coverage and limits of coverage may be made at any time

upon the submission of a new application with the applicable semiannual premium. Return of premium on the superseded canceled policy shall be on a pro rata basis when such cancellation is made for the purpose of changing address or coverage or limits of coverage. Short-rate cancellation procedures shall be applicable to any other cancellation during the term of any policy.

3. Present §§ 1932.3a, 1932.3b, and 1932.3c are deleted and § 1932.5 is added to read as follows:

#### §§ 1932.3a, 1932.3b and 1932.3c [Deleted]

#### § 1932.5 Inspection of Commercial Premises.

(a) All premises for which an application for commercial crime insurance against burglary losses is submitted shall be inspected by the servicing company to determine whether the premises comply with the applicable protective device requirements.

(b) Coverage under a commercial crime insurance policy indemnifying against burglary losses shall not commence unless it is determined that the premises sought to be insured comply with all applicable protective device requirements. *Provided*, That all commercial premises whose exterior doors and accessible openings are found upon inspection to be protected by central station supervised service alarm systems or silent alarm systems (as those systems are defined in paragraphs (b) and (h) of § 1932.1) shall not be required to comply with the provisions of paragraphs (c) and (e) of § 1932.31 pertaining to the protection of those exterior doors and accessible openings by such devices as bars, grillwork, and other physical barriers. The benefit of this provision, therefore, applies also to commercial premises which, because of their particularly high risk inventories of merchandise, continue to be required by paragraph (f) (1) and (2) of § 1932.31 to have exterior doors and accessible openings protected by specified types of alarm systems, namely, supervised service alarm systems for the highest risk inventories and silent alarm systems for less high risk inventories.

(c) All commercial premises with annual gross receipts under \$300,000 whose exterior doors and accessible openings are found upon inspection to be protected by local alarm systems (as defined in paragraph (g) of § 1932.1) which are designed to signal loudly at the premises, shall not be required to comply with the provisions of paragraphs (c) and (e) of § 1932.31 pertaining to the protection of those accessible openings by such devices as bars, grillwork, and other physical barriers. The benefit of this provision ap-

plies also to commercial premises whose high risk inventories are referred to in paragraph (f) (1) and (2) of § 1932.31 and such premises shall not be required to be protected by supervised service alarm systems and silent alarm systems if the premises is equipped with a local alarm system designed to signal loudly at the premises.

(d) If upon any renewal of any policy the insured's statement of annual gross receipts shows that the annual gross receipts total \$300,000 or more the insured will be notified that his premises must be brought into complete compliance with all applicable protective device requirements no later than the expiration of that renewal term. Prior to the issuance of any subsequent renewal policy, the Administrator shall cause an inspection to be made, at a time agreed upon with the insured, and no such subsequent renewal policy shall be issued unless the insured is found to be in compliance.

(e) The Administrator may in his discretion waive one or more protective device requirements with respect to any policy where he determines that compliance would be impractical and would impose a cost not reasonably commensurate with the protection derived. However, in the event of any loss contributed to in whole or in part by any such waiver, the Administrator may withdraw such waiver upon mailing to the insured thirty days written notice of withdrawal. Any loss occurring after thirty days from the day of the mailing of said notice shall not be paid unless the insured's premises shall be in compliance with the previously waived protective device requirement at the time of such loss. The Administrator may also in his discretion determine that the frequency and/or severity of occurrences of loss experienced under any policy issued under the provisions of paragraphs (b) and (c) of this section, requires that as a condition of renewal of such policy, the premises insured thereunder be protected by one or more of the protective devices described in paragraphs (a), (b), (c), (d), (e), and (f)(1), (f)(2), and (f)(3) of § 1932.31.

(f) If, during the course of adjusting a claim submitted by an insured, an adjuster or other investigator discovers a protective device deficiency, not previously discovered and noted by an investigator, with respect to a device, described in any of paragraphs (a), (b), (c), (d), (e), and (f) of § 1932.31, which the insured was required to have installed as a condition of eligibility for insurance coverage, the deficiency shall be made known to the insured who will be given thirty days after his receipt of such written notice within which to remedy the deficiency. During that thirty-day period, burglary losses covered by the terms of

the policy will be paid irrespective of the deficiency. Burglary losses occurring more than thirty days after the date on which an insured is notified of the deficiency will be paid only if it is determined that the deficiency was corrected prior to the loss. However, no loss shall be payable at any time if caused in whole or in part by a protective device deficiency with respect to any device which the insured was required to have installed as a condition of eligibility, and which device was found to be present at the time of a previous investigation, if the deficiency resulted from the inoperability, alteration, removal or disconnection of said required protective device by or with the knowledge of the insured, subsequent to the previous inspection of the premises.

(g) An insured who has knowledge of an inoperability or other malfunction of a protective device which the insured was required to have installed as a condition of eligibility for insurance coverage shall immediately notify the Administrator of such deficiency in writing, or by use of the servicing company's toll-free telephone number 800-638-8780. If the insured complies with such emergency protective measures as the Administrator may specify following receipt of such notice, and if the deficiency is corrected within the time specified by the Administrator, no loss of coverage will result during the period of inoperability or malfunction.

(h) If, an insured cancels a commercial policy because of a move to a new premises and applies for insurance at the new premises, there shall be a mandatory inspection to determine compliance with protective device requirements at the new location. However, protective device requirements shall not be applicable to the new premises until 30 days after the insured's receipt of written notice of either compliance or of a deficiency, thus giving the insured time in which to remedy the deficiency. Burglary losses occurring more than 30 days after the date on which the insured received notice of a deficiency will be paid only if it is determined that the deficiency was corrected prior to the loss.

4. Section 1932.4 is revised to read as follows:

#### § 1932.4 Inspection of Residential Premises Following Losses.

(a) Each residential applicant applying for Federal Crime Insurance shall be responsible for meeting the protective device requirements applicable to his premises. Any person who is doubtful as to whether the protective devices existing on his premises at the time of application meet such requirements should examine the descriptive materials and illustrations available

from the servicing company and direct any specific questions to the servicing company.

(b) In addition insurance agents and brokers are expected to assist and advise prospective insureds concerning the protective device requirements for residential premises. However, no agent or broker shall be authorized to approve or disapprove on behalf of the insurer the adequacy of any required protective devices, and any representation to the contrary is false and shall be void.

(c) Upon receiving any notice of loss from an insured, the Administrator shall cause an inspection of the insured residential premises to be made in the course of the adjustment of the claim in order to determine whether the premises meets the protective device requirements of the program. If no inspection of the premises has previously been made and if the first such inspection reveals that the insured premises does not comply with the applicable protective device requirements, any first loss covered by the terms of the insurance policy, involving robbery or a burglary evidenced by visible marks of forcible entry, will be paid irrespective of any deficiencies in the insured's compliance with the protective device requirements. However, the insured will be given thirty days from the date on which he is notified in writing of any deficiencies to correct such deficiencies. During that thirty day period, robbery or burglary losses covered by the terms of the insurance policy will continue to be paid irrespective of any deficiencies in the insured's compliance with the protective device requirements. Losses occurring more than thirty days after the date on which the insured has been notified in writing of the results of the inspection will be paid only if it is determined that a loss, covered by the terms of the insurance policy, did not result in whole or in part from a protective device deficiency of which the insured was previously placed on written notice.

(Sec. 7(d), 79 Stat. 670; (42 U.S.C. 3535(d)); sec. 1103, 82 Stat. 566, (12 U.S.C. 1749bbb-17))

Issued at Washington, D.C., January 5, 1978.

JAY JANIS,  
Acting Secretary, Housing and  
Urban Development.

(FR Doc. 78-2581 Filed 1-30-78; 8:45 am)

Title 32—National Defense

#### CHAPTER I—OFFICE OF THE SECRETARY OF DEFENSE

SUBCHAPTER M—MISCELLANEOUS  
(DOD Directive 4120.18)

#### PART 209—USE OF THE METRIC SYSTEM OF MEASUREMENT

AGENCY: Office of the Secretary of Defense.

ACTION: Final rule.

SUMMARY: This rule establishes Department of Defense policies for the use of the metric system of measurement.

EFFECTIVE DATE: December 10, 1976.

FOR FURTHER INFORMATION CONTACT:

Mr. Donald Mitchell, Defense Materiel Specifications and Standards Office, Under Secretary of Defense (Research and Engineering), Cameron Station, Alexandria, Va. 22314, telephone 202-274-6337.

MAURICE W. ROCHE,  
Director, Correspondence and  
Directives, Washington Headquarters Services, Department  
of Defense.

JANUARY 23, 1978.

Accordingly, Part 209 reads as follows:

Sec.  
§ 209.1 Purpose.  
§ 209.2 Applicability.  
§ 209.3 Background and objectives.  
§ 209.4 Policies.  
§ 209.5 Responsibilities.

AUTHORITY.—This rule is issued under 15 U.S.C. 205a-k (Pub. L. 94-168).

#### § 209.1 Purpose.

This Part establishes policies for the use of the metric system of measurement within the Department of Defense.

#### § 209.2 Applicability.

The provisions of this Part apply to the Office of the Secretary of Defense, the Joint Chiefs of Staff, the Military Departments, and Defense Agencies (hereinafter referred to collectively as "DoD Components").

#### § 209.3 Background and objectives.

(a) 15 U.S.C. 205a-k (Pub. L. 94-168), establishes a national policy of coordinating the increasing use of the metric system in the United States. Many Defense-related industries have converted or are planning conversion from U.S. customary inch-pound measurement system to metric measurements. The Department of Defense must be able to accept such conversion with minimum cost and disruption of operations.

(b) Use of the metric system will help foster standardization with our allies and thus promote interchangeability and interoperability, facilitate joint military production programs, and simplify supply operations.

(c) Consideration of metric usage is especially appropriate in the design of new Department of Defense Materiel where metric products are expected to be in common use at the time of production release.

(d) Generally, it is recognized that industry will take the lead in the changeover and the DOD Components will keep pace by adopting commercially available metric items wherever economically and technically practicable.

#### § 209.4 Policies.

(a) The Department of Defense will consider the use of the metric system in all of its activities consistent with operational, economical, technical, and safety requirements.

(b) The metric system will be considered for use in all new designs. When it is deemed not to be in the best interest of the DOD to provide metric design, justification shall be provided. Further, it will be considered in the procurement of all supplies and services. In general, the metric system will be adopted for the following:

(1) Where there is a specific military need such as for materiel to be used jointly with NATO and other allied nations.

(2) Military materiel which has potential for significant foreign sales or joint production programs.

(3) Areas where industry has made significant progress in metric conversion and production facilities are available.

(4) Areas where defense industry preparedness or defense production readiness may be enhanced.

(5) Other areas which offer an economic, operational, or other advantage or when no disadvantage is incurred.

(c) Physical and operational interfaces between metric items and U.S. customary items will be designed to assure that interchangeability and interoperability will not be adversely affected.

(d) Existing designs dimensioned in U.S. customary units will be converted to metric units only if determined to be necessary or advantageous. Unnecessary retrofit of existing systems with new metric components will be avoided where both the new metric and existing units are interchangeable and interoperable. Normally, the system of measurement in which an item is originally designed will be retained for the life of the item.

(e) During the metric transition phase hybrid metric and U.S. customary designs will be necessary and acceptable. Materiel components, parts,

subassemblies, and semifabricated materials which are of commercial design will be specified in metric units only when economically available and technically adequate or when it is otherwise specifically determined to be in the best interest of the Department of Defense. Bulk materials will be specified and accepted in metric units when it is expedient or economic to do so.

(f) Defense Systems Acquisition Review Council (DSARC) reviews and associated Decision Coordinating Papers will address the use of metric units of measurement or reasons for their nonuse (DOD Instruction 5000.2<sup>1</sup>).

(g) Technical reports, studies, and position papers (except those pertaining to items dimensioned in U.S. customary units) will include metric units of measurement in addition to or in lieu of U.S. customary units. With respect to existing contracts, this requirement applies only if such documentation can be obtained without an increase in contract costs.

(h) Programing and budgeting actions will include resources required to support the DOD effort in converting to the use of metric units. Use of the metric system will be identified and planned so that costs can be included in the budget cycle on an orderly basis.

(i) The International System of Units (SI) will be the metric system used by the DOD.

(j) Representatives of the Department of Defense will participate in the development of national and international standards using the metric system, to the extent indicated by DOD interest. NATO and other international metric standards will be used to the maximum practical extent. However, if a U.S. Standard is established with greater definition and restriction than a prevailing international standard, the U.S. Standard will apply.

(k) Emphasis will be placed on keeping pace with the conversion or development of specifications, standards, and other general purpose technical data. When the item in question is a military item without a commercial counterpart, the Preparing Activity will assume a leadership role in development of the applicable metric document as the need arises.

(l) When purchasing new equipment, DOD Components are encouraged to specify features which will allow direct measurement in terms of SI units or both SI and U.S. customary units. Use of conversion kits is also encouraged.

(m) Training in metric practices and usage will be provided to those person-

<sup>1</sup> Filed as part of original. Copies may be obtained if needed from the U.S. Naval Publications and Forms Center, 5801 Tabor Ave., Philadelphia, Pa. 19120 Attention: Code 301.

nel whose duties require such knowledge.

(n) Use of dual dimensions (i.e., both metric and U.S. customary dimensions) on drawings will be avoided unless it is determined in specific instances that such usage will be beneficial. However, the use of tables on the document to translate dimensions from one system of measurement to the other is acceptable.

#### § 209.5 Responsibilities.

(a) The Under Secretary of Defense for Research and Engineering and the Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics), will provide policy and any necessary procedural guidance related to this Part.

(b) The Military Departments and Defense Agencies will appoint a person or establish an office to coordinate metric activities and provide advice on metric conversion within the DOD Component concerned.

#### [7910-01]

#### Title 32—National Defense CHAPTER XIV—RENEGOTIATION BOARD SUBCHAPTER B—RENEGOTIATION BOARD REGULATIONS UNDER THE 1951 ACT

#### PART 1453—MANDATORY EXEMPTIONS FROM RENEGOTIATION

#### Renegotiability of Foreign Military Sales Contracts and Subcontracts

#### AGENCY: The Renegotiation Board.

#### ACTION: Final rule.

**SUMMARY:** The Renegotiation Board is amending its regulations concerning contracts that do not have a direct or immediate connection with the national defense to make it clear that contracts awarded pursuant to the Foreign Military Sales Act of 1968 (now the Arms Export Control Act) are not exempt from renegotiation. This amendment is necessitated by reason of a change in the interpretation of this section of the Board's regulations. The amendment also deletes a "Note" to the same section of the Board's regulations concerning the responsibility of the procuring Departments to inform contractors of the exempt status of contracts. The "Note" is being deleted because it is, with the publication of this regulation, obsolete.

**EFFECTIVE DATE:** Immediately.

#### FOR FURTHER INFORMATION CONTACT:

Kelvin H. Dickinson, Assistant General Counsel-Secretary, Renegotiation Board, 2000 M Street NW., Washington, D.C. 20446, 202-254-8277.

**SUPPLEMENTARY INFORMATION:** Section 102(a) of the Renegotiation

Act of 1951, as amended (50 U.S.C. App. 1212(a)) (the Act), provides that all contracts with Departments named in, or designated by the President under, section 103(a) of the Act (50 U.S.C. App. 1213(a)), and related subcontracts, are subject to renegotiation. Thus, all contracts with a named Department, including those awarded pursuant to the Arms Export Control Act, or, prior to change of name, the Foreign Military Sales Act of 1968 (22 U.S.C. §§ 2751-2794), and related subcontracts are renegotiable unless specifically exempted in the Act or by the Renegotiation Board pursuant to provisions of the Act.

Section 106(a)(6) of the Act (50 U.S.C. App. 1216(a)(6)), which, in the Board's opinion, affords the only possible basis for exemption of foreign military sales contracts, exempts from renegotiation any contract which the Board determines does not have a direct and immediate connection with the national defense. This provision also states that "The Board shall prescribe regulations designating those classes and types of contracts which shall be exempt . . ." Pursuant to this statutory directive, the Board has determined in § 1453.5(b)(3)(i) of its regulations that contracts with named Departments are exempt from renegotiation to the extent that (1) they obligate funds of an agency other than a named Department, or (2) the contracting Department is to be reimbursed by such agency or other person. In § 1453.5(b)(3)(ii) the Board has excluded from this exemption contracts which obligate funds appropriated under or to carry out the purposes of foreign aid programs for military assistance.

The exemption, as originally promulgated on March 25, 1952, did not contain any limitation or exclusion. However, after it was published, it was pointed out to the Board that the class exemption would apply to military assistance contracts authorized under the Mutual Security Act since the Department of Defense, in procuring military items for the Mutual Security Agency, would obligate funds appropriated to the President and allocated to the Department of Defense. As a result, the regulation was amended on April 25, 1952 to specifically exclude from the exemption those types of contracts, by adding the following limitation:

(ii) Contracts which obligate funds appropriated under the Mutual Security Act of 1951 (65 Stat. 373) or under earlier foreign aid programs, insofar as such funds are obligated for military assistance, are not exempt under this subparagraph (3).

In 1960 this limitation was amended "to bring up to date the reference to foreign aid programs [then] contained in paragraph (b)(3)(ii)."

In a memorandum to the Board dated May 26, 1960 recommending the

language contained in the present subdivision (ii), the General Counsel noted that:

Funds appropriated to carry out the provisions of Mutual Security legislation, insofar as they are allocated to military rather than economic assistance, are expressly characterized in the appropriation statutes as relating to our own national defense as well as that of the beneficiary countries. Accordingly, contracts entered into pursuant to any such program may not be said to have no direct and immediate connection with the national defense. It follows that such contracts, when entered into by a named Department, should be excepted from the exemption referred to above.

Prior to early 1976, when the Board changed its policy, culminating in its adoption of Interpretation No. 80 on September 1, 1976, the Board had consistently excluded from this exemption contracts which obligated military assistance funds. Further, prior to the issuance of Interpretation No. 80, the Board had expressly held that contracts awarded under the Foreign Military Sales Act of 1968 (now the Arms Export Control Act), were excluded from the exemption by § 1453.5(b)(3)(ii) and therefore were subject to renegotiation. On June 20, 1977, the Board rescinded Interpretation No. 80 (42 F.R. 32339, June 24, 1977), and as soon as practicable thereafter, published for comments a proposed amendment to § 1453.5(b) (2) and (b)(3) of its regulations (42 FR 37424, July 21, 1977). Thus, contrary to the position taken by some commenters, the Board had not always held foreign military sales contracts to be exempt from renegotiation. Actually, such a formal position prevailed only during the period September 1, 1976 to June 21, 1977 when Interpretation No. 80 was in effect, and with the adoption and publishing of the amended regulation, the Board is merely reverting to the position consistently held in the past.

The basis for the amended regulation is clear. The Act provides that all contracts with Departments named in the Act and related subcontracts are subject to renegotiation unless otherwise exempt, and the Board believes there is not basis under the Act for exempting foreign military sales contracts or subcontracts, either individually or as a class of contracts. With reference to the policy objectives of the Arms Export Control Act (formerly the Foreign Military Sales Act of 1968) it is stated in pertinent part, as follows:

"The Congress recognizes, however, that the United States and other . . . countries continue to have valid requirements for effective and mutually beneficial defense relationships in order to maintain . . . international peace and security . . . The need for international defense cooperation among the United States and those friendly countries [allies] is especially important . . ."

Accordingly, it remains the policy of the United States to facilitate the common defense by entering into international arrangements with friendly countries . . . to achieve specific national defense requirements and objectives of mutual concern. (Emphasis supplied.) (22 U.S.C. 2751.)

Further, no foreign military sales agreements can be made unless: "(1) the President finds that the furnishing of defense articles and defense services to such country . . . will strengthen the security of the United States and promote world peace . . ." (22 U.S.C. 2753.)

The Board further notes that the standard form of contract (with the usual contractual liabilities running to the parties) is employed in procuring items for resale to foreign countries. Such contracts when made by the Department of Defense are entered into by Procurement Contracting Officers acting under authority delegated to them by the Secretary of Defense, with the aid of the full range of departmental services available to the PCO. The executed contracts are administered by the Administrative Contracting Officer organizations, including use of the full range of departmental services available to ACO's. Finally, such contracts are subject to price analysis by the Defense Contract Audit Agency prior to their execution and to the full range of audit and recommendations by DCAA after the contracts have been entered into. Thus, the negotiation, administration, and audit of these contracts is in all essential respects indistinguishable from the negotiation, administration and audit of contracts made by the Department of Defense for supplies and services for its own use. Since foreign military sales procurement is an essential part of defense contracting, it is thus among the procurement activities that the Congress intended the Board to review. Accordingly, the Board does not agree with some comments that the method of contracting is irrelevant to the issue.

Under the circumstances, there is no basis for a Board determination that foreign military sales contracts "[do] not have a direct and immediate connection with the national defense" a prerequisite for the exemption under section 106(a)(6) of the Act (50 U.S.C. App. 1216(a)(6)). Consequently, there are no significant differences between the final rule being published herein and the proposed rule published for comment in the July 21, 1977 FEDERAL REGISTER (42 FR 37424).

#### DISCUSSION OF MAJOR COMMENTS

The Board appreciates the interest shown by the large number of contractors, firms, associations, Government agencies, and individuals who commented on the proposed amendment, and all comments, including many that were received after the August 29, 1977 closing date, were carefully

considered by the Board in adopting and publishing this final rule.

Approximately two-thirds of the comments were brief telegraphic communications, substantially identical in form, opposing the amendment on the ground that the General Accounting Office had ruled that "it had no jurisdiction over bid protests on foreign military sales because appropriated funds are not involved." The Comptroller General's Decisions, apparently referred to by these commenters and cited and discussed in more detail by several others (e.g., *Consolidated Diesel Electric Co.*, B-177450, January 6, 1977, 77-1 CPD 7, *Verne Corp.*, Comp. Gen. Dec. B-188332, June 2, 1977, and others) involved instances where the Comptroller General either denied or declined jurisdiction essentially because the foreign purchaser either borrowed funds from the United States, agreed to reimburse the United States, or there was only "incidental or temporary" use of appropriated funds. While the Comptroller General may consider that, under 42 Stat. 24, 31 U.S.C. 71, he has no jurisdiction to handle bid protests on foreign military sales contract awards, the Board's statutory authority to renegotiate foreign military sales contracts with a named Department is clearly provided in the Act and is distinguishable from the Comptroller General's opinion of his bid protest jurisdiction.

Somewhat along the same line, several commenters argued that the preamble to the Act, Section 101 *Declaration of Policy* (50 U.S.C. App. 1211) prescribed the extent of the Board's authority, namely the renegotiation of national defense contracts financed by United States appropriated funds. Since the United States tax payer is not out-of-pocket on foreign military sales contracts, some commenters argued, the Board has no jurisdiction. In this connection, they cited the "pay-in-advance" requirements where no appropriated funds are involved, or reimbursement by the foreign purchaser in 120 days, or up to 12 years in credit sales, together with the "dependable undertaking" on the part of the foreign purchaser to make the United States Government "whole"—the recovery of its "full costs," plus a percentage administration fee. The Tax Court decision in *W. Tip Davis Co. v. Patterson* (12 T.C. 335, 339-40 (1949)) was cited for the principle that only contracts utilizing appropriated funds are subject to renegotiation. *W. Tip Davis* was a renegotiation proceeding under the 1942 Act wherein the court held that direct sales to Army Post Exchanges which "buy with their own funds" and "belong to the shareholding units" were not subject to renegotiation. Although the court said that "[t]his matter of the source and

ownership of funds used to purchase the goods is vital in renegotiation," it also stated that "the statutes providing for renegotiation were not intended to prevent excessive profits from contracts on which the Government was not obligated." Certain commenters also pointed out that the 1942 Act renegotiating authority had excluded from renegotiation post exchange-type contracts, involving non-appropriated funds, both contracts direct with the exchanges and those on their behalf by the Quartermaster General (J.R.M. 332.5 and 8); and that the Board in §1453.5(b)(17), had exempted such contracts "with organizations using nonappropriated funds." However, the Board notes that §332.6 of the 1943 Act Regulations, contrary to regulations under the 1942 Act, excluded from renegotiation direct sales to post exchanges and similar organizations, but held that contracts with the Quartermaster Corps or a similar unit of a named Department, were subject to renegotiation even though articles purchased were assigned or resold to a post exchange (R.R. §332.6). Under the 1951 Act, the Board has consistently held that sales to military exchanges and similar organizations are subject to renegotiation, but they have been exempted under §1453.5(b)(17). The point that distinguishes *W. Tip Davis* and the other examples from the foreign military sales situation, is that the latter contracts are with named Departments, fully obligate the United States, and are subject to renegotiation, unless otherwise exempt under the Act. The Board believes that the latter statement properly describes the Board's jurisdiction and that the statements in the preamble of the Act about the Congress having made available "extensive funds, by appropriation, or otherwise" are entirely consistent with this interpretation.

Even if the source of funds were relevant to the scope of the Board's jurisdiction, the Board notes that the Arms Export Control Act authorizes the use of any appropriated funds, albeit subject to reimbursement, including funds necessary to cover credit sales up to 12 years, or 20 years in the case of one country. There is always the possibility of default, dilatory payments (for which the procuring Department is authorized to charge interest), as well as, payments within 120 days after delivery for cash sales and other widespread actual or contingent involvement of appropriated monies.

Some of the commenters contended that foreign military sales contracts are not "contracts" with "Departments" named in section 103(a) of the Act (50 U.S.C. App. 1213(a)), because the United States is acting as an intermediary or an agent on behalf of the foreign government, as a disclosed

principal, in procuring items under the Arms Export Control Act (formerly the Foreign Military Sales Act of 1968). One commenter went so far as to say that if it were strictly a commercial transaction, the Board's interference in the principal-agency relationship would be considered fraud. In response, the offer and acceptance (DD Form 1513) between the United States and the foreign country does not contain the elements necessary to establish an agency relationship, but rather is a two-country contract where the United States agrees to sell certain items from stock or to contract independently with a defense contractor for the items desired and then to resell them to the foreign purchaser. The United States obtains title and assumes liability on the contract, subject only to an independent reimbursement of total costs.

Further, on the question of Congressional intent which was a subject treated by some commenters, an examination of the legislative history of the 1951 Act reveals that the intended scope of renegotiation was broad enough to encompass the foreign military sales program established by the later enacted Foreign Military Sales Act of 1968 and the Arms Export Control Act (1976 amendment).

The *Declaration of Policy* of the Act (section 101, 50 U.S.C. App. 1211), speaks of Congress having "made available for the execution of the national defense program extensive funds, by appropriation and otherwise . . ." and speaks also of the "elimination of excessive profits from contracts made with the United States, and from related subcontracts, in the course of [the national defense] program." Section 101 was introduced by Representative Daughton, Chairman of the House Ways and Means Committee as part of H.R. 1724. The term "contracts made with the United States" is further defined in section 102(a) of the Act as "all contracts with the Departments specifically named in section 103(a). . . ." During the course of consideration of the 1951 Act, this last quoted language became a source of contention. Senator McClellan offered an amendment which would have changed the language of section 102(a) to read:

(a) *In General.*—The provisions of this title shall be applicable to all contracts (1) having a direct and immediate connection with the national defense, with the Departments specifically named in section 103(a) . . . and (2) to all contracts, having a direct and immediate connection with the national defense, with the Departments designated by the President under section 103(a). Cong. Rec. 1381 (daily ed. Feb. 19, 1951).

This language became part of the Senate version of the bill. However, it was eliminated in conference. At the same time, the conferees formulated

the language which forms the basis for the present section 106(a)(6) exemption. The specific rationale for resting the ultimate determination in the Board was the difficulty of framing the statutory standard. Cong. Rec. 2323 (daily ed. March 12, 1951); H.R. Rep. No. 353, 82d Cong., 1st Sess. 6 and 11 (1951). The statement of the House Managers is particularly illuminating in the narrowness of the exemption as envisioned by Congress. H.R. Rep. No. 213, 82d Cong., 1st Sess. 6 and 11 (1951). "In administering this exemption, the Board's determinations are not to be circumscribed by a narrow definition of the words 'direct' and 'immediate.' The Board is not to determine that a contract does not have direct and immediate connection with the national defense if the purpose of the contract is essential to the national defense, or is clearly connected with the national defense, irrespective of the fact that there may appear to be intervening mediums between the purposes of the contract and the ultimate national defense."

The Board believes this legislative history is wholly consistent with its conclusion that foreign military sales contracts cannot be said to have no direct and immediate connection with the national defense.

The 1951 Act, unlike the predecessor renegotiation statutes, was not an amendment to an appropriations measure, but an act creating an independent agency with an apparently broader authority to remove "excessive profits from contracts made with the United States, and from related subcontracts, in the course of [the national defense] program. . . ." (Section 101 of the Act, 50 U.S.C. App. 1211.) The nature of the foreign military sales program and its involvement with, and impact on, the whole Department of Defense procurement system, and the actual use of appropriated funds (temporarily at least), is manifest in the Comptroller General's August 19, 1977 audit report (Digest of opinion, B-165731), wherein it was found that the Department of Defense may be undercharging foreign purchasers upwards of \$71 million a year, or more, in accessorial and transportation costs. The Comptroller General reported to Congress that foreign military sales have increased from \$952 million in 1970 to \$8.7 billion in 1976, and that about 50 percent of the Army's procurement activities were for the support of foreign sales.

Apparently, the boom in U.S. foreign military sales began in 1973, at which time, "sales" were reported at about \$10 billion a year or more for 1974 and 1975, but these referred to contracts to purchase, not deliveries. The United States, as of November 1975, reported cumulative foreign military sales orders totaling \$44 billion, with cumu-

lative deliveries in the amount of \$19.6 billion (including \$9.5 billion orders and \$3.4 billion deliveries in 1975). (Foreign Military Sales and Military Assistance Facts, DOD, Nov. 1975, p. 8.) Thus, more than likely, actual deliveries under these orders will be occurring in the early and mid 1980's. The Board does not believe, as has been suggested by one commenter, that the Board's fiscal year review of foreign military sales, costs and profits of a particular defense contractor, along with the contractor's other renegotiable business, will interfere with the administration of foreign military sales contracts. It was also pointed out by this commenter that if FMS contracts are subjected to renegotiation, it will delay the DOD's computation of the final total costs (to the Government) of a particular contract and determination of the amount of refund to the foreign customer, until renegotiation proceedings (at the Board and in the courts) is completed, whereas the refund can now be determined when final delivery is made. Although the Board does not believe any substantial additional expense will be incurred by the Government in renegotiating the foreign military sales contract portion of a contractor's business, it is doubtful the Government would seriously consider charging the foreign purchaser with renegotiation costs any more than it would charge for the Department of Labor's administration of the various labor statutes made applicable to the contracts. If completion of renegotiation becomes a problem, suitable arrangements could be worked out as in the case of price redetermination contracts, unsettled at the Departmental level, at the time renegotiation is being completed.

The same commenter, as well as certain other commenters, objected to the proposed amendment because, if the Board determined excessive profits in a case involving receipts under a foreign military sales contract, any amount of excessive profits recovered from the contractor, after income tax credits, is required, under section 105(b)(7) of the Act, to be covered into the U.S. Treasury as miscellaneous receipts. It was contended that such refund, if any, should go to the foreign purchaser, and that there is no existent legal authority to refund such excessive profits to the foreign purchaser. Another commenter also contended that, if the excessive profits were to be refunded to the foreign government, the gross amount should be refunded, rather than the net after Federal income tax credits under §1481 of the Internal Revenue Code of 1954, as in the case of a refund by the contractor to the United States. Yet, the contractor would be entitled to the tax credit which would be a detrimental loss of tax revenues. The Board recognizes

this problem, but considers that it has a statutory responsibility to renegotiate FMS contracts. Further, since the Government agrees in DOD Form 1513 to make such contracts subject to all the ASPR's, it should afford the foreign government the protection of renegotiation so that U.S. defense contractors would not be realizing excessive profits in such transactions.

Moreover, most of those who commented on this point seemed to assume that a foreign military sales contract could be isolated from a contractor's defense contracting business in a particular year. This is presumably why these persons commented on the pro's and con's of refunding to the ultimate purchaser the excessive profits which they deemed would arise from a particular FMS contract. To the contrary, the Board's experience indicates that FMS contracts are typically performed by companies which are simultaneously performing a great number of other renegotiable contracts and subcontracts for products or services. It might well be said that the excessive profits arose out of the entire complex of renegotiable business, and not out of any particular contract.

Additionally, the Board notes that the excessive profits realized by a contractor in any particular year are not refunded to the United States departments or agencies which made the contracts being performed in that year. Instead, the excessive profits are paid into the miscellaneous receipts of the Treasury, where they are of course not available to be restored to the appropriations which gave rise to them.

If it had been the intent of the Congress in passing and amending the Act, to restore amounts paid as excessive profits to the purchasers under contracts where the excessive profits arose, the Act would have contained different provisions than it now does, respecting both fiscal year renegotiation and also the treatment of recoveries.

As stated above, this final regulation is being made effective immediately. Thus, in accordance with §§1451.1 and 1451.2 of the Board's regulations, it will apply to all fiscal years of contractors and subcontractors pending before the Renegotiation Board or a Regional Renegotiation Board; and to all fiscal years of contractors and subcontractors for which renegotiation filings are due but have not been submitted to the Renegotiation Board. However, as provided in §1451.2 of the Board's regulations, the adoption and promulgation of this amended regulation will not affect the validity of any formal action heretofore taken by the Renegotiation Board determining that a specific foreign military sales contract or subcontract is exempt from renegotiation in accordance with prior regulations.

Some commenters argued against making the regulation effective with respect to all filings not yet finally acted upon because: (1) It would discriminate against contractors who had been cleared and against those who would have to refile; (2) the Board had always held foreign military sales contracts to be exempt (a contention that is contrary to the fact); and (3) that the Board lacked the authority to promulgate a "retroactive" regulation. One commenter contended it would be discriminatory and a violation of §1451.2 of the Board's regulations to make the amended regulation retroactive, and "illegal" to make it prospective. Others contended that since the Act "expired" on September 30, 1976, the Board no longer had the authority to promulgate rules and regulations, or, considering the status of pending legislation affecting the Board, the Board should not make any substantive rule changes. It was suggested that the Board was seeking to enlarge its jurisdiction at a time when the future of renegotiation is in question.

Although the "termination date" of renegotiation coverage in section 102(c)(1) of the Act (50 U.S.C. App. 1212(c)(1)) expired on September 30, 1976 and has not yet been extended, and the Board's authority to renegotiate presently extends only to receipts or accruals under renegotiable contracts and subcontracts attributable to performance prior to October 1, 1976, the Board's authority and responsibility under all other sections of the Act, including its authority to make rules and regulations under section 109 of the Act (50 U.S.C. App. 1219), remain fully intact. Full authority also exists to provide retroactive effect to its regulations with respect to all open cases or unfilled renegotiation reports. (See §1451.2 of the board's regulations.) The Supreme Court upheld the retroactive effect of renegotiation of war contracts entered into before the enactment of a predecessor Renegotiation Act. (*Lichter v. United States*, 334 U.S. 742, 789 (1948).) As stated above, except for the period from early 1976 to June 21, 1977, when the Interpretation No. 80 policy change was in effect, the Board, from the inception of the Act, had held foreign military assistance contracts to be subject to renegotiation and had also held foreign military sales contracts to be renegotiable. Further, it cannot make the finding that formed the basis of Interpretation No. 80. Consequently, it has made this amended regulation apply to all open and unfilled cases where no previous formal Board action has been taken. This is a practice consistently followed since the inception of the Act. Although additional information will be required in most cases, the board does not believe that any refilings will be necessary. Con-

tractors will merely have to identify the sales, costs and profits relating to foreign military sales contracts appearing in the filing for each fiscal year so that the Board can incorporate such figures in the renegotiable business portion of the filings. Since detailed records are required under foreign military sales contracts, this should pose no undue burden or expense.

Finally, several contractors contended that the board was obligated, under Executive Order 11949 and OMB Circular A-107, to file an economic impact statement at the time of the Notice of Proposed Rulemaking. The Board believes that no such statement was necessary in this instance, and its certification to that effect was published with the proposed rule in full compliance with the Executive Order.

In view of the numerous and detailed comments submitted by individuals, firms and associations—representative of a major portion of industry affected by renegotiation, and the additional billions of dollars annually that will be subjected to renegotiation under this final regulation, the Board felt that this detailed response was appropriate.

In consideration of the foregoing, Chapter XIV of 32 CFR is amended as set forth below.

Dated: January 26, 1978.

GOODWIN CHASE,  
Chairman.

This part is amended in the following respects:

1. 32 CFR 1453.5(b)(3)(ii) is revised to read as follows:

§1453.5 Contracts that do not have a direct and immediate connection with the national defense.

(b) . . .

(3) . . .

(ii) Contracts which obligate funds appropriated under or to carry out the purposes of foreign aid programs, insofar as such funds are obligated for military assistance, and contracts awarded pursuant to the Foreign Military Sales Act of 1968, or by name change in 1976, the Arms Export Control Act (22 U.S.C. §§ 2751-2794), are not exempt under paragraph (b)(3) of this section.

2. The "Note" to 32 CFR 1453.5(b)(2) and (b)(3) is deleted.

(Sec. 109, 65 Stat. 22; 50 U.S.C. App. Sec. 1219.)

Title 37—Patents, Trademarks and Copyrights

CHAPTER I—PATENT AND TRADEMARK  
OFFICE, DEPARTMENT OF COMMERCE  
PART I—RULES OF PRACTICE IN PATENT  
CASES

Rule Promulgation Relating to Multiple  
Dependent Claims and Drawing Requirements

AGENCY: Patent and Trademark  
Office, Commerce.

ACTION: Final rule.

SUMMARY: This notice adopts rule changes which permit the use of multiple dependent claims and prescribe when, and in what circumstances, drawings or additional drawings need to be furnished. These rule changes are necessary because of amendments to sections 41, 112 and 113, Title 35 United States Code, which become effective on January 24, 1978. The rule changes are intended to carry into effect the changes made by the amendments to the noted sections.

DATES: Effective date, January 24, 1978. The amended rules apply to applications filed on and after the effective date, even though such applications may be entitled to the benefit of an earlier filing date.

FOR FURTHER INFORMATION CONTACT: Mr. Louis O. Maassel by telephone at 703-557-3070, or by mail marked to his attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

SUPPLEMENTARY INFORMATION: This notice changes several rules to conform with 35 U.S.C. sections 41, 112 and 113 as amended by Pub. L. 94-131, effective January 24, 1978, the date of entry into force of the Patent Cooperation Treaty. Notice was given on January 12, 1977 in the FEDERAL REGISTER (42 FR 2632-2644) and on February 8, 1977 in the Official Gazette (955 O.G. 350-363) of a proposal to amend Title 37 of the Code of Federal Regulations due to the entry into force of the Patent Cooperation Treaty and Pub. L. 94-131 (94th Congress; 89 Stat. 658). Interested persons were invited to comment on the proposal on or before May 26, 1977, on which date a public hearing was held. The time for submitting written comments was extended until August 31, 1977 by a notice published on June 23, 1977 in the FEDERAL REGISTER (42 FR 31812) and on July 12, 1977 in the Official Gazette (960 O.G. 8). Comments relevant to the rule changes being promulgated were submitted by only two persons. These comments have been substantially adopted. A transcript of the hearing, the letters and written statements received, and a summary and analysis of the comments are available for public inspection in Room 11E10 of Crystal Plaza Building 3, 2021 Jefferson Davis Highway, Arlington, Va. These changes provide for the filing of multiple dependent claims and for later submission of drawings in applications where such drawings are not necessary for the understanding of the subject matter sought to be patented. This rule change promulgation is directed to only those portions of the proposed rule changes relating to §§ 1.75, 1.81 and 1.83 which are required on January 24, 1978, due to the coming into force of Pub. L. 94-131. The other proposed rules relating to implementation of the Patent Cooperation Treaty will be promulgated later. Good cause is found for the publication of this notice less than 30 days before the effective date of these rules, since it would be in the public interest for the amended rules to take effect on the same date as the statute. Paragraph (c) of § 1.75 differs from the proposal in that two additional sentences have been added indicating how fees will be calculated for multiple dependent claims and claims depending therefrom. No comments were received concerning this rule as originally proposed. Paragraph (c) of § 1.81 has been rewritten to adopt a revision suggested by one of the two persons who submitted comments. Paragraph (d) is a quote from revised 35 U.S.C. 113 and is added to include the restrictions relating to additional drawings. The proposed amendments to paragraphs (a) and (b) of § 1.83 were opposed by both persons who commented and they have not been adopted, but a new paragraph (c) is added in view of those comments. Accordingly, 37 CFR Part 1 is amended as follows:

1. By amending § 1.75 by revising paragraph (c) and adding paragraphs (f) and (g) to read as follows:

§ 1.75 Claims(s).

(c) One or more claims may be presented in dependent form, referring back to and further limiting another claim or claims in the same application. Any dependent claim which refers to more than one other claim ("multiple dependent claim") shall refer to such other claims in the alternative only. A multiple dependent claim shall not serve as a basis for any other multiple dependent claim. For fee calculation purposes, a multiple dependent claim will be considered to be that number of claims to which direct reference is made therein. For fee calculation purposes, also, any claim depending from a multiple dependent claim will be considered to be that number of claims to which direct reference is made in that multiple dependent claim. Claims in dependent form shall be construed to include all the limitations of the claim incorpo-

lated by reference into the dependent claim. A multiple dependent claim shall be construed to incorporate by reference all the limitations of each of the particular claims in relation to which it is being considered.

(f) If there are several claims, they shall be numbered consecutively in Arabic numerals.

(g) All dependent claims should be grouped together with the claim or claims to which they refer to the extent possible.

2. By revising § 1.81 to read as follows:

§ 1.81 Drawings required.

(a) The applicant for a patent is required to furnish a drawing of his invention where necessary for the understanding of the subject matter sought to be patented; this drawing must be filed with the application.

(b) Drawings may include illustrations which facilitate an understanding of the invention (for example, flow sheets in cases of processes, and diagrammatic views).

(c) Whenever the nature of the subject matter sought to be patented admits of illustration by a drawing without its being necessary for the understanding of the subject matter and the applicant has not furnished such a drawing, the examiner will require its submission within a time period of not less than two months from the date of the sending of a notice thereof.

(d) Drawings submitted after the filing date of the application may not be used to overcome any insufficiency of the specification due to lack of an enabling disclosure or otherwise inadequate disclosure therein, or to supplement the original disclosure thereof for the purpose of interpretation of the scope of any claim.

3. By adding a new paragraph (c) to § 1.83 to read as follows:

§ 1.83 Content of drawing.

(c) Where the drawings do not comply with the requirements of paragraphs (a) and (b) of this section, the examiner shall require such additional illustration within a time period of not less than two months from the date of the sending of a notice thereof. Such corrections are subject to the requirements of section 1.81(d).

NOTE.—The Patent and Trademark Office has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Orders 11821 and 11949 and OMB Circular A-107.

Dated: January 12, 1978.

LUTRELLE F. PARKER,  
Acting Commissioner of  
Patents and Trademarks.

Approved:

JORDAN J. BARUCH,  
Assistant Secretary for  
Science and Technology.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION  
AGENCY

SUBCHAPTER C—AIR PROGRAMS

PART 52—APPROVAL AND PROMULGATION  
OF IMPLEMENTATION PLANS

Revision to the Virgin Islands Implementation  
Plan

AGENCY: Environmental Protection  
Agency.

ACTION: Final rule.

SUMMARY: This notice announces that the Environmental Protection Agency is approving a revision to the Virgin Islands Implementation Plan. This approval action has the effect of allowing relaxation of the sulfur-in-fuel-oil limitation applicable to the Virgin Islands Water and Power Authority's Christiansted Power Plant on the island of St. Croix. Prior to this action, this facility was limited under the Implementation Plan to the use of oil with a sulfur content of 0.5 percent, by weight. This relaxation will permit the use of oil with a sulfur content of 1.5 percent, by weight. Receipt of a revision request from the Virgin Islands was announced in the FEDERAL REGISTER on November 9, 1977, at 42 FR 58415, where a full description of the proposed revision is contained.

EFFECTIVE DATE: January 31, 1978.

FOR FURTHER INFORMATION CONTACT:

William S. Baker, Chief, Air Programs Branch, U.S. Environmental Protection Agency, Region II Office, 26 Federal Plaza, New York, N.Y. 10007, 212-264-2517.

SUPPLEMENTAL INFORMATION: On January 19, 1976, the Virgin Islands adopted a revision to 12 V.I.R. & R. 9:204-26, an air pollution control regulation dealing with "Sulfur Compounds Emission Control." This revised regulation was submitted to the Environmental Protection Agency (EPA) for approval as a part of the Virgin Islands Implementation Plan (SIP) on January 21, 1976. In a series of actions appearing in the FEDERAL REGISTER, EPA approved the revised regulation with the exception of a part concerning a revision to the sulfur content of oil allowable for use on the

island of St. Croix. On August 29, 1977, the Virgin Islands again submitted the revised regulation with a request that it be approved only to the extent as it applies to one source on St. Croix. Approval of this proposal therefore has the effect of relaxing the allowable sulfur-in-fuel-oil limitation for the Virgin Islands Water and Power Authority's Christiansted Power Plant from 0.5 percent to a maximum of 1.5 percent, by weight. The sulfur-in-fuel-oil limitation for other sources on St. Croix remains at 0.5 percent.

The revision request was submitted in accordance with all applicable EPA requirements under 40 CFR Part 51, including public hearings which were held on June 21, 24, and 25, 1974. The proposed revision to the SIP was announced in the *FEDERAL REGISTER* on November 9, 1977 (42 FR 58415), where a detailed description of the revision was provided. In this announcement EPA advised the public that comments would be accepted as to whether the proposed revision to the Virgin Islands Implementation Plan should be approved or disapproved. No comments were received.

EPA has reviewed the Virgin Islands control strategy demonstration and is in agreement with its conclusion that, if implemented, the proposed plan revision would not be expected to cause or exacerbate contraventions of any national ambient air quality standard on St. Croix. Thus, EPA approves this revision to the Virgin Islands Implementation Plan. In addition, this action is effective immediately because it imposes no hardship on the affected source, and no purpose is served by delaying the effective date.

Dated: January 26, 1978.

DOUGLAS M. COSTLE,  
Administrator, Environmental  
Protection Agency.

Part 52 of Chapter I, Title 40 Code of Federal Regulations is amended as follows:

**Subpart CCC—Virgin Islands**

1. In § 52.2770, paragraph (c) is amended by adding new subparagraph (9) as follows:

§ 52.2770 Identification of plan.
